The bill (S. 1666) to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service from the appropriation of foreign mails at fixed rates per pound or per mile, and for other purposes, was announced as next in order.

Mr. NYE. There should be an explanation of the bill.

Mr. KING. I should like to have an explanation of the bill. It seems to be a very important measure. I would like to know what is involved, and to what extent it departs from existing law.

Mr. PHIPPS. I ask that it may go over, without prejudice, and we can return to it later.

The PRESIDING OFFICER. The bill will go over without prejudice.

RURAL POST ROADS

The bill (S. 2327) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, was announced as next in order.

Mr. McKELLAR. Mr. President, I have no objection to this bill, but I want to offer an amendment, which I will ask the clerk to read.

Mr. DILL. I object to the bill being taken up at this time.

Mr. ROBINSON of Arkansas. Let the amendment be reported.

Mr. McKELLAR. I hope the Senator will not object to the amendment being reported.

Mr. DILL. I withhold my objection.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 2, after line 17, add the following:

SEC. 3. That for the purpose of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized and directed to be appropriated, out of any money in the Treasury not otherwise appropriated, the following sums, to be expended in the improvement of rural post roads over which rural carriers travel in serving the rural routes other than those now included in the Federal-aid road system: The sum of $50,000,000 for the fiscal year ending June 30, 1929; the sum of $75,000,000 for the fiscal year ending June 30, 1930; and the sum of $100,000,000 for the fiscal year ending June 30, 1931.

SEC. 4. For carrying out the provisions of this act the Secretary of Agriculture shall apportion to each of the States according to the mileage of rural routes, provided that the States appropriate a like amount. The money shall be apportioned to each rural route in the United States in proportion to its mileage, but none of this appropriation shall be spent in the construction or maintenance of roads built by Federal aid heretofore and known as the Federal road system. The expenditure

of this money shall be by the highway departments of the various States in cooperation with the Bureau of Public Roads, United States Department of Agriculture, and the Post Office Department of the United States.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. BAYARD. I object.

The PRESIDING OFFICER. The bill goes over, under objection.

DOUBLE PENSIONS IN SUBMARINE CASUALTIES

Mr. STECK. Mr. President, I was necessarily absent when the calendar was called the last time, and I ask unanimous consent to go back to calendar No. 315, Senate bill 2998, granting double pension in all cases where an officer or an enlisted man of the Navy or Marine Corps dies or is disabled as a result of a submarine accident. It is a bill to which I am sure there will be no objection, and one in which I am very much interested.

Mr. SMOOT. If the Senator will wait, we may get through with the calendar, and if we have time, there will be no objection to considering the bill he has in charge.

Mr. ROBINSON of Arkansas. The Senator from Iowa has stated that he thinks there will be no objection to the consideration of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. SMOOT. Just a moment. I would like to see what the bill is.

Mr. STECK. It is a bill to grant double pensions to dependents of those killed in submarine accidents.

Mr. SMOOT. Is there a favorable report?

Mr. STECK. There is a favorable report from the Committee on Pensions, a unanimous report, I understand.

Mr. JONES. Mr. President, I want to ask the Senator whether there is any question about the bill applying to the dependents. There is nothing said about the widows or the minors, and no reference to any law which controls the granting of a pension to dependents.

Mr. STECK. It says "the amount of pensions allowable shall be double that authorized to be paid under the present law."

Mr. JONES. I can not tell from a reading of the bill whether that applies to dependents, to widows and minor children, or not.

Mr. STECK. It does. It applies to the dependents of officers or enlisted killed, or to the disabled officers or enlisted men themselves.

Mr. JONES. What language is there in the bill which warrants that construction?

Mr. STECK. It says "the amount of pension allowable."

Mr. JONES. The amount of pension allowable to whom—the disabled man?

Mr. STECK. The amount of pension allowable in case the claim is made by the dependents where the man was killed.

Mr. SMOOT. Under what law? There must be some provision of law.

Mr. STECK. There is existing law which provides for pensions.

Mr. SMOOT. There are three or four pension laws applying to dependents.

Mr. ROBINSON of Arkansas. Mr. President, I think the report answers that question, under the third paragraph, where it says:

> Under acts of July 14, 1862, and March 19, 1886, the rates of pension provided for widows and dependents are $12 per month for widows of enlisted men, $15, $17, $20, $25, and $30 per month to widows of officers according to rank, with $2 per month additional for each minor child under 16 years of age.

The provision in the bill plainly is intended to double the allowances referred to in that paragraph.

Mr. SMOOT. The bill ought to refer to those acts.

Mr. ROBINSON of Arkansas. It does not need to refer to them. It says, "The rates allowed"; and the rates allowed are those which are embraced and mentioned in the paragraph I have read.

Mr. JONES. But that is a reference in the report, and it is not in the language of the bill.

Mr. ROBINSON of Arkansas. That is equivalent to saying the rates allowed are authorized by law. The language is perfectly clear to my mind as a matter of legal construction. I find no difficulty in construing it, and the department evidently found no difficulty.

Mr. JONES. I ask the Senator whether the department expressed any view with reference to the construction they give this language?

Mr. STECK. The wording of the bill was submitted to the solicitor for the department and it meets with his approval.

Mr. JONES. What does he say will be the effect of the language?

Mr. STECK. Just exactly as is contained in the report, that it will double the existing pensions as provided in the laws which are mentioned in the report and which have been referred to by the Senator from Arkansas.

Mr. JONES. I am satisfied that that is the intention of the bill, and I am in favor of it; but I doubt very seriously, when it comes to a final construction, whether that will be the construction.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. STECK. I yield.

Mr. COPELAND. I do not know why we should waste words over it. It is perfectly clear that if, under the present laws, a man is entitled to a pension, instead of having the pension which is named in the law at present, it will be doubled. It is perfectly clear.

Mr. STECK. That is the wording of the bill, as I understand it.

The PRESIDING OFFICER. Is there objection to returning to Calendar No. 315?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. FLETCHER. The language of the bill is "the amount of pension," and in the report the reference is to the rate of pension. Is there any difference in the meaning there, or should the word be "rate" instead of "amount"?

Mr. STECK. I think that is purely a difference in words. I think the wording of the bill is sufficient and is correct. It was not drawn by me personally, I may say. It met the approval of the department.

Mr. KING. Mr. President, I would like to ask the Senator from Iowa what effect, in his opinion, this legislation will have upon future legislation. For instance, persons have written me suggesting that the relatives and dependents of those who are killed upon the battle field should receive double the pensions of relatives of those who died in the service but not in battle. Others have insisted that aviation is a dangerous pursuit, and that the dependents of those who are killed in falling from airplanes or as the result of aeronautical accidents should receive double pensions. I was wondering what the end will be. Every employment is considered to be dangerous, and application will be made that additional pensions shall be paid.

Mr. STECK. Such a law is already in existence with reference to flyers. They are entitled to double pension, and also some extra pay, as the Senator probably knows. The idea behind the bill was that this service is, like flying, extra hazardous, and an attempt was made in the bill, which meets the approval of the department, to limit it to injuries or deaths which occur by reason of the extra hazard of the service.

At this time there are only two casualties to which this measure would apply; that is, with reference to the sinking of the submarine *S–4* and the submarine *S–51*.

Mr. TYDINGS. Mr. President, I would like to say for the information of the Senate—it may not be generally known—that officers and enlisted men on submarines can not get life insurance, because the life-insurance companies refuse to insure men who are assuming that risk, whereas in all other branches of the Navy they can get insurance, except in aviation.

Under the present law there is no extra pay for those engaged in service on submarines, and therefore it is unfair to expect a man who is, of course, like any other sailor or officer in the Navy, to go out and assume a risk, to put him up against that extra risk, and give him nothing in the way of insurance which every other naval officer or enlisted man can get. The purpose of the bill is to take the place of insurance which the men could get if they were assigned to a battleship or to a destroyer.

Mr. WALSH of Massachusetts. As I understand the bill, it provides that the same pension law shall apply to officers and enlisted men of the Navy who are injured as the result of a marine accident that is now applicable to officers and enlisted men in the Army in the case of injury or accident.

Mr. STECK. Yes.

Mr. BLAINE. Mr. President, will the Senator yield?

Mr. STECK. I yield.

Mr. BLAINE. If a bill of this character is passed it would appear to me that the basis for compensation rests upon the hazardous occupation in which the officers and enlisted men are engaged when they go upon a submarine. Therefore, for the same reason, why should it not apply to those engaged in the Air Service?

Mr. STECK. There is already a law applicable to those engaged in the Air Service. They are already covered by similar legislation.

Mr. BLAINE. Then why should it not also be extended to the marines who are in Nicaragua, a most hazardous occupation, called down to Nicaragua without an expression of policy on the part of Congress, which alone has the power to declare war? These marines are sent into a strange territory and a strange climate against the terrible so-called bandit Sandino, about whom the Senator from California [Mr. SHORTRIDGE] has told us, and proof of the hazards of that occupation was presented by the distinguished Senator from Washington [Mr. DILL] this morning. Another 5 men have been added to the casuality list, and perhaps before the sun goes down we shall have another 5 or 10 added to the list. The Nicaraguan situation involves a hazard quite as serious as the submarine hazard. I think the mothers, the wives, and the children of the men who have been killed in Nicaragua are entitled to consideration by Congress under the circumstances.

Mr. TYDINGS. Mr. President, if the Senator from Iowa will yield——

Mr. STECK. Certainly.

Mr. TYDINGS. I said to the Senate just a moment ago, and I do not think the Senator from Wisconsin heard me, that men engaged in submarine duty can not get life insurance because the life-insurance companies will not write such insurance. There is no man in Nicaragua who can not get life insurance because he is in the Marine Corps. This bill is to take care of the dependents, because those dependents were deprived of a right of protection which every other officer and enlisted man in the Army and Navy and Marine Corps can obtain.

Mr. BLAINE. Does the Senator contend that any life-insurance company is soliciting the writing of policies on the lives of the men who have been sent to Nicaragua under an order given by the President?

Mr. REED of Pennsylvania. Mr. President, the United States Government itself sent those men there, and not the President.

Mr. STECK. I must refuse to yield further for the discussion of a subject which is not pertinent to the bill under consideration.

Mr. BLAINE. I would like to ask the Senator another question.

Mr. STECK. I yield for any question pertinent to the bill.

Mr. BLAINE. I understand the Government insurance plan applies to officers and enlisted men in the submarine service.

Mr. STECK. I do not believe the Senator, and I disagree as to the purpose of the bill. I hope the Senator will not obstruct the passage of the bill by bringing up other matters at this time.

Mr. BLAINE. Mr. President, I think in all seriousness the bill ought to go over until proper amendments, as I view it, can be offered.

The PRESIDING OFFICER. Under objection, the bill goes over.

RURAL POST ROADS

The bill (S. 1341) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, was announced as next in order.

Mr. BRUCE. Let the bill go over.

Mr. ODDIE. Mr. President, will the Senator from Maryland allow me to make a very brief statement to the effect that a bill in much the same form as this passed the Sentae last year.

The PRESIDING OFFICER. Does the Senator from Maryland withdraw his objection?

Mr. ODDIE. Will the Senator from Maryland allow me to make a brief explanation?

Mr. BRUCE. It is a bill of too much importance to be passed in this way. It imposes too great burdens upon the States to be passed without careful consideration, which can not be given under the five-minute rule.

Mr. ODDIE. Practically the same bill passed the Senate last year. It has been approved by the American Association of State Highway Officials. It provides for the improvement in the allocation of the funds for Federal-aid road building in the public-land States. It does not provide for any more money for any State. It eliminates certain provisions in the law that were found to be unnecessary and impractical. I wish the Senator would withdraw his objection.

Mr. BRUCE. This road system bears with particular severity on the State of Maryland, and I wish to have an opportunity to examine the bill. I have not had an opportunity to read it and look into its effect, and I wish to have the opportunity to do so.

Mr. ODDIE. This is not the regular annual Federal aid appropriation bill. That was called previously this morning and went over under objection.

Mr. BRUCE. Then I am under misapprehension. However, I shall be glad to state that later on I may withdraw my objection, but for the present I object.

The PRESIDING OFFICER. Under objection the bill goes over.

OIL AND GAS PERMITS

The bill (H. R. 5783) to grant extensions of time of oil and gas permits was announced as next in order.

Mr. LA FOLLETTE. Mr. President, I withhold any objection pending the outcome of the question on the Senate committee amendments. Should the Senate committee amendments be rejected, I shall have no objection to the passage of the bill. In fact, I think it should be passed.

Mr. SMOOT. Mr. President, I will assure the Senator that I shall ask that the Senate committee amendments be rejected, and the bill passed just as it came from the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands and Surveys with amendments, on page 2, in line 1, after the word "years," to insert the words "or for such additional period or periods he may deem reasonable or necessary for the full exploration of the land described in the permit"; and on page 2, after line 15, to insert the words "or for such additional period or periods as the Secretary of the Interior may deem reasonable or necessary for the full exploration of the land described in the permit," so as to make the bill read:

Be it enacted, etc., That any oil or gas prospecting permit issued under the act entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, or extended under the act entitled "An act to authorize the Secretary of the Interior to grant extensions of time under oil and gas permits, and for other purposes," approved January 11, 1922, or as further extended under the act of April 5, 1926, may be extended by the Secretary of the Interior for an additional period of two years, or for such additional period or periods as he may deem reasonable or necessary for the full exploration of the land described in the permit, if he shall find that the permittee has been unable, with the exercise of reasonable diligence, to begin drilling operations or to drill wells of the depth and within the time required by existing law, or has drilled wells of the depth and within the time required by existing law, and has failed to discover oil or gas, and desires to prosecute further exploration.

SEC. 2. Upon application to the Secretary of the Interor, and subject to valid intervening rights and to the provisions of section 1 of this act, any permit which has already expired because of lack of authority under existing law to make further extensions, may be extended for a period of two years from the date of the passage of this act, or for such additional period or periods as the Secretary of the Interior may deem reasonable or necessary for the full exploration of the land described in the permit.

Mr. SMOOT. I ask that the Senate committee amendments be disagreed to.

The amendments were rejected.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. SMOOT. Mr. President, there is on the calendar a similar bill (S. 1155) to grant extensions of time under oil and gas permits. I ask that it be indefinitely postponed.

The PRESIDING OFFICER. Without objection, the bill will be indefinitely postponed.

COMPENSATION OF REGISTERS OF LOCAL LAND OFFICES

The bill (S. 766) to fix the compensation of registers of local land offices, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, I would like to have some one familiar with the bill state what change it makes in existing law.

Mr. WARREN. Mr. President, originally, over 100 years ago, the salary was fixed at $500 a year, with compensation from fees of the office up to, but not exceeding, $3,000 a year. That was before the register had likewise become the receiver. Now the duties of register and receiver are all performed by the register of the land office, and yet that same old law, more than 100 years old, governs his compensation. The bill now before the Senate would increase the salary to $1,000 a year and the limit of compensation from the fees is increased to $3,600.

Mr. ROBINSON of Arkansas. Mr. President, what would be the total increased cost incurred in the administration of the Land Office?

Mr. WARREN. It would be $600 for the register. I wish the Senator to understand that the Interior Department has already abolished one of the two offices.

Mr. ROBINSON of Arkansas. But that is not done by the bill now before us. That was done as a measure of economy some years ago. It is now proposed to increase the salaries of the officers who remain, so as to permit them to receive greater compensation than they are now receiving. It becomes a question in my mind whether any final economy results. We abolish one of the offices and combine the duties of the register and the receiver in one officer for the simple reason that in many of the land districts, at least, the duties are not so great as they formerly were. Now, it is proposed to increase the salaries of all receivers. I must object to the present consideration of the bill.

The PRESIDING OFFICER. The bill goes over.

AVIATION FIELD AT PARCO, WYO.

The bill (S. 2858) to authorize the use of certain public lands by the town of Parco, Wyo., for a public aviation field was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands and Surveys with an amendment, on page 1, line 4, after the word "lease," to insert the words "subject to valid existing rights"; and on page 2, line 2, after the word "land," to insert the following proviso: "*Provided further*, That there shall be reserved to the United States all gas, oil, coal, and other mineral deposits found in the land, and the right to prospect for, mine, and remove the same: *And provided further*," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to lease, subject to valid existing rights, to the incorporated town of Parco, Wyo., the south half of section 12, township 21 north, range 86 west of the sixth principal meridian, for the establishment and maintenance of a public aviation field: *Provided*, That said lease shall be for a period of 20 years, and shall be subject to renewal for a like period, on condition that the town officials pay to the United States Government a rental of $1 per annum for the use of said land: *Provided further*, That there shall be reserved to the United States all gas, oil, coal, and other mineral deposits found in the land, and the right to prospect for, mine, and remove the same: *And provided further*, That the mayor and council of Parco shall, in a manner satisfactory to the Secretary of the Interior, agree to assume the expense of clearing and maintaining the aviation field, and shall also agree that Government departments and agencies operating aircraft shall always have free and unrestricted use of said field and the right to erect and install upon said land such structures and improvements as the heads of such departments and agencies may deem advisable, including facilities for maintaining supplies of fuel, oil, and other materials for operating aircraft, and that in case of emergency, or in event it shall be deemed advisable, the Government of the United States may assume absolute control of the management and operation of said field for military purposes.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF COTTON-FUTURE EXCHANGES

The bill (S. 1414) for the prevention and removal of obstructions and burdens upon interstate commerce in cottonseed oil by regulating transactions on future exchanges, and for other purposes, was announced as next in order.

Mr. COPELAND. Mr. President, I am forced to object to the present consideration of the bill.

The PRESIDING OFFICER. The bill will go over.

Mr. COPELAND. I do this without prejudice at all toward the bill, but because numerous protests have come to me from my city regarding it. I do not know the merits of their contentions, but it is only right that I should inquire into the matter before I consent to the consideration of the bill.

Mr. MAYFIELD. Mr. President, I will say that the bill does for cottonseed-oil products the same as the Smith-Lever Act did for grain and the same as the Capper-Tincher Act did for grain. It simply places the exchanges dealing in cottonseed-oil products under the supervision of the Secretary of Agriculture. The bill has the indorsement of the Secretary of Agriculture. It is reported unanimously by the Committee on Agriculture and Forestry of the Senate and is supported by all Senators from the cotton-growing States, including the Senators from Louisiana. It simply places these exchanges under the supervision of the Secretary of Agriculture.

Mr. COPELAND. Let me say to the Senator from Texas that I assume he is entirely correct; and I hope I shall be able to withdraw my objection later, but in view of the protests, I must object at this time.

Mr. MAYFIELD. I shall not insist on the Senator withdrawing his objection now, and I shall be glad to discuss the matter with him in person.

The PRESIDING OFFICER. Under objection the bill goes over.

BILL PASSED OVER

The bill (S. 1728) placing service postmasters in the classified service was announced as next in order.

Mr. BLEASE and others. Over.

Mr. DALE. Mr. President, I hope the Senator from South Carolina will not object to the consideration of the bill.

The PRESIDING OFFICER. Is the objection withdrawn? The bill goes over.

AMENDMENT OF HAWAIIAN HOMES COMMISSION ACT

The bill (H. R. 6989) to amend the Hawaiian Homes Commission act, 1920, approved July 9, 1921, as amended by act of February 3, 1923, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 204 of the Hawaiian Homes Commission act, 1920, is hereby amended to read as follows:

"SEC. 204. Upon the passage of this act all available lands shall immediately assume the status of Hawaiian home lands and be under the control of the commission, to be used and disposed of in accordance with the provisions of this title, except that:

"(1) In case any available land is under lease by the Territory of Hawaii, by virtue of section 73 of the Hawaiian organic act, at the time of the passage of this act, such land shall not assume the status of Hawaiian home lands until the lease expires or the Commissioner of Public Lands withdraws the lands from the operation of the lease. If the land is covered by a lease containing a withdrawal clause, as provided in subdivision (d) of section 73 of the Hawaiian organic act, the Commissioner of Public Lands shall withdraw such lands from the operation of the lease whenever the commission, with the approval of the Secretary of the Interior, gives notice to him that the commission is of the opinion that the lands are required by it for the purposes of this title; and such withdrawal shall be held to be for a public purpose within the meaning of that term as used in subdivision (d) of section 73 of the Hawaiian organic act;

"(2) Any available land, including land selected by the commission out of a larger area, as provided by this act, as may not be immediately needed for the purposes of this act, may be returned to the Commissioner of Public Lands and may be leased by him as provided in subdivision (d) of section 73 of the Hawaiian organic act; any lease of Hawaiian home lands hereafter entered into shall contain a withdrawal clause, and the lands so leased shall be withdrawn by the Commissioner of Public Lands, for the purposes of this title, upon the commission giving five years' notice of such withdrawal;

"(3) The commission shall not lease, use, nor dispose of more than 20,000 acres of the area of Hawaiian home lands, for settlement by native Hawaiians, in any calendar five-year period."

SEC. 2. Section 213 of the Hawaiian Homes Commission act, 1920, as amended by act of February 3, 1923, is hereby further amended to read as follows:

"SEC. 213. There is hereby established in the treasury of the Territory a revolving fund to be known as the Hawaiian home loan fund. The entire receipts derived from any leasing of the 'available lands' defined in section 203, these receipts including proportionate shares of the receipts from the lands of Humuula Mauka, Piihonua, and Kaohe Hakuu, of which lands portions are yet to be selected and 30 per cent of the Territorial receipts derived from the leasing of cultivated sugar-cane lands under any other provision of law, or from water licenses, shall be covered into the fund until the amount of moneys paid therein from those three sources alone shall equal $2,000,000. In addition to these moneys and the moneys covered into the revolving fund as installments paid by lessees upon loans made to them as provided in paragraph 2 of section 215, there shall be covered into the revolving fund all other moneys received by the commission from any source whatsoever."

Mr. JONES. Mr. President, may we have just a brief explanation as to what changes the bill proposes to make?

Mr. WILLIS. Mr. President, the Senator from Arizona [Mr. HAYDEN] reported the bill. There is a unanimous report from our committee, but if the Senator from Arizona will do so I shall be glad to have him explain it.

Mr. HAYDEN. The original Hawaiian homes act was passed as an experiment in an effort to induce the native Hawaiian people to go back to the land, become farmers, and build homes for themselves. That experiment has been conducted for five years and has been a complete success. There have been over 3,000 acres reclaimed and made available to them out of the

public lands in Hawaii. The purpose of the bill is to extend the act so it will apply to all the islands and make the benefits available to all the people of the Hawaiian race.

Mr. WILLIS. Will not the Senator also call attention to the fact that the revolving fund provided for in the bill comes not at all out of any Federal appropriation but entirely out of the Territorial funds?

Mr. HAYDEN. All of the money provided for in the bill is appropriated by the Hawaiian Legislature. The bill is framed in accordance with a memorial of the Hawaiian Legislature. It has been very carefully considered by the Hawaiian Homes Commission and the Interior Department and should be passed.

Mr. SMOOT. I have no objection to the passage of the measure, but I simply wish to say that if similar legislation had been enacted about 10 years ago the natives of the Hawaiian Islands would have been much better off than they are to-day.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. WHEELER. I object.

The PRESIDING OFFICER. Being objected to, the bill goes over.

WILLIAM A. LIGHT

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1691) for the relief of William A. Light. It proposes to pay in full settlement against the Government $1,524.89 to William A. Light, of Valentine, Ariz., as compensation for injuries sustained on September 26, 1916, in the discharge of his official duties as superintendent of the United States Indian school agency at Mescalero, N. Mex.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AGRICULTURAL DAY

The joint resolution (S. J. Res. 61) to provide for an agricultural day was considered as in Committee of the Whole.

Mr. KING. Mr. President, I should like an explanation of what the joint resolution proposes.

Mr. CAPPER. Mr. President, a similar joint resolution passed in the closing days of the last session of the Senate but failed to receive consideration in the other House. It had its origin with the National Grange. It merely proposes to designate the first Thursday in October of each year as a day when attention will be called to the outstanding importance of agriculture as an industry.

Mr. ROBINSON of Arkansas. Does the measure propose to create another legal holiday?

Mr. CAPPER. The joint resolution expressly states that it will not create another legal holiday.

Mr. ROBINSON of Arkansas. I observe that the language of the joint resolution provides for the appropriate observance throughout the United States of the first Thursday in October of each year as Agricultural Day. How is that observance to be secured?

Mr. CAPPER. The joint resolution provides that it shall be done by the President by proclamation or otherwise, directed to the governors of the several States of the United States, so that a simple letter written by the President to the governors calling attention to this Agricultural Day is all that will be required. Representatives of every national farm organization in the country appeared before the Committee on Agriculture and Forestry in favor of the measure. It also had the unanimous support of that committee in its favor.

The PRESIDING OFFICER. Is there objection to consideration of the joint resolution?

Mr. SMOOT. Mr. President, I shall have no objection to the passage of the joint resolution if it does not provide that there shall be another legal holiday, and I see that it expressly provides that it shall not be so considered. I trust that we are not going to have any more legal holidays in the United States.

Mr. CAPPER. The Committee on Agriculture and Forestry was of the same opinion as that expressed by the senior Senator from Utah.

Mr. KING. Mr. President, I shall not object to the consideration of the joint resolution, but I wish to offer an amendment to it. I think, as the joint resolution will be interpreted, if it shall become a law, the final result will be a legal holiday for all employees of the Government on Agricultural Day, and, of course, the purpose is to have a legal holiday in the States. On page 1 I move to strike out, in lines 7, 8, and 9 of the joint resolution, the following words:

and it is the sense of the Congress that such holiday should be appropriately observed throughout the United States.

I do not think it is the business of Congress to tell the States what they should do in regard to holidays. That is for the States to determine for themselves. Congress is not a vast overlord to tell the States when, in its opinion, they should establish holidays. I believe it would be an affront to the States to do so. I therefore think the words I have read should go out of the joint resolution; and if the Senator from Kansas [Mr. CAPPER] is correct, that it is not intended that Agricultural Day shall be made a legal holiday, let us indicate that a little more clearly by eliminating the language to which I have referred.

The PRESIDING OFFICER. The amendment proposed by the junior Senator from Utah will be stated.

The CHIEF CLERK. On page 1, line 7, after the words "Agricultural Day," it is proposed to strike out the comma and the words "and it is the sense of the Congress that such day should be appropriately observed throughout the United States," so as to make the joint resolution read:

Resolved, etc., That in order to encourage consideration of the basic relationship of farming and agriculture to the well-being of the people of the Nation, it is hereby declared that the first Thursday in October of each year is designated as Agricultural Day. The President is requested to communicate this declaration, by proclamation or otherwise, to the governors of the several States of the United States and to request them to take such action as they may deem advisable in order to bring about observance of such day. This resolution shall not be construed as establishing a legal public holiday.

Mr. MCNARY. Mr. President, supplementing the remarks made by the author of the joint resolution, the junior Senator from Kansas [Mr. CAPPER], I desire to say that when this measure came before the Senate Committee on Agriculture and Forestry all of the major farm organizations were represented. They asked that this day of observance be created, not as a legal holiday but by some act of Congress so that the States, speaking through their governors, might have their attention called to it. Personally, I see no objection to the elimination of the words as suggested by the Senator from Utah [Mr. KING]. That amendment would leave the substance of the joint resolution, namely, that some reference should be made to a holiday such as might be designated by the governors of the States by proper proclamation; and, if it be agreeable to the author of the bill, as chairman of the committee from which the resolution was reported, I shall have no objection to the elimination of that language.

Mr. CAPPER. I have no objection to the amendment suggested by the Senator from Utah.

The PRESIDING OFFICER. Does the Senator from Kansas accept the amendment?

Mr. CAPPER. I do.

Mr. SHORTRIDGE. Mr. President, in order to allay the fears of the Senator from Utah [Mr. KING], I desire to suggest that the last sentence of the joint resolution read:

This resolution shall not be construed as establishing a legal public holiday.

Mr. CAPPER. That is correct. The Senator from Utah [Mr. KING] now understands that.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Utah [Mr. KING].

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

DESCHUTES PROJECT IN OREGON

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1186) to provide for the construction of the Deschutes project in Oregon, and for other purposes, which had been reported from the Committee on Irrigation and Reclamation with amendments.

The first amendment was, on page 1, section 1, line 7, after the word "construct," to strike out the words "at Benham Falls, on the Deschutes River, in the State of Oregon, a storage reservoir and incidental works sufficient in size and the necessary canals and conduits for the delivery of water from said reservoir and said river to irrigate the lands requiring irrigation, and which he may find to be feasible for irrigation on the following units of the Deschutes project in the State of Oregon, namely: The north unit, east unit, Powell Buttes irrigation district, west unit, south unit, and Tumalo irrigation district," and in lieu thereof to insert "reservoir, or reservoirs, and incidental works of sufficient capacity to store, and canals, conduits, and other works of sufficient capacity to deliver such

water as may be necessary for the reclamation, through irrigation, of any unit, units, or parts of units, described, considered, or referred to in the 1914 Deschutes project report (prepared by the Interior Department in cooperation with the State of Oregon), which he may find to be feasible," so as to make the section read:

That in accordance with the provisions of the act of June 17, 1902 (32 Stat. L. 388), known as the reclamation law, and acts amendatory thereof or supplementary thereto, the Secretary of the Interior is hereby authorized and empowered to construct a reservoir, or reservoirs, and incidental works of sufficient capacity to store, and canals, conduits, and other works of sufficient capacity to deliver such water as may be necessary for the reclamation, through irrigation, of any unit, units, or parts of units, described, considered, or referred to in the 1914 Deschutes project report (prepared by the Interior Department in cooperation with the State of Oregon), which he may find to be feasible.

Mr. SMOOT. Mr. President, I have not had time to read the bill through or to read the report, but I wish to ask the Senator who introduced the bill if this project falls within the class of regular reclamation projects?

Mr. McNARY. Yes. I will say to the Senator that this bill does not ask for an appropriation of money. It refers to a project which must be built, if ever, in the usual way under the reclamation act of 1902, namely, in accordance with estimates submitted by the Secretary of the Interior and also in accordance with estimates made by the Director of the Budget and submitted by the President to Congress, and acted upon favorably by the appropriate committees of Congress. It does not in any way change the law. There is an amendment in the bill which the committee had inserted which directs the Secretary of the Interior to submit estimates of probable cost for the purpose of determining whether, in the opinion of those interested in the project and the Congress, it is a feasible one. It does not in any way commit Congress to the construction of this project. It is in the nature of an inquiry, of securing further data. The committee after considering the bill reported unanimously in favor of its adoption. It requires no money, I repeat, and does not affect the status of the project at all; but it does ask for an estimate of the amount of money necessary for the construction of the project.

Mr. SMOOT. I notice that the bill provides:

there is hereby authorized to be appropriated from any money in the reclamation fund such amounts as may be necessary to carry out the purposes of this act, to be appropriated from time to time upon estimates made by the Secretary of the Interior.

That money will come out of the reclamation fund, will it not?

Mr. McNARY. Certainly, if the project is found to be feasible following the estimates and if in the future the Secretary shall report it favorably for the consideration of Congress.

Mr. SMOOT. Then the only money that will be expended in case the report shall be adverse will be for examinations and surveys?

Mr. McNARY. I will say to the Senator that a complete examination has been made. I merely want the Secretary to submit to Congress an estimate of the cost of the project. It will require no new survey and no expenditure of money, in my opinion, whatsoever.

Mr. KING. Mr. President, will the Senator permit an inquiry?

Mr. McNARY. I shall be glad to yield.

Mr. KING. I notice that the title of the bill reads:

To provide for the construction of the Deschutes project in Oregon, and for other purposes.

Does not the Senator agree that it might be better and obviate any supposed commitment to amend the title so that it would read something like this?—

To secure data with respect to the feasibility of constructing the Deschutes project, Oregon.

Mr. McNARY. Mr. President, the title is in the usual form in which similar bills have been passed. I would not desire to have it changed, because it does not commit the Government until the estimates are submitted, if it shall be found feasible by the Secretary of the Interior, and estimated for by the Director of the Budget, and approved by Congress. So I would prefer to leave the title as it is.

Mr. KING. The Senator states that the titles of similar bills which have provided for the securing of such data have been in the same form?

Mr. McNARY. Yes. Last year the Senator from Wyoming [Mr. KENDRICK] introduced such a bill, which was passed in connection with a Wyoming irrigation project, and the Senator from Texas [Mr. SHEPPARD] and other Senators, as I now recall, also had similar bills passed.

Mr. KING. Then the department construes measures of this kind as not committing the Government at all to the construction of the projects?

Mr. McNARY. Not at all.

Mr. SMOOT. I will inquire of the Senator if he thinks section 3 of the bill is necessary? It reads:

SEC. 3. That to enable the Secretary of the Interior to continue surveys and investigations, to negotiate the necessary contracts for the repayment of the cost of said project, or the units thereof, and for the purpose of constructing said storage reservoir, incidental works, canals, conduits, and appurtenant structures, there is hereby authorized to be appropriated from any moneys in the reclamation fund such amounts as may be necessary to carry out the purposes of this act, to be appropriated from time to time upon estimates made by the Secretary of the Interior.

Mr. McNARY. That provision is necessary in order to obtain the data.

Mr. SMOOT. Is an appropriation for that purpose authorized?

Mr. McNARY. Not at all. The survey has already been made. I want the Interior Department merely to submit to Congress an estimate. For a survey, this bill is not required, because the act of 1902 and the amendatory acts permit the Secretary of the Interior to make the surveys; so whatever construction may be placed on it, I am not asking for anything that is not now existing law.

Mr. SMOOT. I am perfectly aware of that and, therefore, I thought that the language to which I have referred was unnecessary for that reason.

Mr. McNARY. If it is unnecessary, it is harmless, in any event.

Mr. SMOOT. All the other projects have been constructed under existing law.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment of the Committee on Irrigation and Reclamation was, on page 3, after line 12, to insert:

The Secretary of the Interior is hereby directed to submit to Congress, in accordance with section 16 of the act of August 13, 1914 (38 Stat. 686), estimates of the amount of money necessary to be expended for the construction of any unit or units or parts of units referred to in section 1 of this act, which he may find to be feasible.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

G. W. GILKISON

The bill (H. R. 5380) to correct the military record of G. W. Gilkison was announced as next in order. The bill had been reported adversely from the Committee on Military Affairs.

Mr. REED of Pennsylvania. I move that the bill be indefinitely postponed.

The motion was agreed to.

JOSEPH M. BLACK

The bill (H. R. 9151) for the relief of Joseph M. Black was announced as next in order. The bill had been reported adversely from the Committee on Military Affairs.

Mr. REED of Pennsylvania. I move that the bill be indefinitely postponed.

The motion was agreed to.

FORT M'HENRY, MD.

The Senate as in Committee of the Whole proceeded to consider the bill (H. R. 204) to authorize an additional appropriation for Fort McHenry, Md.

The bill was read, as follows:

Be it enacted, etc., That the sum of $81,678 is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for further carrying out the provisions of the act approved March 3, 1925, chapter 425 (Public, No. 543), entitled "An act to repeal and reenact chapter 100, 1914 (Public, No. 108), to provide for the restoration of Fort McHenry, in the State of Maryland, and its permanent preservation as a national park and perpetual national memorial shrine as the birthplace of the immortal Star-Spangled Banner, written by Francis Scott Key, for the appropriation of the necessary funds, and for other purposes," approved March 3, 1925 (43 Stat. L. 1109).

Mr. JONES. Mr. President, let us have a brief explanation of that bill.

Mr. REED of Pennsylvania. Mr. President, the bill authorizes an appropriation to complete the restoration of Fort McHenry, Md., which is historically important because it was the site of the attack that inspired the writing of The Star-Spangled Banner. In the last Congress a bill was introduced carrying $192,000 for this purpose, but after further study by the War Department it was found that that was needlessly large and the department has recommended an appropriation of only $81,678, as carried by the bill.

Mr. JONES. This bill merely provides for the preservation of Fort McHenry as a national park?

Mr. REED of Pennsylvania. That is all.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PENSIONS FOR AVIATION DUTY

The bill (S. 3198) to amend the act of March 3, 1915, granting double pension for disability from aviation duty, Navy or Marine Corps, by inserting the word "Army," so as to read "Army, Navy, and Marine Corps," was announced as next in order.

Mr. KING. Let that bill go over.

Mr. ROBINSON of Arkansas. Mr. President, I think there should be an explanation of the purposes and effect of the bill.

Mr. KING. I have asked that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

GEORGE W. BOYER

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2657) for the relief of George W. Boyer, which was read, as follows:

Be it enacted, etc., That the claim of George W. Boyer, of Pine Grove, Pa., owner of the barge *Pine Grove,* against the United States of America for damages alleged to have been caused by collision on December 7, 1925, between said barge and the highway bridge at Coinjock, N. C., while said bridge was owned and operated by the United States, may be litigated and determined in the District Court of the United States for the Eastern District of Virginia, sitting as a court of admiralty and acting under the rules governing such courts, and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States of America in favor of said George W. Boyer, or against said George W. Boyer in favor of the United States of America, ascertained upon the principles and measures of liability applicable in like cases in admiralty between private persons or corporations, with the same right of appeal: *Provided,* That notice of any suit brought by George W. Boyer by virtue hereof shall be given to the Attorney General of the United States in the manner provided by any order entered by the District Court of the United States for the Eastern District of Virginia, at Norfolk, in said cause, and it shall be the duty of the Attorney General of the United States to cause the United States attorney for the eastern district of Virginia at Norfolk to appear on behalf of the United States and protect and defend its interests: *Provided further,* That the proceeding hereby authorized shall be begun within four months from the date of the passage of this act.

Mr. JONES. Let us have a brief explanation of that bill.

Mr. SWANSON. Mr. President, this bill is in the usual form and provides that there shall be referred to the proper district court of the United States a claim for damages arising because of a collision of the barge *Pine Grove* with the highway bridge at Coinjock, N. C. Instead of paying for the damages outright by act of Congress, it is proposed to allow the claimant to sue in the district court of the United States where the Government of the United States may defend itself. As I have said, it is in the usual form, and I think the bill should be passed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RURAL POST ROADS

Mr. ODDIE. I ask unanimous consent that the Senate recur to Order of Business No. 320, being the bill (S. 1341) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. PITTMAN. Mr. President, I have examined the bill very carefully, as I did the bill which was before the Senate during the last Congress, and I wish to join with the Senator from Nevada in urging its passage.

Mr. ROBINSON of Arkansas. May I ask if the amendments which have been reported to the bill were contained in the bill which was before the Senate during the last Congress?

Mr. PITTMAN. There were some of the amendments in the bill which passed last year. But other amendments have been added, in order to accomplish the same objects which were provided for in that bill. However, since the passage of the bill the road bureau has stated that without the amendments proposed the bill would not accomplish the purpose desired and contemplated.

Mr. SMOOT. Was a report made on the bill?

Mr. ODDIE. There is a favorable report from the department including a suggestion for the clarification of the wording in part of the bill used last year, and I have made the change suggested by the department.

Mr. SMOOT. There is no report in my calendar.

Mr. ODDIE. I have the report from the department right here.

Mr. SMOOT. It is a favorable report, is it?

Mr. ODDIE. There was one amendment offered by the Senator from Washington [Mr. JONES], which appears on page 5, lines 1 to 10. I have accepted that amendment and have had it incorporated in the bill. That was not covered in the department's report; but everything else in the bill was reported upon favorably by the department.

Mr. ROBINSON of Arkansas. Mr. President, what is the effect of that amendment?

Mr. ODDIE. It qualifies the provision in section 4 for protecting highway road markers, which prevents objectionable advertising signs on the main Federal-aid highways. The amendment is as follows:

Provided, That nothing herein shall be held to prohibit the highway department of any State from authorizing motoring organizations, associations, and corporations, heretofore engaged in sign-posting work under the direction of such highway departments, to erect and maintain such highway markers and directional signs when done without expense to the State or the United States, or to place on such markers and directional signs the insignia or name of the agency so designated, when done in a manner approved by such highway department.

Mr. ROBINSON of Arkansas. I think that is a good amendment.

Mr. SHORTRIDGE. That was acceptable, was it? That meets the objections——

Mr. ODDIE. That meets the objection heretofore made by important road organizations in the State of California and other Western States.

Mr. BLAINE. Mr. President, I should like to inquire the purpose of attaching a penalty with respect to this provision by the Government of the United States. It seems to me that that is a question of police regulation for the respective States, and this provision simply means that there will be double jeopardy. Are not the States competent to regulate the use of highways within the respective States?

Mr. ODDIE. They are to a certain extent, Mr. President; but much of this work is done with Federal aid, and I will say to the Senator from Wisconsin that the American Association of State Highway Officials has indorsed this provision in regard to the penalties for defacing the road markers.

Mr. BLAINE. Yes; but those officials have no authority to impose upon the people of a State the possibility of a double jeopardy, and to surrender the police jurisdiction of the respective States over these matters. I think all of that part which refers to penalties respecting a purely local police regulation should be stricken out.

I am not opposed to the bill. I am just opposed to imposing upon the States this kind of legislation. I think the States are capable of regulating these matters themselves.

Mr. SMOOT. Mr. President, many of these are interstate roads, and without the penalty the provision would be ineffective. If you take out the penalty, you might just as well reject the amendment.

For instance, in my State the road goes right through the State of Utah into Nevada. You go from Salt Lake City out to the boundary line of Utah within a couple of hours or three hours, with a good automobile, and then you are in the State of Nevada.

Mr. BLAINE. Mr. President, let me call attention to the fact that this penalty attaches to that which the highway department of a State does. If the highway department does not do it, the penalty does not attach. Why have it attach, when the State has jurisdiction to do what the bill proposes that the State may do? Why attach a penalty? Why not leave that to the State?

Mr. ODDIE. Mr. President, this work is financed partly by the Federal Government under the Federal-aid system.

Mr. SMOOT. Largely.

Mr. BLAINE. Is it not a very small portion?

Mr. ODDIE. It is 50 per cent in most States, and in the so-called public-land States the contribution of the Federal Government is increased in proportion to the acreage of public lands in those States.

Mr. BLAINE. In my own State we expend perhaps twenty or twenty-five times as much as the Federal Government contributes. Why have this additional penalty? Why have the possibility of double punishment? Why take away from the States their proper jurisdiction to pass laws with reference to their police powers? I think it is an indirect violation of the ninth amendment and the tenth amendment, and it is going to lead to this, if the Senator will yield just for the suggestion: The time is very close at hand when it will be proposed that the Federal Government take over the policing of all highways in part constructed by Federal funds, and we will find our States deprived of their ordinary police powers with respect to these matters.

I think the States can be trusted to carry out their police powers, and I am opposed to any provision with respect to matters of this kind when the States themselves are vitally interested, and when the duty rests upon them, and when they will discharge that duty.

I must object to the bill in the present situation, unless the Senator will strike out the penal provision imposing the possibility of double jeopardy.

Mr. ODDIE. Mr. President, one reason for the necessity for this provision is this:

There are places in the desert country where losing one's way on the roads means death. I personally have been in that country for many years, and I know that several times I have come very close to death by reason of the lack of highway signs; and there are people who willfully destroy those signs.

Mr. BLAINE. Permit me to suggest that I am not objecting to the provision with respect to placing the signs; but why not let your State protect your citizens? Is it going to fail in its duty? I think not.

Mr. ODDIE. No, Mr. President; but my State and the highway departments of all the States have asked that this provision be put in the bill.

Mr. BLAINE. I do not think the highway department ever thought of the question of the penalty.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. ODDIE. Will the Senator waive his objection and let the bill go through in this way and let it go to conference, so that the matter can be adjusted there? If not, I will ask that the matter go over for five minutes, so that I can discuss the matter with the Senator from Wisconsin.

The PRESIDING OFFICER. The bill will be passed over without prejudice. The clerk will state the next bill on the calendar.

PAUL D. CARLISLE

The bill (S. 3201) for the relief of Paul D. Carlisle was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the stoppage placed against the pay of Paul D. Carlisle, a major on the retired list of the United States Army, in the sum of $341.28, by reason of the absence with leave not in a full-pay status, be, and the same hereby is, removed, and in case the sum, or any part thereof, has been already deducted from his pay the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Paul D. Carlisle the sum of $341.28, or such lesser sum, equal in amount to the sum so deducted.

Mr. JONES. Mr. President, I should like to have an explanation of that bill.

Mr. SHEPPARD. Mr. President, the War Department advised this officer that he was entitled to leave of absence for something like three and a half months. He took that leave of absence. After that he was retired. Before he was retired they checked up his pay, and in checking up his leave records they decided that he was not entitled to the three and a half months, but was entitled to only 2 months and 11 days, and therefore they docked his pay for that amount. The War Department says the error should be cured by this bill; that the officer was not to blame for taking the excess leave.

Mr. SMOOT. He must have known how much leave he had.

Mr. SHEPPARD. He took the word of the department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

W. H. KAUFMAN

The bill (S. 2061) for the relief of W. H. Kaufman was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 5, after the words "sum of," to strike out "$50" and insert "$25," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to W. H. Kaufman, out of any money in the Treasury not otherwise appropriated, the sum of $25, in full satisfaction of all claims against the United States for damage to his crops caused by the landing of a United States Forest Service airplane engaged in forest-fire patrol.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

OLD DOMINION LAND CO.

The bill (S. 2926) for the relief of the Old Dominion Land Co. was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, to strike out all after the enacting clause and to insert:

That the Comptroller General of the United States be, and he is hereby, authorized and directed to certify for payment to the Old Dominion Land Co., from any money in the Treasury not otherwise appropriated, the sum of $3,314.40, on account of destruction by the United States of two buildings formerly located on premises leased from the claimant in connection with Camp Hill and Camp Stuart, Va.

Mr. JONES. Mr. President, may we have an explanation of that bill?

Mr. HOWELL. Mr. President, this is a case where two buildings on property leased for cantonment purposes were destroyed or removed. The Comptroller General has held that there was an implied contract against waste on this property, and that the removal of the buildings was not authorized under the lease. Therefore, after investigation, it has been determined that the value of these buildings was as stated in the bill; and, while the Secretary of War does not directly recommend the payment of this bill, it was forwarded by the War Department to the Claims Committee with the request that the bill for the reimbursement of this company be reduced.

Mr. JONES. Is there any question as to the value of the buildings?

Mr. HOWELL. The Comptroller General went into the matter and determined that this was the amount due, and that if the claim was to be allowed this was not excessive.

Mr. JONES. Has this property been turned back to the original possessors?

Mr. HOWELL. That is my understanding—that the property has been turned back, and the matter closed.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CHIPPEWA INDIANS OF MINNESOTA

The bill (S. 2342) providing for a per capita payment of $25 to each enrolled member of the Chippewa Tribe of Minnesota from the funds standing to their credit in the Treasury of the United States was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with amendments, on page 2, line 2, after the words "distribution of," to strike out "$100" and to insert "$25"; in line 3, after the word "each," to insert "of the"; and in the same line, after the word "enrolled," to strike out "member of the tribe" and insert "Chippewa Indians of Minnesota," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States so much as may be necessary of the principal fund on deposit to the credit of the Chippewa Indians in the State of Minnesota, arising under section 7 of the act of January 14, 1889 (25 Stat. L. 642), entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," and to make therefrom a per capita payment or distribution of $25 to each of the enrolled Chippewa Indians of Minnesota, under such rules and regulations as the said Secretary may prescribe: *Provided*, That before any payment is made hereunder the Chippewa Indians of Minnesota shall, in such manner as may be prescribed by the Secretary of the Interior, ratify the provisions of this act and accept same: *Provided further*, That the money paid to the Indians as authorized herein shall not be subject to any lien or claim of attorneys or other parties.

Mr. SMOOT. Mr. President, I was going to ask the Senator from Minnesota [Mr. SHIPSTEAD] whether there was not a provision in the last Interior Department appropriation bill authorizing an annual per capita payment to these Indians.

Mr. REED of Pennsylvania. Mr. President, the bill is objected to by the Secretary of the Interior, who says there is no necessity for the payment, and it is objected to by the Budget Bureau; and I therefore ask that it go over.

Mr. JONES. Mr. President, let me suggest to the Senator that a representative of the Indian Bureau was present before the committee, I remember—I happened to be present when this matter was heard—and he thought it would be well to make this $25 payment. He thought it was quite desirable under the conditions there. The bill as originally presented was objected to, I think, by the department and also by the Budget; but as amended by the committee the amount is cut down to $25, which the representative of the department who was present before the committee thought was a proper thing to do.

Mr. REED of Pennsylvania. I understand that these Indians have about $4,500,000 in their fund to their credit. It is not likely to be increased much. It will take about $400,000, pretty nearly 10 per cent of it, to pay each Indian $25. The Secretary of the Interior, in reporting on the bill, says that it ought to be held for times when their crops are short, to tide them over emergencies; that in the last season their crops were not short, and that there is no occasion for paying them anything.

I see the Senator from North Dakota [Mr. FRAZIER] here now, and I will ask him for an explanation of the bill.

Mr. FRAZIER. Mr. President, both the Senators from Minnesota were very much in favor of a small allotment to these Indians.

It seems that these particular Indians depend a great deal on the wild-rice crop upon the lakes in Minnesota in their territory. A great deal of wild rice grows there, and they depend largely upon the wild rice for their food in the winter. They also sell to the stores a good deal of the wild rice that they gather there. I had a letter from one of the storekeepers in that locality, and he said that on account of the short wild-rice crop they could not buy it at the stores, that the Indians did not have enough to live on, and he was very strongly in favor of their getting at least a small per capita payment. All who have expressed themselves on the matter think there should be a small per capita payment, and we thought $25 was about right.

Mr. ROBINSON of Arkansas. Mr. President, if the Senator will yield, I notice that there is printed in the report a petition, signed apparently by a great many Indians, setting forth substantially the facts stated by the Senator from North Dakota. They say:

> Our gardens were killed by frost, the wild-rice crop of last fall was very poor, and our people are suffering from hunger and cold.

That petition is signed by a large number of Indians. It looks to me, if that showing is made, as if they ought to be permitted to have at least a small amount of their own money.

Mr. BRATTON. Mr. President, will the Senator from North Dakota yield?

Mr. FRAZIER. I yield.

Mr. BRATTON. That statement was made by one of the Senators from Minnesota before the committee in the presence of the Commissioner of the Bureau of Indian Affairs, and, as I recall, was not controverted by him in any way.

Mr. FRAZIER. It was not.

Mr. BRATTON. I take it that that statement stands undisputed.

Mr. SMOOT. Mr. President, I ask whether in the Interior Department appropriation bill a payment was not provided for on behalf of these Chippewa Indians.

Mr. FRAZIER. I think not.

Mr. SMOOT. The Senator will remember that there were three or four, and I do not remember whether there was one for this purpose or not. That is the reason only I asked the question. If there was, of course, there would be no necessity for this legislation.

Mr. FRAZIER. It is my understanding that there was not.

Mr. REED of Pennsylvania. I withdraw the objection.

Mr. FLETCHER. Mr. President, I notice in the petition that they say that they ought to have $50 per capita, and that anything else would be inadequate; but if they are satisfied with $25, I suppose we should have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill providing for a per capita payment of $25 to each enrolled member of the Chippewa Tribe of Minnesota from the funds standing to their credit in the Treasury of the United States."

RURAL POST ROADS

Mr. ODDIE. Mr. President, I ask unanimous consent to return to Calendar 320, Senate bill 1341, to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes.

I have discussed this matter with the Senator from Wisconsin, and to correct what I think should have been corrected after studying the matter——

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Post Offices and Post Roads with amendments, on page 3, in line 14, after the word "Agriculture," to strike out down to and including the word "State," on line 1, page 4, and to insert "upon request from the State highway department of such State, may increase the share payable by the United States to any percentage up to and including the whole cost on projects on the primary system of Federal-aid highways and on projects on the secondary system when the latter is a continuation of a route on the primary system or directly connects with a route on the primary system of an adjoining State, but the average Federal pro rata allotted to all Federal-aid projects in any such State during any fiscal year shall not exceed the pro rata authorized in such State under the provisions of this act"; and on page 4, line 25, to strike out after the word "Agriculture" the words "and any person, firm," and insert "*Provided*, That nothing herein shall be held to prohibit the highway department of any State from authorizing motoring organizations, associations, and corporations, heretofore engaged in sign-posting work under the direction of such highway departments, to erect and maintain such highway markers and directional signs when done without expense to the State or the United States, or to place on such markers and directional signs the insignia or name of the agency so designated, when done in a manner approved by such highway department," so as to make the bill read:

Be it enacted, etc., That paragraph 4, section 4, of the act entitled "An act making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes," approved June 19, 1922 (42 Stat. L. 660), prescribing limitations on the payments of Federal funds per mile which the Secretary may make, is hereby amended by adding at the end thereof a further proviso, as follows:

"*And provided further*, That the Secretary of Agriculture may make payments in excess of the above limitations per mile in the case of any project involving construction in mountainous, swampy, or flood lands, on which the average cost per mile for the grading and drainage structures other than bridges of more than 20 feet clear span will exceed $10,000 per mile; and also in the case of any project which, by reason of density of population or character and volume of traffic, the State highway department and the Secretary of Agriculture may determine should be improved with a surface of greater width than 18 feet. In no event shall the payments of Federal funds on any project under this proviso exceed 50 per cent of the cost of the project, except as such payments are authorized to be increased in the public-land States."

SEC. 2. That the paragraph of section 6 of the Federal highway act, approved November 9, 1921, which reads as follows: "Not more than 60 per cent of all Federal aid allotted to any State shall be expended upon the primary or interstate highways until provision has been made for the improvement of the entire system of such highways: *Provided*, That with the approval of any State highway department the Secretary of Agriculture may approve the expenditure of more than 60 per cent of the Federal aid apportioned to such State upon the primary or interstate highways in such State," is hereby repealed.

SEC. 3. That section 11 of the Federal highway act, approved November 9, 1921 (42 Stat. L. 212), as amended or supplemented, be further amended by adding at the end of the second paragraph thereof the following:

"*And provided further*, That in the case of any State containing unappropriated public lands and nontaxable Indian lands, individual and tribal, exceeding 5 per cent of the total area of all lands in the State in which the population, as shown by the latest available Federal census, does not exceed 10 per square mile of area, the Secretary of Agriculture, upon request from the State highway department of such State, may increase the share payable by the United States to any per-

centage up to and including the whole cost on projects on the primary system of Federal-aid highways and on projects on the secondary system when the latter is a continuation of a route on the primary system or directly connects with a route on the primary system of an adjoining State, but the average Federal pro rata allotted to all Federal-aid projects in any such State during any fiscal year shall not exceed the pro rata authorized in such State under the provisions of this act.

SEC. 4. That hereafter the shield or other insignia of the United States as shown on the seal of the United States, or any simulation thereof shall not be used as a highway marker, directional sign, or advertising medium on or along any road or highway in the United States, which is a part of or may become a part of the primary or interstate or secondary or intercounty highway system as designated in accordance with the Federal highway act of November 9, 1921, except where heretofore or hereafter so used by the highway departments of the several States acting cooperatively through their organization, known as the American Association of State Highway Officials, and with the United States Department of Agriculture: *Provided*, That nothing herein shall be held to prohibit the highway department of any State from authorizing motoring organizations, associations, and corporations heretofore engaged in sign-posting work under the direction of such highway departments to erect and maintain such highway markers and directional signs when done without expense to the State or the United States, or to place on such markers and directional signs the insignia or name of the agency so designated, when done in a manner approved by such highway department; and any person, firm, organization, corporation, or association who shall use or shall simulate and use such shield or other insignia of the United States as a highway marker, directional sign, or advertising medium for or along such highways, or who shall destroy, mutilate, deface, tear down, or remove any such highway marker or directional sign heretofore or hereafter erected by the highway department of any State on said system of highways, shall be deemed guilty of a misdemeanor and shall be punishable by a fine of not to exceed $100 or by imprisonment for not more than 30 days, or by both such fine and imprisonment, in the discretion of the court.

SEC. 5. All acts or parts of acts in any way inconsistent with the provisions of this act are hereby repealed, and this act shall take effect on its passage.

The amendments were agreed to.

Mr. ODDIE. Mr. President, I ask that the bill be further amended by striking out the word "such," on line 12, page 5, and inserting the word "any."

The amendment was agreed to.

Mr. ODDIE. I move to amend, on line 15, page 5, by striking out the word "such," and on lines 16 and 17 by striking out the words "highway department of any State" and inserting in lieu thereof the words "the Bureau of Public Roads, at the expense of the Federal Government."

The purpose of this amendment is to make the penalty apply only to signs erected by the Federal Government and at the expense of the Federal Government.

The amendment was agreed to.

Mr. BRUCE. Mr. President, may I ask the Senator from Nevada whether that is the bill about which we arrived at an understanding a moment ago?

Mr. ODDIE. It is the same bill.

Mr. REED of Pennsylvania. Mr. President, I send to the desk the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 5, after line 21, add a new section, as follows:

SEC. 5. In every case in which, in the judgment of the Secretary of Agriculture, it shall be practicable to plant and maintain shade trees along the highways authorized by said act of November 9, 1921, and by this act, the planting of such trees shall be included in the specifications provided in section 8 of said act of November 9, 1921.

Mr. ODDIE. Mr. President, I ask the Senator from Pennsylvania if he will not withhold the amendment until the regular Federal aid highway bill comes up?

Mr. REED of Pennsylvania. Mr. President, I propose to offer the amendment to that, too. The Senator will notice that it does not compel the specification of shade trees in any case. It is only in those cases in which, in the judgment of the Secretary of Agriculture, it is practicable and desirable that shade trees should be planted. Then he shall specify them, as he would the other details of the road.

I do not mean to make any lengthy remarks upon the subject. Two years ago the Senate adopted the same amendment without apparent objection from any source. I was compelled to take a train in the middle of the afternoon, and just after I had left the Senate a motion was made to reconsider and strike out the amendment. It was done without debate, and I think without the Senate knowing what was going on.

All of us realize the necessity in this country of protecting our roads, if we can, by the use of shade trees, where it will not injure a road or be to the disadvantage of the public.

Mr. ODDIE. Mr. President, I accept the amendment.

Mr. BLAINE. Mr. President, I hope this amendment will not be inserted in the bill. Just as I suggested a few moments ago, the time is not far distant when the Federal Government is going to reach out its hands and attempt to assume complete jurisdiction over highways to which they contribute very little money in comparison with what the States contribute.

In some sections it is a positive injury to a highway to have shade trees along the highway, and we are endeavoring to cut them out and clear the roadsides, so that the highway might have its proper drainage and the proper sun and the proper air in the springtime and in seasons of great rainfall and in the wintertime, because of the snow that fills in the cuts and the grades, and is held in them for months many, many feet deep. Here is a proposal to turn over to an individual in the city of Washington, far away from those localities, the power to compel the planting of shade trees along those highways.

I think this is yielding a duty and a right that belongs to the respective States of this Nation, and for that reason I hope the amendment will not be adopted. I think this is a bill which, in view of the circumstances that have arisen this morning, really ought to go over for very deliberate consideration. Therefore I am persuaded to object.

The PRESIDING OFFICER. The bill will go over.

Mr. MOSES obtained the floor.

Mr. ODDIE. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Nevada?

Mr. MOSES. I yield.

Mr. ODDIE. I will ask the Senator from Pennsylvania if, in the face of this objection, he will not consent to withdraw the amendment?

Mr. REED of Pennsylvania. No; Mr. President, certainly it is high time that in the United States we should begin to give some thought to the beauty of our countryside.

Mr. FLETCHER. Regular order!

Mr. MOSES. Under the regular order, I am recognized. I ask unanimous consent to return to Calendar No. 318.

Mr. FLETCHER. I object. If the Senator will allow the next bill on the calendar to be passed, to which there can be no objection, I will make no objection to his request.

Mr. MOSES. Does the Senator mean Calendar No. 341?

Mr. FLETCHER. Calendar No. 341. I want to have that bill disposed of.

JOE W. WILLIAMS

The PRESIDING OFFICER. The clerk will report Calendar No. 341.

The CHIEF CLERK. Senate bill 484, a bill for the relief of Joe W. Williams.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. HEFLIN. Mr. President, it is almost 2 o'clock, and as there are a great many bills which have not been reached, I suggest to the Senator from Kansas that we go ahead with the calendar after 2 o'clock.

Mr. CURTIS. Mr. President——

Mr. MOSES. I still have the floor, and I yield to the Senator from Kansas.

Mr. CURTIS. It was my intention to ask at 2 o'clock that the unfinished business be temporarily laid aside and that we proceed to the consideration of unobjected bills on the calendar. I do hope, if that consent shall be given, that Senators will confine themselves to short debate, to the five minutes allowed under the rule, and that they will not continue to ask us to go back and take up bills that have been passed over. In this way we can devote all the afternoon to the consideration of measures to which there is objection, and I hope that we may complete the calendar.

Mr. ODDIE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. ODDIE. I will ask what is before the Senate now?

Mr. MOSES. The Senator from New Hampshire is before the Senate.

Mr. ODDIE. What bill?

The PRESIDING OFFICER. Senate bill 484, for the relief of Joe W. Williams.

Mr. ODDIE. I will ask that that go over until I have an opportunity to study it.

Mr. FLETCHER. Mr. President, may I say to the Senator that it is a bill which affects simply the question of adjusting some confusion in the title of lands in Alabama and Florida.

Everybody is in favor it; the department is in favor of it, and it merely enables the quieting of the title.

Mr. ODDIE. Under those circumstances, I withdraw my objection.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to convey by patent to Joe W. Williams, of Chipley, Fla., the west half of the west half of section 19, township 7 north, range 12 west, Houston County, Ala., upon payment by the said Joe W. Williams to the United States of the sum of $1.25 per acre, at any time within 90 days after the enactment of this act: *Provided*, That upon default on the part of said Williams in making such payment within said period, all rights hereby conferred shall lapse.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TRANSPORTATION OF MAILS BY AIR TO FOREIGN COUNTRIES

Mr. MOSES. Mr. President, I renew my request for unanimous consent to return to Calendar No. 318, Senate bill 1666, to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service from the appropriation of foreign mails at fixed rates per pound or per mile, and for other purposes.

Accepting the rebuke of the Senator from Kansas about returning to bills on the calendar, I will say that I was engaged in a subcommittee with a hearing and could not be here when the calendar was called earlier in the day.

Mr. CURTIS. Mr. President, the so-called rebuke was not intended as a rebuke. It was a warning simply that if we are to get through with the calendar we should not go back to bills to which objection has been made.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Hampshire? The Chair hears none.

Mr. MOSES. Mr. President, I report back favorably from the Committee on Post Offices and Post Roads the bill (H. R. 7213) to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound or per mile, and for other purposes.

This bill is identical with Senate bill 1666 and has been passed upon by the Committee on Post Offices and Post Roads. It applies simply to an authorization of the Postmaster General to make contracts for the carrying of air mail into foreign countries. He already has the authority to make contracts for the transportation of mail as between the States, but none as to the transportation of mail into foreign countries by air. There is a development of air mail routes into Latin America particularly, which it is desired to make use of by reason of this legislation. The bills are exactly the same in terms, almost exactly the same in language, and I would like, if unanimous consent is granted to return to the consideration of this bill, to substitute the House bill for the Senate bill, and to ask for its passage.

Mr. KING. I would like to ask the Senator if there is any necessity for this legislation at the present time.

Mr. MOSES. This legislation covers no increase in appropriation whatever. It simply gives the Postmaster General the authority to make contracts under the existing appropriation for air mail transportation, so that there may be air mail transportation between this country and Latin America. There is not a cent involved in it; it is merely a matter of discretion and judgment on the part of the Postmaster General, and it is essential only in so far as it is generally regarded as essential to bring about the development of air mail transportation.

Mr. ROBINSON of Arkansas. Mr. President, may I ask the Senator a question?

Mr. MOSES. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. Referring to the proviso on page 2, that "in the award and interpretation of the contracts herein authorized, the decision of the Attorney General shall be final, and not subject to review by any officer or tribunal of the United States, except by the President and the Federal courts," is that a change in existing law or a new law?

Mr. MOSES. No; it is not a change in the existing law. It is a fact that exists with respect to all contracts which are made by the Post Office Department for transportation of mails, whether by rail, by bus, by water, or in any other way whatever.

Mr. KING. What is the necessity of the limitation?

Mr. MOSES. I will say to the Senator from Utah that it is in order to obviate the constant recourse which used to be had by contractors for carrying the mails when they would find themselves frequently in a situation where, by reason of physical conditions, they found it more expensive to carry the mails than they had anticipated when they made their bid and accepted the contract, and they kept coming here repeatedly to Congress for relief by legislation. It is in order to do away with all that, and to make whatever contract is entered into final and conclusive.

Mr. ROBINSON of Arkansas. Congress can not estop itself from further legislation on the subject. This would not prevent the Congress itself, either now or at another session, from repealing this provision or enacting any other it wanted to.

Mr. MOSES. That is true; but it will provide to the Senator from Arkansas, in his capacity as a member of the Committee on Post Offices and Post Roads, with ample justification for refusing to consider such pleas as are brought to us.

The PRESIDING OFFICER. Is there objection to substituting House bill 7213 for Senate bill 1666?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider House bill 7213, which was read, as follows:

Be it enacted, etc., That when, in his judgment, the public interest will be promoted thereby, the Postmaster General is authorized to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound or per mile; and the Postmaster General is hereby authorized to award such contracts to the bidders that he shall find to be the lowest responsible bidders that can satisfactorily perform the service required to the best advantage of the Government: *Provided*, That the rate to be paid for such service shall not in any case exceed $2 per mile: *And provided further*, That in the award and interpretation of the contracts herein authorized, the decision of the Postmaster General shall be final, and not subject to review by any officer or tribunal of the United States, except by the President and the Federal courts.

SEC. 2. The Postmaster General shall make and issue such rules and regulations as may be necessary to carry out the provisions of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. The Senate bill will be indefinitely postponed.

ORDER OF BUSINESS

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is Senate Joint Resolution 46.

Mr. CURTIS. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed with the consideration of unobjected bills on the calendar until the calendar is completed, with the exception that I understand the Senator from New York [Mr. COPELAND] desires to present his resolution, which will take just a few moments.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. KING. I suppose the Senator means when the call of the calendar is completed we are not to return to the beginning?

Mr. CURTIS. That is my idea. I will state that if the call of the calendar is completed this afternoon, it is my intention to ask that when the Senate adjourns to-day it shall adjourn to meet at noon Monday next.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas? The Chair hears none. The unfinished business is temporarily laid aside. The clerk will state the next bill on the calendar.

RURAL POST ROADS

Mr. ODDIE. Mr. President, I ask unanimous consent to return again to Calendar 320, the bill (S. 1341) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada?

Mr. LA FOLLETTE. I will withdraw my objection for the present.

Mr. ROBINSON of Arkansas. I think we should proceed with the calendar.

Mr. ODDIE. I think the last objection has been settled, and that we can get through with the consideration of the measure in a few minutes.

Mr. LA FOLLETTE. I reserve the right to object.

The PRESIDING OFFICER. That is equivalent to objection.

Mr. LA FOLLETTE. Very well; I withhold my objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. ODDIE. The last amendment to the bill is proposed by the Senator from Pennsylvania. I have just consulted with him and the Senator from Wisconsin about it, and we have decided that with this amendment the bill will be accepted. I therefore will offer the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 5, after line 21, insert the following new section:

SEC. 5. In every case in which, in the judgment of the Secretary of Agriculture and the highway department of the State in question, it shall be practicable to plant and maintain shade trees along the highways authorized by said act of November 9, 1921, and by this act, the planting of such trees shall be included in the specifications provided in section 8 of said act of November 9, 1921.

Mr. REED of Pennsylvania. I accept that modification of my amendment.

The amendment as modified was agreed to.

The bill was reported to the Senate and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SALE OF LANDS NEAR GARDEN CITY, KANS.

The bill (S. 2545) to authorize the sale of certain lands near Garden City, Kans., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the State of Kansas be, and it is hereby, authorized to sell all or any part of the following-described land granted to said State under the provisions of the act of Congress approved June 22, 1916, to wit: Sections 25, 26, and 35 in township 24 south, and sections 1 and 2 in township 25 south, all in range 33 west of the sixth principal meridian, notwithstanding the restrictions contained in said act: *Provided*, That the proceeds of said sale shall be used to purchase land in sections 23 and 24 in township 24, range 33, and in sections 19 and 30 in township 24, range 32, all in Finney County, Kans., to be used as a State game preserve.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC LANDS IN OKLAHOMA

The bill (S. 2725) to extend the provisions of section 2455, United States Revised Statutes, to certain public lands in the State of Oklahoma was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That all the provisions of section 2455, United States Revised Statutes, as amended, be, and they are hereby, extended to surveyed, unreserved, unappropriated nonmineral public lands in that part of the State of Oklahoma formerly comprised in Oklahoma Territory: *Provided*, That this act shall not apply to any such area where under existing law such lands are now subject to public or private sale: *Provided further*, That the proceeds of all sales hereunder shall be deposited in the Treasury of the United States to the credit of such fund or funds as may be provided by existing law for the disposition of such lands.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

IMPERIAL COUNTY (CALIF.) HIGHWAY

The bill (H. R. 5686) granting a right of way to the county of Imperial, State of California, over certain public lands for highway purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized, subject to valid existing adverse rights, to grant to the county of Imperial, State of California, for use as a public highway all the right, title, and interest of the United States of America in and to all or any of the following-described property, situated in the county of Imperial, State of California, being 80 feet in width and lying 40 feet northerly and southerly of and parallel with the following-described center line:

Beginning at the common corner of sections 1, 2, 11, and 12 of township 17 south, range 16 east, San Bernardino base and meridian; thence easterly along the section line between sections 1 and 12 of township 17 south, range 16 east, and between sections 6 and 7, 5 and 8, 4 and 9, 3 and 10, 2 and 11, and 1 and 12 of township 17 south, range 17 east, and along the southerly line of sections 6, 5, and 4 of township 17 south, range 18 east, San Bernardino base and meridian, to a point in the southerly line of the last-mentioned section 4, which point is 828.42 feet westerly of the southeast corner of said section; thence northeasterly around a circular curve having a radius of 2,000 feet concave to the northwest, a distance of 1,570.80 feet to a point; thence north 45 degrees east, 5,810.17 feet to a point; thence northeasterly around a circular curve having a radius of 2,000 feet concave to the southeast, a distance of 1,570.80 feet to a point in the northerly line of section 2, township 17 south, range 18 east, San Bernardino base and meridian, which point is 828.42 feet easterly of the northwest corner of the last-mentioned section 2; thence easterly along the northerly line of sections 1 and 2, township 17 south, range 18 east, San Bernardino base and meridian, to its intersection with the center line of the California State highway extending from Holtville, Calif., to Yuma, Ariz.: *Provided*, That the Secretary of the Interior be, and he hereby is, authorized, as a condition precedent to the granting of said parcels of land for the purposes herein specified, to prescribe such conditions, to impose such limitations and reservations, and to require such bonds or undertakings as he may deem necessary in order to protect valid existing rights in and to said lands, including reclamation and public water reserve purposes: *Provided further*, That the grant herein made shall not apply to the southwest quarter, section 1, township 17 south, range 16 east, San Bernardino meridian.

SEC. 2. That the land herein ceded shall revert back to the United States when same shall cease to be used as a public highway.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ZUNI INDIAN RESERVATION, N. MEX.

The bill (S. 1456) to authorize an appropriation for a road on the Zuni Indian Reservation, N. Mex., was considered as in Committee on the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment on page 1, line 10, after the word "practicable" to insert the following additional proviso: "*And provided further*, That the proper authorities of the State of New Mexico or the county of McKinley shall agree to maintain such road free of expense to the United States," so as to make the bill read:

Be it enacted, etc., That there is hereby authorized an appropriation of $8,000, out of any money in the Treasury not otherwise appropriated, for the construction of that portion of the Gallup-St. Johns highway within the Zuni Indian Reservation, N. Mex., under the direction of the Secretary of the Interior and in conformity with such rules and regulations as he may prescribe: *Provided*, That Indian labor shall be employed so far as practicable: *And provided further*, That the proper authorities of the State of New Mexico or the county of McKinley shall agree to maintain such road free of expense to the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF FEDERAL RESERVE ACT

The bill (S. 1989) to amend the third paragraph of section 13 of the Federal reserve act was considered as in Committee of the Whole. The bill had been reported from the Committee on Banking and Currency with amendments, on page 2, line 1, to strike out the words "are drawn to finance" and to insert in lieu thereof the words "grow out of," and on page 2, line 3, after the word "marketable" to insert the words "agricultural and other," so as to make the bill read:

Be it enacted, etc., That the third paragraph of section 13 of the Federal reserve act be amended and reenacted to read as follows: "Upon the indorsement of any of its member banks, which shall be deemed a waiver of demand, notice, and protest by such bank as to its own indorsement exclusively, and subject to regulations and limitations to be prescribed by the Federal Reserve Board, any Federal reserve bank may discount or purchase bills of exchange payable at sight or on demand which grow out of the domestic shipment or the exportation of nonperishable, readily marketable agricultural and other staples and are secured by bills of lading or other shipping documents conveying or securing title to such staples: *Provided*, That all such bills of exchange shall be forwarded promptly for collection, and demand for payment shall be made with reasonable promptness after the arrival of such staples at their destination: *Provided further*, That no such bill shall in any event be held by or for the account of a Federal reserve bank for a period in excess of 90 days. In discounting such bills Federal reserve banks may compute the interest to be deducted on the basis of the estimated life of each bill and adjust the discount after payment of such bills to conform to the actual life thereof."

Mr. KING. Mr. President, I ask for an explanation of the bill.

Mr. SHEPPARD. Mr. President, the intermediate rural credits act amended the Federal reserve act so as to extend

the privilege of rediscount to drafts, with bills of lading attached, drawn to finance the shipment of agricultural products. The Federal reserve banks held in administering this law that the term "agricultural" referred only to raw agricultural products and, therefore, did not extend the privilege to finished agricultural products such as cottonseed oil, bran, flour, canned corn, and things of that kind. The Federal Reserve Board feels that if the privilege is extended to finished agricultural products it will be of great benefit to agriculture and to commerce as well, and will carry out the original intention of the first enactment.

Mr. ROBINSON of Arkansas. The Federal Reserve Board makes no objection?

Mr. SHEPPARD. The Federal Reserve Board recommends it.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL INDEFINITELY POSTPONED

The bill (H. R. 972) for the relief of James C. Simmons, alias James C. Whitlock, was announced as next in order. The bill had been reported adversely from the Committee on Military Affairs.

Mr. REED of Pennsylvania. I move that the bill be indefinitely postponed.

The motion was agreed to.

FRED R. NUGENT

The bill (H. R. 4536) for the relief of Fred R. Nugent was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Fred R. Nugent, who was a private in the Hospital Corps, United States Army, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of that organization on the 7th day of April, 1899: *Provided*, That no back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PROTECTION OF FISH IN THE DISTRICT OF COLUMBIA

The bill (S. 2972) for the further protection of fish in the District of Columbia and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 2 of the act of May 17, 1898, entitled "An act for the protection of fish in the District of Columbia," etc, as amended by the act of March 3, 1901, entitled "An act to amend the acts for the protection of birds, game, and fish in the District of Columbia," be, and the same is hereby, further amended so as to read as follows:

"SEC. 2. That no person shall catch or kill in the waters of the Potomac River or its tributaries within the District of Columbia any black bass (otherwise known as green bass and chub), crappie (otherwise known as calico bass and strawberry bass), between the 1st day of January and the 29th day of May of each year, nor have in possession nor expose for sale any of said species between the dates aforesaid, nor catch or kill any of said species of fish at any other time during the year except by angling, nor catch nor kill any of the aforesaid species by what are known as out lines or trot lines, having a succession of hooks or devices."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1131) to encourage and promote the production of livestock in connection with irrigated lands in the State of Wyoming was announced as next in order.

Mr. KENDRICK. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

NELLIE KILDEE

The bill (S. 1755) for the relief of Nellie Kildee was considered as in Committee of the Whole.

Mr. NYE. Mr. President, an error has occurred in the printing of this bill, on page 1, line 9. I move to strike out the numerals "1901" and to insert in lieu thereof the numerals "1902."

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 1, line 9, strike out "1901" and insert "1902," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to issue patent for the east half of the southwest quarter, and the west half of the southeast quarter of section 15, in township 44 north, and range 3 east, Boise meridian, in the State of Idaho, to Nellie Kildee, who settled and established residence thereon in 1902, when unsurveyed, upon which she put valuable improvements and fully complied with the homestead law prior to its withdrawal in 1906 for forestry purposes, and whose entry was canceled by the Department of the Interior and motion for the exercise of supervisory authority denied.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LYN LUNDQUIST

The bill (S. 1756) for the relief of Lyn Lundquist was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and directed to issue patent for the west half of the northeast quarter and the east half of the northwest quarter of section 15, in township 44 north, and range 3 east, Boise meridian, in the State of Idaho, to Lyn Lundquist, who settled and established residence thereon in 1902, when unsurveyed, upon which he put $3,000 worth of improvements and fully complied with the homestead law prior to its withdrawal in 1906 for forestry purposes, which claim was canceled March 26, 1914, and motion for the exercise of supervisory authority denied January 21, 1920.

Mr. JONES. Mr. President, I would like to have a brief explanation of the bill.

Mr. BORAH. Mr. President, the most I can say about the bill is that it has been here so long that the details have almost escaped me. It has passed the Senate three different times. It has never passed the House. It is a bill for the purpose of authorizing the Secretary of the Interior to issue patents to these people. The contention has been that they had not performed the work, but the committee on three different occasions found that they did.

Mr. JONES. I understand the committee found that they had complied with the homestead law?

Mr. BORAH. Yes.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGISTRATION OF LOBBYISTS

The bill (S. 1095) to require registration of lobbyists, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Judiciary with amendments.

The first amendment was, in section 1, page 1, line 4, after the word "engage," to strike out "whether," and in the same line, after the word "pay," to strike out "or otherwise"; and on page 2, line 3, after the word "Senate," to strike out "or by any other means. Third. In this act the word 'person' shall include both male and female, and the singular shall include the plural," so as to make the section read:

That a lobbyist, within the meaning of this act, is one who shall engage, for pay, to attempt to influence legislation, or to prevent legislation, by the National Congress.

Second. Lobbying, as defined and understood in this act, shall consist of any effort to influence the action of Congress upon any matter coming before it, whether it be by distributing literature, appearing before committees of Congress, or interviewing or seeking to interview individual Members of either the House of Representatives or the Senate.

The amendment was agreed to.

Mr. BRUCE. Mr. President, I am in sympathy with the general object of this bill. I think it is a good thing to require persons who endeavor to influence legislation to register. We have in Maryland a registration statute which requires everyone who goes to Annapolis, in the attempt to influence legislation, as a matter of pecuniary employment, to register his name, address, and so on, in a book.

That statute has not proved, practically speaking, entirely effective; but it is such a statute, it seems to me, as any State should as a matter of sound policy enact. But when a bill of this sort is introduced it is very easy, it seems to me, for it to overstep the mark; that is to say, not properly to discriminate between persons who are bringing perfectly legitimate forms of persuasion to bear upon legislative action and persons whose relations to legislation are such that any influence they may

exert might very well be carefully watched. The bill does not draw any distinction between lobbyists for pay.

Mr. CARAWAY. That is only where lobbying is their sole occupation. That is what they are doing it for, not because they have an interest as citizens but because they are paid to do it. That is the only point.

Mr. BRUCE. That is right. I think that is a sound distinction, but I submit this case to the Senator: Here is some one who happens to be the secretary of an association which is interested in pushing something legislatively. He receives a salary. Is he also to register when it becomes his duty as such secretary to distribute some literature, for instance, in behalf of his association? It might be, of course, that that literature, so far from being opprobrious in any respect, might be of a character eminently to promote the public welfare. Indeed, it might well relate to the work of some philanthropic or eleemosynary body? It seems to me that the language "a lobbyist within the meaning of this act is one who shall engage for pay"——

Mr. CARAWAY. That is it. If he is not hired for that purpose, then he does not fall within the provisions of the bill. But if some one hires him to come here and he accepts money to influence legislation, then it is his duty to register so we may know who hired him.

Mr. BRUCE. That is true, but suppose the person who comes here is acting as secretary of an association and as a part return for his salary as such secretary, we will say, is charged with the duty of promoting some measure pending in Congress by the distribution of literature.

The PRESIDING OFFICER. The time of the Senator from Maryland has expired. Does the Senator from Maryland object? We are under the five-minute rule.

Mr. BRUCE. I am sorry. It is a bill of the utmost importance. I am thoroughly in sympathy with it. What I was going to suggest was that it might well read "special pay."

Mr. CARAWAY. Mr. President, I will take the floor in my own behalf and I yield to the Senator from Maryland.

Mr. BRUCE. It seems to me the words "special pay" might answer the purpose, though that is not very apt language, I confess. Language ought to be employed that would discriminate between somebody who is paid especially for the purpose of coming down here and looking after legislation pending in Congress, and the secretary of some charitable association, for instance, who comes merely as an incident of his general duties.

Mr. CARAWAY. There is no question that he would have to accept employment for the purpose.

Mr. BRUCE. I do not think that the absence of such a distinction is quite proper, though I may be wrong.

Mr. ROBINSON of Arkansas. Mr. President, will my colleague yield?

Mr. CARAWAY. Certainly.

Mr. ROBINSON of Arkansas. I think it is a very grave question whether the amendment ought to be adopted without at least some further modification.

To illustrate what I mean, the bill would then apply only to persons who are directly employed to come here to influence legislation. The vast majority of lobbyists would be relieved from any responsibility to register under the provisions of the bill if the amendment now under consideration should be agreed to. Hundreds of men come here who are the paid representatives of corporations and of individuals interested in legislation. They are not specially employed for the purpose of lobbying against legislation, but while in the employ of the corporation or of the individual interested they are permitted or directed to come to Washington to oppose or to favor legislation. I doubt whether there are very many instances where lobbyists are specially employed to oppose or to favor certain measures. I think the bill as originally prepared by the junior Senator from Arkansas [Mr. CARAWAY] is far preferable to the bill as it will be after this amendment shall have been agreed to.

Mr. BRUCE. That was just the point I was endeavoring to make. As the bill originally read, before this amendment was suggested by the committee, it read "whether for pay or otherwise."

Mr. CARAWAY. The committee has recommended the words "or otherwise" be stricken out.

Mr. BRUCE. The words "or otherwise," it seems to me, certainly ought to be stricken out.

Mr. CARAWAY. I hope there will be no objection to the amendment as it is reported by the committee. I think it will meet the very purpose with which the Senator is in sympathy. The other amendment the Senator suggested to use the other day I should be happy to accept; that is, page 3, at the beginning of line 21, to strike out the word "and" and to insert the word "or."

Mr. BRUCE. And then to add, after the words "12 months," at the end of line 22, the words "or be both fined and imprisoned as aforesaid, in the discretion of the court."

Mr. CARAWAY. I would have no objection to that amendment.

Mr. BRUCE. I think the measure ought to be framed in that way so as to leave it in the discretion of the court either to impose a fine or imprisonment, or both.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Maryland yield to me?

Mr. BRUCE. Certainly.

The PRESIDING OFFICER. The Senator from Arkansas [Mr. CARAWAY] has the floor.

Mr. CARAWAY. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. I wish to suggest to the Senator from Maryland [Mr. BRUCE] that no effective lobby act can be expected unless provision is made to include under the provisions of the act all who receive yearly salaries and who appear in favor of or against legislation. In some of the States of the Union where lobby acts have been passed providing for registration of those only who receive special fees for appearing in favor of or against legislation the result has been that many lobbyists who received annual retainers and therefore did not have to make any report escaped the purposes of the act. It seems to me such acts should include all who either for yearly salaries or for special retainers appear in favor of or against legislation. I do not see how we can secure an effective act otherwise.

Mr. BRUCE. That may be; but in that event certainly a tremendously large registration book would be required. It would be like the Domesday Book. For instance, take the recent hearing on the electric light and power industry, where there were gathered at one time in the committee room 60 or 75 official representatives of the various electric light and power companies. They occupied pretty nearly all of the chairs in the room. Every one of them was probably in receipt of a salary from some electric light or power company. Is every one of them to register his name and address and then from month to month the amount of compensation that he received for his services here as a legislative agent?

Mr. CARAWAY. I think he would. I think that would come within the provisions of the proposed act.

Mr. WALSH of Massachusetts. I will say to the Senator from Maryland [Mr. BRUCE] that the Massachusetts law, after which this is modeled, has worked extremely well. The result has been to provide a very helpful agency in letting the public know who appeared for hire in favor and against legislation.

Mr. BRUCE. So far as I am concerned, I will say to the Senator from Massachusetts——

The PRESIDING OFFICER. The time of the Senator from Arkansas [Mr. CARAWAY] has expired.

Mr. BRUCE. I merely want to offer one amendment, Mr. President.

Mr. GEORGE obtained the floor.

Mr. BRUCE. Mr. President——

Mr. GEORGE. I yield to the Senator from Maryland.

Mr. BRUCE. On page 3, line 21, I move to strike out the word "and" and to substitute the word "or"; and after the words "12 months," at the end of line 22, I move to add the words "or be both fined and imprisoned as aforesaid in the discretion of the court."

Mr. CARAWAY. I should have no objection to that amendment. I do not want to make it mandatory that the court shall imprison a defendant, but that he may fine or imprison in his discretion.

Mr. BRUCE. That is correct. I think the court should have the discretion to do either or both.

The PRESIDING OFFICER. The first amendment proposed by the Senator from Maryland [Mr. BRUCE] will be stated.

The CHIEF CLERK. The first amendment is on page 3, line 21, to strike out the word "and" and to insert the word "or."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Maryland.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment proposed by the Senator from Maryland will be stated.

The CHIEF CLERK. On page 3, at the end of line 22, it is proposed to insert the words "or be both fined and imprisoned as aforesaid in the discretion of the court."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Maryland.

Mr. GEORGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia desire to address himself to the amendment of the Senator from Maryland which has just been stated?

Mr. GEORGE. Mr. President, I wish to address a question to the Senator from Arkansas, because I have not had time to study the bill. Does the bill define as a lobbyist one who appears for himself because of his interest in legislation?

Mr. CARAWAY. No, sir; it would not abridge the right of petition. The first section says:

That a lobbyist within the meaning of this act is one who shall engage for pay—

It is the man who hires himself out to influence legislation, either to promote or defeat legislation, which the bill is aimed to reach. It does not undertake to curtail the right of petition, the right of people who feel interested in legislation to come here and make all the representations they want to make. They could do that without falling within the provisions of the bill.

Mr. GEORGE. The citizen himself who is affected by legislation and who appears in behalf of such legislation or in opposition to such legislation is not within the bill?

Mr. CARAWAY. Absolutely not.

Mr. GEORGE. Is the definition of lobbyist broad enough to include the representatives of newspapers?

Mr. CARAWAY. It would not, because their purpose and business is not that of lobbying. The bill affects those who come here for hire. The newspapers may make any representations and take any position they may wish and wage any kind of crusade they desire for or against legislation. The bill will not abridge the freedom of the press nor the freedom of speech nor the right of petition, and it is not intended to do so.

Mr. GEORGE. It would not include a case where a newspaper or publication received special compensation to champion or to oppose legislation?

Mr. CARAWAY. I think if a newspaper should hire itself out for that purpose it would be included under the bill.

Mr. GEORGE. It would cover such a case?

Mr. CARAWAY. Yes.

Mr. McKELLAR. As I understand, the bill applies only to those who lobby for pay.

Mr. CARAWAY. That is all that is provided for.

Mr. SMOOT. Mr. President, may I ask the Senator a question?

Mr. CARAWAY. The Senator from Georgia has the floor.

Mr. GEORGE. I merely wished to say in that connection that America's most distinguished humorist, Will Rogers, in the morning press seems to have placed himself in the class of lobbyist, as I think. He declares for the Madden bill, or the American Cyanamid Co.'s offer for Muscle Shoals. Notwithstanding the fact that he is a humorist, his statement is evidently influenced by the hope that he will receive "pay," since his statement deals neither with facts nor is confined to the truth.

Mr. SMOOT. Mr. President, I wish to ask the Senator if the bill as amended would require a person to register who may be appointed by a chamber of commerce for the purpose of coming to Washington in regard to a certain piece of legislation and who received no compensation other than his railroad expenses?

Mr. CARAWAY. The bill would not do that. Citizens could get together and pay the expense of a thousand people if they so desired to come here and make representations as to their rights or interest, and they would not fall within the provisions of the bill.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Maryland.

Mr. BLEASE. Mr. President, I have no objection to the passage of this bill, but I think a great deal more has been said about the lobby question than is justified by the facts. It may be possible that I have not sufficient influence in the Senate or even sufficient control of my own vote to have any so-called lobbyists approach me, but in my three years of service in the Senate up to this time there has not been a single man or woman as the representative of any corporate interest or any private interest who as a lobbyist has called on me or has attempted to control my vote in respect to any measure which has been before the Senate. I think the recent articles published in newspapers in reference to a great lobby being active in Washington in opposition to the resolution of the Senator from Montana [Mr. WALSH] are an insult to and an outrage upon every Member of this body. I saw no signs here of any great lobby; I saw no signs of any Senator being unduly influenced, and yet we have read slurs in some of the newspapers, even going so far as to give the names of individual Senators, and attempting to belittle the Senate as a body before the American people.

In my opinion, a bill or a resolution bringing before the bar of the Senate those who do that kind of writing and who spread that kind of talk and requiring them to show what Senator has been unduly influenced by some lobbyist or what Senator has changed his vote or his position on measures because of some reward or the hope of some reward, political or otherwise, would do more good and have a better effect in placing the Senate, individually and collectively, in a proper light before the American people, than a bill along the lines of the one now pending.

As I have said, I do not object to the bill, but I merely wanted to put myself on record as condemning, so far as I am concerned, this outrageous talk and writing that is continually going on about Senators being unduly influenced by somebody on the outside.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The question is on the amendment offered by the Senator from Maryland.

Mr. KING. Mr. President, under the definition of a lobbyist it occurs to me that persons who speak to Senators when they are home or who write to them from their homes regarding legislation prospective or pending in Congress, if they are paid, would come under the denunciation of the proposed statute.

Mr. CARAWAY. Of course, if they hire out to influence legislation they would come within the provisions of the bill.

Mr. WALSH of Massachusetts. Why should they not? Why should we not know who they are?

Mr. KING. Mr. President, I wish to ask the Senator a further question. Take a case of this character. I recall when I was home last summer that persons who are interested in a grazing act in a section of the State employed one of their neighbors to come to Salt Lake City and confer with me and, I am inclined to think, to confer also with the senior Senator from Utah [Mr. SMOOT], as to certain legislation in regard to the public domain. Undoubtedly that person was paid for his services or for the journey, some 300 or 400 miles. He did not come to Washington; he did not contemplate doing so; but he wanted to get the views of Senators, or at least one Senator, as to the possibility of such legislation. Would he be amenable to the provisions of this proposed act?

Mr. CARAWAY. There might be a line of demarcation there about which I could not tell. Of course, the act speaks for itself. It has in contemplation only those who come to Washington to undertake to influence legislation. Under a hypothetical case, I do not know. I have a very strong opinion about it, but I do not want to make an expression of opinion.

Mr. KING. What would the Senator say regarding this matter: I have received probably a thousand pieces of literature from various parts of the Southern States in regard to flood control. Much of it undoubtedly has been paid for by individuals. Some of the literature has come from representatives of organizations, and those representatives undoubtedly were paid. Would such a person have to register, although he does not come here?

Mr. CARAWAY. Of course he is not going to register if he does not come here, because he could not register down there. There are any number of cases where there might be technical violations, as there are of every law on the statute books, that nobody ever expects to come within the provisions of the law, and nobody expects ever to try to enforce the law against them. It is the purpose of the measure to require publicity. That is the idea of the bill. For instance, we receive telephone messages——

Mr. KING. I want to ask one or two other questions, and my time is limited.

Mr. CARAWAY. I beg the Senator's pardon.

Mr. KING. I just want to get the Senator's view. Take another case: I have had perhaps 10 or 15 telegrams and letters from various game organizations and from wardens, some in favor of and some protesting against a certain bill which is pending in the Senate. Undoubtedly those wardens were paid. Undoubtedly some of the secretaries of the organizations for the protection of game, wild birds, and so forth, are paid. Would they come within the provisions of the statute?

Mr. CARAWAY. I do not think so; but——

Mr. KING. I confess that I am not able to determine the implications and the far-reaching effects of this measure.

Mr. BRUCE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield; and if so, to whom?

Mr. KING. I am trying to get the view of my friend from Arkansas, because I respect his view very much.

Mr. CARAWAY. I am trying to give it to the Senator.

My view of the matter is that, like any other law, this law will have to be enforced with common sense. I have not the remotest idea that any court would say that it would curtail the right of petition, representation, and direct appeal to Members of Congress. It only applies to that class of people who make a profession of influencing or who have for the time being the occupation for hire of influencing legislation.

Mr. KING. May I say to the Senator that I received this morning a letter from a gentleman who represents, I know, a number of persons who are interested in a certain bill, the Army retirement bill. He has, I am advised, been traveling around, receiving pay, and he has written me asking me to support the bill. Would he come within the terms of this bill?

Mr. CARAWAY. If he were to come here lobbying for the bill he would.

Mr. KING. He does not come here. He writes me.

Mr. CARAWAY. I do not think his writing the Senator a letter from out in Utah would be construed by any court on earth as bringing him within the provisions of the bill. That is my judgment about the matter.

Mr. KING. It seems to me that he would be within its provisions. It seems to me the bill would apply to any person who interviews or seeks to interview a Senator, whether he is here or whether he is at home or on a railroad train.

Mr. BRUCE. Or, if the Senator will allow me to interrupt him, who distributes literature.

Mr. KING. Or who distributes literature. I think such a person would come within the provisions of the bill. It is very dangerous, it seems to me. I think it would prevent chambers of commerce or others from distributing literature unless they registered. They would have to come here and register. The bill is very far-reaching in its effects.

The PRESIDING OFFICER. The time of the Senator from Utah has expired.

Mr. BRUCE. Mr. President, this bill is a matter of very great importance; and, of course, it would not be going through as rapidly as it is but for the fear on the part of Members of the Senate of being exposed to misconception and misconstruction and told that they passed this bill because they were afraid not to pass it. We are all in sympathy with the general purposes of the bill, apparently. Why should we not, however, perfect its provisions so as not to do needless injustice to anybody?

Mr. BORAH. Mr. President, this bill has had pretty thorough consideration in the committee. I do not think Senators are hesitating to oppose it simply for fear they might be thought to be siding with the lobbyists. It may be possible that the bill needs some further consideration, but my judgment is that the bill is effective for the purpose for which the author introduced it. If there is any criticism of the bill it is because already it has been liberalized, if I may say so, rather than made drastic. I think the bill ought to pass.

Mr. BRUCE. Mr. President, let me ask the Senator from Idaho if he feels satisfied that this bill discriminates clearly between legitimate propaganda and lobbying?

For instance, take our friends of the Anti-Saloon League. They had a paid agent here, Mr. Wheeler, and so did the Association Against the Prohibition Amendment, perhaps. Mr. Wheeler was paid by the year. He was paid to carry on perpetual lobbying, you may say, at the Capitol; and so there are charitable organizations, organizations in the United States, which have secretaries who are constantly mailing literature of every sort—most valuable literature, most useful literature—to Members of Congress. What I should like to know is, would it be possible for the counsel or the secretary of the Anti-Saloon League, or the counsel or the secretary of the Association Against the Prohibition Amendment, or the secretary of the League of Women Voters, or the secretary of any public-spirited association to send me as a Senator literature without incurring the penalties of this bill in case there had not been registration?

My cry is the cry of Goethe on his death bed, "Light! More light!" When any question is pending in this body, the first thing I do is to turn to every scrap of written material, pro or con, relating to the question; and I presume that this is the course pursued by every other Member of the Senate.

I do not want to be cut off from sources of light because it is believed that close by sources of light there are sources of darkness. This bill says that a lobbyist within the meaning of the bill is one who shall engage in certain activities for pay—for what sort of pay? For pay pro hac vice for the particular legislative purpose in hand, or pay as a secretary by the year for carrying on the general duties of secretary of an association?

There certainly is a valid distinction there that should be observed. We do not want unduly to restrict the right of disinterested individual men and women to come here and to enlighten us with regard to public questions.

Mr. CARAWAY. Nobody could put that construction on it.

Mr. BRUCE. I hope not. As I say, I am absolutely friendly to this bill if it is properly safeguarded.

Of course, I think that there is no little claptrap talked about lobbying. The other day the representatives of the electric light and power interests who gathered in the committee room of the Interstate Commerce Committee were all stigmatized as lobbyists. They had just as much right to be in that room as the members of the Interstate Commerce Committee themselves. They were American citizens, corporate officers, owners of property, charged with responsibilities only less great than the public responsibilities with which we are charged. Why did not they have as much right to their seats in that committee room as we have to our seats in this Chamber? If, however, one of them was prepared for a special compensation to ply a Member of this body with corrupt solicitations or influences of any sort, or even ordinary argumentative persuasion, he should be made to register, and, of course, should be punished if he violated the terms of his registration.

The PRESIDING OFFICER. The time of the Senator from Maryland has expired.

Mr. BRUCE. I do ask the Senate, by unanimous consent, to allow this discussion to continue, without reference to myself, in order that the bill may be perfected.

Mr. CURTIS. Mr. President, unanimous consent was given to consider unobjected bills. The Senator realizes that if the bill is to be discussed at length we have morning hours when bills can be so discussed. If this bill is to take the two hours, I hope somebody will object to it so that we may go on with the calendar.

Mr. BRUCE. But I do not think we will find——

Mr. COUZENS. I object, then, if that is all there is to it.

The PRESIDING OFFICER. Objection is heard. The bill will be passed over.

Mr. BRUCE. Mr. President, I will say nothing more about the bill. Let us put it through. Let us pass it right now. I will take my chances on it.

Mr. CARAWAY. I hope the Senator from Michigan will withdraw his objection in view of that statement.

Mr. COUZENS. I do not object if we are going to proceed according to the unanimous-consent understanding, but if we are going to debate the bill all afternoon I will object.

The PRESIDING OFFICER. Does the Senator from Michigan withdraw his objection?

Mr. COUZENS. I withdraw my objection.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Maryland, which will be stated.

The CHIEF CLERK. On page 3, at the end of line 22, it is proposed to insert "or be both fined and imprisoned as aforesaid, in the discretion of the court."

The amendment was agreed to.

The next amendment of the Committee on the Judiciary was, in section 2, page 2, line 18, after the word "incident," to strike out "to the carrying on of his calling as a lobbyist" and to insert "to his employment. The Clerk of the House of Representatives and the Secretary of the Senate shall within six days after any lobbyist shall have registered under the provisions of this act file with their respective bodies and have printed in the CONGRESSIONAL RECORD the information required by this act to be registered. And each month the Clerk of the House of Representatives and the Secretary of the Senate shall likewise file with their respective bodies and have printed in the CONGRESSIONAL RECORD a copy of the financial report required by section 3 hereof," so as to make the section read:

SEC. 2. Any person, before he shall enter into and engage in lobbying as defined in this act, shall register with the Clerk of the House of Representatives, and the Secretary of the Senate, and shall give to these officers his name, address, the person, association, or corporation by whom or by which he is employed, and in whose interest he appears as a lobbyist. He shall also disclose the interest he himself may have, or those whom he represents, in the proposed legislation, or for the defeat of legislation. He shall likewise state how much he has been paid, and is to receive, and by whom he is paid, or is to be paid, and how much he shall be allowed for expenses incident to his employment. The Clerk of the House of Representatives and the Secretary of the Senate shall within six days after any lobbyist shall have registered under the provisions of this act file with their respective bodies and have printed in the CONGRESSIONAL RECORD the information required by this act to be registered. And each month the Clerk of the House of Representatives and the Secretary of the Senate shall likewise file with their respective bodies and have printed in the CONGRESSIONAL RECORD a copy of the financial report required by section 3 hereof.

The amendment was agreed to.

The next amendment was, in section 4, page 3, line 14, after the word "oath," to insert "and he shall at the time he reg-

isters file a written authorization of his employment by the person by whom he is employed," so as to make sections 3, 4, 5, 6, and 7 read:

SEC. 3. At the end of each month he shall file with the Secretary of the Senate and the Clerk of the House of Representatives a report of moneys by him expended in carrying on his work as a lobbyist, to whom paid, and for what purpose, and give the names and date of any person or persons whom he has entertained as such lobbyist, and what the expense of this entertainment was.

SEC. 4. Reports required to be made shall be under oath, and he shall at the time he registers file a written authorization of his employment by the person by whom he is employed.

SEC. 5. Any person who may engage in lobbying without first complying with the provisions of this act shall be guilty of a misdemeanor, and upon conviction shall be fined not less than $100 and not more than $1,000 and be imprisoned in a common jail for not less than 1 month nor more than 12 months.

SEC. 6. Any lobbyist who shall make a false affidavit, where an affidavit is required in the provisions of this act, shall be deemed guilty of perjury, and upon conviction shall be punished as provided by statute for such an offense.

SEC. 7. A new registration shall be necessary for each session of Congress.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

WAR-TIME RANK FOR RETIRED ARMY OFFICERS

The bill (S. 2258) to give war-time rank to certain officers on the retired list of the Army was announced as next in order.

Mr. KING. Let that go over.

Mr. TYSON. Mr. President, will the Senator from Utah withhold his objection in order that I may explain the purpose of the bill?

Mr. KING. I withhold the objection.

Mr. TYSON. Mr. President, this is a bill that passed the Senate in practically the same form last year, and went to the House. It is for the purpose of permitting the President of the United States to nominate, and by and with the advice and consent of the Senate to appoint, any commissioned officer of the Army who served in the Army of the United States during the World War, whose service during that war was creditable, and who has been or hereafter may be retired according to law, to a rank on the retired list at the highest rank held by him during the World War, provided that no increase of pay and allowances shall result from the provisions of this act.

Mr. President, there are a great many officers of the Army who are at this time very far advanced in age. Many of them had a higher rank during the war than they have in the Regular Army at this time; and they feel that they ought to be allowed to have the rank which they held during the World War. I hope the Senator from Utah will withdraw his objection, and that the Senate will pass the bill. The officers of the Army are very anxious to have the rank which they held during the World War in order that their posterity may feel that they were entitled to that rank, and were not demoted, as many of them were, as the Senate well knows, after they came back from the World War.

The bill does not apply to any particular rank, but applies to officers of all ranks of the Army who were in the World War and who held a higher rank during the World War, and it is within the discretion of the President. He is not required to nominate any of these men unless he desires to do so.

It seems to me, Mr. President, that the bill is a very worthy one, and one that the Senate ought to pass.

Mr. KING. Mr. President, if these officers are on the retired list, and receive this promotion and this higher rank, would it advance them to the same emoluments as persons in that class?

Mr. TYSON. Not at all. Not a single penny of pay would they get in any way for this increased rank due to retirement.

Mr. KING. I withdraw the objection.

The PRESIDING OFFICER. The objection is withdrawn.

Mr. REED of Pennsylvania. Mr. President, I hope the bill will pass, as it passed last year, but I want to suggest a grammatical change to the Senator—that in line 9, on page 1, he strike out the words "may be" and put in "shall have been," because, of course, it is the intention of the bill that this brevet rank shall not be given until the officer retires.

Mr. TYSON. I shall be glad to accept the amendment.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs, with amendments, on page 1, line 6, after the word "Army," to strike out "not above the grade of brigadier general"; on the same page, line 10, after the word "to," to strike out "an advanced grade" and insert "a rank"; and on page 2, line 1, before the word "held," to strike out "grade" and to insert "rank," so as to make the bill read:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, to appoint any commissioned officer of the Army who served in the Army of the United States during the World War, whose service during that war was creditable, and who has been or hereafter may be retired according to law, to a rank on the retired list, at the highest rank held by him during the World War: *Provided*, That no increase of pay and allowances shall result from the provisions of this act.

The amendments were agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania offers an amendment, which will be stated.

The CHIEF CLERK. On page 1, line 9, after the word "hereafter," it is proposed to strike out "may be" and insert "shall have been," so as to read:

Whose service during that war was creditable, and who has been or hereafter shall have been retired according to law.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DOUBLE PENSIONS IN SUBMARINE CASUALTIES

Mr. TYDINGS. Mr. President, I ask unanimous consent that we recur to Senate bill 2998, granting double pension in all cases where an officer or enlisted man of the Navy or Marine Corps dies or is disabled as a result of a submarine accident. The Senator from Wisconsin, who objected this morning, has withdrawn his objection. I ask that the bill now be considered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maryland?

Mr. CURTIS. If it is not going to lead to debate, I shall not object. I shall feel obliged to object if it leads to debate.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That in all cases where an officer or enlisted man of the Navy or Marine Corps, while employed in actual duty on a submarine, dies or is disabled by an injury incurred in line of duty by reason of the increased hazard of the service, the amount of pension allowed shall be double of that authorized to be paid should death or disability have occurred by reason of an injury received in line of duty not the result of a submarine accident.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1940) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The bill will be passed over.

COLUMBIA BASIN RECLAMATION PROJECT

The bill (S. 1462) for the adoption of the Columbia Basin reclamation project, and for other purposes, was announced as next in order.

Mr. KING. Let that go over.

Mr. JONES. Mr. President, I know that the objection takes the bill over, but there is an amendment offered by the Senator from Idaho [Mr. BORAH] which meets the objection of the two Senators from that State, and I would like to have the amendment agreed to, and then the bill, of course, will go over.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. The Senator from Idaho proposes the following amendment: At the proper place insert a proviso to read as follows:

Provided, That no appropriation for construction under the gravity plan shall be made until a compact shall have been entered into between the States, either to determine the allocation of waters and definite storage elevation and areas or to determine the basic principles that for all times shall govern these matters: *And provided further*, That the passage of this act shall not in any respect whatever prejudice, affect, or militate against the rights of the State of Idaho, or the residents or the people thereof, touching any matter or thing or property

or property interests relative to the construction of the Columbia Basin project.

Mr. KING. Mr. President, if it is understood that as a result of my consenting that this amendment shall be added to the bill it does not advance it to a better stage or my consent is not regarded as a waiver of objection to its consideration I shall not object.

The PRESIDING OFFICER. The Senator can object to the bill at any stage. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KING. I object to the consideration of the bill.

The PRESIDING OFFICER. The bill will go over, under objection.

JOSEPH F. RITCHERDSON

The bill (H. R. 519) for the relief of Joseph F. Ritcherdson was announced as next in order.

Mr. KING. Let that go over.

Mr. CURTIS. Mr. President, this soldier, Joseph F. Ritcherdson, would get no money benefit from this measure, because he already draws a pension. The object simply is to give him recognition by giving him a discharge. There is no question but that he served for two years in the Army. He already draws a pension under private act. The bill was reported favorably by the Committee on Military Affairs, and I hope there will be no objection.

Mr. KING. I would like to ask the Senator if the soldier was dishonorably discharged?

Mr. CURTIS. He had no discharge whatever; that is the trouble. The soldier enlisted as a musician and instead of serving as a musician he served as a private in the Army. He was a boy about 14 years old, who substituted for a musician, and served for two years in the Southland, going wherever the organization went. He draws a pension now for that service, but he does want a discharge, and I think he is entitled to it. He is 80 years of age now.

Mr. KING. This would not increase the pension?

Mr. CURTIS. It would not increase his pension at all.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SURETY BONDS OF POSTAL EMPLOYEES

Mr. PHIPPS. Mr. President, this morning when Calendar No. 317, House bill 7030, was reached I allowed it to go over because I did not have at hand the report of the department on the bill. I ask unanimous consent to return to the consideration of the bill.

Mr. CURTIS. If no debate results, I have no objection.

Mr. KING. Let the Senator explain the bill. I have no objection to its consideration.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 7030) to amend section 5 of the act of March 2, 1895.

Mr. PHIPPS. The department advises as follows:

> Renewing bonds every four years means extra expense to the employees and more work for the department in recording the filing of the bonds. The proposed amendment, which is made in the interest of economy, reads as follows:
>
> "*Provided*, That the payment and acceptance of the annual premium on corporate surety bonds furnished by postal officers and employees shall be a compliance with the requirement for the renewal of such bonds within the meaning of this act."

This is a matter, Mr. President, which might really have been passed upon by the department itself, but they did not feel that they had the authority. It does not make any change in the status of the bond whatever, but at the expiration of the four years the Government employee in the Postal Service having paid his annual premium, the bond continues on, the surety having already been approved by the postal authorities.

Mr. KING. Mr. President, a few weeks ago I received a number of letters from a surety company objecting to a bill; I do not know whether it is this bill or not, and I am inclined to think it is not. I have no objection to the passage of the bill, with the understanding that if, upon examining the files in my office, I discover that the objections were to this bill, the Senator will consent on Monday to a reconsideration of the vote by which the bill was passed, and that it be placed back on the calendar.

Mr. PHIPPS. I think that is a perfectly fair proposition. I think the Senator will find that the objections relate to a different matter entirely.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AMENDMENT OF HAWAIIAN HOMES COMMISSION ACT

Mr. WILLIS. Mr. President, a few moments ago, under the objection by the Senator from Montana [Mr. WHEELER], we passed over Calendar 326, House bill 6989, to amend the Hawaiian Homes Commission act, 1920, approved July 9, 1921, as amended by act of February 3, 1923. I have since conferred with the Senator, and he advises me that he has no objection now to the consideration of the bill. I therefore ask unanimous consent to return to the consideration of the blil.

The PRESIDING OFFICER. Is there objection?

Mr. WILLIS. It is the Hawaiian homes act, which the Senator from Arizona [Mr. HAYDEN] explained.

Mr. LA FOLLETTE. I desire to ask the Senator to explain the bill.

The PRESIDING OFFICER. Is there objection to returning to the consideration of the bill?

Mr. LA FOLLETTE. Not if the Senator from Kansas will permit the Senator from Ohio to make an explanation of it.

Mr. CURTIS. If the explanation will last only about two minutes, I shall not object. I insist on going through this calendar this afternoon.

Mr. WILLIS. I think the Senator from Kansas is right, and I shall take only one minute.

The purpose of this Hawaiian homes act is to enable the native Hawaiian people to get back upon the land. That is the gist of it. A resolution was passed through the Hawaiian Legislature along this line.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DIVISION OF SAFETY, DEPARTMENT OF LABOR

The bill (S. 1266) to create in the Bureau of Labor Statistics of the Department of Labor a division of safety, was announced as next in order.

Mr. BAYARD. Let that go over.

Mr. SHORTRIDGE. Mr. President, I hope the Senator will permit this bill to pass. It was introduced at the instance of the Secretary of Labor, and was quite fully considered by the Committee on Education and Labor. It has been reported by the committee without amendment, it has been twice considered by the committee, and twice reported favorably. It is companion to a bill pending in the House. I must assume that Senators by this time are more or less acquainted with the scope and purpose of the bill.

Mr. BAYARD. I know the purpose of the bill, I may say to the Senator, and that is the reason why I object to it.

Mr. SHORTRIDGE. I hope the Senator will permit me to add this. I hold in my hand a letter addressed to me by Mr. Stewart, the Commissioner of Labor Statistics, accompanied by a letter addressed to him by the bureau of labor and statistics of the State of Arkansas.

I do not wish to take up the time of the Senate if it will be unavailing, but I am now taking up this time, addressing myself immediately to the Senator from Delaware, to the end that he will between now and the next call of the calendar make a further examination, and a more effectual one, to the end that the bill may come up for full consideration by the Senate. I understand the Senator's position, but I hope to persuade him that it is a meritorious measure.

Mr. BAYARD. I am fully aware of the subject matter of the bill, and I am thoroughly opposed to it in principle. More than that, I contend, knowing the facts as I do know them, that there is no valid reason why this legislation should be passed. This is taken care of in nearly all the States, and there is no necessity for having it taken care of by a Federal bureau.

Mr. SHORTRIDGE. I suppose I must conclude that any appeal of mine would be unavailing.

Mr. BAYARD. We have the necessary machinery now in our State, and the other States have, and they can compare their notes back and forth. It is wholly unnecessary for the Federal Government to stick its nose into this matter.

Mr. SHORTRIDGE. I think I understand the position of the Senator from Delaware, and he need not repeat it.

The PRESIDING OFFICER. Under objection, the bill will be passed over.

POULTRY DISEASES

The bill (S. 2030) to provide for research into the causes of poultry diseases, for feeding experimentation, and for an educational program to show the best means of preventing disease in poultry, was announced as next in order.

Mr. KING. I would like to have an explanation of the bill.

Mr. COPELAND. Mr. President, the poultry industry is the fourth largest industry in America. The poultry industry amounts to a billion dollars a year, and I am sorry to say that certain diseases are decimating the flocks of poultry in this country, particularly in the Mississippi Valley. The purpose of this measure is to give sustaining legislation to permit the agricultural appropriation subcommittee, when it gets to it, to consider on its merits the justification for the expenditure of sums for meeting experimentation and for the study of these diseases, in order that they may be wiped out.

Mr. REED of Pennsylvania. Mr. President, will the Senator submit to a question?

Mr. COPELAND. Of course.

Mr. REED of Pennsylvania. I notice by the report that the department says it already has all the authority that this act gives.

Mr. COPELAND. The committee gave consideration to that, may I say to the Senator from Pennsylvania, and since then the committee itself decided that there was not ample authority, and that they need this sustaining legislation.

Mr. SMITH. Mr. President, I would like to state in behalf of this measure that there is not a matter of more urgent importance. There are certain features of it that it might not be well to discuss on the floor of the Senate, but the measure is very important and very essential to the preservation of the poultry industry in this country. I think the bill as reported from the committee, after having been thoroughly investigated, is one which well deserves passage at the hands of this body.

Mr. REED of Pennsylvania. Mr. President, I am strongly in favor of giving the department this authority and I believe that it ought to be done, and I believe the bill ought to pass, but surely the Senator will permit me to suggest that section 2 and section 4 are not in the form in which authorizations ought to be passed by Congress. If they are intended to be appropriations, then the bill ought to go to the Committee on Appropriations.

Mr. COPELAND. We must have the sustaining legislation, and I am perfectly willing that the question of appropriations be entirely omitted now and that the appropriations be merely authorized at this time.

Mr. REED of Pennsylvania. That is what I mean, that they ought to be expressed as authorizations instead of a direction to the Secretary of the Treasury to pay.

Mr. SMITH. I think perhaps, if the Senator from New York will allow me, if the bill were amended so as to make it an authorization rather than a direction, it would fulfill all that is necessary.

Mr. REED of Pennsylvania. That is exactly the point.

Mr. KING. Mr. President, I am unwilling to consent to an appropriation now of $30,000. That amount may not be necessary. The Agricultural appropriation bill, which will be before us within a few days, carries an enormous appropriation. I have no doubt some fund is provided in the bill which would be available for just such experimentation as is called for here.

Mr. SMITH. Mr. President, I think the Senator is in error, because of the particular features to which this bill pertains.

Mr. KING. I withhold the objection for a moment.

Mr. COPELAND. I want the Senator from Pennsylvania to suggest the language, because the only thought is to authorize this matter, so that it can be dealt with.

Mr. REED of Pennsylvania. Mr. President, in order to bring it to the attention of the Senate, I move to strike out section 2 and to substitute instead the following words:

That to carry out the provisions of section 1 of this act the sum of $30,000 is hereby authorized to be appropriated.

Mr. COPELAND. I am glad to accept that amendment.

Mr. KING. Mr. President, why does the Senator from Pennsylvania suggest so large a sum?

Mr. REED of Pennsylvania. Because that is the sum carried by the bill itself. I do not know anything about the amount that is needed. I take it from the bill as it is written.

Mr. JONES. Mr. President, I am going to object to the consideration of the bill at this time. There may be a provision in the agricultural appropriation bill which will cover this matter.

The PRESIDING OFFICER (Mr. FESS in the chair). Under objection, the bill will go over.

PEARL RIVER BRIDGE, LEAKE COUNTY, MISS.

The bill (S. 3118) to authorize the construction of a temporary railroad bridge across Pearl River at a point in or near section 35, township 10 north, range 6 east, Leake County, Miss., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce, with an amendment, on page 1, line 6, after the word "point," to insert the words "suitable to the interests of navigation," so as to make the bill read:

Be it enacted, etc., That the Pearl River Valley Lumber Co. is hereby authorized to construct a temporary railroad bridge connecting its timber holdings and its lands and timber across Pearl River at a point suitable to the interests of navigation in or near section 35, township 10 north, range 6 east, Leake County, Miss., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

OHIO RIVER BRIDGE, GOLCONDA, ILL.

The bill (H. R. 7183) authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, on page 2, line 23, at the beginning of the section, to insert the words "Sec. 4."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

OHIO RIVER BRIDGE, MOUND CITY, ILL.

The bill (H. R. 66) authorizing B. L. Hendrix, G. C. Trammel, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, on page 2, line 19, to strike out the name "Trummel" and insert the name "Trammel."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

MISSISSIPPI RIVER BRIDGE, LANSING, IOWA

The bill (H. R. 5803) authorizing the Interstate Bridge Co. of Lansing, Iowa, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Lansing, Iowa, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MISSOURI RIVER BRIDGE, SOUTH DAKOTA AND NEBRASKA

The bill (S. 2827) granting the consent of Congress to the States of South Dakota and Nebraska, their successors and assigns, to construct, maintain, and operate a bridge across the Missouri River, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 1, line 4, after the word "Nebraska" to strike out the words "their successors and assigns"; on page 2, line 6, after the words "South Dakota" to strike out the words "their successors and assigns"; and on page 2, line 19, after the word "Nebraska" to strike out the words "their successors and assigns,"

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "A bill granting the consent of Congress to the States of South Dakota and Nebraska to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebraska."

PEARL RIVER BRIDGE, MADISON AND RANKIN COUNTIES, MISS.

The bill (S. 3119) to authorize the construction of a temporary railroad bridge across Pearl River in Rankin County, Miss., and between Madison and Rankin Counties, Miss., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Pearl River Valley Lumber Co. is hereby authorized to construct a temporary railroad bridge connecting its timber holdings and its lands and timber across Pearl River at a point between or near sections 33 and 34, township 8 north, range 3 east, in Madison County, Miss., and sections 3 and 4, township 7 north, range 3 east, in Rankin County, Miss., and between Madison County and Rankin County, Miss., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ATCHAFALAYA BRIDGE, MORGAN CITY, LA.

The bill (H. R. 449) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a toll bridge across the Atchafalaya River at or near Morgan City, La., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE, WABASHA, MINN.

The bill (H. R. 6476) authorizing the Wabasha Bridge Committee, Wabasha, Minn., to construct, maintain, and operate a bridge across the Mississippi River at or near Wabasha, Minn., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COLUMBIA RIVER BRIDGE, HOOD RIVER, OREG.

The bill (H. R. 7199) granting the consent of Congress to the Oregon-Washington Bridge Co. to maintain a bridge already constructed across the Columbia River near the city of Hood River, Oreg., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SNAKE RIVER BRIDGE, HEYBURN, IDAHO

The bill (H. R. 7371) to legalize a bridge across the Snake River near Heyburn, Idaho, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the free highway bridge now being constructed by the State of Idaho across the Snake River near Heyburn, Idaho, if completed in accordance with plans accepted by the Chief of Engineers and the Secretary of War as providing suitable facilities for navigation, shall be a lawful structure, and shall be subject to the conditions and limitations of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, other than those requiring the approval of plans by the Chief of Engineers and the Secretary of War before the bridge is commenced.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TENNESSEE RIVER BRIDGE, MARSHALL COUNTY, ALA.

The bill (H. R. 7375) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Guntersville on the Guntersville-Huntsville road in Marshall County, Ala., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge and approaches thereto across the Tennessee River at a point suitable to the interests of navigation at or near Guntersville on the Guntersville-Huntsville road in Marshall County, in the State of Alabama, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ST. LOUIS RIVER BRIDGE, WISCONSIN AND MINNESOTA

The bill (H. R. 7909) to authorize the maintenance and renewal of a timber-frame trestle in place of a fixed span at the Wisconsin end of the steel bridge of the Duluth & Superior Bridge Co. over the St. Louis River between the States of Wisconsin and Minnesota was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TENNESSEE RIVER BRIDGE, MADISON AND MORGAN COUNTIES, ALA.

The bill (H. R. 7914) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Whitesburg Ferry, on the Huntsville-Laceys Spring road between Madison and Morgan Counties, Ala., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TENNESSEE RIVER BRIDGE, JACKSON COUNTY, ALA.

The bill (H. R. 7915) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Scottsboro, on the Scottsboro-Fort Payne road in Jackson County, Ala., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MONONGAHELA RIVER BRIDGE, PA.

The bill (H. R. 7925) granting the consent of Congress for the maintenance and operation of a bridge across the Monongahela River between the borough of Glassport and the city of Clairton, in the Commonwealth of Pennsylvania, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CLAIMS ARISING FROM SINKING OF VESSEL "NORMAN"

The bill (S. 851) to amend an act of Congress approved July 3, 1926, being Private Act No. 272, and entitled "An act conferring jurisdiction upon the Federal District Court for the Western Division of the Western District of Tennessee to hear and determine claims arising from the sinking of the vessel known as the *Norman*," was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the act of Congress approved July 3, 1926, being Private Act No. 272, and entitled "An act conferring jurisdiction upon the Federal District Court for the Western Division of the Western District of Tennessee to hear and determine claims arising from the sinking of the vessel known as the *Norman*," be and the same is hereby, amended so as to make sections 1, 2, and 3 read as follows:

"SECTION 1. That jurisdiction is hereby conferred upon the Federal District Court for the Western District of Tennessee to hear and determine in actions at law all claims, however arising, irrespective of the amount, for damages, whether liquidated or unliquidated, for personal injury, death, or loss or damage to property against the United States of America growing out of the sinking of the vessel known as the *Norman* on the Mississippi River on or about May 8, 1925, near Memphis, Tenn. Suits for damages sounding in tort are expressly allowed to be brought hereunder against the United States of America and when filed shall be triable upon the same principles and measures of liability as in like suits at law between private individuals or corporations: *Provided*, That the United States shall not set up either lack of authority or want of negligence on the part of its officers and agents in charge of said boat at the time of said accident: *Provided further*, That recovery under this act shall be the sole right of recovery for such claims under law of the United States, and that the total amount recovered in any case brought under the provisions of this act for personal injury or death shall not exceed the sum of $15,000. Should employees elect to sue hereunder their right of recovery shall be limited to the provisions of this act.

"SEC. 2. Any such claim may be instituted at any time within two years after the passage of this act notwithstanding the lapse of time or any statute of limitation. No statute for the limitation of the liability of the owner of any vessel shall be applicable to any such claim. Proceedings in any action under this act and appeals therefrom and payment of the judgment therein shall, except when inconsistent with the provisions of this act, be had as in the case of claims over which the court has jurisdiction in actions at law under the first paragraph of paragraph 20 of section 24 of the Judicial Code, as amended.

"SEC. 3. Service on the United States of America under any suit instituted under this act shall be had on the United States district attorney of the Western Division of the Western District of Tennessee, and the clerk of the United States district court of said district shall also send to the Attorney General of the United States a certified copy of the summons and declaration so filed. Said action shall be docketed and tried as any other suit at law pending in said court and tried by jury, or by stipulation of the parties a jury may be waived

as in other suits at law: *Provided, however,* That in all suits so filed under this act the claimants, in order to obtain a judgment against the United States of America, shall only be required to prove that they are the proper legal parties entitled to the recovery sought and the amount of damages suffered, if any, not exceeding $15,000."

Mr. JONES. Mr. President, this is quite an important bill. I should like to have some explanation of it.

Mr. McKELLAR. I shall be glad to comply with the request of the Senator from Washington. A bill of this kind was passed last year. It is for the purpose of determining the damages of various people who were drowned because of the sinking of the steamer *Norman* near Memphis several years ago.

Mr. JONES. I have no objection to the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HORACE G. KNOWLES

The bill (S. 3325) for the relief of Horace G. Knowles was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $7,296.49 to Horace G. Knowles as salary for the period of March 30, 1909, to December 22, 1909, during which period he was commissioned as a minister of the United States to Nicaragua and was all that whole period under instructions to await orders of the State Department.

Mr. JONES. Mr. President, I would like to have the bill explained.

Mr. REED of Pennsylvania. Mr. President, I have been reading the report. Mr. Knowles was appointed commissioner to Nicaragua and was confirmed by the Senate. He was called home from Rumania, where he had been stationed, and was held here in Washington because the legation in Nicaragua was closed owing to the revolution. For some reason he was not permitted to be paid because of a ruling by the Treasury Department or the Comptroller General. The bill is to give him pay while he was waiting here under orders until it was possible for him to get to his post in Nicaragua.

Mr. KING. May I inquire of the Senator whether during the time he was here he was denied the compensation which he was receiving in Rumania?

Mr. REED of Pennsylvania. It seems that he was receiving a limited pay to which he was entitled under what is called the period of instruction that he was supposed to go through. His pay continued at that rate, but not at the full rate for a qualified minister.

Mr. McKELLAR. Is the amount now appropriated for the full rate or is it the full rate less the amount which has already been paid?

Mr. REED of Pennsylvania. This is the amount of the shortage.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3023) to revise the boundary of a portion of the Hawaiian National Park, on the island of Hawaii, in the Territory of Hawaii, was announced as next in order.

Mr. LA FOLLETTE. Mr. President, I would like to have an explanation of the bill.

Mr. NYE. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will be passed over.

LOTS IN ST. MARKS, FLA.

The bill (H. R. 9842) to provide for the survey, appraisal, and sale of the undisposed lots in the town site of St. Marks, Fla., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior may cause all public lands within the Government town site of St. Marks, situated in sections 2, 3, 10, and 11, township 4 south, range 1 east, Tallahassee meridian, Florida, established by the act of March 2, 1833 (4 Stat. 664), to be surveyed into lots, blocks, streets, and alleys as he may deem proper and when the survey is completed cause said lots to be appraised by three competent and disinterested persons appointed by him and report their proceedings to him for action thereon. If such appraisement be disapproved, the Secretary of the Interior shall again cause the said lands to be appraised as before provided; and when the appraisal has been approved he shall cause the said lots to be sold at public sale to the highest bidder for cash at not less than the appraised value thereof, first having given 60 days' public notice of the time, place, and terms of the sale immediately prior thereto by publication in at least one newspaper having a general circulation in the vicinity of the land and in such other newspapers as he may deem advisable; and any lots remaining unsold may be reoffered for sale at any subsequent time in the same manner at the discretion of the Secretary of the Interior, and if not sold at such second offering for want of bidders, then the Secretary of the Interior may sell the same at private sale for cash at not less than the appraised value thereof: *Provided,* That the square embracing the lands now being used as a burying ground be set aside as a cemetery for the use of the town of St. Marks, Fla.: *Provided further,* That the municipality of St. Marks, Fla., shall have a right for 90 days subsequent to the filing of the plat of survey of said town site to select and receive patent to any two blocks desired for public park purposes, not exceeding 5⅞ acres in area.

Mr. JONES. Mr. President, I would like to have an explanation of the bill.

Mr. OVERMAN. In the absence of the Senator from Florida [Mr. FLETCHER], who had to leave the Chamber, I was requested to say that he hopes the bill will pass. It has been approved by the department and everyone interested. It has relation to about 5 acres of land in town lots in St. Marks, Fla.

Mr. JONES. I see that the bill provides for a proper appraisal, and so on, so that I think the interests of the Government are fully protected.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 445) authorizing the Secretary of the Interior to enter into a cooperative agreement or agreements with the State of Montana and private owners of lands within the State of Montana for grazing and range developments, and for other purposes, was announced as next in order.

Mr. KING. I suggest that the bill be passed over temporarily.

The PRESIDING OFFICER. The bill goes over temporarily.

The bill (H. R. 6684) to amend section 2455 of the Revised Statutes of the United States, as amended, relating to isolated tracts of public land, was announced as next in order.

Mr. JONES. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will be passed over.

APPROVAL OF ACT 25, SESSION LAWS OF 1927, HAWAII

The bill (H. R. 84) to approve Act 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the district of Waimea, on the island and in the county of Kauai, Territory of Hawaii," was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That Act No. 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the District of Waimea, on the island and in the county of Kauai, Territory of Hawaii," passed by the Legislature of the Territory of Hawaii and approved by the Governor of the Territory of Hawaii on March 26, 1927, is hereby approved: *Provided,* That the authority in section 15 of said act for the amending or repeal of said act shall not be held to authorize such action by the Legislature of Hawaii except upon approval by Congress in accordance with the organic act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 6194) for the relief of Frank Stinchcomb was announced as next in order.

Mr. KING. Let the bill be passed over.

The PRESIDING OFFICER. The bill goes over.

ADDITIONAL PAY FOR SUBMARINE PERSONNEL

The bill (S. 3131) to provide additional pay for personnel of the United States Navy assigned to duty on submarines and to diving duty was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That hereafter all officers of the Navy on duty on board a submarine of the Navy shall, while so serving, receive 25 per cent additional of the pay for their rank and service as now provided by law; and an enlisted man of the United States Navy assigned to duty aboard a submarine of the Navy, or to the duty of diving, shall, in lieu of the additional pay now authorized, receive pay, under such regulations as may be prescribed by the Secretary of the Navy, at the rate of not less than $5 per month, and not exceeding $30 per month, in addition to the pay and allowances of his rating and service: *Provided,* That divers employed in actual salvage operations in depths of over 90 feet shall, in addition to the foregoing, receive the sum of $5 per hour for each hour or fraction thereof so employed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MARY M. JONES

The bill (H. R. 2524) for the relief of Mary M. Jones was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Mary M. Jones, out of any money in the Treasury of the United States not otherwise appropriated, in full settlement against the Government, the sum of $1,035, in compensation for damages caused and sustained to property in Linn County, Oreg., such loss being caused by fire set from burning material from an Army airplane on or about July 1, 1924, the said airplane being in fire-control service under the direction of the Forest Service.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PUBLIC HEALTH SERVICE ADVERTISING

The bill (S. 3294) for the relief of certain newspapers for advertising services rendered the Public Health Service of the Treasury Department, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized, notwithstanding the provisions of section 3828 of the Revised Statutes of the United States, to settle, adjust, and certify the following claims for advertising services rendered the Public Health Service, Treasury Department, namely, the claims of certain Chicago newspapers for advertising services rendered October 3, 1918, amounting in all to $2,894, under the appropriation "Suppressing Spanish influenza and other communicable diseases, 1919"; the claim of a Houston (Tex.) newspaper, $65.17, and the claim of a New York newspaper, $30, for advertising services rendered between June and October, 1920, under the appropriations "Pay of personnel and maintenance of hospitals, Public Health Service, 1920," and "Maintenance, marine hospitals, 1921."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1956) for the relief of Levi R. Whitted was announced as next in order.

Mr. KING. Mr. President, will the Senator from North Carolina give us a brief explanation of the bill?

Mr. OVERMAN. I ask that the bill may go over temporarily.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2069) to extend the provisions of section 1814 of the Revised Statutes to the Territories of Hawaii and Alaska was announced as next in order.

Mr. LA FOLLETTE. Mr. President, I would like to have an explanation of the bill or else I must ask that it may go over.

Mr. CURTIS. Let it go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2292) providing for the employment of certain civilian assistants in the office of the Governor General of the Philippine Islands, and fixing salaries of certain officials, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

MATTIE HALCOMB

The bill (S. 1434) for the relief of Mattie Halcomb was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with an amendment, on page 1, after line 2, to strike out all after the enacting clause, and to insert in lieu thereof:

Be it enacted, etc., That Mattie Halcomb, mother of Henry Grady Halcomb, late ship's cook, second class, United States Navy, is hereby allowed an amount equal to six months' pay at the rate said Henry Grady Halcomb was receiving at the date of his death: *Provided*, That the said Mattie Halcomb establishes to the satisfaction of the Secretary of the Navy the fact that she was actually dependent upon her son, the late Henry Grady Halcomb, at the time of his death.

SEC. 2. That the payment of the amount of money allowed and authorized to be paid to the said Mattie Halcomb is authorized to be made from the appropriation "Pay, subsistence, and transportation of naval personnel."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Mattie Halcomb."

OUACHITA RIVER BRIDGE, HARRISONBURG, LA.

The bill (H. R. 5727) to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, La., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WABASH RIVER BRIDGE, VINCENNES, IND.

The bill (S. 2965) authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 3, after line 17, to insert the following:

SEC. 5. The act of Congress approved February 13, 1925, authorizing the States of Indiana and Illinois to construct a bridge over the Wabash River at Vincennes, Ind., is hereby repealed.

And on page 3, line 22, strike out the section number "5" and insert the numeral "6," so as to make the bill read:

Be it enacted, etc., That in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes, the State of Indiana, acting by and through the State highway commission, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Wabash River, at a point suitable to the interests of navigation, at or near Vincennes, Ind., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the State of Indiana, acting by and through the State highway commission, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, maintenance, and operation of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said State of Indiana, acting by and through the State highway commission, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of tolls so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. In fixing the rates of toll to be charged for the use of such bridge the same shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize an amount not to exceed the cost of such bridge and its approaches as soon as possible under reasonable charges, but within a period of not to exceed 10 years from the completion thereof. After a sinking fund sufficient to pay an amount not to exceed the cost of constructing the bridge and its approaches shall have been so provided, such bridge shall thereafter be maintained and operate free of tolls. An accurate record of the cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 5. The act of Congress approved February 13, 1925, authorizing the States of Indiana and Illinois to construct a bridge over the Wabash River at Vincennes, Ind., is hereby repealed.

SEC. 6. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE, CHESTER, ILL.

The bill (H. R. 6973) authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COOSA RIVER BRIDGE, CHEROKEE COUNTY, ALA.

The bill (H. R. 8530) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a bridge across the Coosa River near Cedar Bluff, in Cherokee County, Ala., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REREFERENCE OF BILL

Mr. WILLIS. Mr. President, a few moments ago Calendar No. 395, the bill (S. 2069) to extend the provisions of section 1814 of the Revised Statutes to the Territories of Hawaii and Alaska, was objected to by the Senator from Wisconsin [Mr. LA FOLLETTE]. My attention has been called to the fact that under the practice this bill, while reported from the Committee on Territories and Insular Possessions, really ought to have gone to the Committee on the Library, since it relates to a matter here in the Capitol. I ask, therefore, that the bill be taken from the calendar and referred to the Committee on the Library.

The PRESIDING OFFICER. Without objection, it is so ordered.

POULTRY DISEASES

Mr. JONES. Mr. President, a short while ago I objected to the immediate consideration of Order of Business No. 360, being Senate bill 2030, to provide for research into the causes of poultry diseases, and so forth. I objected to the consideration of the bill to which I refer because I thought that its subject matter would be cared for in the agricultural appropriation bill. I have since examined the latter bill hurriedly, and I am inclined to think that it probably does not give the authority which may be necessary; so I withdraw my objection to the consideration of the bill which I have named.

The PRESIDING OFFICER. Is there objection to returning to the consideration of the bill named by the Senator from Washington?

Mr. SACKETT. Mr. President, I hope the bill may be passed. Its passage is essential in the States which are engaged in shipping poultry.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2030) to provide for research into the causes of poultry diseases, for feeding experimentation, and for an educational program to show the best means of preventing disease in poultry, which was read, as follows:

Be it enacted, etc., That the Secretary of Agriculture is hereby authorized to have the Bureau of Animal Industry institute research into the causes of influenza, infectious bronchitis, white diarrhea, and other diseases of poultry, also that he be authorized to conduct feeding experimentation with a view to increasing the physical welfare of poultry.

SEC. 2. That to carry out the provisions of section 1 the Secretary of the Treasury is authorized and directed to set aside the sum of $30,000, to be paid to the Secretary of Agriculture in the usual way.

SEC. 3. That the Secretary of Agriculture is hereby authorized to have the Bureau of Animal Industry arrange an educational program to present to farm agents and others who may be interested in the improvement of the health of poultry, ways of preventing disease, and to give to the public methods of practical poultry sanitation at the discretion of the Secretary.

SEC. 4. That to carry out the provisions of section 3 the Secretary of the Treasury is authorized and directed to set aside the sum of $20,000, to be paid to the Secretary of Agriculture in the usual way.

Mr. KING. Mr. President, I move to reduce the amount of the proposed appropriation from $30,000 to $20,000.

Mr. SMITH. Mr. President, I hope the Senator from Utah will not offer that amendment, because if the work contemplated in the bill is efficiently done it will be worth a hundred times the amount proposed to be appropriated. We had better have it done as thoroughly as may be rather than to restrict the bureau at the very initial period of the investigation.

Mr. KING. I had in mind the fact that the agricultural appropriation bill will soon be here.

Mr. SACKETT. Mr. President, the poultry industry is really the fourth largest agricultural industry in this country. It has never as yet had adequate protection, and it is proposed by this bill to make researches and studies which will result in the protection of shipments of poultry in interstate commerce.

Mr. KING. If the Agricultural Department should take some of its very large and, I think, extravagant appropriations for other purposes and apply a portion of them to this investigation it would perhaps be rendering a public service.

The PRESIDING OFFICER. Does the Senator from Utah offer the amendment which he has suggested?

Mr. KING. I withdraw the amendment.

Mr. REED of Pennsylvania. Mr. President, I move to strike out section 2 of the bill and to insert in lieu thereof the following words:

That in order to carry out the provisions of section 1 of this act the sum of $30,000 is authorized to be appropriated.

Mr. SMITH. Mr. President, I think that that amendment would, if adopted, put the bill in proper shape, because it would make the necessary authorization.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. REED of Pennsylvania. I move to strike out section 4 and to insert the following:

That in order to carry out the provisions of section 3 of this act the sum of $20,000 is authorized to be appropriated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ALABAMA, WISCONSIN, ILLINOIS, MINNESOTA, AND LOUISIANA BRIDGE BILLS

The following bridge bills were severally considered as in Committee of the Whole, reported to the Senate without amendment, ordered to a third reading, read the third time, and passed:

H. R. 8531. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road between Talladega and Shelby Counties, Ala.;

H. R. 8726. An act authorizing Oscar Baertch, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis.;

H. R. 8740. An act granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 8741. An act authorizing the Dravo Contracting Co., its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 8743. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, Minn.;

H. R. 8818. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La.;

H. R. 8837. An act authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Cassville, Wis.;

H. R. 8896. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia Road in Escambia County, Ala.; and

H. R. 9064. An act granting the consent of Congress to the highway department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River at or near Pell City, on the Pell City-Anniston Road between Calhoun and St. Clair Counties, Ala.

BILLS REPORTED FROM COMMITTEE ON MILITARY AFFAIRS

Mr. REED of Pennsylvania. Mr. President, I wish to state to the Senate why it is that about 25 bills reported from the Committee on Military Affairs and next on the calendar are found in one place. The War Department sent the committee about 40 suggested bills, some of which the committee did not approve and some of which we wished further to study, but after hearing the Secretary of War explain in detail these particular bills the committee was unanimous in voting to report them. Almost every member of the committee was present during the discussion. Each bill was taken up carefully and in detail. Many bills were not agreed to and were withheld, either permanently or for further explanation. Each of the bills that follow on the calendar I shall be glad to explain one by one as we get to them; but I simply wish the Senate to understand that these bills are here after full consideration by the Military Committee.

Mr. KING. May I ask the Senator from Pennsylvania whether they are for the purpose of giving higher grades or greater compensation to officers?

Mr. REED of Pennsylvania. I do not think there is a single case of that kind except one private bill to correct a clerical error in the length of the commissioned service of an officer.

Mr. KING. I notice in one bill that there is a provision for mileage apparently changing the cost of transportation.

Mr. REED of Pennsylvania. That is rather an economy than an additional allowance, as I will explain when we get to the bill.

TRANSFER OR LOAN OF AERONAUTICAL EQUIPMENT

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1822) to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions, which was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized in his discretion to transfer or loan to museums or properly accredited schools, colleges, and universities, for exhibition or instructional purposes, any aircraft, aircraft parts, instruments, or engines that have become obsolete or impaired to the extent that repair would not be economical: *Provided*, That such aircraft, aircraft parts, or engines will not be used in actual flight: *Provided further*, That no expense shall be caused the United States Government by the delivery or return of said property.

Mr. REED of Pennsylvania. The bill which is now under consideration proposes to provide for the loan to colleges of obsolete aviation equipment on condition that it shall not be used in flying.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRANK STINCHCOMB

Mr. WALSH of Massachusetts. Mr. President, I ask unanimous consent to return to Order of Business 389, being the bill (H. R. 6194) for the relief of Frank Stinchcomb. There is now no objection to the consideration of the bill, the Senator who objected when it was reached on the calendar having withdrawn his objection.

Mr. JONES. Mr. President, what is the object of the bill, I will ask the Senator from Massachusetts?

Mr. WALSH of Massachusetts. The bill relates to the computation of service of a lieutenant in the Navy, but it does not involve any expense.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts?

Mr. JONES. Who asked that the bill go over?

Mr. WALSH of Massachusetts. The Senator from Utah [Mr. KING] asked that it go over, but he has withdrawn his objection. As I have explained, the bill involves no expenditure of money, but merely fixes the officer's status on the pay roll.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that an act for the relief of Frank Stinchcomb, approved June 6, 1924 (43 Stat. L. 1374), be amended by adding thereto the following: "*Provided*, That if appointed a lieutenant in the regular Navy he shall be entitled to count all service which he would have been entitled to count had he been appointed a lieutenant in the United States Navy under the act of June 4, 1920, for pay and all other purposes: *Provided*, That no back pay or allowances shall accrue to this officer by reason of the passage of this act."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRANSPORTATION ALLOWANCE

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1825) to amend section 12 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended by the act of June 1, 1926 (44 Stat. L. 680), so as to authorize an allowance of 3 cents per mile, in lieu of transportation in kind, for persons using privately owned conveyances while traveling under competent orders, which was read, as follows:

Be it enacted, etc., That section 12 of the joint service pay act of June 10, 1922, as amended, be further amended by inserting between the first and second paragraphs the following:

"Individuals belonging to any of the services mentioned in the title of this act, including the National Guard and the reserves of such services, traveling under competent orders which entitle them to transportation or transportation and subsistence as distinguished from mileage, who, under regulations prescribed by the head of the department concerned, travel by privately owned conveyance shall be entitled, in lieu of transportation by the shortest usually traveled route now authorized by law to be furnished in kind, to a money allowance at the rate of 3 cents per mile for the same distance: *Provided*, That this provision shall not apply to any person entitled to traveling expenses under the 'subsistence expense act of 1926.'"

Mr. REED of Pennsylvania. Mr. President, at the present time the law entitles an officer who travels under orders in his own automobile to be paid his entire expense for gasoline and oil on the presentation of receipts therefor. Such bills average more than 3 cents a mile, but in order to save the bother to the officer concerned and the clerical work on the part of the Government it seems to be wise to establish a low rate per mile. This bill establishes an allowance of only 3 cents per mile, as against 7 cents per mile if the officer travels by train. It will result in an economy to the Government and the saving of clerical work.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

GENERAL STAFF CORPS ELIGIBLE LIST

The bill (S. 1828) to amend the second paragraph of section 5 of the national defense act, as amended by the act of September 22, 1922, by adding thereto a provision that will authorize the names of certain graduates of the General Service Schools and of the Army War College, not at present eligible for selection to the General Staff Corps eligible list, to be added to that list, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the second paragraph of section 5 of the national defense act, as amended by the act approved June 4, 1920, and further amended by the act of September 22, 1922, be, and the same is hereby, amended to read as follows:

"After the completion of the initial General Staff Corps eligible list, the name of no officer shall be added thereto unless upon graduation from the General Staff School he is specifically recommended as qualified for General Staff duty, and hereafter no officer of the General Staff Corps, except the Chief of Staff, shall be assigned as a member of the War Department General Staff unless he is a graduate of the General Staff College or his name is borne on the initial eligible list: *Provided*, That nothing herein shall operate to debar the name of any graduate of the Army War College, the Command and General Staff School, or the former General Staff College, General Staff School, Army Staff College, the Staff College, the School of the Line, the Army School of the Line, or the Infantry-Cavalry School from being added to the General Staff Corps eligible list if the manner of the performance of his duties and quality of his work is such as to indicate that he has since become well qualified for General Staff duty, and he is so recommended by a board of general officers: *And provided further*, That the name of any National Guard or reserve officer who has demonstrated by actual service with the War Department General Staff during a period of not less than six months, as hereinafter provided for, that he is qualified for General Staff duty, may, upon the recommendation of a board consisting of the general officers of the War Department General Staff, assistants to the Chief of Staff, be added to said eligible list at any time. The Secretary of War shall publish annually the list of officers eligible for General Staff duty, and such eligibility shall be noted in the annual Army Register. If at any time the number of officers available and eligible for detail to the General Staff is not sufficient to fill all vacancies therein, majors or captains may be detailed as acting General Staff officers under such regulations as the President may prescribe: *Provided*, That in order to insure intelligent cooperation between the General Staff and the several noncombatant branches, officers of such branches may be detailed as additional members of the General Staff Corps under such special regulations as to eligibility and redetail as may be prescribed by the President, but not more than two officers from each such branch shall be detailed as members of the War Department General Staff."

Mr. REED of Pennsylvania. Mr. President, in explanation of that bill, let me say that at present there are a number of graduates of the Army War College, the Command and General Staff School, the former General Staff College, as it was called, the General Staff School, and the School of the Line who to-day are ineligible for appointment to the staff, although their service has been highly creditable. The new language which this bill adds to the existing law is found on page 2 between lines 9 and 19. The result will be to widen the field of choice for staff duty. At present the department thinks the field of choice is too much restricted.

Mr. ROBINSON of Arkansas. How is it restricted now, may I ask the Senator.

Mr. REED of Pennsylvania. It is restricted by the law which the Senator will find at the top and at the bottom of page 2, which provides:

After the completion of the initial General Staff Corps eligible list, the name of no officer shall be added thereto unless upon graduation from the General Staff School he is specifically recommended as qualified for General Staff duty, and hereafter no officer of the General Staff Corps, except the Chief of Staff, shall be assigned as a member of the War Department General Staff unless he is a graduate of the General Staff College or his name is borne on the initial eligible list.

A large number of officers with high credit for past service had all the schooling that was available to them at the time of their study before the staff college was organized, and the department feels that, in fairness to those officers, they ought to be eligible for selection if they are considered desirable.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COLLECTION OF INDEBTEDNESS OF ENLISTED MEN

The bill (S. 1829) to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That under such regulations as the Secretary of War shall prescribe, when it has been administratively ascertained that an enlisted man of the Army is indebted to the United States or any of its instrumentalities, the amount of such indebtedness may be collected in monthly installments by deduction from his pay on current pay rolls: *Provided*, That the aggregate sum of such deductions for any month shall not exceed two-thirds of the soldier's rate of pay for that month: *And provided further*, That whenever any part of the pay of a soldier for a certain month shall have been legally forfeited by sentence of court-martial, or otherwise legally authorized to be withheld, then no deduction under this act shall be so applied as to reduce the actual pay received by the soldier for that month below one-third of his authorized rate of pay therefor: *And provided further*, That the Secretary of War, under such regulations as he shall prescribe, may cause to be remitted and canceled, upon honorable discharge of the enlisted man from the service, any such indebtedness incurred during the current enlistment and remaining unpaid at the time of discharge: *And provided further*, That nothing in this act shall be construed to prevent collections of such indebtedness on final statements from pay, in the proportions hereinbefore indicated, or from clothing allowance savings.

Mr. REED of Pennsylvania. Mr. President, the bill now under consideration seems to me to be highly desirable from the standpoint of the welfare of the enlisted men. At present if an enlisted man owes anything to the Government his entire pay is taken each month until the Government is reimbursed. This bill limits the amount of the deductions to two-thirds of his monthly pay. The Government in the end will get its money back, but the man in the meantime will have something on which to live. Great embarrassment is caused to some men whose full monthly pay is taken for two or three months in that way.

Mr. KING. How do they become indebted to the Government?

Mr. REED of Pennsylvania. The indebtedness may arise in various ways. The Senator will understand that allotments absorb part of the enlisted man's pay; his war-risk insurance takes another slice out of his month's pay; and if he is found guilty by court-martial of some minor infraction and sentenced to forfeit say one half of his pay, if the other half is taken up by allotments, the result is that he has nothing whatever coming to him at the end of the month.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. I yield.

Mr. TYDINGS. He might also lose a piece of his equipment, such as his rifle or other article, and would be obliged to make it good.

Mr. REED of Pennsylvania. Yes; but the commonest case is that of sentence by summary court. Of course, if he damages or loses Government property, he is held liable for that.

Mr. KING. Suppose he leaves the service before the Government has been paid?

Mr. REED of Pennsylvania. In that case the Government loses just as it loses now. If he is discharged with an honorable discharge any balance of indebtedness remaining unpaid is canceled. That, I understand, is the law to-day.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXCHANGE OF DETERIORATED AND UNSERVICEABLE AMMUNITION

The bill (S. 1833) to amend the act approved June 1, 1926 (44 Stat. L. 680), authorizing the Secretary of War to exchange deteriorated and unserviceable ammunition and components, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the act of June 1, 1926, authorizing the Secretary of War to exchange deteriorated and unserviceable ammunition and components, and for other purposes (44 Stat. L. 680), be, and the same is hereby, amended to read as follows:

"That the Secretary of War be, and he is hereby, authorized to exchange deteriorated and unserviceable ammunition and components thereof for ammunition or components thereof in condition for immediate use, or to sell the same and procure new ammunition or components thereof from the proceeds of such sales: *Provided*, That the proceeds of such sales also shall be available to defray either the whole or part of the expenses of the necessary breaking down of deteriorated and unserviceable ammunition, of preparing ammunition or components for sale, of selling, and of reconditioning and placing in storage ammunition or components to be retained, and he shall make statement of his action under this provision in his annual report."

Mr. McKELLAR. Will the Senator explain that bill?

Mr. REED of Pennsylvania. Yes. Under the present law the Secretary of War has authority to exchange deteriorated ammunition, but the authority extends only to an exchange of it. If he finds, for example, a charge for a .75 gun with its brass case and its shell has deteriorated so as to become completely useless, all the Secretary can do now is to make an arrangement to exchange that with somebody for a piece of good ammunition. In that way he is limited in respect to the number of people with whom he may deal. This bill would allow him to sell it as well as to barter it.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

APPROPRIATIONS FOR ARMY CONTINGENCIES

The bill (S. 2387) to authorize appropriations for contingencies of the Army, was announced as next in order.

Mr. McKELLAR. Mr. President, I should like an explanation of that bill.

Mr. REED of Pennsylvania. Mr. President, at the present time there is a military-contingent fund which may be used for necessary entertainment of distinguished guests or foreign officers who come to military posts. For example, a distinguished admiral of some other navy stops at Honolulu and is there entertained by the commander of the Hawaiian department. There is a small contingent fund on which he is permitted to draw for that entertaining. This bill does not provide any increase in the amount, but it widens the authority so as to allow for contemporaneous entertainment of American officers who may happen to be in the assemblage.

It is a trivial thing. It is explained in the report by the statement of the Secretary that at present many commanding officers in the Army are required to defray from their personal funds large amounts annually in the official entertainment of distinguished foreigners and high officials.

Mr. ROBINSON of Arkansas. What is the total amount expended for the purposes contemplated by the bill?

Mr. REED of Pennsylvania. I am not familiar with the amount that is now expended; but they make an estimate here that the passage of this bill will not cause an expenditure of more than $6,000 per annum.

Mr. ROBINSON of Arkansas. That is, it will not increase the amount by more than that?

Mr. REED of Pennsylvania. That is the estimate. If the Senator would like the bill to go over, I will get the exact figures.

Mr. ROBINSON of Arkansas. Oh, no; I do not ask that.

Mr. McKELLAR. I should rather have the Senator put in a provision, if he will, putting a certain limitation on it, because he can easily see that if extended too far it might cause adverse comment.

Mr. REED of Pennsylvania. I do see that, and I think I ought to have the figures to give the Senate before I ask that the bill be taken up; so I will ask that it go over.

The PRESIDING OFFICER. The bill will be passed over.

PAY OF NATIONAL GUARD OFFICERS AND ENLISTED MEN

The bill (S. 2537) to amend section 110, national defense act, so as to provide better administrative procedure in the disbursements for pay of National Guard officers and enlisted men, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the second paragraph of section 110, national defense act, as amended, be, and the same is hereby, amended to read as follows:

"All amounts appropriated for the purpose of this and the last preceding section shall be disbursed and accounted for by the officers and agents of the Finance Department of the Army, and effective as soon as practicable after July 1, 1928, all disbursements under the foregoing

provisions of this section shall be made for such three months' periods for the various units of the National Guard as shall be prescribed in regulations issued by the Secretary of War and on pay rolls prepared and authenticated in the manner prescribed in said regulations: *Provided*, That for the period necessary to put into operation the payment plan herein provided for, the Secretary of War is authorized to fix initial pay periods of less than three months for such number of units as he may deem necessary: *And provided further*, That stoppages may be made against the compensation payable to any officer or enlisted man hereunder to cover the cost of public property lost or destroyed by, and chargeable to, such officer or enlisted man."

Mr. REED of Pennsylvania. This bill is made necessary by the fact that the present law provides for the paying of National Guard officers at the end of every three-month period, and a definite quarter is fixed at the end of which all officers have to be paid. What it is desired to do is to stagger those payments, so that fewer clerks can do the work by working steadily at it throughout the year.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INJURIES TO MEMBERS OF CIVILIAN COMPONENTS OF ARMY

The bill (S. 2948) to amend section 6, act of March 4, 1923, as amended, so as to better provide for care and treatment of members of the civilian components of the Army who suffer personal injury in line of duty, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 6 of the act approved March 4, 1923, entitled "An act to extend the benefits of section 14 of the pay readjustment act of June 10, 1922, to validate certain payments made to the National Guard and reserve officers and warrant officers, and for other purposes," as amended by an act approved June 3, 1924, be, and the same is hereby, amended to read as follows:

"SEC. 6. That officers, warrant officers, and enlisted men of the National Guard who suffer personal injury in line of duty while at encampments, maneuvers, or other exercises, or at service schools, under the provisions of sections 94, 97, and 99 of the national defense act of June 3, 1916, as amended; members of the Officers' Reserve Corps and of the enlisted reserve corps of the Army who suffer personal injury in line of duty while on active duty under proper orders; and persons hereinbefore described who may now be undergoing hospital treatment at Government expense for injuries so sustained; shall, under such regulations as the President may prescribe, when hospital treatment is necessary for appropriate treatment of such injury, be entitled to hospital treatment, including medical treatment, at Government expense, until the disability resulting from such injury can not be materially improved by further hospital treatment, and, during the period of hospitalization, to the same pay and allowances whether in money or in kind that they were entitled to receive at the time such injury was suffered, and to transportation to their homes at Government expense when discharged from hospital. Officers, warrant officers, and enlisted men of the National Guard who suffer personal injury in line of duty when participating in aerial flights prescribed under the provisions of section 92 of said national defense act as amended shall, under regulations prescribed as aforesaid, be entitled to the same hospital treatment, including medical treatment, pay and allowances, and transportation to their homes, as if such injury had been suffered while in line of duty at encampments, maneuvers, or other exercises under the aforementioned section 94 of the national defense act; and members of the Officers' Reserve Corps and enlisted reserve corps of the Army injured in line of duty while voluntarily participating in aerial flights in Government-owned aircraft by proper authority as an incident to their military training, but not on active duty, shall, under regulations prescribed as aforesaid, be entitled to the same hospital treatment, including medical treatment, pay and allowances, and transportation to their homes, as if such injury had been suffered while on active duty under proper orders. No person hospitalized under the foregoing provisions of this section on account of any personal injury suffered shall be entitled to receive, in connection with such injury, pay or allowance other than hospital treatment, including medical treatment and transportation, as herein provided, for more than six months; but for any remaining period of such hospitalization he shall be entitled to subsistence at Government expense: *Provided*, That the pay and allowances of members of the Officers' Reserve Corps and the enlisted reserve corps of the Army on active duty shall not be limited hereby. Members of the Reserve Officers' Training Corps and members of the civilian training corps who suffer personal injury in line of duty while at camps of instruction under the provisions of sections 47a and 47d of said national defense act as amended shall, under regulations prescribed as aforesaid, be entitled to hospital treatment, including medical treatment and transportation to their homes, as in the case of persons hereinbefore described, and to subsistence during hospitalization. If the death of any person mentioned herein occurs while he is undergoing the training or hospital treatment contemplated by this section, the United States shall, under regulations prescribed as aforesaid, pay for burial expenses and the return of the body to his home a sum not to exceed $100.

"The validation, under this section as heretofore standing, of certain expenditures previously made by the Government shall not be disturbed."

Mr. REED of Pennsylvania. Mr. President, the explanation of this bill is simple. It is merely to correct a quibble raised by some of the law officers of the department in regard to the words in the present law that provide for treating these boys who go to civilian camps in summer, or Reserve Officers' camps, or Officers' Reserve Corps summer training, and get hurt in the course of their training. The present law provides that they shall receive medical attention "until fit for transportation home." It is held, because of the use of those words, that the Government has no right to treat them after the moment at which they are physically able to travel without risk to their lives.

I think Congress never meant anything of that sort; but the Judge Advocate General has held that those words mean that all that the Army can give a boy who is hurt is merely such restoration as is necessary to fit him for transportation to his home; and, no matter how bad his condition when he gets home, the very fact that he went there is evidence that he was fit for transportation, and therefore treatment can not be furnished. This is merely to allow them to carry him on the end of his illness.

Mr. KING. This bill does not provide for indefinite care or for compensation during the period of illness brought about by the accident or any malady that may have resulted from the boy's service?

Mr. REED of Pennsylvania. No, Mr. President; it gives no compensation whatever—merely medical treatment by Army doctors—and I can not see that it will involve any considerable increase in cost to the Army. I know it was intended by Congress, when it passed the original law, that such treatment should be given.

Mr. SMITH. Mr. President, does not the Senator think that if it did involve considerable cost, if the injury was sustained during the service in training, it should be incurred?

Mr. REED of Pennsylvania. I think it should; and I think that is what Congress meant.

Mr. HEFLIN. Mr. President, that is the suggestion I intended to make. The Senator from South Carolina is right. If the boy is hurt in the line of duty and disabled, if he can not work, and he lies in a hospital or at home, why should not the Government have him treated and pay him for the time he has lost, too?

Mr. SMITH. Does the amendment cover that?

Mr. REED of Pennsylvania. It certainly will take care of his medical treatment. It does not provide for any pension.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF NATIONAL DEFENSE ACT

The bill (S. 2950) to amend the second paragraph of section 67, national defense act, as amended, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the second paragraph of section 67, national defense act, as amended, be, and the same is hereby, amended to read as follows:

"The appropriation provided for in this section shall be apportioned among the several States and Territories under just and equitable procedure to be prescribed by the Secretary of War and in direct ratio to the number of enlisted men in active service in the National Guard existing in such States and Territories at the date of apportionment of said appropriation, and to the District of Columbia, under such regulations as the President may prescribe: *Provided*, That the sum so apportioned among the several States, Territories, and the District of Columbia shall be available under such rules as may be prescribed by the Secretary of War for the actual and necessary expenses incurred by officers and enlisted men of the Regular Army when traveling on duty in connection with the National Guard; for actual and necessary expenses incurred by officers of the Regular Army, and reserve officers holding commissions in the National Guard on active duty in the Militia Bureau or the War Department General Staff, while traveling in attending the annual conventions of the National Guard Association of the United States and The Adjutants General Association; for the transportation of supplies furnished to the National Guard for the permanent equipment thereof; for office rent and necessary office expenses of officers of the Regular Army on duty with the National Guard; for the expenses of the Militia Bureau, including clerical services; for expenses of enlisted men of the Regular Army on duty with the National Guard, including an allowance for quarters and subsistence provided in section

11 of the pay readjustment act of June 10, 1922, medicine, and medical attendance; and such expenses shall constitute a charge against the whole sum annually appropriated for the support of the National Guard and shall be paid therefrom and not from the allotment duly apportioned to any particular State, Territory, or the District of Columbia; for the promotion of rifle practice, including the acquisition, construction, maintenance, and equipment of shooting galleries, and suitable target ranges; for the hiring of horses and draft animals for use of mounted troops, batteries, and wagons for forage for the same; and for such other incidental expenses in connection with lawfully authorized encampments, maneuvers, and field instruction as the Secretary of War may deem necessary, and for such other expenses pertaining to the National Guard as are now or may hereafter be authorized by law."

Mr. REED of Pennsylvania. Mr. President, the explanation of that bill is that it is simply to allow travel expense for those officers who attend National Guard conventions or conventions of adjutants general. It will involve practically no expenditure of money whatever, and will not result in an increase in appropriations.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ISSUE OF ARMS, ETC., FOR PROTECTION OF PUBLIC MONEY AND PROPERTY

The bill (S. 3058) to amend that provision of the act approved March 3, 1879 (20 Stat. L. 412), relating to issue of arms and ammunition for the protection of public money and property, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the provision relating to issue by the Secretary of War of arms and ammunition for protection of public money and property, contained in the act of March 3, 1879 (20 Stat. L. 412), be, and the same is hereby, amended to read as follows:

"That upon the request of the head of any department or independent agency of the Government, the Secretary of War be, and he hereby is, authorized to issue arms, suitable accouterments for use therewith, and ammunition whenever they may be required for the protection of the public money and property, and they may be delivered to any officer of the department or independent agency designated by the head of such department or independent agency, to be accounted for to the Secretary of War, and to be returned when the necessity for their use has expired: *Provided, however*, That hereafter the cost of all ammunition issued, the cost of replacing borrowed arms and accouterments which are lost or destroyed or are irreparable, the cost of repairing arms and accouterments returned to the War Department, and the cost to the War Department of making and receiving shipments under the authority of this act shall be covered by transfer of funds from the department or independent agency concerned to the credit of War Department funds."

Mr. KING. Mr. President, I should like an explanation of that bill.

Mr. REED of Pennsylvania. Mr. President, the effect of the proviso which is added by this bill will be to relieve the War Department in the future of charges against its appropriations for stores which it issues to the Postmaster General and the Secretary of the Treasury. It is not estimated that there will be any increase in cost. The bill seems to have been omitted from my calendar, so that I can not speak by the book; but the purpose of the bill is to authorize transfers in appropriations from the departments that receive these arms of the War Department itself. It is a mere bookkeeping matter, and does not increase the cost to the Government.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RECOVERY OF BODIES OF OFFICERS, SOLDIERS, ETC.

The bill (H. R. 230) to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sum as may be necessary to pay the expenses incident to the recovery of bodies of officers, cadets, United States Military Academy, acting assistant surgeons, members of the Army Nurse Corps, warrant officers, enlisted men, and civilian employees, under such regulations as the Secretary of War may prescribe.

Mr. REED of Pennsylvania. Mr. President, at the present time the Government has authority and appropriations for the burial of bodies, for their transportation to their homes, and for all of the expense resulting from a drowning case, but it has not authority to pay anybody to try to recover the body if it is not found at the time of the accident. Once in a while it becomes necessary to drag a stream or a lake to try to recover a body; but the Comptroller General has ruled, I understand, that there is no money available for that purpose.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FORT MONMOUTH MILITARY RESERVATION, N. J.

The bill (H. R. 233) to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That The Secretary of War is hereby authorized and empowered to acquire a strip of land lying along the easterly side of the Red Bank-Eatontown Highway, bordering on and for use of Fort Monmouth Military Reservation, N. J., and there is hereby authorized to be appropriated for such purpose a sum not to exceed $1,000 out of any money in the Treasury not otherwise appropriated.

Mr. REED of Pennsylvania. That is a strip of land running along a vacated street-railway track.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SUBSISTENCE OF CANDIDATES ATTENDING TRAINING CAMPS

The bill (H. R. 234) to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1 cent a mile for subsistence of candidates in going to and returning from camp was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 47d of the national defense act, as amended by the act approved June 4, 1920 (41 Stat. 779), be, and the same is, further amended by inserting between the words "mile" and "for" in the fourteenth line of said section 47d the following language to wit:

"Or, at the option of the Secretary of War, transportation in kind may be furnished, and in addition thereto candidates may be paid a subsistence allowance at the rate of 1 cent a mile within such limits as to territory as the Secretary of War may prescribe."

Mr. REED of Pennsylvania. Mr. President, at the present time the students going to these citizens' summer camps are paid the cost of their meals while traveling, provided they bring a receipt to show what they paid. It requires a lot of clerk hire, but in the end it costs more than an average of a cent a mile. This is to help everybody by establishing a flat rate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRAVEL EXPENSES FOR SURVEYS OF BATTLE FIELDS

The bill (H. R. 235) to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That mileage of officers of the Army and actual expenses of civilian employees traveling on duty in connection with the studies, surveys, and field investigations of battle fields shall be paid from the appropriations made from time to time to meet the expenses for these purposes.

Mr. REED of Pennsylvania. This bill is due to a ruling of the Comptroller General that the travel of officers in going to a battle field could not be paid out of an appropriation to make a survey of the battle field after they got there.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INCLUSION OF ARMY NURSES IN LAW GRANTING SIX MONTHS' PAY TO BENEFICIARIES

The bill (H. R. 238) to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army, was considered as in Committee of the Whole.

Mr. REED of Pennsylvania. Mr. President, this simply extends the privilege to nurses regularly employed in the Army. It has been ruled that they were not enlisted persons.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISPOSITION OF REMAINS OF MILITARY PERSONNEL AND CIVIL EMPLOYEES OF THE ARMY

The bill (H. R. 248) to authorize appropriations to be made for the disposition of remains of military personnel and civilian employees of the Army was considered as in Committee of the Whole.

Mr. REED of Pennsylvania. Mr. President, this is general legislation which has been carried in the War Department appropriation bill for many years; and in the desire to shorten that bill we are putting it in general legislation.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LANDS IN PENNSYLVANIA

The bill (H. R. 5476) to authorize the Secretary of War to sell to the Pennsylvania Railroad Co. a tract of land situate in the city of Philadelphia and State of Pennsylvania was considered as in Committee of the Whole.

Mr. JONES. Mr. President, I should like to know why the bill specifies that this land shall be sold to the Pennsylvania Railroad Co.

Mr. REED of Pennsylvania. It is really an exchange. This is a tract of land used for a system of tracks in North Philadelphia at the depot now being used by the Shipping Board. The railway tracks in that neighborhood are being elevated, and the yards owned by the Government will soon cease to have any connection with any railway system because of the elevation. The railroad has offered to provide a tract of substantially the same acreage, and, they say, of equal value, and to take over this yard area from the Government.

The committee in the House of Representatives was somewhat skeptical as to the fate of the Government in these exchanges of land, and therefore it amended the bill in the House to require appraisals and to forbid a sale for less than the appraised value.

Mr. ROBINSON of Arkansas. There is no authority here for a transfer or exchange of lands. The authority is for the sale; but I presume the War Department already has authority to purchase the tract that it desires.

Mr. REED of Pennsylvania. I understand so.

Mr. ROBINSON of Arkansas. Manifestly, the only purchaser for the land probably would be the Pennsylvania Railroad Co.

Mr. REED of Pennsylvania. Yes; the only purchaser could be that company.

Mr. JONES. Does the Government need this land?

Mr. REED of Pennsylvania. It is part of the Shipping Board facilities there. The War Department has the title, I believe. It is charged to the War Department; but I understand that the only use for the land at present is the use to which the Shipping Board is putting it.

Mr. McKELLAR. Does the land border on the water, or not?

Mr. REED of Pennsylvania. It is not right at the water. I understand that the piers are not to be changed, but the purpose of this exchange is to enable them to get from the railroad company another area on which tracks can be constructed that will lead to these same piers.

Mr. ROBINSON of Arkansas. They do not require this particular tract any longer, according to the report, for military purposes.

Mr. REED of Pennsylvania. That is my understanding.

Mr. ROBINSON of Arkansas. That is what the Secretary of War states in his letter.

Mr. JONES. Does the Shipping Board require it?

Mr. McKELLAR. I was just going to ask, does the Shipping Board desire the property?

Mr. REED of Pennsylvania. I do not understand that the Shipping Board has made any objection to this bill, but I suggest that we allow the bill to go over.

Mr. JONES. I think it had better go over.

Mr. REED of Pennsylvania. I will get a report from them.

Mr. JONES. I hope the Senator will find out, too, if they actually exchange lands, why they need other lands.

The PRESIDING OFFICER. The bill will be passed over.

PURCHASE OF HORSES AND MULES

The bill (H. R. 7195) to provide for the purchase of horses and mules for the Military Establishment was considered as in Committee of the Whole.

Mr. REED of Pennsylvania. Mr. President, the whole purpose of this bill is to use the appropriation for the purchase of mules, under the requirement that they shall be purchased in the open market. The present law does not make that requirement.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CIVILIAN CARETAKERS FOR NATIONAL GUARD

The bill (H. R. 242) to amend section 90 of the national defense act, as amended, so as to authorize employment of additional civilian caretakers for National Guard organizations, under certain circumstances, in lieu of enlisted caretakers heretofore authorized, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 2, line 1, to strike out the comma after the word "lieutenant" and the words "and that," and to insert after the word "further," in line 2, the word "that," so as to make the bill read:

Be it enacted, etc., That the second proviso of section 90 of the national defense act, as amended by the act approved May 28, 1926 (44 Stat. 673–674), be, and the same is hereby, amended so as to read: "*Provided further*, That in each heavier-than-air squadron one caretaker may be a commissioned officer not above the grade of first lieutenant: *And provided further*, That in any organization whenever it shall be found impracticable to secure the necessary competent caretakers for the materials, animals, armament, or equipment thereof from the personnel of such organization, the organization commander may employ civilians for any or all except one of the caretakers authorized for the organization, and such civilians shall be entitled to such compensations as may be fixed by the Secretary of War."

The amendment was agreed to.

Mr. REED of Pennsylvania. Mr. President, the present law requires that a certain proportion of the caretakers shall be men enlisted in these military organizations. In some of the organizations it is found impossible to get men who can give all of their time to the care of the animals, and it is necessary to hire caretakers at a low rate of pay. The rate of pay is fixed by regulation, and an appropriation is made separately each year in the Army appropriation bill to pay these caretakers. This simply authorizes what many organizations now are doing out of their own pockets. It allows all of the caretakers, save one, to be engaged from civilians, instead of their being enlisted men.

Mr. KING. I notice that it requires that there shall be at least one officer of the grade of lieutenant, or above. Is that important?

Mr. REED of Pennsylvania. That is in the present law, and that is in connection with taking care of airplanes. The first proviso is in the present law. The second proviso relates to organizations employing animal-drawn equipment. The reason why the commissioned officer is required in heavier-than-air outfits is because there is so much fragile material belonging to the Government. It requires great care.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CAPT. GEORGE E. KRAUL

The bill (H. R. 3510) to authorize the President, by and with the advice and consent of the Senate, to appoint Capt. George E. Kraul a captain of Infantry, with rank from July 1, 1920, was considered as in Committee of the Whole.

The bill had been reported by the Committee on Military Affairs with an amendment, on page 1, line 3, after the word "That," to insert the words "in order to rectify an admitted error of the War Department in the computation of commissioned service," and a comma, so as to make the bill read:

Be it enacted, etc., That, in order to rectify an admitted error of the War Department in the computation of commissioned service, the President of the United States be, and he hereby is, authorized to appoint, by and with the advice and consent of the Senate, George E. Kraul a captain of Infantry in the Regular Army of the United States, with rank from July 1, 1920: *Provided*, That no back pay or allowances shall accrue as a result of the passage of this act, and there shall be no increase in the total number of captains of the Regular Army now authorized by law by reason of the passage of this act.

Mr. REED of Pennsylvania. Mr. President, I would like to say a word about this bill. The committee has definitely set its face against putting any man into the Army by private bill. This bill is an exception, as appears by the amendment, because of a clerical error of the clerk in The Adjutant General's office who calculated the length of this man's commissioned service for the purpose of determining his place on the promotion list. Captain Kraul is now in the Army. It does not add any officer, but simply puts Captain Kraul in his admittedly proper place on the list.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CARLISLE BARRACKS RESERVATION

The bill (H. R. 5635) to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the

Carlisle Barracks Reservation was considered as in Committee of the Whole.

Mr. REED of Pennsylvania. Mr. President, under a law we passed in 1924, the Secretary of War was authorized to sell certain land and use the proceeds from the sale for buying two other tracts. The proceeds were not enough to buy both tracts, and this changes the law simply to enable him to buy one, but no authorization is given to buy any other.

Mr. McKELLAR. Mr. President, I want to remark in passing that it seems to me that giving to the Secretary of War or to any other executive officer of the Government the right to sell property, and then with the proceeds buy other property, is a very bad practice. We should always cover the money into the Treasury, and make an appropriation for the purchase of the property we desire to buy.

Mr. REED of Pennsylvania. I agree with the Senator, and if the law did not already read that way, I would ask to have the sale and purchase separately authorized. I think that ought to be done.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AMENDMENT OF NATIONAL DEFENSE ACT

The bill (S. 1823) to amend section 2 of the act approved June 6, 1924 (43 Stat. L. 470), entitled "An act to amend in certain particulars the national defense act of June 3, 1916, as amended, and for other purposes," was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 2, line 5, after the word "arms," to insert a colon and the following proviso: "*Provided*, That not more than 5 per cent of the total commissioned strength of the Army shall be so excepted at any one time," and a semicolon.

The amendment was agreed to.

Mr. REED of Pennsylvania. Mr. President, this is intended to amend the Manchu law. The Manchu law, as the Senate will remember, is that which is designed to prevent staff officers holding staff positions throughout their whole military career, out of touch with troops. The present law requires that every officer shall spend a certain part of each four years of service on duty with troops, so that every staff officer has a taste of field service. That is all right and the committee does not propose to change it, nor does the War Department ask us to do so; and it will be found on looking at this bill that it does not propose to change that practice with regard to general staff officers.

There are other officers, however, who are covered by the general wording of the law whose work is seriously interrupted. For example, in the Chemical Warfare Service there are a large number of technical experimenters at work. To take them away from their laboratories and send them out with troops interrupts their work, and it does the Government no good.

Mr. McKELLAR. Mr. President, would it not mean the teaching of other officers to perform those particular duties? It seems to me that the Manchu law has been of the greatest value to the Army. The Senator will not recall, perhaps, but some time before the late war there was a large accumulation of officers principally here in Washington. It almost became a scandal in the Army, and it brought about the passage of the Manchu law. I think we ought to conform to that law. I believe that officers of the Army should be required to serve with troops, certainly once in every four years. I doubt the wisdom of this bill and hope the Senator will let it go over, so that we may look into it.

Mr. REED of Pennsylvania. I will be very glad to let it go over, and we can discuss it more fully.

Mr. ROBINSON of Arkansas. Before it is passed over, Mr. President, let me ask if the changes in existing law as provided in this bill are confined to such persons in such technical service as is suggested by the Senator from Pennsylvania.

Mr. REED of Pennsylvania. The bill would apply to all officers except those in the General Staff Corps. The exception is shown on page 1. I do not mean to press the bill now. I am going to ask that it go over, but let me give the Senator an illustration.

In France the head of the Graves Registration Service was an officer who had been in France for three years, who knew the ground thoroughly, who had learned to speak French fluently, who had all the problems at his finger tips, so that he could almost tell in what part of any cemetery any man was buried. He was taken away, brought back here to serve with troops as the result of the Manchu law, and we had to send an officer to take his place, who, in the nature of things, would not have any of that information. It seriously impeded the work, and cost the Government money. That is the theory of the department in asking for the legislation.

Mr. McKELLAR. But, instead of having one officer who could do that particular work, when there was a change made, at the end of the third year, we would have another officer who could do the work. It cuts both ways, and taking it by and large, I am constrained to believe that it is of immense value to the Army to have its officers serve with troops at least every four years.

Mr. REED of Pennsylvania. I agree with the Senator about the value of the Manchu law in general. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will be passed over.

WITHHOLDING OF PAY OR ALLOWANCES IN THE MILITARY SERVICE

The bill (S. 1830) to authorize the Secretary of War to withhold pay or allowances of any person in the military service to cover indebtedness due the United States or its military agencies or instrumentalities was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with amendments. The first amendment was, on page 1, line 4, to strike out "him" and insert "them."

The amendment was agreed to.

Mr. JONES. Mr. President, may I ask the Senator if the word "respectively" should not come after the word "them"? It does not mean that these regulations shall be made jointly by the Secretaries of War and Navy?

Mr. REED of Pennsylvania. I think that amendment would be appropriate.

Mr. JONES. I suggest that amendment.

Mr. REED of Pennsylvania. This bill is made necessary by a recent decision of the courts, which changed the practice of a hundred years in both the Army and the Navy. Always before if an officer were indebted to the Government, the amount of his indebtedness was deducted from his pay. Now, for the first time in a century, it has been held that the law gives us no right to do that.

Mr. ROBINSON of Arkansas. Does the Senator mean that that is a ruling of the Comptroller?

Mr. REED of Pennsylvania. No; a decision of the courts.

Mr. McKELLAR. Of the Supreme Court?

Mr. REED of Pennsylvania. Yes; of the United States Supreme Court.

Mr. JONES. I offer an amendment. I move after the word "them" to insert the word "respectively."

Mr. McKELLAR. Where?

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 1, line 4, after the committee amendment, insert the word "respectively," so that it will read "by them respectively."

The amendment was agreed to.

Mr. ROBINSON of Arkansas. Does that mean that each secretary may prescribe rules, independent of the rules prescribed by the other?

Mr. JONES. I think so. They deal with their own departments.

Mr. REED of Pennsylvania. Each would prescribe the regulations for his own department.

The PRESIDING OFFICER. The clerk will state the next amendment of the committee.

The CHIEF CLERK. On page 1, after the word "War," insert the words "or the Secretary of the Navy"; on the same page, line 7, after the word "military," insert the words "or naval"; on page 2, line 3, after the word "Army," insert the words "or Navy"; and on line 7, after the word "War," insert the words "or the Secretary of the Navy."

The amendments were agreed to.

Mr. JONES. Mr. President, I want to ask the Senator this question: We passed a bill a short time ago dealing with indebtedness of members of the Army. Does not this modify that?

Mr. REED of Pennsylvania. That dealt with the indebtedness of enlisted men. This relates to officers.

Mr. JONES. This says "any person in the military service." It seems to me this covers privates as well as officers.

Mr. REED of Pennsylvania. The two would be considered together. I suppose the reason why the word "persons" is put in is for the purpose of covering warrant officers, nurses, and other persons of that character. The use of the word "officer" would not be quite broad enough. The other measure covers enlisted men.

Mr. JONES. This bill would not be considered as modifying the other measure to that extent? This may become a law after the other becomes a law.

Mr. REED of Pennsylvania. Yes; that would be true, because the other, as I recall it, is a House bill. I suggest that we let this bill go over.

The PRESIDING OFFICER. The bill will be passed over.

SECRET MILITARY MATERIAL

The bill (S. 1831) to authorize the Secretary of War and the Secretary of the Navy to class as secret certain material, apparatus, or equipment for military and naval use was announced as next in order.

Mr. McKELLAR. Mr. President, will not the Senator explain the bill?

Mr. REED of Pennsylvania. In the first place, the committee was unwilling to give that authority to the Secretary of War or to the Secretary of the Navy. We believed that if it was to be given to anyone, it ought to be given to the President himself. Therefore the amendments which the Senator sees in the bill.

There are a number of military secrets in all armies that have to be exposed if the goods which they cover are bought on specifications and by open bidding. To give a good illustration, the eyepieces of the German gas masks in the last war were made of some material, or in some such way, that they would not get dim from the moisture of one's breath. Nobody during the war could learn how those were made. If the United States makes an invention like that, in order to get the articles manufactured and to purchase them from the lowest bidder it has to advertise its specifications, and the moment it does so, the military value of the invention is gone.

There are not many things of that sort, a few of the fire-control instruments, perhaps, and some of the Signal Corps apparatus, and a few tricks they have in aviation, not many; but it is desirable that we shall keep them secret if we can. The discretion ought to be in the President; not in any subordinate officer.

Mr. LA FOLLETTE. Mr. President, I ask that the bill may go over.

Mr. McKELLAR. Before it goes over, may I call the attention of the Senator from Pennsylvania to the fact that the language used in the bill is very broad, being "any material, apparatus, or equipment for military or naval use." That would include everything, and I was wondering if some limitation could not be made. I merely make the suggestion. I hope the Senator will consider it when the bill comes up again.

Mr. ROBINSON of Arkansas. May I suggest to the Senator in the same connection that the language he has quoted is modified by that which follows, "or equipment for military or naval use which is of such a nature that the interests of the public service would be injured by publicly divulging information concerning them," and so forth.

Mr. McKELLAR. Yes; that is true, but still it is very broad.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The bill goes over, under objection.

BILL PASSED OVER

The bill (S. 1838) to amend section 110 of the national defense act by repealing and striking therefrom certain provisions prescribing additional qualifications for National Guard State staff officers, and for other purposes, was announced as next in order.

Mr. REED of Pennsylvania. I ask that the bill may go over. Some Senators wish to consider it further.

The PRESIDING OFFICER. The bill will be passed over.

WAR DEPARTMENT MEDALS AND BADGES

The bill (H. R. 8309) to amend an act entitled "An act to prohibit the unauthorized wearing, manufacture, or sale of medals and badges awarded by the War Department," approved February 24, 1923, was considered as in Committee of the Whole.

Mr. ROBINSON of Arkansas. Mr. President, may we have an explanation of the reason for the bill?

Mr. REED of Pennsylvania. The only need for it is to make it an offense to wear the distinguished flying cross, a decoration which has been authorized since the passage of the original act of 1923. The flying cross was not included in that act because it did not then exist. This bill modifies it only to insert those words, but the bill as it passed the House put the soldier's medal ahead of the flying cross. The amendment made in our committee merely reverses the order in which the words occur.

Mr. ROBINSON of Arkansas. Does not the Senator think the language should be "any person who knowingly offends against the provisions of this section"?

Mr. REED of Pennsylvania. I had not paid attention to that because it is the old law. I agree with the Senator that the word "knowingly" might well be inserted.

Mr. ROBINSON of Arkansas. It seems to me under that provision a gallant young flyer who permitted his sweetheart to wear his medal might suffer the painful embarrassment of having her fined $250.

Mr. REED of Pennsylvania. Whereas the fine ought to be paid by him?

Mr. ROBINSON of Arkansas. Whereas there ought not to be any fine at all in such a case.

The bill had been reported from the Committee on Military Affairs with amendments, on page 1, line 10, to strike out the words "soldier's medal," and on page 2, line 1, after the word "cross" to insert the words "soldier's medal."

The amendments were agreed to.

Mr. REED of Pennsylvania. I move to amend by inserting on page 2, line 11, after the word "who," the word "knowingly."

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 2, line 11, after the word "who," insert the word "knowingly," so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to prohibit the unauthorized wearing, manufacture, or sale of medals and badges awarded by the War Department," approved February 24, 1923 (sec. 1425, title 10, U. S. Code), be amended so as to read as follows:

"That hereafter the wearing, manufacturing, or sale of the Congressional Medal of Honor, distinguished-service cross, distinguished-service medal, distinguished-flying cross, soldier's medal, or any other decoration or medal which has been, or may be, authorized by Congress for the military forces of the United States, or any of the service medals or badges which have been, or may hereafter be, awarded by the War Department, or the ribbon, button, or rosette of any of the said medals, badges, or decorations, of the form as is or may hereafter be prescribed by the Secretary of War, or of any colorable imitation thereof, is prohibited, except when authorized under such regulations as the Secretary of War may prescribe.

"Any person who knowingly offends against the provisions of this section shall, on conviction, be punished by a fine not exceeding $250 or by imprisonment not exceeding six months, or by both such fine and imprisonment."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CONSTRUCTION AT WEST POINT

The bill (H. R. 9202) to authorize construction at the United States Military Academy, West Point, N. Y., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with amendments, on page 1, line 3, after the word "authorized," to strike out the words "the razing of the old cadet mess hall at the United States Military Academy, West Point, N. Y., and," and in line 6, after the word "barracks," to insert the words "at the United States Military Academy, West Point, N. Y.," so as to make the bill read:

Be it enacted, etc., That there is hereby authorized the construction of a new cadet barracks at the United States Military Academy, West Point, N. Y., at a total cost of not to exceed $825,000: *Provided*, That the Superintendent of the United States Military Academy, West Point, N. Y., with the approval of the Secretary of War, is authorized to employ architects to draw the necessary plans and specifications from funds herein authorized, when appropriated.

The amendments were agreed to.

Mr. KING. Mr. President, I recall that a few years ago we made very liberal appropriations for West Point and it was stated then, as I recall, that ample provision had been made for the institution for many years. Why is it that so large an appropriation is now required?

Mr. REED of Pennsylvania. Because of the increase in the number of officers in the Army and a consequent increase in the number of cadets at the academy. Congress has recently authorized a further increase to take care of the sons of soldiers of the World War who were killed. The Congress has already authorized the razing of the old mess hall and has appropriated $135,000 for the purpose. That building is to be replaced by the new cadet barracks and the appropriation of $135,000 authorized the preparation of the plans for the new barracks. We were unwilling to go further than that in the appropriation bill this year. It was not necessary to appropriate the balance of the money. That is why in the appropriation bill, as in the housing bill which we passed, we declined to include the cost of building the new barracks.

Mr. JONES. Mr. President, can the Senator tell me how many cadets the proposed new barracks will care for?

Mr. REED of Pennsylvania. I can read that from the report, if the Senator please:

The present barracks facilities provide for the accommodation of 875 cadets. As a result cadets are living three in a room designed for two. The crowded conditions interfere with studies and are unhealthy and uncomfortable. To adequately care for 1,200 cadets, another barracks to accommodate 325 cadets (or 163 rooms, the equivalent of a little more than 10 of the present divisions) is required as soon as possible.

Mr. JONES. Is it expected to increase the membership at West Point to 1,200?

Mr. REED of Pennsylvania. The membership of West Point is now authorized at 1,200.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ANNIVERSARY OF DISCOVERY OF HAWAIIAN ISLANDS

The bill (H. R. 81) to authorize the coinage of silver 50-cent pieces in commemoration of the one hundred and fiftieth anniversary of the discovery of the Hawaiian Islands by Capt. James Cook, and for the purpose of aiding in establishing a Capt. James Cook memorial collection in the archives of the Territory of Hawaii, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in commemoration of the one hundred and fiftieth anniversary of the discovery of the Hawaiian Islands by Capt. James Cook, and for the purpose of aiding in establishing a Capt. James Cook memorial collection in the archives of the Territory of Hawaii, there shall be coined in the mints of the United States silver 50-cent pieces to the number of 10,000, such 50-cent pieces to be of a standard troy weight, composition, diameter, and design as shall be fixed by the director of the mint and approved by the Secretary of the Treasury, which said 50-cent pieces shall be legal tender in any payment of their face value.

SEC. 2. The coins herein authorized shall be issued only upon the request of the Cook Sesquicentennial Commission of Hawaii and in such numbers and at such times as they shall request upon payment by such commission to the United States of the par value of such coins.

SEC. 3. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material, and for the transportation, distribution, and redemption of the coins, for the prevention of debasement or counterfeiting, for security of the coin or for any other purpose, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized: *Provided*, That the United States shall not be subject to the expense of making the necessary dies and other preparation of this coinage.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REIMBURSEMENT TO STATE OF NEVADA

The joint resolution (S. J. Res. 41) directing the Comptroller General of the United States to reopen, readjust, and resettle the account between the State of Nevada and the United States was considered as in Committee of the Whole.

The joint resolution had been reported from the Committee on the Judiciary with an amendment to strike out all after the resolving clause and insert:

That the Comptroller General of the United States is authorized and directed to reopen, restate, and resettle the account of the State of Nevada for moneys advanced and expended in aid of the Government of the United States during the War between the States, and on such restatement and resettlement (1) to assume the balance due the State of Nevada on January 1, 1900, as being correctly stated in the account set forth in the reports of the Secretary of the Treasury printed in House Document No. 322 and Senate Document No. 441, Fifty-sixth Congress, first session; (2) to add to such balance the interest certified by the Governor and the Comptroller of the State of Nevada as actually paid by said State from January 1, 1900, to the date of the approval of this joint resolution, in the principal sums so advanced and expended; and (3) after deducting the amounts repaid by the United States to the State of Nevada since January 1, 1900, to certify to Congress for an appropriation the balance found due the State of Nevada.

Mr. PITTMAN. Mr. President, I wish to say that the joint resolution provides that the Comptroller General shall readjust the account between the State of Nevada and the United States for expenditures made by that State during the Civil War in the raising of ample troops to keep open the Overland Trail during that war. The request was made in 1861 under the act of 1861. Nevada at that time called for volunteers under the Territorial act, and enlisted 1,180 men. She spent a total sum of $109,000 in that matter. She has only been paid the sum of $22,000 since that time. The Territory borrowed the money to raise the troops and had to pay interest on it. The Territorial act authorizing the enlistment and pay of such volunteers was approved by Congress. When the State came into the Union in 1864 under the enabling act it had to assume the debts of the Territory. It assumed this debt and issued its bonds in payment of it.

The bonds have never been paid off and are still drawing interest, although legislation affecting the matter has passed the Senate five separate times, but was not acted upon in the House.

The situation is that the matter was adjusted up to 1890. In 1890 a similar measure was passed calling upon the Comptroller General to adjust the account. The final statement of his adjustment was as follows:

Total paid by the State for which no reimbursement has been made, $462,441.97.

We want the adjustment brought up to date from that time.

Mr. ODDIE. Mr. President, I hope the joint resolution will pass. It is exceedingly just. The Judiciary Committee have approved it unanimously and it should be followed by a measure at a later time making the necessary appropriation.

Mr. JONES. Mr. President, I want to ask the Senator from Nevada if the language "certified to Congress for an appropriation of the balance found due to the State of Nevada" is sufficient authorization for an appropriation?

Mr. PITTMAN. It is not, although it anticipates an appropriation. That is the reason why the joint resolution went to the Committee on the Judiciary. It was first taken up by a subcommittee of which the Senator from Colorado [Mr. WATERMAN] was chairman, and then went to the full committee and received a unanimous report.

Mr. JONES. I wonder if the Senator from Nevada would have any objection to making it read, "certify to Congress the balance found due the State of Nevada, and appropriation for the same is hereby authorized"?

Mr. PITTMAN. I do not ask that that language be inserted at this time, for I am satisfied Congress will appropriate the money to settle the account as adjusted in accordance with this resolution, and this is the regular form.

Mr. JONES. Very well.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Committee on the Judiciary.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. PITTMAN subsequently said: Mr. President, I ask unanimous consent that in connection with the passage of Senate Joint Resolution 41, following its passage there be printed in the RECORD the report of the committee, which is very short, and statements before the Judiciary Committee, by Mr. Frank Norcross and Mr. Charles J. Kappler in reference to the matter, which I hand to the clerk.

There being no objection, the report and statements were ordered to be printed in the RECORD, as follows:

[S. Rept. No. 433, 70th Cong., 1st sess.]

REIMBURSEMENT OF NEVADA

Mr. WATERMAN, from the Committee on the Judiciary, submitted the following report, to accompany Senate Joint Resolution 41:

The Committee on the Judiciary, to which was referred the resolution (S. J. Res. 41) directing the Comptroller General of the United States to reopen, readjust, and resettle the account between the State of Nevada and the United States, reports the same favorably to the Senate and recommends that the resolution do pass with the following amendment:

Strike out all of that part of the resolution after the resolving clause and insert in lieu thereof the following:

"That the Comptroller General of the United States is authorized and directed to reopen, restate, and resettle the account of the State of Nevada for moneys advanced and expended in aid of the Government of the United States during the War between the States, and on such restatement and resettlement (1) to assume the balance due the State of Nevada on January 1, 1900, as being correctly stated in the account set forth in the reports of the Secretary of the Treasury printed in House Document No. 322 and Senate Document No. 441, Fifty-sixth Con-

gress, first session: (2) to add to such balance the interest certified by the Governor and the comptroller of the State of Nevada as actually paid by said State from January 1, 1900, to the date of the approval of this joint resolution, on the principal sums so advanced and expended; and (3) after deducting the amounts repaid by the United States to the State of Nevada since January 1, 1900, to certify to Congress for an appropriation the balance found due the State of Nevada."

The joint resolution has for its ultimate purpose the reimbursement of the State of Nevada for moneys actually advanced and expended on account of debts and obligations contracted by the Territory of Nevada at the request of the United States and assumed by the State at the time of its admission into the Union, in raising, equipping, and compensating soldiers called into the service of the United States during the years 1863 to 1865, inclusive, for the purpose of guarding and keeping open the Overland mail and emigrant route to the Pacific coast.

FACTS OF THE CASE AS DISCLOSED BY VARIOUS OFFICIAL REPORTS

In pursuance of the act of Congress of March 3, 1899 (30 Stat. 1206), referred to in the joint resolution, the Secretary of the Treasury was directed—

"to investigate and report to Congress * * * the amount furnished by said State of Nevada or by the Territory of Nevada and assumed by said State * * * with such interest on the same as said State has actually paid, together with what amounts have been heretofore paid by the United States."

The Secretary of the Treasury, on January 19, 1900, in compliance with said act, transmitted "a statement of the case made by the Auditor of the War Department" of date January 18, 1900, from which it appears that with interest paid by the State to December 31, 1899, there remained "the sum of $462,441.97 for which the State has not been reimbursed." (H. Doc. 322, 56th Cong., 1st sess.) In a subsequent report under the same act of Congress the Secretary corrected the balance due theretofore given, showing the sum of $439,222.72 due the State instead of $462,441.97. (S. Doc. 441, 56th Cong., 1st sess.) The State has never been reimbursed in this amount, or any material portion thereof, but whatever sums have been paid will, after including interest paid by Nevada to date, be deducted by the Comptroller General in adjusting and settling the account under Senate Joint Resolution 41, with the statement of the Secretary of the Treasury of January 19, 1900, as modified June 4, 1900, forming the basis of calculation.

The Senate in the Fiftieth, Fifty-first, Fifty-third, Fifty-fifth, and Fifty-sixth Congresses passed measures for the reimbursement of Nevada for such expenditures, and it would seem is committed by vote and by sentiment to the payment of the same. Committees of the House have invariably reported favorably. (Hearings, p. 30.)

The Territory of Nevada was created by act of Congress March 2, 1861 (12 Stat. 210), embracing a very large portion of what was then known as the Great American Desert, in which had been discovered extremely valuable gold and silver mines and across which the Overland mail and emigrant route extended for nearly 500 miles.

The exigency of the situation then existing is illustrated by the following excerpt from one of numerous calls made upon the Territory by the commanding general of the Pacific to furnish troops in an emergency:

[Hearings, pp. 17, 18, and S. Rept. No. 1286, 50th Cong., 1st sess.]

The Indian disturbances along the line of the Overland mail route, east of Carson City, Nevada Territory, threaten the entire suspension of our mail facilities as well as preventing any portion of the vast immigration approaching from the East reaching Nevada. * * * My force immediately available on that line is small. It is impossible for us at this moment to purchase horses and equipment. Each man would have to furnish his own. * * * Even one company will be accepted.

G. WRIGHT,
Brigadier General, United States Army, Commanding.

The Territorial legislature adopted "An act to encourage enlistments and give bounties and extra pay to our volunteer soldiers," approved February 20, 1864. It was under this act that most of the enlistments going to make up the regiment of Cavalry and a battalion of Infantry furnished by the Territory, in all, 1,180 men, were secured and the debt, later assumed by the State, contracted. The so-called "bounties" consisted of $10 per recruit allowed to captains of companies in lieu, and the "extra pay" of $5 per month to soldiers in addition to the Army pay. The Territory was without money and authorized a bond issue for the purpose.

A board of Army officers appointed under the act of Congress approved June 27, 1882 (22 Stat. 111), reported that the so-called "bounty" pay to captains was for "enlisting, lodging, and subsisting the men of their companies prior to their entering the United States service in lieu, * * * and, under the circumstances, this expense was economical." Concerning the so-called "extra pay" they reported:

"We are decided in the conviction * * * that the legislature was mainly instigated by a desire to do a plain act of justice * * * by placing them on the same footing, as regards compensation * * * their compensation from all sources did not exceed, if indeed was equal to, the value of the money received as pay by the troops stationed elsewhere." (Hearings, p. 23.)

Notwithstanding the facts, the board of Army officers, as has the Court of Claims (45 C. Cls. 264), felt compelled, while recognizing the equity of Nevada's case, to deny reimbursement because of the use by Nevada of the expression "bounty and extra pay," terms which did not correctly set forth the true nature of the payments intended to be made.

The act of Congress creating the Territory of Nevada provided that copies of all acts of the legislature must be submitted to Congress. Congress interposed no objection to the act creating this debt. (Hearings, p. 24.)

The Journals of the Senate and House of Representatives show that the Territorial act providing for extra pay to the Nevada volunteers was forwarded to Congress, laid before each House, and referred to the Committee on Territories. Congress, though it had the power to disapprove said act, did not so disapprove; although on another occasion in 1863 Congress passed an act expressly nullifying section 24 of the Nevada Territorial act relating to corporations. Had Congress disapproved of the extra pay it would therefore have so declared by an act. By approving said Territorial act Congress accepted said Territorial act as a modification of the act of 1861 and the regulations made thereunder, so far as Nevada alone was concerned, and thereby made such extra pay here in dispute valid. These important facts were not presented to the Army officers or the Court of Claims; if they had been, said Army officers and the court would, instead of rigidly adhering to the act of 1861 and the regulations, undoubtedly have rendered a favorable decision. In any event, it is now proven for the first time that such extra pay was made by the Territory of Nevada with the approval of Congress.

CONDITIONS PREVAILING IN NEVADA TERRITORY IN 1863–64

On March 21, 1864, Congress, for national purposes, passed an enabling act authorizing the people of the Territory of Nevada to adopt a constitution and be admitted into the Union as a State at a time when the people were wholly unprepared, from population, taxation, resource, and financial standpoints, to assume the burdens of statehood. This will be more fully realized when it is remembered that at such time, namely, in 1863 and 1864, the Territory of Nevada embraced a large desert and mountainous area with a limited population perhaps of not more than 15,000 persons. The inducement to go into that region was the discovery of rich mines on what is known as the Comstock lode. Men were scarce, and under the existing law of supply and demand the wages of labor and prices of supplies in Nevada were necessarily greatly in excess of those prevailing in other sections of the country. There were no regular United States troops operating in that vast desert region. Such United States troops as had been stationed in the far West had been transferred east during the early part of the war, and for such reason volunteers were called for from that locality, where hostile Indians abounded and who interfered with the overland route from Salt Lake City to San Francisco.

The cost of living and wages of labor in Nevada during the War between the States were from 50 to 100 per cent higher than in the Atlantic States. Under such extreme conditions prevailing it was found necessary by the Territory of Nevada, acting under the advice of the Army officers, to pass acts providing for the payment of $10 per recruit to captains and $5 per month to soldiers in addition to the regular Army pay, as an inducement to secure speedy enlistments of men to fight the Indians on the desert and in the mountains, incited to hostilities by the general war conditions prevailing, and of course partially to cover the high cost of living.

It may here be added that had not the patriotic impulses of the people of the Territory of Nevada been most fervent in behalf of the Union, as the record shows they were, it is doubtful if, under the conditions prevailing in Nevada at that time, and in fact, upon the whole Pacific coast, it would have been possible to have obtained the enlistment of men for the United States Army service against the Indians to guard the overland route where men were readily employed in the mines at wages ranging from $5 to $10 per day in gold.

The conditions existing in such Territory at that time can be appreciated when we find that the Quartermaster General estimated the cost of a bushel of corn purchased at Fort Leavenworth, Kans., and delivered at Salt Lake City, Utah, was $17 a bushel. (Report Secretary of War, 1865–66, pt. 1, pp. 23–112; also report General Halleck to Secretary of War, dated October 18, 1866; War Department Annual Report, 1866, pp. 31–32.)

To understand the conditions in Nevada at that time it must be borne in mind that there were no railroads crossing the continent at that period. The Panama and Cape Horn routes had been closed, and snows on the Sierra Nevada Mountains blocked for eight months in the year travel from the Pacific coast to the interior.

The great Comstock mines, then the greatest gold and silver producers in the world, were supplying their resources for the support of the Government, and there was only one trail that could be kept open, and that was the overland trail through Nevada.

Out of its population of 15,000 persons over 1,100 volunteered. They abandoned from $5 to $10 a day in the mines and suffered hard-

ships as no other soldiers ever suffered. They supplied their own horses and equipment and lived as best they could. They kept the communication open in the face of numerous and severe Indian wars.

CONGRESS ESTOPPED FROM DENYING RELIEF

Technically, it has been construed that the Federal law allows no bonus to soldiers. What inducement was there in the sum of $10 for officers for each recruit, which sum was expended for enlisting, lodging, and subsisting the men prior to entering United States service, in lieu, and $5 a month for privates? These sums were not a bounty; they were only essential as increased pay to permit soldiers and officers to exist under the laws of supply and demand prevailing in the Territory in 1863 and 1864, and so the Army board found. Congress, which passed upon the acts of the Territory, found no objection to this extra pay, although Congress had a right to refuse to ratify it. Congress is now and ever since has been estopped from denying reimbursement after it forced the admission of the Territory of Nevada into the Union under the condition that it should assume such obligations incurred by the Territory, and in view of the fact Congress approved the Territorial act providing for extra pay.

HISTORICAL FACTS COVERING NEVADA STATEHOOD

Charles A. Dana, then Assistant Secretary of War, is authority for the statement, undoubtedly true, that the administration of President Lincoln—

"had decided that the Constitution of the United States should be amended by the adoption of the thirteenth amendment. * * * It was believed that such an amendment would be equivalent to new armies in the field, that it would be worth at least a million men. * * * When that question (ratification) came to be considered * * * one State more was necessary. The State of Nevada was organized and admitted into the Union to answer that purpose." (Dana's Recollections of the Civil War, p. 174.) (Hearings, p. 16.)

The State being thus practically forced into the Union for national reasons was bound to assume and discharge the debts contracted by the officers of the Territory, all of whom were appointed by and in the pay of the General Government and, in fact, were officers thereof. It did so as part of its constitution, which was approved by President Lincoln. The response of the people of the Territory to the call of Congress had also the effect of shifting the burden of the cost of its government from the Nation to the State, which effected a saving to the General Government many times greater than all the debts and obligations for war purposes paid by the State and for which the State now seeks reimbursement.

STRICT CONSTRUCTION OF ACTS AGAINST NEVADA

While the construction placed on the acts of Congress by the board of Army officers and the Court of Claims was unquestionably rigid and strict instead of liberal, as later held, they should be construed by the Supreme Court in New York *v.* United States, (160 U. S. 598) deemed necessary, perhaps, because of their general application, still such construction as applied to the peculiar and unusual conditions prevailing at the time in Nevada could not do otherwise than produce and effect an injustice calling for relief. Likewise the board of Army officers, due to their rigid construction, held that interest on money borrowed by a State for the common defense could not be allowed, yet the Supreme Court, in New York *v.* United States, supra, held interest so paid as a proper charge and cost.

The statement made by Congressman UNDERHILL, of Massachusetts, chairman of the House Committee on Claims while the claims bill, H. R. 9285, was under consideration January 30, 1928 (CONGRESSONAL RECORD, 70th Cong., p. 2187), aptly applies to what should have been done in the Nevada case, which we here quote with approval:

"Many of the reports from the Comptroller General are based on a strict interpretation of the letter of the law and technicalities. Of course I would not have the comptroller go against the law, but I think if I were in his place I could stretch my conscience to the extent of finding a reasonable interpretation of the law rather than a strict interpretation of the letter of the law."

MORAL OBLIGATION TO REIMBURSE NEVADA

Congress, on July 27, 1861, passed an act entitled "An act to indemnify the States for expenses incurred by them in defense of the United States" (12 Stats. 276), and it is not unlikely that the officials of the Territory, so far from the seat of government, in those extraordinary days construed this act to warrant incurring any debt which circumstances seemed to them to require. As to any regulations made thereunder, it is doubtful if the Territorial officials ever saw them. In any event, the emergency was great and was met, effectually, by means that the board of Army officers conceded were both "economical" and "a plain act of justice." The debt having been contracted by the Territory under an act of its legislature which Congress, having the opportunity, had not objected to, Congress would not only be estopped but would be in honor bound to reimburse the Territory.

When the people of Nevada Territory were, for national exigencies, called upon by Congress to organize a State government, still greater it would seem is the moral obligation resting upon Congress to provide for reimbursement for debts so required to be assumed and which were incurred in common defense for the benefit of the United States and at its urgent calls. As was said by the Supreme Court of the United States in the sugar bounty cases (U. S. *v.* Realty Co., 163 U. S. 427):

"That even though in its purely legal aspects an invalid law could not be made the basis of a legal claim, the planter had acquired a claim against the Government of an equitable, moral, or honorable nature; that the Nation, speaking broadly, owed a "debt" to an individual when his claim grew out of right and justice—when, in other words, it was based upon considerations of a moral or merely honorary nature."

Under this opinion the bounties were paid.

The reimbursement of Nevada plainly and strongly grows out of "right and justice," and the Senate having heretofore, after exhaustive reports, on five separate occasions, passed measures for payment, your committee concur in such action.

SENATE PASSED AMENDMENT FOR PAYMENT

In the Fifty-sixth Congress the Senate committee reported the following amendment to the sundry civil appropriation bill, H. R. 11212:

"To pay the State of Nevada the sum of $462,441.97 for moneys advanced in aid of the suppression of the rebellion in the Civil War, as found and reported to Congress January 22, 1900, by the Secretary of the Treasury, as provided by the act approved March 3, 1899 (30 Stat. 1206)."

Before the adoption of this amendment the following Senators spoke in support thereof:

"Senator HAWLEY, of Connecticut. There is no sort of question as to its justice.

"Senator HALE, of Maine. The Senate is committed to this State claim, by vote, by sentiment, and it is only a question of time when it will pass.

"Senator TELLER, of Colorado. If there are any claims that are just and proper which the United States ought to pay, this is one of them. It is as sacred an obligation, in my judgment, as the national bonds." (CONGRESSIONAL RECORD, 56th Cong., 1st sess., vol. 33, pt. 7, p. 6278.)

FORMER REPORTS OF THE SECRETARY OF THE TREASURY

The Secretary of the Treasury in his report responding to the act of Congress approved March 3, 1899 (30 Stat. 1206), set forth the actual amounts paid by Nevada and not reimbursed as follows (H. Doc. No. 322, 56th Cong., 1st sess.; S. Doc. 441, 56th Cong., 1st sess.):

Amount of claim of the State of Nevada, including interest up to June 30, 1899 (Report of the Secretary of War, p. 10, S. Ex. Doc. 10, 51st Cong.)	$412,600.31
Amount of interest paid by Nevada from June 30, 1899, to December 31, 1899	58,401.27
	471,001.58
Amount which the State was reimbursed April 10, 1888, under act of June 27, 1882	8,559.61
Total paid by the State for which no reimbursement has been made	462,441.97

In a subsequent report, printed in Senate Document 441, Fifty-sixth Congress, first session, the Secretary corrected the above amount by deducting the sum of $23,219.25 paid January 13, 1899, leaving the balance, which had not been reimbursed, $439,222.72.

On July 1, 1910, under the decision of the Court of Claims and the Comptroller of the Treasury, an additional sum was allowed as interest on the $8,559.61 amounting to $12,283.04, leaving a balance due and not reimbursed of $426,939.68.

In addition there should be added interest on the principal sum from January 1, 1900, to date of passage of the joint resolution.

The object and purpose of Senate Joint Resolution 41 is to direct the Comptroller General of the United States to accept as a basis for calculation the undisputed statement of the Secretary of the Treasury printed in House Document 322, as modified by statement in Senate Document 441, Fifty-sixth Congress, first session, and to add thereto the interest on the principal sum borrowed in aid of the Government paid by the State of Nevada since December 31, 1899; then to deduct from such sum the $12,283.04 heretofore paid by the United States under the Court of Claims decision, and the balance resulting should be the amount to be submitted by him to the Budget for a proper estimate to Congress in time to be inserted in one of the general appropriation bills.

In view of the fact that the reimbursement of Nevada passed the Senate five times, and on account of the peculiar merit, on the ground of right and justice, such reimbursement possesses, and because Nevada is not asking reimbursement of a penny she has not actually expended in good faith, your committee recommends that Senate Joint Resolution 41 do pass.

COMMITTEE ON THE JUDICIARY, UNITED STATES SENATE,
Wednesday, January 25, 1928.

* * * * * * *

Senator WATERMAN. Are you ready to proceed, gentlemen?

Mr. NORCROSS. Before I make my statement I wish to offer a memorial by T. B. Balzar and Morley Griswold, governor and lieutenant

governor and adjutant general, respectively, and various State officials, which was passed by the Legislature of the State of Nevada, for the record.

Senator WATERMAN. It may go in as part of the record.

The paper referred to is as follows:

A MEMORIAL FOR THE REIMBURSEMENT OF THE STATE OF NEVADA FOR EXPENDITURES MADE IN AID OF THE GOVERNMENT OF THE UNITED STATES DURING THE WAR BETWEEN THE STATES

[Extract from the CONGRESSIONAL RECORD, December 15, 1927]

Memorial from the officials of the State of Nevada (the legislature not being in session) asking for the reimbursement of the State for moneys actually advanced and expended by the State in aid of the Government of the United States during the War between the States

MEMORIAL OF THE STATE OF NEVADA

To the Senate and House of Representatives of the United States:

Your memorialists, the executive officers of the State of Nevada (the legislature not now being in session), respectfully pray that an appropriation be made to reimburse the State of Nevada for moneys actually expended by the State for costs, charges, and expenses incurred in enrolling, equipping, and compensating her military forces during the Civil War in response to the urgent calls of and under proper requisitions made by the commanding officer of the Military Department of the Pacific, under direct authority of the President and the Secretary of War, upon the understanding that all such costs, charges, and expenses actually incurred in raising troops for the United States would be reimbursed to the State.

The expenditures made by the State of Nevada for and on account of the United States, and at its most urgent call, are set forth by the Secretary of the Treasury pursuant to the act of Congress approved March 3, 1899 (30 Stat. 1206), as follows:

"The amount expended by the State of Nevada, with such interest on the same as the State had paid, between February 10, 1865, and June 30, 1889, amounts in all to the sum of $412,600.31. * * * From June 30, 1889, to December 31, 1899, the State of Nevada has paid the sum of $58,401.27 as interest upon money paid by the State in aiding * * * in the Civil War. (The Supreme Court of the United States in the New York case (160 U. S. 598) held interest paid by the State on borrowed money a proper cost or charge.) * * * The total amount expended by the State of Nevada or by the Territory of Nevada and assumed by said State, with such interest on the same as the said State has actually paid, amounts to $471,001.58. * * * The sum of $8,559.61 was allowed and paid the State of Nevada. * * * This amount, deducted from the total paid by the State of Nevada, leaves the sum of $462,441.97 for which the State has not been reimbursed." (H. Doc. 322, 56th Cong., 1st sess.)

No part of the sum actually expended has been reimbursed the State of Nevada other than the small amount credited, although the costs, charges, and expenses, including interest, incurred by other States in aid of the Government during the Civil War have been paid said States.

The State of Nevada is in urgent need of the sum due her from the United States, and your memorialists believe that if the attention of Congress is again invited to this matter it will appreciate the justness of her request for reimbursement.

Your attention is respectfully called to a few salient facts. The Territory of Nevada was created by act of Congress approved March 2, 1861. It embraced a generally mountainous and desert region of nearly 100,000 square miles and comprised a then population, exclusive of Indians, of but approximately 15,000. A Territorial government was made necessary by the then recent discoveries of great gold and silver mines. Early in 1861 the Government withdrew all troops from the Pacific coast, excepting one regiment of Infantry and three batteries of Artillery, to guard practically the entire Mexican cession and the Oregon country, nearly one-third of the area of the United States. In 1863, by reason of activities at sea, the ocean route to the Pacific was closed. The overland route was left the only means of communication. This route also was threatened with closure by warring Indians and bandits. The Territory of Nevada was called upon to furnish troops in this exigency. This required money, which the Territorial treasury did not possess. The Territory authorized a bond issue and answered the Government's urgent calls with a regiment of Cavalry and a battalion of Infantry.

The overland route was kept open to California and the Comstock Lode and other Nevada mines were permitted to continue operations. These mines turned into the Treasury of the United States during the years of and immediately following the Civil War $500,000,000 of gold and silver. On March 21, 1864, just two months after the people of the Territory had overwhelmingly defeated a proposed State constitution, authorized by act of the Territorial legislative council, Congress passed an enabling act and the people of Nevada were asked to assume the obligations of statehood. So important is this matter that we quote from Charles A. Dana, then Assistant Secretary of War, the following excerpt from his book Recollections of the Civil War:

"The administration had decided that the Constitution of the United States should be amended so that slavery should be abolished. This was not only a change in our national policy, it was also a most important military measure. * * * It was believed that such an amendment would be equivalent to new armies in the field—that it would be worth at least a million men. * * * When that question came to be considered, the issue was seen to be so close that one State more was necessary. The State of Nevada was organized and admitted into the Union to answer that purpose."

The author proceeds and quotes President Lincoln, when the question of the vote upon admission was in doubt, as saying:

"Here is the alternative: That we carry this vote or be compelled to raise another million, and I don't know how many more, men, and fight no one knows how long."

The State was morally bound to assume the Territorial debts and obligations. It did so as a part of the Constitution. President Lincoln, with whom Congress alone left the matter, upon receipt of a copy of the Constitution, sent by telegraph, approved the same with that provision.

We call the attention of Congress to the fact that the appropriate committees of both the Senate and House of Representatives have in past years repeatedly made exhaustive investigations of Nevada's war expenditures and have in every instance reported upon the same favorably, and that the Senate on three separate occasions passed measures carrying an appropriation for reimbursement. In this connection we crave the indulgence of the Congress to be permitted to have three distinguished statesmen, among the many who have considered the matter, again speak in behalf of our State:

Senator Hawley, of Connecticut: "There is no sort of question as to its justice."

Senator Hale, of Maine: "The Senate is committed to this State claim by vote, by sentiment, and it is only a question of time when it will pass."

Senator Teller, of Colorado: "If there are any claims that are just and proper which the United States ought to pay, this is one of them. It is as sacred an obligation, in my judgment, as the national bonds." (CONGRESSIONAL RECORD, 56th Cong., 1st sess., vol. 33, p. 6278.)

It is respectfully submitted, in conclusion, that the conditions under which these expenditures were made were in many respects peculiar to Nevada alone; that the justice of reimbursement has not only been established, but we believe a moral obligation is also involved stronger, if possible, than the mere legality of the obligation; that since reimbursement has been so long delayed it would be but an act of tardy justice to appropriate the sum necessary for such reimbursement at the present session of Congress.

Done at Carson City, State of Nevada, this 5th day of December, 1927.

J. B. BALZAR,
Governor
MORLEY GRISWOLD,
Lieutenant Governor and Adjutant General.
W. G. GREATHOUSE,
Secretary of State.
M. A. DISKIN,
Attorney General.
GEORGE B. RUSSELL,
State Treasurer.
ED. C. PETERSON,
State Comptroller.
GEORGE WATT,
Surveyor General.
WALTER W. ANDERSON,
Superintendent of Public Instruction.
A. J. STINSON,
State Inspector of Mines.

STATEMENT OF FRANK H. NORCROSS, RENO, NEV.

Mr. NORCROSS. In the statement that I will make, with respect to the application of the State of Nevada for reimbursement for moneys expended by the State and debts assumed by the State, which were originally contracted for by the Territory of Nevada, I will endeavor to give a general history of the entire matter.

Senator WATERMAN. All of the debts of the Territory and all of the claims which the Territory had against others passed to the State?

Mr. NORCROSS. Yes. The Territory of Nevada was created by an act of Congress, March 2, 1861. The Territory was undoubtedly created as the result of the discovery of the Comstock Lode and the rush of miners to this western country, and undoubtedly also grew out of the political condition then existing on the Pacific coast on account of the breaking out of the Civil War. At that time it was extremely doubtful as to what the attitude of the Pacific coast would be. That is a matter of history, and I will not occupy any time on that.

Senator WATERMAN. Right there; I notice that this resolution says "the amount of money actually advanced and expended by the State of Nevada." Now, none of the moneys were advanced by the State, but were previously advanced by the Territory. Is that right?

Mr. NORCROSS. That is not exactly right. Practically all of the money was paid by the State, but a great portion of the debt was

contracted by the Territorial governor preceding the organization of the State, so that almost the entire amount for which the State asks reimbursement was contracted originally by the Territory, and then, upon the organization of the State government, it was assumed by the State and paid by the State.

Senator WATERMAN. There has never been any question raised with reference to that situation at all?

Mr. NORCROSS. That situation has been covered in various reports of Senate and House committees when this matter was before the Congress a number of years ago and prior to the time the case was before the Court of Claims, although I will explain that a little later.

Senator WATERMAN. I just wanted to get the foundation of this; that is all.

Mr. NORCROSS. The situation which governed the contracting of this debt is substantially this:

In 1863, two years after the organization of the Territory, by reason of the activities at sea, the Panama route to the Pacific and the route via the Horn was closed. The only remaining communication with California and the Pacific coast was the Overland Trail. At that time there were very few United States troops upon the Pacific coast. At the breaking out of the Civil War all of the troops then in California were ordered to the Atlantic coast. There was left but one regiment of Infantry and three batteries of Artillery to guard what was practically the entire Mexican cession alone, so that the situation which arose later made it absolutely necessary to raise additional troops. The breaking out of Indian wars, in the latter part of 1863, threatened the entire closure of the overland route.

General Wright, who was in command of the military on the Pacific, called upon Governor Nye, of the Territory, to raise additional troops, and stated that it would be necessary for the men to provide their own horses and equipment, that he could furnish arms and ammunition, but anything more than this would have to be furnished by the troops.

A few troops were raised prior to the passage of legislation. The legislature—I think it was in the fall of 1863, or early in 1864—passed an act providing for the encouragement of enlistments in the Territorial forces. That act provided for the payment to captains of $10 per recruit, and for the soldiers $5 per month, and it was designated in the act as "bonus and extra pay."

This expression has governed the legal questions which have subsequently arisen and were controlling in the decision rendered finally in 1910 by the Court of Claims.

The State government was organized in 1864, but before going into that I will refer briefly to the legal points that have been raised against the reimbursement of Nevada.

As I have stated, the whole objection was based upon the use in the Territorial act of the words "bonus and extra pay," because, as I understand it, the policy of the Government was not to allow what was called the "bonus and extra pay."

It is the contention of the State of Nevada that, as a matter of fact, it was not "bonus and extra pay"; and we think that established by the Board of Army Examiners appointed under an act passed by Congress in 1882 to consider the reimbursement of a number of States, including Texas, California, Oregon, Nevada, Nebraska, and, I think, Colorado also. This Board of War Claim Examiners considered the statement furnished by Nevada for its expenditures in great detail. The report was filed, and it is of record, but the important point in the matter is this, that while the Board of War Claim Examiners, consisting all of Army officers—and, as we contend, unacquainted with the law—took the position that while these expenditures were under the circumstances necessary and, as a matter of actual fact, were not "extra pay," but, nevertheless, because the Territorial act had so declared, that that was controlling upon the board.

That, in substance, is the effect, as I understand it, of the decision of the Court of Claims.

Senator WATERMAN. Let me ask you right there one question, if you will.

Mr. NORCROSS. Yes.

Senator WATERMAN. What is Nevada seeking? Merely a recoupment of this "bonus and extra pay"? Is that the sum and substance of the whole thing?

Mr. NORCROSS. It is the main amount of the original debt. In addition to that, it is asking interest, under the decision of the case of New York *v.* United States, which was appealed from the Court of Claims; and, in fact, the claim of the State of New York was for disbursements during the war.

Senator WATERMAN. Then, so far as the principal sum is concerned, it is "bonus and extra pay"; that is what it is?

Mr. NORCROSS. That is what the Army officers say it is. With reference to the matter of the interest, it is interest that has been actually paid by Nevada on money borrowed in aid of the common defense.

Senator WATERMAN. It is interest actually paid by Nevada on that sum?

Mr. NORCROSS. Yes.

Senator WATERMAN. So they want to be recouped for that interest?

Mr. NORCROSS. Yes.

Senator WATERMAN. In addition to the principal?

Mr. NORCROSS. Yes; the Supreme Court held such interest is part of the principal.

Senator WATERMAN. And they are asking no interest upon the total of that?

Mr. NORCROSS. Oh, no.

Senator WATERMAN. None at all; they are just asking for that which they paid out and nothing more?

Mr. NORCROSS. That is all, just to be reimbursed upon the amount it actually paid out.

Senator WATERMAN. I understand your claim now.

Mr. NORCROSS. Now, briefly, on the merits. The State has always heretofore claimed an absolute legal liability under the original act of Congress of 1861 or 1862, which is general and, of course, applied to the entire country.

Then, also, the act of 1882, which created this Board of War Claims Examiners. That act generally, or the important feature of it, provided this, in substance, that the Board of War Claims Examiners should not make any allowance for any of these States or Territories which would be in excess of the amounts paid to Government troops under a similar condition. Now, it was always the contention of the State of Nevada that under that act the State was at the time entitled to reimbursement. So far as the history of this claim is concerned, that was the position of the Senate, taken on four several occasions, because the Senate on four several occasions passed the act providing for the payment of the full amount of this claim.

Senator WATERMAN. The Senate has four times provided for the payment of this claim; is that right?

Mr. NORCROSS. Yes.

This might be a good place to refer to statements made concerning this matter when it was before the Senate. Here is the statement of Senator Teller, and I am reading from pages 6278 and 6279 of volume 33, part 7, Fifty-sixth Congress, first session, of the CONGRESSIONAL RECORD.

Senator ODDIE. What is the date of that?

Mr. NORCROSS. It is May 31, 1900. Here is the statement of Senator Teller [reading]:

"Mr. President, I just want to say one word about this matter. If there are any claims that are just and proper which the United States ought to pay, this is one of them. It has had all the care and attention it is possible to give a claim. Every dollar of this account has been found by the Treasury Department to be due the State of Nevada. The State has been kept out of it for thirty-odd years, and it is an expenditure that all of the States of the West were compelled to make from time to time. Most of them have been recognized and paid, and there is no reason why this should not be paid. It is as sacred an obligation, in my judgment, as the national bonds, and the conditions are such that everybody knows that the Government can pay it now as well as at any other time. The State of Nevada demands that if the Government is ever to pay it, the thing ought to be paid now."

And then from Senator Hawley, of Connecticut. The statement of Senator Hawley is as follows [reading]:

"Mr. President, I have served a good many years on the Committee on Military Affairs, and at every Congress I have heard this bill discussed from beginning to end. There is no sort of question as to its justice. It is just as much due as your board bill which you pay every month."

And I will read a portion taken from a statement made by Senator HALE, of Maine [reading]:

"I want to say to the Senator from Nevada that I know he is reasonable; that the Senate is committed to this State claim by vote, by sentiment, and it is only a question of time when it will pass."

Senator ASHURST, just before you came in I read the statement of Senator Teller, of Colorado. I had just referred to the question of the legality, as the State had heretofore contended, with respect to the disbursements on account of the $5 per month, so-called extra pay to the troops that were raised, and a $10 allowance, which was called a "bonus" in the Territorial act, which was given to captains of companies for recruits. The board of Army examiners, consisting of three officers, made an exhaustive examination of all of these accounts, and with respect to the $5 per month, so-called extra pay, they stated that in view of the high cost of living on the Pacific coast and the tremendous expense of transporting into that section, the extra pay, so called, did not exceed, if indeed it equaled, the pay that was received by soldiers in other parts of the country.

With respect to the $10 bonus, they made this statement, that it was intended, and actually did cover the expenses of transportation, of recruiting, of subsisting, and lodging, and all of the incidentals which went to prepare a soldier for mustering into the United States service, but concluded that statement with the expression that, as a matter of fact, it was economical, so that upon the strict merits of the matter there was, in fact, no extra pay.

Senator WATERMAN. May I interrupt you right there?

Mr. NORCROSS. Yes.

Senator WATERMAN. Senator ASHURST, as I understand the development up to this time, this "bonus and extra pay," so denominated by

Nevada and provided for by statute, had been repudiated by the board and by the Government up to this time, together also with interest, which, in fact, the Territory and State has paid upon that sum of money so advanced to these soldiers; and, further, that when these men were enlisted they had to outfit themselves, except as to arms and ammunition, and these soldiers went in from Nevada and the State or Territory allowed them this $15 referred to, and the Government gave them only arms and ammunition, but they had to forage around, or do something to feed themselves and cloth themselves. Is that a correct statement?

Mr. NORCROSS. That is substantially correct. They could not furnish the soldiers with horses or equipment, about which there can be no question. There was a total of 1,180 men finally mustered into the service, and the facts show that those men, in the main, kept open the Overland Trail, which was considered a military necessity, and which, so far as the financial benefit to the country is concerned, tremendous.

At that time, as you gentlemen can yourselves verify in history, the Comstock mine was then the greatest producer of precious metals of any mine in the world, and it is probable that if the Overland Trail had been closed, the mines would have had to follow, because, as shown by reports at that time, the Sierra Nevada Mountains were closed by reason of snows for six months of the year, and a large portion of the supplies were coming from the East.

That was the situation, so far as the Territory was concerned. Now, in that connection, we take this position, because we believe there is involved in this reimbursement a tremendous moral obligation for the Government to recognize.

Senator WATERMAN. And you base your case entirely upon that?

Mr. NORCROSS. We have to very largely now. I have explained what has been the legal position heretofore taken, which is that these payments were not in fact "bonus or extra pay."

Let me, right in that connection, say this: That even the Territory followed what was theretofore the established policy of the Government in respect to troops in far-distant countries. Following the Mexican War and the admission of California into the Union the Government in its military appropriation bills provided for the payment for troops upon the Pacific coast of double pay to that paid in any other part of the United States, and that was in time of peace, and even at that time expenses and the cost of supplies in California could not be a circumstance to what they were in the desert region of Nevada in the early sixties.

Senator ASHURST, I think, probably knows something about that, and the Senator from Colorado also.

Senator WATERMAN. I would like to ask a question right there. We had a claim the other day with reference to New York City. Have you any familiarity with that?

Mr. NORCROSS. No; I have not.

Senator WATERMAN. You have not. Very well.

Senator PITTMAN. Let me interrupt you right there to see if I follow you. Is it the fact that the United States had declared against paying bonuses?

Mr. NORCROSS. I would not say the United States had declared against bonuses. The original act of 1861 or 1862 provided substantially that the Government would reimburse the States for all expenditures. Previous to 1861, under the act of 1850, bounties were paid by the United States.

Senator PITTMAN. I think I understand.

Senator WATERMAN. Do I understand that your position toward this claim is that it is predicated more upon what the policy of the Government had been with reference to affording some relief to Nevada that it is not affording to somebody else? Is that about the objection?

Mr. NORCROSS. If I understand your question: Taking the history of Nevada's reimbursement case, so far as it has been before the Congress in the past years, the Senate has, as I have stated on four occasions, after its committee submitted exhaustive reports, even after the board of Army officers had reported adversely, passed provisions for the reimbursement of Nevada in full together with the interest Nevada actually paid on the principal borrowed in aid of the common defense.

On each several occasions the House committees, considering that matter, had also reported favorably. There was nothing adversely reported against the Nevada case by either the House or Senate committees, but it apparently was impossible to get the House itself to pass the measures, except the act of March 3, 1899, directing the Secretary of the Treasury to report the amount due, which is printed in House Document 332, Fifty-sixth Congress, first session.

Senator WATERMAN. The action of the Senate and House and of this board had been founded on a plan suitable to the policy, and that this kind of expenditure made by Nevada was not recognized by the board or the Government as a matter of policy. Is that it?

Mr. NORCROSS. I think possibly that would be putting it a little too strong. Apparently, when the matter was considered by the House many years ago, there was apprehension at that time that it might create a precedent upon which other States could come in, which apprehension if expressed is unfounded.

Senator WATERMAN. Exactly.

Mr. NORCROSS. A little later I am going to cover that matter, so far as the Territory and State of Nevada is concerned. There is no possible element of precedent here, because Nevada's claim is unique, and stands alone; but this situation I will cover fully a little later.

Senator PITTMAN. I want to ask you what was the regulation of 1861, upon which the Court of Claims turned this case down?

Mr. NORCROSS. The act of July 27, 1861 (12 Stat. 276), provided:

"That the cost, charges, and expenses properly incurred by any State in raising troops to protect the rights of the Nation would be made by the General Government."

Senator ASHURST. That is an act of Congress?

Mr. NORCROSS. Yes; the act of March 8, 1862 (12 Stat. 615), provided that the act of 1861 should embrace the expenses before, as well as after its approval.

Senator ASHURST. What was the date of that act?

Mr. NORCROSS. July 27, 1861; and the second one, which was designed to remove any question as to whether it would apply to expenses contracted both before or after, was passed March 8, 1862.

It has always been our contention that under the provisions of that act, the Territorial officials would have been justified in proceeding. As to the regulations made thereunder it is doubtful if Nevada ever knew of them.

Senator PITTMAN. As Senator WATERMAN said, the desire, of course, was to have uniformity. Whether that uniformity meant uniformity throughout the United States or not is another question in my mind. I should judge from what the military board stated to the investigating committee, that they felt that it was an economical arrangement, and they felt it was not too much, and that it was inequitable to apply a uniform payment in that section of the country, but that the legislature of the Territory had practically established this form by designating it as a bonus and an additional payment.

Senator WATERMAN. That is it, and it was not policy to pay that.

Senator PITTMAN. To pay a bonus and an additional amount.

Senator WATERMAN. Now, you suggested a moment ago, when I interrupted you, that it could not establish a precedent, because there is no other case like it. Now, the conditions in Nevada, I imagine, were entirely different from the conditions in any other State or Territory in the country at that time; therefore it takes it out and puts it in a class by itself, and for that reason it does not establish a precedent to anybody else. Is that correct?

Mr. NORCROSS. That is correct. And you will find, in the decision of the Court of Claims passing on this, that they did not refer to the act of 1882 which created this Army board. That act of 1882, provided, in effect, that no greater allowance should be given to any State or Territory for its troops than that paid to troops in the same country.

Now, it has been the contention of the State that under the language of that act, properly construed, that as there were no United States troops in that country, no troops except those raised by the Territory of Nevada, and some raised in California under the same, similar condition, that under the language of the act troops there were not paid more than were paid in the same country, because there was no other country like Nevada at that time.

Senator WATERMAN. Well, I do not think we need to discuss very much more the legal aspect of that.

Mr. NORCROSS. No.

Senator WATERMAN. And the question is, as Senator PITTMAN has said, the Court of Claims passed on the legal aspect of it. The question is whether, as a matter of substantial justice, under the peculiar conditions existing at the time, the Government should be lenient with this thing and reimburse to the State of Nevada these amounts which it paid out for the benefit of the country as a whole; and I agree that they are entitled to be reimbursed. That is the whole thing, is it?

Mr. NORCROSS. That is the whole thing.

In conclusion, I want to stress the two main points which, in my judgment, present a great moral obligation here.

First, under the Territorial form of government, the officers were really Federal officers, and the governor and legislature were paid directly from the Treasury of the United States.

Senator ASHURST. And appointed by the President?

Mr. NORCROSS. Appointed by the President, except the members of the Territorial council. They were elected by the local people, but in the Nevada Territorial form, the legislation rested in both the governor and the Territorial council, but all were paid directly from the Treasury of the United States, but they were all, in effect, officers of the Government. So much for that.

Now, in 1864, as is shown by the book "Recollections of the Civil War," written by Charles A. Dana, the great editor of the New York Sun, who was Assistant Secretary of War during the administration of President Lincoln. He states in that book, and I will ask permission to read into the record just a short expression from that conclusion. He states that the administration had finally determined that a constitutional amendment abolishing slavery would have a moral effect, the equivalent of raising another army of a million men and "fight no one knows how long." He quotes that as the language of President Lincoln. When they canvassed the situation, they found they were one State short of the necessary three-fourths to ratify

such an amendment, and, he states, that then Lincoln made the announcement that "we will make a State out of the Territory of Nevada." They called on the State, or Territory, to enter into the Union. They passed an enabling act, and so great was the haste to get Nevada into the Union that Congress, after it first passed the act, amended it by putting the election just one month ahead for the vote upon the Constitution. The Territory of Nevada telegraphed that Constitution to President Lincoln, and the State subsequently paid thirty-four hundred and odd dollars for that dispatch, but the State is not asking for reimbursement on that account. I only mention that to show the great desire of President Lincoln's administration to get the State into the Union.

Senator WATERMAN. There is no question about that.

Mr. NORCROSS. Here is what happened. The State certainly was morally obliged to assume the debt of the Territory. It did so in a constitutional provision, and that Constitution was approved by Abraham Lincoln.

Senator WATERMAN. That is what the Federal Constitution did.

Mr. NORCROSS. Yes. So that it is our contention that that creates a moral obligation. The Government wanted Nevada into the Union, and there were 16,000 voters in that vast Territory at that time. There were only one thousand and some odd dollars in the treasury of the Territory. The Government immediately shifted a burden of thirty thousand and odd hundred dollars a year to the shoulders of the future people of the Territory to maintain a State government, but the Government saved three or four times the amount of this claim in what it would have had to pay the Territorial officers. In addition to that, the State, upon coming into the Union, had to borrow, and did borrow, $100,000 to keep its own government going for the first year, and for that it had to pay, and did pay, 2 per cent per month interest.

Now, the facts are probably these, that the people of the little State of Nevada have probably paid for the privilege and honor of being a State millions and millions of dollars that they would not otherwise have had to pay. It borrowed, in order to pay this very debt contracted by the Territory for war expenditures, in aid of the common defense $100,000, for which it paid 1½ per cent per month interest for the first few years. The State, in 1866, I think it was, passed its first large bond issue, on which bond issue it had to pay 10 per cent, which was designed to take up all of the obligations. There is a report of the secretary of the State treasurer in the report of 1867, in which the State treasurer stated that he had been to New York City endeavoring to sell the State bonds at 10 per cent, and he was unable to do so.

The next legislature passed another act which provided for the issue of bonds on a 12 per cent per annum rate, and before that legislature adjourned it amended the act to increase it to 15 per cent, which was the rate the State had to pay because virtually at that time it had no resources and no credit. There was practically none in that vast country, except the Comstock Lode and a few other mines.

Now, that generally is the main ground that the State is asking for this reimbursement; first, that as a matter of actual fact, this was not a bonus nor extra pay.

Senator PITTMAN. But it was a necessary payment?

Mr. NORCROSS. It was an absolutely necessary payment to keep the overland route open. That is shown by the Government's reports and acknowledgments.

Senator ODDIE. I think a brief statement would be well, as to the great benefit then derived from the Comstock mines to the Government at that time, showing they have continued to the present.

Mr. NORCROSS. I am glad you mentioned that, Senator. I did state some time ago that the closing of the Overland Trail would undoubtedly have closed the Comstock mines. The Comstock mines in 1863 were at the height of their production. There was greater production later, but during the years of the Civil War, and in the decade immediately following, those mines practically turned into the Treasury of the United States a half billion dollars. It is said that the production from the Comstock Lode alone enabled the Government to assume specie payments 10 years sooner than it otherwise could have done. If the mines had been closed in 1863, it is difficult to say when they would have been opened again, but it certainly is a fact that they might have been closed and probably would have been had not the troops been raised by the Territory of Nevada.

Senator WATERMAN. They had to get supplies from somewhere, and they could not get them unless the way was open.

Mr. NORCROSS. Yes. Just to illustrate the cost of nearly everything in the Territory at that time. In this report of the board of Army officers, in support of their statement that the pay received by the Nevada troops did not average, if indeed it equaled, the pay of other troops, the cost of transportation from Fort Leavenworth to Salt Lake City on a bushel of corn, the freight alone was $17, and that was still 500 miles east of the Comstock Lode at Carson, Nev. That is only an illustration of a number of substantial things. When these men went into the service with $5 extra pay, they could have gone into the mines of the Comstock Lode and received from $5 to $10 per day. There is nothing on earth, that I can conceive of, that would have induced these men to have gone into the service at that time except for the highest motives of patriotism.

Senator WATERMAN. I do not think you could get anywhere without running right up against the word "patriotism."

Mr. NORCROSS. And then there was another inducement for them not to go into the service, it being the fact, that one great mine having been found in that vast country, these men could go prospecting with a chance of finding another. So that the troops were certainly entitled to great credit, I think.

There is, in the report to the Secretary of War—I think this occurred during the latter part of 1864 or 1865—when two or three companies of troops were sent from Salt Lake City, and they must have included Nevada troops, at least in part, went over into Idaho and fought a band of Indians and annihilated them, and it was reported that some sixty-odd, if I recollect it, were lost—killed or wounded, and the troops suffered severely from frostbite. Just a little while before the call for troops, volunteers in Nevada from Virginia City and Carson, under Major Ormsby fought the Piute Indians on Pyramid Lake and were virtually annihilated by the Indians. Later a second battle of Pyramid Lake was fought by volunteer troops under Captain Storey, after whom Storey County was named. Captain Lassen, after whom Lassen County, Calif., was named, was killed with his band of troops in Washoe County, just shortly before the massacre of Major Ormsby near there in a fight with the Indians; so you can see there was really hard fighting in that section of the country during that period of time, in order to guard the overland route and keep the Indians under subjection.

Senator ASHURST. The Adjutant General's office has a muster roll showing who were in the service?

Mr. NORCROSS. They are all reported; yes. When this matter was before the Senate and House a number of years ago, the claim of Nevada was presented, all the items to a cent.

Senator ASHURST. How much did it amount to?

Mr. NORCROSS. The principal, about $110,000, with interest.

Senator ASHURST. That is interest which Nevada paid?

Mr. NORCROSS. The principal and the interest which the State has actually paid would add approximately half a million dollars on top of it.

Senator ASHURST. The State is asking for the principal and the amount of money that the State paid out as interest on it?

Mr. NORCROSS. Yes, sir.

Senator ASHURST. You are asking the interest from the Government; you are asking what the State has paid out for interest?

Mr. NORCROSS. Yes, sir.

Senator WATERMAN. I imagine that has all been audited, hasn't it?

Mr. NORCROSS. Yes, sir; up to 1899.

Senator ASHURST. You are not asking our Government to pay interest, but you are asking to be reimbursed for what you have paid out as interest only?

Mr. NORCROSS. Yes.

Senator ASHURST. You are asking just what the State paid out in interest, but you are not asking the Government for interest on your claim?

Mr. NORCROSS. No; just reimbursement for the interest paid, according to the decision of the Supreme Court in the New York case, reported in 160 U. S. 547.

Senator ODDIE. There have been recent statements of accounts sent from the State of Nevada, have there?

Mr. NORCROSS. From 1900 to the present time——

Senator ODDIE. Do they appear here?

Mr. NORCROSS. Not in that report, but we will present that to the committee.

Senator PITTMAN. I suggest, Mr. Chairman, that this report of the Treasury Department, made in 1900, be incorporated in the record.

Senator WATERMAN. I think that is a good idea. It is so ordered.

Senator PITTMAN. Because we are trying now to get some kind of a report from that date on up to now.

Senator WATERMAN. Well, he may have it copied in.

Senator PITTMAN. Unfortunately, he does not have that, because he could not do it until he got the report of the comptroller of the State of Nevada, consequently he reported on this resolution before receiving the State comptroller's report and could not bring it up to date, and what we request is that this be brought up to date and have a full report.

The report is as follows:

[H. Doc. No. 322, 56th Cong., 1st sess.]

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., January 19, 1900.

SIR: Referring to the act of March 3, 1899 (30 Stat. 1206), upon the subject of the claim of the State of Nevada for moneys advanced in aid of the suppression of the rebellion in the Civil War, and calling for

report to Congress by the Secretary of the Treasury thereon, I have the honor to transmit herewith copy of statement of the case made by the Auditor for the War Department January 18, 1900.

Respectfully,

L. J. GAGE, *Secretary.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
OFFICE OF AUDITOR FOR THE WAR DEPARTMENT,
Washington, January 18, 1900.

SIR: In reply to your communication of March 11, 1899, requesting a report under provisions of act of March 3, 1899, paragraph "State claims" (Public 190), upon the claim of the State of Nevada for moneys advanced in aid of the suppression of the rebellion in the Civil War, I have the honor to state the following:

On December 24, 1889, the Secretary of War, acting in accordance with a resolution of the Senate of February 27, 1889, transmitted a full and complete statement showing the amount expended by the State of Nevada, with such interest on the same as the State had paid between February 10, 1865, and June 30, 1889, amounting in all to the sum of $412,600.31. This report is found in Executive Document No. 10, first session, Fifty-first Congress.

From a certified statement of Samuel P. Davis, State comptroller of Nevada, made on December 19, 1899, it appears that since the time covered by the report of the Secretary of War, i. e., from June 30, 1889, to December 31, 1899, the State of Nevada has paid the sum of $58,401.27 as interest upon money paid by the State in aiding in suppressing the rebellion of the Civil War. Accordingly, assuming this statement to be correct, the total amount expended by the State of Nevada, or by the Territory of Nevada and assumed by the State, with such interest on the same as the said State has actually paid, amounts to $471,001.58.

Upon reports of an examination of this claim made by the State war claims examiners, the Third Auditor and the Second Comptroller of the Treasury, under act of June 27, 1882, the sum of $7,559.61 was allowed and paid to the State of Nevada on April 10, 1888. This amount, deducted from the total amount paid by the State of Nevada, leaves the sum of $462,441.97 for which the State has not been reimbursed. The following is a tabulated statement of this claim:

Amount of claim of the State of Nevada, including interest up to June 30, 1889, as shown in the report of the Secretary of War (see page 10, S. Doc. No. 10, 51st Cong.)	$412,600.31	
Amount of interest paid by Nevada from June 30, 1889, to December 31, 1899	58,401.27	
Total claim		471,001.58
Amount which the State was reimbursed on April 10, 1888, under act of June 27, 1882		8,559.61
Total paid by the State for which no reimbursement has been made		462,441.97

Respectfully,

F. H. MORRIS, *Auditor.*

[S. Doc. No. 431, 56th Cong., 1st sess.]

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, June 4, 1900.

SIR: Referring to the act of March 3, 1899 (30 Stat., p. 1206), upon the subject of the claim of the State of Nevada for moneys advanced in aid of the suppression of the rebellion in the Civil War, and calling for report to Congress by the Secretary of the Treasury thereon, I have the honor to transmit herewith copy of the report of the Auditor for the War Department of May 28, 1900, amending his report of January 18, 1900, which was transmitted to the Senate by this department January 19, 1900.

Respectfully,

L. J. GAGE, *Secretary.*

The PRESIDENT OF THE SENATE.

TREASURY DEPARTMENT,
OFFICE OF THE AUDITOR FOR THE WAR DEPARTMENT,
Washington, May 28, 1900.

SIR: In my reply of January 18, 1900, to your request of March 11, 1899, for a report under the provisions of the act of March 3, 1899 (Public, No. 190), upon the claim of the State of Nevada for moneys advanced during the War of the Rebellion, the balance reported to be due the State was given as $462,441.97.

A reexamination of the account shows that this amount should be reduced by the sum of $23,180.92, allowed by Treasury settlement No. 425, of January 13, 1899, and the further sum of $38.33, being a double charge in the account, making the amount to be deducted $23,219.25, leaving a balance of $439,222.72 due the State instead of the above.

Respectfully,

F. H. MORRIS, *Auditor.*

The SECRETARY OF THE TREASURY.

OFFICE OF STATE CONTROLLER,
Carson City, Nev., January 19, 1928.

Hon. J. R. MCCARL,
Comptroller General, Washington, D. C.

SIR: I herewith present a statement of the amount of interest paid by the State of Nevada on the principal of its Civil War claims from December 31, 1899, to December 31, 1927:

Interest on the principal, Dec. 31, 1899, to June 30, 1910	$58,401.97
Interest on principal from June 30, 1910, to Dec. 31, 1927	86,588.92
Total	144,990.87

Respectfully submitted.

ED. C. PETERSON, *State Controller.*

I certify that to the best of my knowledge the above amount is correct.

[SEAL.] ED. C. PETERSON, *State Controller.*

Subscribed and sworn to before me this 19th day of January, 1928.

EVA HATTON,
Clerk of Supreme Court, State of Nevada.

Senator ASHURST. When was the last amount of interest paid?

Mr. NORCROSS. The State has never been able to pay any of its bonded indebtedness, other than with other bonds issued later on.

Senator ASHURST. Was that all refunded in some other obligation?

Senator WATERMAN. You are paying interest on it now, aren't you?

Mr. NORCROSS. Yes; we are paying interest at the rate of 5 per cent.

Senator PITTMAN. This is the report we are waiting on from the comptroller general of Nevada; and we can follow it on to the Treasury Department here, so that they will be in a position where they can either approve or disapprove it.

Mr. NORCROSS. Yes.

Senator ASHURST. What is the assessed valuation of the State property now; isn't it around five or six hundred million dollars?

Mr. NORCROSS. My recollection is that it is around six hundred million now.

Before I finish, gentlemen, I would like to read into the record from this book, Recollections of the Civil War, about which I spoke a moment ago.

Senator WATERMAN. Just read that into the record.

Mr. NORCROSS. I am reading from Recollections of the Civil War, by Charles A. Dana. The State did not have the benefit of this when the matter was up in 1898. I am reading from page 174. [Reading:]

"The administration had decided that the Constitution of the United States should be amended so that slavery should be prohibited. This was not only a change in our national policy, it was also a most important military measure. It was intended not merely as a means of abolishing slavery forever, but as a means of affecting the judgment and the feelings and the anticipations of those in rebellion. It was believed that such an amendment to the Constitution would be equivalent to new armies in the field, that it would be worth at least a million men, that it would be an intellectual army that would tend to paralyze the enemy and break the continuity of his ideas. In order thus to amend the Constitution it was necessary first to have the proposed amendment approved by three-fourths of the States. When that question came to be considered, the issue was seen to be so close, that one State more was necessary. The State of Nevada was organized and admitted into the Union to answer that purpose. I have sometimes heard people complain that Nevada is superfluous and petty, not big enough to be a State; but when I hear that complaint I always hear Abraham Lincoln saying, 'It is easier to admit Nevada than to raise another million soldiers.'"

And then this is a quotation that he speaks of the measure, no doubt, in the House of Representatives.

Senator ASHURST. Yes.

Mr. NORCROSS. This a quotation from Abraham Lincoln that he uses [reading]:

"Here is the alternative, that we carry this vote or be compelled to raise another million, and I don't know how many more men, and fight no one knows how long."

They needed the 3 votes on the new armies——

Senator ASHURST (interposing). It was 2 votes in the Senate and 1 in the House, and they needed 1 more vote for the ratification of the thirteenth amendment, I suppose?

Mr. NORCROSS. No; it was 3 votes in the House of Representatives; they needed 3 votes to pass it in the House, because of a certain position being taken.

Senator ASHURST. There were more amendments, the thirteenth, fourteenth, and fifteenth——

Mr. NORCROSS (interposing). No; this referred to the enabling act, to admit Nevada into the Union.

Senator PITTMAN. Does that cover your statement, Mr. Norcross?

Mr. NORCROSS. Yes.

Senator PITTMAN. As to this resolution, Judge Norcross knows more about this case than any of us; in fact, I don't know very much about it at all, except from what I have heard from time to time through the committee.

Mr. Kappler has been retained by the State to represent them here legally, and I have no doubt that he will be able to assist the Representatives in Congress in getting together the matter referred to by Judge Norcross for your convenience, if you need it.

Senator WATERMAN. I would like to have the whole thing before me.

Every time this claim, covering this $5 and this $10 paid by the Territory of Nevada, has come before the Senate committee, if I understand you, the Senate committee has approved that claim.

Mr. NORCROSS. That is absolutely true, Senator WATERMAN. The Senate has always passed the bill. The House committees on every occasion reported favorably and made exhaustive and strong reports, but the appropriation was unfavorably acted upon in the House, chiefly, I suspect, because the true situation of the Nevada case, differing as it does all others, was not clearly presented at the time.

STATEMENT OF MR. CHARLES J. KAPPLER, ATTORNEY AT LAW, WASHINGTON, D. C.

Mr. KAPPLER. Mr. Chairman and members of the committee, Judge Norcross has quite thoroughly gone over the history and merit of this matter of reimbursement to Nevada, but my statement is intended to cover largely the merits of the case, in consecutive form, and from the standpoint of equity, fair dealing, right, and justice.

1. The Territory of Nevada was organized under the act of Congress approved March 2, 1861 (12 Stat. 210).

2. The State of Nevada was admitted into the Union by the enabling act approved March 21, 1864 (13 Stat. 30).

3. The act of July 27, 1861 (12 Stat. 276), provided that the costs, charges, and expenses properly incurred by any State in raising troops to protect the authority of the Nation would be met by the General Government. The act of March 8, 1862 (12 Stat. 615), provided that the act of 1861 should embrace expenses before as well as after its approval. The acts of June 27, 1882 (22 Stat. 111), and August 4, 1886 (24 Stat. 217), were remedial statutes.

4. The Government of the United States during the war between the States, after nearly all regular troops on the Pacific coast had been transferred to the East, called upon the Territory and State of Nevada on three separate occasions to raise and equip soldiers to keep open the overland route and to quell Indian hostilities, which service theretofore had been performed by the Regular Army, on the basis of the acts of 1861 and 1862, supra, and the following letter from the Secretary of State, William H. Seward, sent to the governors of States and Territories under date of October 14, 1861:

"The President has directed me to invite your consideration to the subject of the improvement and perfection of the defenses of the State over which you preside, and to ask you to present the subject to the consideration of the legislature when it shall have assembled.

"Such proceedings by the State would require only a temporary use of its means. The expenditures ought to be made the subject of conference with the Federal authorities. Being thus made with the concurrence of the Government for general defense, there is every reason to believe that Congress would sanction what the State should do, and would provide for its reimbursement."

The first call on Nevada for troops was made in the following dispatch:

HEADQUARTERS OF THE ARMY,
Washington, D. C., April 15, 1863.

Brig. Gen. G. WRIGHT, *San Francisco, Calif.:*

The Secretary of War authorizes you to raise additional regiments in California and Nevada to reinforce General Conner and protect overland routes. Can not companies be raised in Nevada and pushed forward immediately? General Conner may be able to raise some companies in Utah or out of emigrant trains.

H. W. HALLECK, *General in Chief.*

HEADQUARTERS DEPARTMENT OF THE PACIFIC,
San Francisco, Calif., April 2, 1863.

His Excellency O. CLEMENS,
Governor of Nevada Territory, Carson City, Nev.

SIR: I have been authorized by the War Department to raise volunteer companies in Nevada Territory for the purpose of moving east on the overland mail route in the direction of Great Salt Lake City. If it is possible to raise three or four companies in the Territory for this service I have to request your excellency may be pleased to have them organized. I should be glad to get two companies of Cavalry and two of Infantry, the mounted troops to furnish their own horses and equipments. Arms, ammunition, etc., will be furnished by the United States. Should your excellency consider it impossible that this volunteer force can be raised, even one company will be accepted. I will send you a plan of organization, and an officer with the necessary instructions for mustering them into the service.

With great respect, I have the honor to be,
Your obedient service.

G. WRIGHT,
Brigadier General, U. S. Army, Commanding.

The second call follows:

HEADQUARTERS DEPARTMENT OF THE PACIFIC,
San Francisco, December 22, 1863.

SIR: The four companies of Cavalry called for from the Territory of Nevada have completed their organization; two of the companies have reached Camp Douglas, Utah, and the remaining two are at Fort Churchill, Nev. On the representations of Governor Nye that additional troops might be raised in Nevada, I have, under the authority conferred upon me by the War Department, called upon the governor for a regiment of Infantry and two more companies of Cavalry.

G. WRIGHT,
Brigadier General, United States Army, Commanding.

ADJUTANT GENERAL UNITED STATES ARMY,
Washington, D. C.

The third call follows:

HEADQUARTERS DEPARTMENT OF THE PACIFIC,
Virginia City, October 13, 1864.

SIR: I have the honor to acquaint you that I have received authority from the War Department to call on you, from time to time, as the circumstances of the service may require, for not to exceed in all, at any time, one regiment of volunteer Infantry and one regiment of volunteer Cavalry, to be mustered into the service of the United States as other volunteer regiments under existing laws and regulations.

Under this authority I have to request you will please raise, as soon as possible, enough companies of Infantry to complete, with those already in the service from Nevada, a full regiment of Infantry. Brigadier General Wason will confer with you and give all the information necessary as to details for this service.

IRWIN MCDOWELL,
Major General, Commanding Department.

His Excellency JAMES W. NYE,
Governor of Nevada Territory.

5. The Territory and State of Nevada under such calls raised, equipped, mounted, subsisted, and paid 1,180 men, enlistments being for three years (S. Rep. 154, 54th Cong., 1st sess., p. 70–71).

6. The Nevada volunteers in conjunction with California volunteers were employed in guarding and protecting the overland mail and emigrant routes and in keeping in subjection the Indian tribes that roamed over the country adjacent thereto. (Report Secretary of War, dated November 25, 1889.)

7. United States Army officers, the governor, and The Adjutant General, all Government officials, and the Territorial legislature advised together on the enactment of the necessary legislation for raising troops and paying expenses incurred, supervised the raising and equipping of said men and putting them into active military service of the United States, as well as consulted on ways and means for Nevada to procure the money with which to meet the necessary expenses incurred.

8. The Territory and the State, in order to enroll, subsist, clothe, supply, equip, pay, and transport the volunteers and place them in the service of the United States (their treasury being low in funds), were compelled to issue bonds, at the then prevailing rates of interest, to meet the cost thereof.

9. The Territory and State advanced and expended such money in good faith on the assurance of Secretary of State Seward, and the acts of 1861 and 1862, supra, that the use of the Territory's means would be but temporary, as reimbursement for such expenditures would be made by Congress.

10. No money was expended that was not absolutely necessary in order to raise, supply, and equip the mounted troops required in that sparsely populated desert region so urgently called for by the United States. Conditions such as existed in Nevada during the war did not prevail in any other section of the country, and therefore the case of Nevada stands unique and alone.

11. The Secretary of the Treasury has reported to Congress that the Territory of Nevada and the State of Nevada (Nevada assuming the obligations of the Territory when admitted into the Union as a State in 1864) actually expended for and on behalf of the Government during the war between the States and for interest charges on money borrowed for the benefit of the Government, the sum of $462,441.97, which sum, less $23,219.25 paid on account January 13, 1899 (S. Doc. 431, 56th Cong., 1st sess.), and less $12,283.04 paid on account July 1, 1910, has not been reimbursed.

12. It is not disputed that the Territory and State of Nevada actually expended said sum of $462,441.97 for the common defense, as reported by the Secretary of the Treasury in House Document 322, Fifty-sixth Congress, first session, based on the evidence presented.

13. The larger part of Nevada's costs and charges was erroneously disallowed by the board of Army officers appointed under the acts of 1882 and 1886 on the assumption the law did not provide for payment of interest on money borrowed by the State for the benefit of the United States. Since the disallowance was made, the Supreme Court of the United States, in the similar case of New York *v.* United States (160 U. S. 598), has held where a State had paid interest on money borrowed and paid out and expended for the "common defense," the

amount of such interest should, like the principal, be fully reimbursed. The opinion of the Supreme Court in the New York case so aptly presents the duties and responsibilities of the General Government, under the Constitution, to the several States in time of war and its obligation to reimburse moneys expended by States in aid of the "common defense," such presentation so peculiarly applying to the case of Nevada, that the following is quoted therefrom:

"The duty of suppressing armed rebellion, having for its object the overthrow of the National Government, was primarily upon that Government and not upon the several States composing the Union. New York came promptly to the assistance of the National Government by enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting troops to be employed in putting down the rebellion. Immediately after Fort Sumter was fired upon its legislature passed an act appropriating $3,000,000, or so much thereof, as was necessary, out of any moneys in its treasury not otherwise appropriated, to defray any expenses incurred for arms, supplies, or equipments for such forces as were raised in that State and mustered into the service of the United States. In order to meet the burdens imposed by this appropriation the real and personal property of the people of New York were subjected to taxation. When New York had succeeded in raising 30,000 soldiers to be employed in suppressing the rebellion, the United States, well knowing that the national existence was imperiled, and that the earnest cooperation and continued support of the States were required in order to maintain the Union, solemnly declared by the act of 1861 that 'the costs, charges, and expenses properly incurred' by any State in raising troops to protect the authority of the Nation would be met by the General Government. And to remove any possible doubt as to what expenditures of a State act would be so met, the act of 1862 declared that the act of 1861 should embrace expenses incurred before as well as after its approval. It would be a reflection upon the patriotic motives of Congress if we did not place a liberal interpretation upon those acts, and give effect to what, we are not permitted to doubt, was intended by their passage.

"Before the act of July 27, 1861, was passed the Secretary of State of the United States telegraphed to the Governor of New York, acknowledging that that State had then furnished 50,000 troops for service in the War of the Rebellion, and thanking the governor for his efforts in that direction. And on July 25, 1861, Secretary Seward telegraphed: 'Buy arms and equipments as fast as you can. We pay all.' And on July 27, 1861, that 'Treasury notes for part advances will be furnished on your call for them.' On August 16, 1861, the Secretary of War telegraphed to the Governor of New York: 'Adopt such measures as may be necessary to fill up your regiments as rapidly as possible. We need the men. Let me know the best the Empire State can do to aid the country in the present emergency.' And on February 11, 1862, he telegraphed: 'The Government will refund the State for the advances for troops as speedily as the Treasurer can obtain funds for that purpose.' Liberally interpreted, it is clear that the acts of July 27, 1861, and March 8, 1862, created on the part of the United States an obligation to indemnify the States for any costs, charges, and expenses properly incurred for the purposes expressed in the act of 1861, the title of which shows that its object was 'to indemnify the States for expenses incurred by them in defense of the United States.'

"So that the only inquiry is whether, within the fair meaning of the latter act, the words 'costs, charges, and expenses properly incurred' included interest paid by the State of New York on moneys borrowed for the purpose of raising, subsisting, and supplying troops to be employed in suppressing the rebellion. We have no hesitation in answering this question in the affirmative. If that State was to give effective aid to the General Government in its struggle with the organized forces of rebellion it could only do so by borrowing money sufficient to meet the emergency, for it had no money in its treasury that had not been specifically appropriated for the expenses of its own government. It could not have borrowed money any more than the General Government could have borrowed money without stipulating to pay such interest as was customary in the commercial world. Congress did not expect that any State would decline to borrow and await the collection of money raised by taxation before it moved to the support of the Nation. It expected that each loyal State would, as did New York, respond at once in furtherance of the avowed purpose of Congress, by whatever force necessary, to maintain the rightful authority and existence of the National Government.

"We can not doubt that the interest paid by the State on its bonds issued to raise money for the purposes expressed by Congress constituted a part of the costs, charges, and expenses properly incurred by it for those objects. Such interest, when paid, became a principal sum as between the State and the United States; that is, became a part of the aggregate sum properly paid by the State for the United States. The principal and interest so paid constitutes a debt from the United States to the State. It is as if the United States had itself borrowed the money through the agency of the State. We therefore hold that the court below did not err in adjudging that the $91,320.84 paid by the State for interest upon its bonds issued in 1861 to defray the expenses to be incurred in raising troops for the national defense was a principal sum which the United States agreed to pay, and not interest within the meaning of the rule prohibiting the allowance of interest accruing upon claims against the United States prior to the rendition of judgment thereon."

14. Had the Territory and State of Nevada failed to raise the troops called for by the Government, the Government would have been compelled to raise the troops east of the Rocky Mountains and equip and transport them west to suppress Indian hostilities and keep open the important overland route (there being no railroads) between Salt Lake City and San Francisco, considered a military necessity by the Government, which task was performed for the Government by Nevada by virtue of the expenditures for which she now seeks reimbursement.

15. The military authorities of the United States well knew at that time the exact condition of the region embracing Nevada and of the roads across the mountains leading thereto; of the cost of transportation; of the prices of labor and supplies as well as of their own inability to furnish either horses or equipment for military service that required mounted troops.

16. During the War between the States men were scarce in Nevada, and under the then existing laws of supply and demand wages and prices of supplies in Nevada were necessarily greatly in excess of those prevailing in other sections of the country. (This is well known to those familiar with conditions prevailing in newly discovered mining regions.) There were no United States Regular troops operating in that vast desert and mountain region; hostile Indians abounded and seriously interfered with overland travel and the mails. The cost of living and wages of labor in Nevada during the war were at least 50 per cent, and in many instances 200 per cent higher than in the Atlantic States; and under such extreme conditions inducements above the Regular Army pay necessarily had to be offered and given to secure speedy enlistment of men to fight the Indians, incited to hostilities by the general war conditions, on the desert and in the mountains. Such inducements as were granted by the legislature of the Territory and State in order to comply with the urgent calls of the Government, however, did not exceed the costs which the Government would have been compelled to incur in raising troops east and transporting them to the far West. This is conceded by Army officers, especially by Major Biddle, who examined the accounts of Nevada, and who stated that the laws in force at the time of the expenditures were not equitable ones to apply to the reimbursement of the far West States, where the laws of supply and demand were so exceptionally different. (S. Ex. Doc. 1, 51st Cong., 1st sess.) It is indeed doubtful if an undertaking to raise and equip troops in the East and transport them west would have been feasible at that particular time, considering the necessity and haste the situation demanded and the serious condition of affairs at the principal seat of war in the East.

17. The majority of the board of Army officers, under the said acts of June 27, 1882, and August 4, 1886, reported on the question of the additional payments made by Nevada to the soldiers as follows:

"This bounty was paid to captains for expenses incurred by them in enlisting, lodging, and subsisting the men of their companies prior to their entering the United States service, in lieu thereof, as is shown by the fact that no other bills are presented for these expenses, and under the circumstances this expense was economical; but this claim having been submitted by the State of Nevada as a premium or bounty, the examiners are debarred from considering it as under the second section of the act of 1882 no higher rate can be allowed than was paid by the United States, which was $2 per enlistment."

According to this report, it appears the "additional" pay was in name and form only and that Nevada's expenses were economical and to the advantage of the United States, but simply because she used the words "premium or bounty," although the above report plainly shows the additional sums paid to captains was for expenses incurred by them in enlisting, lodging, and subsisting the men in lieu of other allowances, the Army officers disallowed such reimbursement, notwithstanding Congress intended in passing the said act, as the debates and reports show, to cover the Nevada expenditures in full. Secretary of War Robert T. Lincoln, writing to Senator Maxey, January 26, 1884, said: "This statute is deemed sufficiently broad to embrace all proper claims of said State and Territory of Nevada"; and Senator Maxey subsequently, in Senate Report No. 406, Forty-eighth Congress, first session, on S. 657, stated:

"It is deemed by the department that the act approved June 27, 1882, is sufficiently broad to embrace all proper claims of Nevada, whether as a State or Territory, and no additional legislation is necessary."

While the Territorial and State statutes used the word "bounty" to describe an allowance payable to captains of companies for each volunteer recruit secured or enlisted, it was not a bounty in any true sense of that term whatsoever. The majority report was in error in saying that this portion of Nevada's expenditures was "submitted by the State of Nevada as a premium or bounty." The application for reimbursement recited that it was for "recruiting, enlisting, organizing, and enrolling."

In view of the fact that the Army officers found that the expense was for "enlisting, lodging, and subsisting the men of their companies prior to their entering the United States service" and that "under the cir-

cumstances this expense was economical," it is not easy to account for the disallowance upon any technical reason that it was a bounty because it just happened to be so called in the Territorial and State statutes.

18. From June 17, 1850, continuously until August 3, 1861, the practice of the War Department under the laws of Congress was to pay each soldier enlisted, recruited, or reenlisted in the Far West States, a sum of money which, while Congress termed it a "bounty" yet it in fact and effect was, and was intended to be merely extra or additional pay in the form of a constructive mileage equivalent to the cost of transportating a soldier from New York City to the place of such enlistment or reenlistment, estimated at $160 (S. Rept. 544, pt. 2, 55th Cong., 2d sess., p. 12); said sum was to be paid to each Pacific-coast soldier as follows:

"SEC. 3. And be it further enacted, that whenever enlistments are made at or in the vicinity of the said military posts and remote and distant stations, a bounty equal in amount to the cost of transporting and subsisting a soldier from the principal recruiting depot in the harbor of New York to the place of such enlistment be, and the same is hereby, allowed to each recruit so enlisted." (Act June 17, 1850.)

In addition, in consequence of the high cost of living in the Pacific Coast States, on September 28, 1850, Congress passed an act paying to every commissioned officer serving in those States an extra $2 per day and to all the enlisted men serving in the United States Army in those States double the pay then being paid to the troops of the Regular Army.

While the above acts were subsequently repealed, still if the necessity for this character of alleged bounty for the Regular Army of the United States existed in a time of profound peace—and no one doubts but that a necessity therefore did exist—then how much greater the necessity for a similar treatment in a period of actual war, when the land carriage for supplies over a distance of 2,000 miles from the Missouri River to the Pacific coast was simply impossible, or at least impracticable, there not being then any overland railroad, and the two sea routes via Cape Horn and the Isthmus of Panama, as reported by the Secretary of War, being both hazardous and expensive.

It is submitted if it was just, necessary, and reasonable to grant such a bounty to men enlisting in the Regular Army serving in remote localities in time of peace, then the allowance by Nevada of a bounty (in name only) to its volunteers when they were in the actual and active service of the United States in time of war, and while the exigencies exceeded in degree those under which the United States had theretofore paid a much larger sum to its own Regular Army serving in the far West in a time of peace, may be considered unquestionably necessary and reasonable and deemed by Nevada and the Army officers advising her in 1863 and 1864 to be in harmony with the policy so long and so often pursued by the United States; and, consequently, it is contended the board of Army officers should have held Nevada's expenses as necessary and reasonable and to the manifest best interests of the General Government, and within the true intent and meaning of the acts of 1861–62, 1882, and 1886.

The board of Army officers were authorized by Congress and in instruction by the Secretary of War, to examine, consider, and pass upon the "necessity for and reasonableness of" Nevada's expenditures, and in their report they say:

"We are decided in the conviction that in granting them this extra compensation, the Legislature of Nevada was mainly instigated by a desire to do a plain act of justice to the United States Volunteers raised in the State and performing an arduous frontier service, by placing them on the same footing as regards compensation with the great mass of the officers and soldiers of the United States Army serving east of the Rocky Mountains. * * * When measured by the current prices of the country in which they were serving, their compensation from all sources did not exceed, if indeed it was equal to, the value of the money received as pay by the troops stationed elsewhere, i. e., outside of the Department of the Pacific." (S. Ex. Doc. 10, 51st Cong., 1st sess.)

Yet, notwithstanding these views held and expressed by the Army officers, they proceeded to disallow on technical grounds solely, void of all fairness, Nevada's expenditures; especially is such disallowance unjust in view of the fact that said Army officers themselves interpreted the alleged "bounty" as an allowance for enlisting, lodging, and subsisting the newly recruited soldiers in lieu of all other allowances, and found that said expenses were economical to the United States and that the expenditures were necessary and reasonable.

It must be kept in mind that the Government, through its Army officers and its Governor of Nevada Territory appointed by the President and The Adjutant General, was at all times cognizant of the conditions prevailing in Nevada, and also cognizant of the war enactments passed by the Territorial legislature on the recommendation of said governor and commanding officer of the United States Army, to meet the extreme situation, all of which enactments were forwarded to the President and the Congress at Washington as provided by law, and, without question, approved. There is nothing in the records to the contrary. Nevada was never advised by the commanding officers of the Department of the Pacific, under whose auspices the troops were raised, or by the President, or the Secretary of War or of State, that the expenditures, "the necessity for and reasonableness of" which have never been disputed, authorized by the Territorial and State legislatures and approved by the governor, would not be reimbursed as provided by the acts of 1861 and 1862, and as officially promised by the Secretary of State in his letter of October 14, 1861. If the construction of the acts of 1861–62, 1882, and 1886, as applied by the Army officers and subsequently by the Court of Claims under the acts of February 14 and May 27, 1902 (32 Stat. 235–236, 45 Ct. Cls. 264), to Nevada's war expenditures, is adhered to, then it is evident that the Government is not carrying out its plighted faith to Nevada, and is in honor bound to make proper reimbursement.

The applicable law on the subject of legislative acts passed by a Territory of the United States is contained in sections 1844 and 1850 of the Revised Statutes of the United States (1878) reading as follows:

"SEC. 1844. The secretary (of the Territory) shall record and preserve all the laws and proceedings of the legislative assembly and all acts and proceedings of the governor in the executive department; he shall transmit one copy of the laws and journals of the legislative assembly, within 30 days after each session thereof, to the President and two copies of the laws within like time to the President of the Senate and to the Speaker of the House of Representatives for the use of Congress. * * *

"SEC. 1850. All laws passed by the legislative assembly and governor of any Territory, except in the Territories of Colorado, Dakota, Idaho, Montana, and Wyoming, shall be submitted to Congress and if disapproved shall be null and of no effect."

In the act of Congress authorizing the organization of the Territory of Nevada is contained the following:

"SEC. 3. The secretary of said Territory shall * * * on or before the 1st day of December in each year transmit to the President of the United States, to the Speaker of the House of Representatives and the President of the Senate for the use of Congress one copy of the laws passed by the legislative assembly." (12 Stat. 210.)

The question arising as to the validity of a certain act relating to civil suits, passed by the legislative assembly of the Territory of New Mexico, the Supreme Court of the United States in A., T. & S. F. R. R. Co. *v.* Sowers (213 U. S. 54), held that in view of the fact that the law of the Territory of New Mexico had been submitted to Congress as required by the organization act and section 1850 of the Revised Statutes and same had not been disapproved, it would be assumed that such law had been approved by Congress.

Therefore it would seem to follow that as the Territorial acts of Nevada (all Territorial officers as well as the assembly being strictly under the jurisdiction of, and paid by, the United States), authorizing the expenditure of money, including additional pay (if additional pay it was) to United States Volunteers in aid of the Government, having been submitted to the President and to Congress as required by law and the same not having been disapproved, such expenditures under said acts made were consequently made with the cognizance, sanction, and approval of the United States; and any act of Congress subsequently passed having the effect of denying reimbursement in full for such expenditures would be an abridgement of the liability of the United States to Nevada after such expenditures had been made and after the Government had received the full benefit therefrom. While Congress may have the power to do this, still it has been the policy of the Government not knowingly to exercise such power in any given case, and Congress has been quick to relieve itself of the moral obligation thus imposed upon it in order to do right and justice when a case of that character has arisen. (U. S. *v.* Realty Co., 163 U. S. 427; U. S. *v.* Cook, 257 U. S. 523.)

19. Another error, it is contended, was committed by the Army officers and later by the Court of Claims in construing the act of June 27, 1882 (22 Stat. 112), by failing to give full weight to the remedial character of the act and liberally to construe the acts of 1861–62. The reason assigned for the disallowance of Nevada's additional pay to the volunteers was that "it was a higher rate than was allowed and paid by the United States for similar services in the same grade and for the same time in the United States Army serving in Nevada." The Army officers and the Court of Claims apparently overlooked the fact that there was no part of the United States Army "serving in Nevada for the same time" other than Nevada and California volunteers. There was no other army available; hence the necessity of raising troops locally to keep open the overland route as a military measure and also to protect the settlers against hostile Indians. It is at least very doubtful if "similar services" were being rendered by any other portion of the Army, and certainly the conditions under which they were rendered were wholly different, as explained by said Army officers in paragraph 18, supra. Therefore, there was no proper basis for comparison between the pay of regular United States soldiers and what it was found necessary for Nevada in a great emergency to pay the newly recruited volunteers in that particular Territory. Under these circumstances, it is submitted, the provisions of the acts of 1882 and 1902, as well as acts of 1861–62, should have been liberally construed in favor of the ex-

penditures actually made by Nevada in aid of the Government and at its urgent request, as set forth by the Supreme Court in New York v. U. S., supra, as follows:

"Liberally interpreted, it is clear that the acts of July 2, 1861, and March 8, 1862, created on the part of the United States an obligation to indemnify the States for any costs, charges, and expenses properly incurred for the purposes embraced in the act of 1861, the title of which shows that its subject was to indemnify the States for expenses incurred by them in defense of the United States."

20. Necessity for furnishing the troops was great and urgent, as the calls disclose, and time was an important element. Under the circumstances, Nevada did what the Government expected of her in the most economical, practical manner compatible with carrying out the instructions of the Government. Necessity, time, and speed being the prime factors in such an emergency, as they always are in stress of war, expenses to be incurred under such stress in raising, equipping, and maintaining troops in that sparsely settled, barren desert region during Indian excitements, and with extremely high prices prevailing, could not be permitted to defeat the very purpose sought to be accomplished by the Government. (New York v. U. S., 160–598, supra.) The Territorial officials and the Army officers, all appointed by the President and acting as agents of the Government, being on the ground were undoubtedly the best judges as to what had been done under the emergency facing them and of the necessity for and reasonableness of expenses to be incurred. In incurring these expenses the Territory and State, it should be borne in mind, stood in the shoes of the Government whose constitutional duty it was to provide the troops, and that Government had expressly directed the State to raise and equip such troops in its behalf. Yet the expenses necessarily incurred by Nevada and the method employed in incurring them were, as stated by Major Biddle, economical; they likewise did not exceed the Government's allowance to soldiers under the act of 1850, nor what the costs would have been had the Government itself been required to raise, equip, and send troops to the far West under the most exceptional conditions prevailing in 1863, in that desert region 2,500 miles from the seat of government and at a time when the armies of the Government in the East were in the midst of many sanguinary battles, including Fredericksburg, Gettysburg, and Chambersburg.

21. The patriotic impulses of Nevada were not questioned during the war. The Government gratefully accepted her contribution of men and advancement of money upon which she is still paying interest in aid of the preservation of the Union. There was no question then as to the services she rendered. President Lincoln showed he appreciated what Nevada actually meant to the Union when he said, as reported by Charles A. Dana in his Recollections of the Civil War, pages 174, 175, at the time Nevada was admitted as a State in the Union:

"Here is the alternative: That we carry this vote or be compelled to raise another million, and I don't know how many more men, and fight no one knows how long."

22. Unquestionably the Government is legally, morally, and equitably obligated to reimburse Nevada the money she actually expended at its request in aid of the Nation of which she has thus far been deprived either through technical construction of the law or by the rigid letter of the existing law by the Army officers and the Court of Claims notwithstanding the Army officers conceded the expenditures so made were necessary and reasonable, and the manner in which made was economical and that the existing law was most inequitable to apply to an unusual and extreme case such as that of Nevada; and the Court of Claims saying—

"that laws were enacted by the State at the instance of the officer commanding the military department of the Pacific to provide funds with which to meet the expense of volunteers was quite natural and commendable under the conditions existing there, both to the officer and the legislature, and may give rise to some equity in favor of the claim."

It is submitted there should have been no hard and fast rule applied on the point whether or not the expenditures, made during those confessedly extraordinary and trying days and in that barren region where under the laws of supply and demand in operation at the time prices were at least 50 per cent higher than in any other section of the country, were incurred strictly according to the letter of the law without considering the spirit thereof or the necessity, time, conditions, and prices existing in the region in which expended, which made compliances impossible. The failure to take all these factors into consideration has caused a great injustice of long standing to be done to Nevada.

Furthermore, the acts of 1861 and 1862 and the regulations were general acts passed in the early war period when it was thought the war would be confined to the South and the East and consequently did not have in view an exceptional case such as Nevada now presents; nevertheless if liberally construed, as held by the Supreme Court they should be, said acts would meet Nevada's situation; in other words, said acts and regulations were held to apply to the States of New York and Pennsylvania, for instance, where men, equipment, supplies, and transportation were plentiful, while said acts were interpreted equally to apply to the barren region embracing Nevada where men, equipment, supplies, and transportation were scarce and prices in consequence extremely high. In the former instance the laws and regulations could be justly applied, but in the latter instance such laws and regulations, if intended to apply, were wholly inequitable and impossible of just application and required special treatment.

Comptroller Tracewell, in a report made May 10, 1910, set for that the acts of July 27, 1861, and the joint resolution of March 8, 1862, authorizing reimbursement to any State of the costs, charges, and expenses properly incurred for enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting its troops employed in aid of the Government during the war between the States had at one time been considered not applicable to the far Western States and Territories, which report tends to show that such laws were inequitable to apply to the far Western States and Territories by virtue of the laws of supply and demand operating differently in that barren region, and in effect holds the bounty acts of 1850 justly applicable.

23. There is no danger of setting a precedent by Congress making reimbursements to Nevada of the money she actually expended for the Nation. No other case can be cited on a parallel with it. Furthermore, Congress itself carries the shield of protection to the Treasury in all such cases, should they arise. It may be taken for granted that no case without great merit will receive its approval. That the Nevada reimbursement is just, meritorious, and honorable can not and has not been denied. Congress on grounds of justice and right has repeatedly passed acts appropriating money. In two recent cases passed during the Sixty-ninth Congress, although such cases do not appeal to equity and morals and fair dealing to the same extent as does the Nevada case, Congress by the act approved March 3, 1926 (44 Stat. 160), paid the Omaha Indians the sum of $374,465.02 as interest, notwithstanding the Supreme Court had held interest was not due. (U. S. v. Omaha Indians, 253 U. S. 275.)

By the act approved June 12, 1926 (44 Stat. 740), Congress granted to the Kiowa, Comanche, and Apache Indians $1,000,000 or more in the Treasury, being money received from oil lands and oil mining leases in the Red River, notwithstanding the Supreme Court of the United States in Oklahoma v. Texas (260 U. S. 606; and 261 U. S. 345), to which said Indians were parties, held that the Kiowa, Comanche, and Apache Indians had no right to said money whatsoever; that the right, title, and interest thereto was in the United States.

By the act of March 2, 1895 (28 Stat. 910–933), being the sugar bounty act appropriating money to pay bounties to persons who had been prevented by the repeal of the act of 1890 from obtaining bounties for the production of sugar before the act was repealed, Congress appropriated a large sum of money for their relief; and the Supreme Court of the United States in United States v. Realty Co. (163 U. S. 427), held—

"That the case as presented to Congress was enough upon which to base the assertion that there was a moral and honorable claim upon the Public Treasury, which that body had the constitutional right to recognize and pay; that even though in its purely legal aspects an invalid law could not be made the basis of a legal claim, the planter had acquired a claim against the Government of an 'equitable, moral, or honorable nature'; that the Nation, speaking broadly, owed a 'debt' to an individual when his claim grew out of right and justice—when, in other words, it was based upon considerations of a moral or merely honorary nature."

By the act approved May 27, 1908 (35 Stat. 318), Congress appropriated $250,000 to pay the contractor of the Post Office Building at San Francisco for increased costs of work above his contract price caused by delay and enhanced prices of labor and material due to the earthquake and fire in April, 1906. The architect of the building claiming 5 per cent from the Government of the extra amount awarded the contractor filed suit, and the case went to the Supreme Court. The Government contended that the amount awarded the contractor under the act of Congress was a mere gratuity and can not be properly treated as a part of the cost of the construction. Chief Justice Taft, in rendering the court's opinion in United States v. Cook (257 U. S. 527), said:

"It is not helpful to point out that the United States need not have varied the terms of the main contract, or that no consideration moved to it in the change, or that the contractor could not have recovered anything additional in a suit without the legislation. There was the moral consideration which properly induced the recognition of an honorable obligation by Congress, and turned an unenforceable equity into a binding and effective provision."

The Chief Justice then quoted the citation from United States v. Realty Co., supra, and awarded the architect 5 per cent of the amount.

Compare the above cited acts of Congress, expressly recognizing moral, equitable, or honorable obligations covering sugar bounties and contractor's losses arising in time of peace with the moral, equitable, and honorary, and, it may be added, legal obligation resting upon the Government to reimburse Nevada for moneys she actually expended or advanced in aid of the Government in time of a great war, involving the life of the Nation, at its urgent calls, and how can Congress justly refuse to redeem such obligation?

It may be argued that Congress in recognizing moral obligations to the Indians, notwithstanding adverse opinions by the Supreme Court, did so on the ground they were wards of the Government. In reply it may be said that the people of the Territory of Nevada who came to the aid of the Government by supplying men and money in a great emergency were also in effect wards of the Government while a Territory of the United States and when most of the money now sought to be reimbursed was expended. Congress had plenary power over the Territory and its people, the same as it had over the Indians; the President appointed the governor and all other officials, and even the members of the Territorial legislature were paid by the United States; and every act passed by such legislature was required by law to be transmitted to Congress, and Congress had the power to disapprove any act so passed. Congress and the departments of the Government themselves were part and parcel of the legislative department of the Territory of Nevada, and by not disapproving the Territorial legislative enactments granting the additional pay to its volunteers, now disputed, thereby participated therein and sanctioned and approved such payments as "necessary and reasonable."

In the Nevada case Army officers and the Court of Claims, inferior tribunals, rendered unfavorable decisions, while in the Omaha and in the Kiowa, Comanche, and Apache cases the Supreme Court of the United States, the highest court, rendered adverse opinions, notwithstanding which Congress appropriated large sums of money, totaling over twice the sum due Nevada, to carry out moral, equitable, honorable obligations of the Government based on right and justice.

The uncontroverted and cruel fact remains that Nevada for her patriotic and devoted efforts in aid of the Government at its urgent calls during the War between the States has been left out in the "cold"; that in good faith in carrying out the instructions of the Government in a crisis Nevada actually expended the sum of $462,441.98 on behalf of the Nation, on the official assurance she would be reimbursed, and for which, except as to certain small payments, she has not been reimbursed, as reported by the Secretary of the Treasury, and that her citizens to-day are still paying interest on money borrowed to aid in the common defense. What has been allowed Nevada under the construction of the Army officers and the Court of Claims is but 2½ per cent of the actual amount of money she expended or obligated herself to pay, while other States, wholly differently situated, have received practically the entire amount expended. If there ever was a case that ought to appeal to the conscience and the sense of justice of the Congress, this is the one.

25. That Nevada is entitled to full reimbursement has been declared by prominent Senators familiar with the facts in the following strong terms:

Senator Hawley, of Connecticut: "There is no sort of question as to its justice.

Senator Eugene Hale, of Maine: "The Senate is committed to this State claim by vote, by sentiment, and it is only a question of time when it will pass.

Senator Teller, of Colorado: "If there are any claims that are just and proper which the United States ought to pay, this is one of them. It is as sacred an obligation, in my judgment, as the national bonds." (CONGRESSIONAL RECORD, 56th Cong., 1st sess., vol. 33, pt. 7, p. 6278).

26. Bills providing for the reimbursement of Nevada passed the Senate in the Fiftieth, Fifty-first, and Fifty-fourth Congresses.

By the act of March 3, 1899 (30 Stat. 1206) the Secretary of the Treasury was directed to report to Congress the amount of money actually expended by Nevada in aid of the Government.

On January 18, 1900, the Secretary of the Treasury reported the amount as "$462,441.97 which has not been reimbursed." (H. Doc. 322, 56th Cong., 1st sess.)

In the Fifty-sixth Congress, first session, the Senate again passed the following item in H. R. 11212, the sundry civil appropriation bill:

"To pay the State of Nevada the sum of $462,441.97 for moneys advanced in aid of the suppression of the rebellion in the Civil War, as found and reported to Congress on January 22, 1900, by the Secretary of the Treasury, as provided in the act approved March 3, 1899 (30 Stat. 1206)." (CONGRESSIONAL RECORD, 56th Cong., 1st sess., vol. 33, pt. 7, p. 6278.)

Thus making four times the Senate passed the item paying Nevada. While invariably favorable reports on bills have been submitted to the House by the appropriate committees in various Congresses since 1890, the House for one reason and another, failed to pass same.

On January 13, 1899, the sum of $23,219.25 in addition to the $8,559.61 originally allowed by the Army officers, was allowed and paid. (S. Doc. No. 431, 56th Cong., 1st sess.)

Under the acts of Congress approved February 14, 1902 (32 Stat. 30), and May 27, 1902 (32 Stat. 235), the case was referred by the Secretary of the Treasury to the Court of Claims, with the result that the sum of $12,283.04 as partial interest on the $8,559.61, supra, was paid on July 1, 1910.

The total balance due Nevada is $426,938.68, together with interest actually paid since 1900, which has not been reimbursed.

Mr. NORCROSS. May I add this, that the very last time this matter was before the Congress, in a conference committee between the Senate and the House there were a number of claims pending at that time. The conference committee was unable to agree, but they put in that act a special provision with reference to Nevada, and upon that act Secretary Gage made the report, a copy of which was filed here, setting out the claim in full, showing that both Houses, and even the conference committee, at that time recognized that there was in Nevada this peculiar condition which needed special consideration.

Senator ASHURST. It was necessary to maintain the overland route. There was, prior to that time, from about 1850, I think, to the outbreak of the war, what is known as the Butterfield State Line; we had the Butterfield State Line, which is about 2,500 miles in length, extending from St. Louis to San Francisco, but when the war broke out it had to be closed, so that only left open the overland route.

Mr. KAPPLER. And because of the Indian hostilities then existing in that mountainous country, it was necessary to raise these Nevada troops to protect and keep open this line of transportation.

Mr. NORCROSS. There is another question in my mind that I want to mention. James W. Nye, who was selected by President Lincoln as Governor of the Territory of Nevada, was selected to perform a great public service to the western coast. That was because Nye had stumped the entire western country with Secretary Seward. He was chairman of the metropolitan board of police of New York City. He was one of the great stump riders, and from time to time went with Thomas Starr King to California, and he is credited with keeping the Pacific coast loyal during the Civil War.

There is no question but that Nye was close to the administration, and Nye was the man who raised the troops and kept the overland route over the desert and the mountains open. Those matters are of record, and part of the history of the times.

Senator WATERMAN. Senator ASHURST, what have you to say about it?

Senator ASHURST. I am for it.

Senator WATERMAN. Yes; I think it is a matter that should have our approval, and I think there are a great many other reasons for that, irrespective of the legal aspect of it.

I would like for you, Mr. Norcross, or somebody, prepare a precise and positive statement of the facts as you have given them here to-day. I am asking you to do that, because I have so many things to do.

Mr. NORCROSS. I will be very glad to do that.

Senator WATERMAN. There are several controlling reasons here why Nevada should be recognized in this matter, if you base it on what has been brought out here to-day. I think we can do that, can't we, gentlemen?

Senator ASHURST. Yes.

Senator WATERMAN. Judge Norcross can prepare the facts and we can very briefly get to the solution of the propositions that are involved therein, and get it in the record.

Mr. NORCROSS. I will be very glad to do that.

Whereupon, at 11 o'clock a. m., Wednesday, January 25, 1928, the hearing of the subcommittee was closed.

BILL PASSED OVER

The bill (S. 3092) to enable the George Washington Bicentennial Commission to carry out and give effect to certain approved plans was announced as next in order.

Mr. BLEASE. I object.

The PRESIDING OFFICER. Objection is heard, and the bill goes over.

DEDICATION STONES FROM LOCKS OF OHIO & ERIE CANAL

The bill (S. 3292) providing for turning over to the Ohio State Archæological and Historical Society two dedication stones formerly a part of one of the locks of the Ohio & Erie Canal was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Attorney General is hereby authorized and directed to turn over to the Ohio State Archæological and Historical Society for preservation in the museum of said society the two dedication stones formerly a part of one of the locks of the Ohio & Erie Canal, and now located on the reservation of the United States Industrial Reformatory at Chillicothe, Ohio.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SALARY OF LIBRARIAN OF CONGRESS

The bill (H. R. 9036) to increase the salary of the Librarian of Congress was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Librarian of Congress on and after July 1, 1928, shall receive salary at the rate of $10,000 per annum.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RELIEF OF STATE OF NORTH CAROLINA

The bill (S. 3097) for the relief of the State of North Carolina was considered as in Committee of the Whole. The bill had been reported from the Committee on Claims with an amendment, in line 4, after the word "pay," to insert the words "out of any money in the Treasury not otherwise appropriated," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the balance due the State of North Carolina of $118,035.69, as certified by the Comptroller General of the United States as of February 29, 1928.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

NATIONAL ARCHIVES

The bill (S. 1169) to create an establishment to be known as the national archives was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Library with the following amendments:

Page 2, line 6, strike out the word "his" where it appears the first time and insert the word "their."

Page 2, line 12, after the word "transfer," strike out the remainder of the paragraph and insert in lieu thereof "but the archives council hereinafter provided for by section 5 shall have authority to accept or decline the deposit of any such materials."

Page 2, line 24, after the word "secretary," insert "the executive officer of the Public Buildings Commission."

Page 2, line 25, after the word "department," insert "or independent establishment."

Page 3, line 22, after the word "room," strike out the comma and insert the word "and."

Page 3, lines 22 and 23, strike out the words "and the superintendency of the building."

Strike out the word "archive" wherever it appears in the bill and insert in lieu thereof the word "archives."

So as to make the bill read:

Be it enacted, etc., That there is hereby created an establishment to be known as the national archives, the head of which shall be the Librarian of Congress, hereby entitled "director of the national archives," who shall have general charge of the national archives building and of all records, documents, and other materials deposited therein.

SEC. 2. That from and after the date when the exterior walls of the national archives building have been completed the head of each executive department and independent establishment of the United States Government and the chairman of the Board of Commissioners of the District of Columbia are authorized and directed to submit to the said director a list or successive lists of all records, papers, documents, charts, etc., in their custody which in his judgment should be filed in the national archives building.

SEC. 3. That the said director and the official submitting any such list shall jointly have authority to arrange for the transfer to the national archives building of any such records, papers, documents, charts, etc., which may be designated by the director for transfer, but the archives council, hereinafter provided for by section 5, shall have authority to accept or decline the deposit of any such materials.

SEC. 4. That under the direction of the said director the immediate charge of the building and its contents shall be exercised by an officer known as the archivist of the United States, who shall be appointed by the director from among such persons as are qualified for the higher grades of the professional and scientific service, as defined in the classification act of 1923.

SEC. 5. That there be established an archives council, consisting of the director, who shall be its chairman, the archivist, who shall be its secretary, the executive officer of the Public Buildings Commission, a member appointed, respectively, by each head of an executive department or independent establishment which has deposited in the archives building, from its files, an amount of material in excess of 50,000 cubic feet, and a member of the American Historical Association appointed by the director from among persons who are or have been members of the executive council of that association; the last-mentioned member to serve without compensation, except repayment of expenses actually incurred in attending meetings of the archives council; and that the archives council shall hold at least one meeting in every year.

SEC. 6. That the director shall have authority, by and with the advice and consent of the archives council, to make regulations concerning the classification, custody, use, and loan of materials deposited in the national archives building, and concerning the destruction of useless papers deposited therein.

SEC. 7. That there be two assistant archivists, appointed by the director from among such persons as are qualified for the professional and scientific service as defined by the classification act of 1923, one of these assistant archivists to have charge of the division of general administration, including personnel, disbursements, supplies, mail and files, the photographic room, and the bindery, the other assistant archivist to have charge of the division of operations, including classification and indexing, the library, the map room, the superintendency of the public search room, and the superintendency of stacks and rooms for Government searches, and that in addition to the two assistant archivists the director shall have authority to appoint such other employees as he shall find necessary for the service of the establishment.

SEC. 8. That in order to advise and prepare plans respecting the publication of historical materials in the national archives there be established a commission on national historical publications, to consist of the director, who shall be its chairman, the archivist, who shall be its secretary, the chief of the historical section of the War Department General Staff, the superintendent of naval records in the Navy Department, the chief of the division of manuscripts in the Library of Congress, and two members of the American Historical Association, appointed by the director from among those persons who are or have been members of the executive council of that association, the members of this commission to meet at least once a year and to serve without compensation except repayment of expenses actually incurred in attending meetings of the council.

SEC. 9. That such appropriations as may be necessary to provide for the salaries of officers and employees of the establishment and for expenditures for its service and for the maintenance of the national archives building are hereby authorized.

The amendments were agreed to.

Mr. SMOOT. Mr. President, is this Calendar 449 we are considering?

The PRESIDING OFFICER. It is.

Mr. KING. I ask that the bill may go over. There is no necessity for it. We have not an archives building. What is the necessity of anticipating?

Mr. FESS. We are to have an archives building very soon, and this is simply presenting the organization so as to take care of the situation when it arrives.

Mr. SMOOT. I shall have to ask that the bill go over.

Mr. FESS. A similar bill was offered at the last session by the Senator from Utah himself.

Mr. SMOOT. No; it is quite different from the bill I offered then.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

BILL PASSED OVER

The bill (H. R. 8725) to amend section 224 of the Judicial Code was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDING OFFICER. Objection is heard, and the bill goes over.

BILLS INDEFINITELY POSTPONED

The bill (S. 1928) to provide for appointing Robert J. Burton, a former field clerk, Quartermaster Corps, a warrant officer, United States Army, which had been reported adversely from the Committee on Military Affairs, was announced as next in order.

Mr. REED of Pennsylvania. I move that the bill be indefinitely postponed.

The motion was agreed to.

The bill (H. R. 2649) authorizing the President to reappoint John P. Pence, formerly an officer in the Signal Corps, United States Army, an officer in the Signal Corps, United States Army, which had been reported from the Committee on Military Affairs adversely, was announced as next in order.

Mr. REED of Pennsylvania. I move that the bill be indefinitely postponed.

The motion was agreed to.

BILLS PASSED OVER

The bill (S. 2966) for the relief of Oliver C. Sell, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDING OFFICER. Objection is heard, and the bill goes over.

The bill (H. R. 2294) for the relief of George H. Gilbert was announced as next in order.

Mr. KING. Over.

The PRESIDING OFFICER. Objection is heard, and the bill goes over.

FEDERAL RESERVE BOARD

The bill (H. R. 6491) to amend section 8 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended, was announced as next in order.

Mr. ROBINSON of Arkansas. Mr. President, there should be an explanation of the bill.

Mr. EDGE. Mr. President, I shall be very glad to make a brief explanation. The bill simply changes the existing law permitting the Federal Reserve Board to pass upon the application of directors to serve as directors of more than one institution. The old Kern law provided that they may serve in three institutions. The present law reads:

Provided such banks are not in substantial competition.

The Federal Reserve Board has said that that language rather defeats the old Kern amendment, and has asked that it be changed to this form, using the words "if, in its judgment, it is not incompatible with the public interest." In other words, the object is to promote competition, and the mere fact that a banker can not be a director of any other institution if there is substantial competition, more or less discourages competition. I might say that the Senator from Virginia [Mr. GLASS] introduced a similar bill last year and it passed the Senate, but in the conference between the two Houses on the McFadden bill it was not included. I read this short paragraph from the Federal Reserve Board letter, which I received a day or two ago.

On behalf of the Federal Reserve Board, I wish to thank you and the other members of the committee for the action taken in reporting the bill. It has been extremely difficult for the board to function intelligently under the present law, and I am sure that if this amendment is enacted, it will enable us to function more in accordance with the original intent of the law.

Mr. ROBINSON of Arkansas. This bill does not, as I understand it, in any sense change the definition in the law of the institutions which may have interlocking directors?

Mr. EDGE. Not in the slightest degree. The national banks have been more or less at a disadvantage, as I have already explained, because the question of competition is always arising when the board begins deciding on applications for a permit, but in the case of State institutions, of course, the Federal Reserve Board has absolutely no jurisdiction and interlocking directors may be named ad libitum.

Mr. LA FOLLETTE. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will go over.

GEORGE WASHINGTON BICENTENNIAL COMMISSION

Mr. FESS. Mr. President, I was called to the telephone a moment ago when Order of Business 445, being the bill (S. 3092) to enable the George Washington Bicentennial Commission to carry out and give effect to certain approved plans, was reached on the calendar and was objected to.

The PRESIDING OFFICER. As the Chair recalls, the bill was objected to by the Senator from South Carolina.

Mr. BLEASE. Yes.

Mr. FESS. Will the Senator from South Carolina withhold his objection for a moment?

Mr. BLEASE. I should be willing to do so, but the fact being that I objected to the bill at the request of another Senator, I could not now consent to its consideration.

Mr. LA FOLLETTE. Regular order, Mr. President.

BILLS AND JOINT RESOLUTION PASSED OVER

The bill (S. 759) to give the Supreme Court of the United States authority to make and publish rules in common-law actions was announced as next in order.

Mr. SACKETT and Mr. McKELLAR asked that the bill go over.

Mr. CURTIS. Mr. President, I observe that that bill has been adversely reported.

Mr. SACKETT. But a minority report on the bill has been filed by the Senator from Illinois [Mr. DENEEN], and I therefore ask that it go over.

The PRESIDING OFFICER. The bill will be passed over.

CLAIMS OF GRAIN ELEVATORS AND GRAIN FIRMS

The joint resolution (S. J. Res. 59) authorizing the President to ascertain, adjust, and pay certain claims of grain elevators and grain firms to cover insurance and interest on wheat during the years 1919 and 1920, as per a certain contract authorized by the President, was announced as next in order.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. SMOOT. Mr. President, I should like to ask the Senator from Minnesota [Mr. SHIPSTEAD], who introduced the joint resolution, whether there is a report on it from the department? I do not see any such report.

Mr. SHIPSTEAD. The report on the joint resolution is Report No. 441.

Mr. SMOOT. But there is no report from the department on the measure.

Mr. SHIPSTEAD. Mr. President, I can say to the Senator from Utah that the joint resolution was sent to the Department of Agriculture and that department reported back that they knew nothing about it. It was then sent to the man who represents the United States Grain Corporation, but no reply has been received. The letter was sent to that corporation early in January, but there has been no reply received by the Senate Committee on Agriculture since the letter was sent.

Mr. SMOOT. There was, then, neither a favorable nor an unfavorable reply sent?

Mr. SHIPSTEAD. No; the last time I inquired of the Senator from Oregon [Mr. MCNARY], the chairman of the committee, he said he had not heard from the man to whom the letter was addressed. I thought it rather peculiar that an answer to the letter had not been made.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Utah yield to me?

Mr. SMOOT. I first desire to ask what length of time was allowed to furnish a report between the time when the joint resolution was reported out of the committee and the time the request to which the Senator refers was made?

Mr. SHIPSTEAD. I should estimate it was about a month.

Mr. SMOOT. They ought to have been able to have made some kind of a report in that time. Would the Senator from Minnesota object to letting the joint resolution go over to-day, and I shall write a letter to ascertain if I can get any reasons why an answer has not been made?

Mr. SHIPSTEAD. Of course, if the Senator objects to the consideration of the joint resolution, I can only agree to his request.

Mr. SMOOT. I should like to know a little more about the matter, I think, without expressing any opinion whether the legislation ought to be enacted or not.

Mr. SHIPSTEAD. Mr. President, I might say that I am informed that a measure similar to the joint resolution was submitted to the Committee on War Claims of the House of Representatives, and after hearing the witnesses who were in favor of the measure it was insisted that a Mr. Dudley come down to the committee. He came, and I understand he objected, but I am informed that the House Committee on War Claims reported favorably on the bill in that body.

Mr. SMOOT. I will look the matter up.

FLOOD CONTROL

Mr. JONES. Mr. President, when I presented the report on the flood control bill I intended to ask that the junior Senator from Missouri [Mr. HAWES] might have the privilege of filing a minority report should he desire to do so. I do not think any such request is necessary, but he asked me to make it, and I now make the request that he may have that privilege.

The PRESIDING OFFICER. The request will be noted and granted.

LIEUT. ROBERT STANLEY ROBERTSON, JR.

The bill (S. 1377) for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy, was announced as next in order.

Mr. KING. I ask that the bill go over.

The PRESIDING OFFICER. Objection being heard, the bill goes over.

CHARLES R. SIES

The bill (S. 151) for the relief of Charles R. Sies was announced as next in order.

Mr. KING. I ask that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

LIEUT. HENRY C. WEBER, UNITED STATES NAVY

The bill (S. 2442) for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy, was announced as next in order.

Mr. KING. I ask that the bill go over.

Mr. LA FOLLETTE. Mr. President, will the Senator withhold his objection for a moment?

Mr. KING. Yes.

Mr. LA FOLLETTE. Mr. President, this bill merely seeks to restore to his proper grade an officer now in the Navy. The delay occasioned by his not being notified of his appointment and confirmation following his examination, which was successfully passed, was not the fault of the officer in question but was the fault of the department and of the Senate. No charges, as I am advised by the chairman of the committee, were filed against the confirmation, nor was there any objection raised against it. Therefore, in order to correct the injustice which has been done to this officer, who has given excellent service, this bill has been introduced and I hope the Senator will not insist upon his objection. I have looked into it very carefully, and I think it is a meritorious case.

Mr. SMOOT. Mr. President, I have not read the entire bill, but I see that the Acting Secretary of the Navy, in closing his report, says:

In view of the foregoing, the Navy Department recommends that this bill be not enacted.

Mr. LA FOLLETTE. Yes; that this true; the Navy Department does not recommend the bill, but the Naval Affairs Committee went into the matter, as the chairman of the committee will state, and I have gone into it myself, and I can not see any reason why the Navy Department should take the position it has taken, because the facts show that it was not the fault of the officer but the delay was occasioned both by the department and the Senate.

Mr. HALE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Maine?

Mr. LA FOLLETTE. I yield.

Mr. HALE. Mr. President, let me say that, as I recall it, I informed the Senator the other day that the delay was occasioned in the Senate. I have, however, had the matter looked up since that time, and I find that the delay was in the department itself. This officer took an examination on October 30, 1918, and two months afterwards, in January, 1919, he was informed by the department that he had passed the examination. On March 1, 1919, four months after taking the examination, he was notified of his confirmation by the Senate. However, on February 4, 1919, he had reached the maximum age limit of 32 years for this promotion and his commission was withheld. The delay was due to no fault on his part.

Mr. LA FOLLETTE. Mr. President, the statement of the Senator *from* Maine shows that responsibility for the delay rests entirely upon the Navy Department.

Mr. HALE. Entirely.

Mr. LA FOLLETTE. And yet this officer had completed the examination; had qualified in every respect, and at the time he took the examination was serving in the Navy.

Mr. HALE. That is entirely true. It is fair to say that the situation which arose was the fault of the Navy Department.

Mr. SMOOT. Mr. President, I have not had the time to read the entire report, but I noticed the closing sentence in the letter from the Navy Department to which I have referred.

Mr. LA FOLLETTE. The only explanation I can make is that the Navy Department does not want to admit that it has done a wrong in this case; but it has done a wrong to this officer, and in justice to him it should be corrected.

Mr. HALE. I agree with the Senator that an injustice has been done which should be corrected.

Mr. KING. Mr. President, that may be so; but until we have a further explanation on the part of the Navy Department I think the bill had better be passed over.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

Mr. LA FOLLETTE. Mr. President, I ask to have placed in the RECORD, in connection with the bill which has just been under discussion, a letter from Mrs. Henry C. Weber; and I should like to state that if the Congress has so far abrogated its legislative functions that it can not correct injustices of this character, then we have reached a pretty pass.

The PRESIDING OFFICER. Without objection, the letter will be printed in the RECORD.

The letter is as follows:

1346 CHESTNUT STREET,
Waukegan, Ill., January 31, 1928.

HON. ROBERT B. HOWELL,
Committee on Naval Affairs, United States Senate,
Washington, D. C.

MY DEAR SENATOR: I have received a printed copy of the letter of the Acting Secretary of the Navy, dated January 21, 1928, addressed to the chairman of the Committee on Naval Affairs, United States Senate, Washington, D. C., giving the views and recommendations of the Navy Department with reference to the bill (S. 2442) for the relief of my husband, Lieut. Henry C. Weber, Medical Corps, United States Navy.

In view of the fact that Lieutenant Weber is now serving with the Third Brigade of United States Marines in China, I have been asked to give appropriate attention to any developments in connection with this bill. I therefore beg leave to quote and comment upon certain statements contained in the above-mentioned letter from the Acting Secretary of the Navy. The fourth paragraph of this letter states that—

"Lieutenant Weber was in 1918, while serving under his temporary appointment as an assistant surgeon in the Navy, examined for permanent appointment to the Medical Corps in accordance with the general law. He was found qualified on examination and was nominated to the Senate. Prior to confirmation by that body he had passed the maximum age limit of 32 years and could not, therefore, receive an appointment. Subsequently he entered the permanent Navy under the provisions of section 5 of the act of June 4, 1920 (41 Stat. 835), which fixed the maximum age limitation for appointees to the Medical Corps at 42 years."

It is believed that an amplification of the statements contained in the foregoing paragraph will conduce to a more ready and complete understanding of the merits of Lieutenant Weber's claim. The facts are that on October 30, 1918, while serving as a temporary lieutenant in the Medical Corps of the Navy, Lieutenant Weber took the examination for appointment to the regular Navy. At this time he was well below the maximum age limit of 32 years fixed by the general law. The Navy Department informed him on January 2, 1919 (after a lapse of two months), that he had passed this exmination. An announcement was made on March 1, 1919 (four months after taking the examination and two months after receiving notice that he had passed it) that his appointment had been confirmed by the United States Senate. Inasmuch, however, as Lieutenant Weber had reached the age of 32 years on February 4, 1919, his commission was withheld by the Navy Department. Please note that Lieutenant Weber satisfactorily complied with all requirements for appointment over three months before reaching the maximum age limit of 32 years.

In the fifth paragraph fo the departent's letter it is stated that—

"The bill S. 2442 would, if enacted, result in an immediate additional cost to the Government of approximately $1,150 per annum."

The department evidently is under a misapprehension in making this statement. The facts are that Lieutenant Weber is at the present time receiving the pay and allowances of the fourth pay period, the pay of a lieutenant commander of the Navy, to which the Comptroller General of the United States, in a decision rendered on October 21, 1927 (copy attached), stated he was entitled to receive from June 2, 1927, under the provisions of paragraph 5 of section 1 of the act of June 10, 1922.

The enactment of this bill would therefore involve no increased expense to the Government until Lieutenant Weber had completed 23 years of service, when as a lieutenant commander of the Medical Corps of the Navy he would receive the pay of the fifth pay period. By that time, however, he would in all probability have attained the rank of a lieutenant commander in the Medical Corps of the Navy in the ordinary course of events.

The sixth paragraph of the department's letter states that—

"A bill (H. R. 16197, 69th Cong.) which is similar to the bill S. 2442 was referred to the Bureau of the Budget with the above information as to cost and a statement to the effect that the Navy Department contemplated recommending that the proposed legislation be not enacted in view of the fact that it is not for the general good of the service and that it would establish an undesirable precedent in that many other officers with longer service would be equally justified in asking similar relief. Under date of January 29, 1927, the Director of the Bureau of the Budget advised the Navy Department that this report would not be in conflict with the financial program of the President."

It is respectfully submitted that any legislation having as its object the correction of an injustice unintentionally inflicted upon Lieutenant Weber, as this bill does, is a substantial contribution to the morale of the service and therefore for its general good.

The assertion that "it would establish an undesirable precedent in that many other officers with longer service would be equally justified in asking similar relief" is not believed to be justified by the conditions of this particular case. The claim of Lieutenant Weber is not based upon length of service but upon the fact that he satisfactorily complied with all requirements imposed upon him in ample time to receive appointment before attaining the maximum age limit of 32 years contained in the general law, and that it was due to long and apparently unnecessary delay on the part of the Government and through no fault of his that he was deprived of appointment.

By reference to the register of commissioned and warrant officers of the United States Navy and Marine Corps it will be noted that the officers who took the examination for appointment to the Medical Corps of the Navy at the same time as Lieutenant Weber did, on October 30, 1919, were appointed on and took precedence as of December 10, 1918.

Had Lieutenant Weber been commissioned in the Medical Corps of the Navy as of December 10, 1918, he would have received promotion to the grade of lieutenant commander in that corps during the summer of 1926. The result of the delay in Lieutenant Weber receiving his commission in the regular Navy has been to subject him to a loss of approximately 100 numbers and possibly to postpone promotion to the grade of lieutenant commander in the Medical Corps of the Navy from 8 to 10 years.

The proposed bill is designed to correct this injustice in so far as it may be done by legislation. It will give Lieutenant Weber the rank that he would have received had his case been acted upon with reasonable promptitude. At the same time, however, its enactment will involve no increased expense whatever to the Government.

In view of the facts and circumstances outlined herein, I wish to ask, in behalf of Lieutenant Weber, that this bill for his relief be given the

further careful consideration of the committee of which you are a member, and that it be accorded the favorable consideration that its merits would seem to justify.

Very respectfully,

Mrs. HENRY C. WEBER.

JOSEPH CUNNINGHAM

The bill (S. 2733) to amend the military record of Joseph Cunningham was announced as next in order.

Mr. KING. I ask that the bill go over.

Mr. SHORTRIDGE. Mr. President, the amendment to the bill is merely a verbal change. It does not in any wise affect the purpose or scope of the measure.

The PRESIDING OFFICER. The Chair will say that objection was heard to the consideration of the bill.

Mr. SHORTRIDGE. Then I shall not waste time in discussing it.

The PRESIDING OFFICER. The Chair understood the Senator from Utah [Mr. KING] to object.

Mr. KING. If the Senator from California desires to make an explanation, I shall withhold the objection.

Mr. SHORTRIDGE. I do not care to say anything more. The amendment, however, merely strikes out unnecessary words in the bill. I think it a meritorious measure.

The PRESIDING OFFICER. The bill will be passed over.

JOHN LEWIS BURNS

The bill (S. 1852) to correct the naval record of John Lewis Burns was considered as in Committee of the Whole. It directs the Secretary of the Navy to correct the naval record of the late John Lewis Burns, gunner, United States Navy, to show that his death on August 6, 1918, while attached to the U. S. S. *North Carolina*, was incurred in line of duty and was not due to his own misconduct.

Mr. REED of Pennsylvania. That is another bill which the Navy Department recommends be not enacted. I think it ought to be explained before it shall be passed.

Mr. SHORTRIDGE. The Navy Department is not the legislative branch of the Government.

Mr. HALE. Mr. President, this is the case of an enlisted man who served in the Navy for 13 years. In 1917 he was temporarily appointed a gunner, commissioned rank, and served on active duty until August 6, 1918, when he was admitted to the Naval Hospital at Portsmouth, N. H., and died on that day. He died as the result of a gunshot wound, not incurred in the line of duty, while on board the *North Carolina*. He shot himself at about 4.45 a. m., was immediately transferred to the Naval Hospital at Portsmouth at 5.15, and died at 6 a. m.

It is claimed that the argument used and submitted to the board of inquiry charging suicide was entirely circumstantial; that his death may have been accidental, or caused by another, or that Burns was temporarily insane; it being further claimed that in view of Burns' long naval record he should be given the benefit of the doubt.

I will say, that now in the Navy when a man shoots himself, and nobody has actually seen the act, it is the policy of the department to consider the death as having occurred in line of duty; he is given the benefit of the doubt. That policy has been followed since 1923.

Mr. KING. I wish to ask the Senator from Maine if it is the rule of the department simply because there is not an eyewitness to the death of an enlisted man, though the circumstances pointing to suicide may be very strong, that the department will regard the death as not an act of self-destruction?

Mr. HALE. At the present time that is true. It was not the case at the time when Burns died.

Mr. KING. No matter how strong the circumstances may be and how clear it is that the man committed suicide?

Mr. HALE. Unless some one has actually seen the act, the man is given the benefit of the doubt. That is now the policy of the department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE AT OR NEAR QUINCY, ILL.

Mr. DALE. From the Committee on Commerce I report back favorably without amendment House bill 9849, to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Quincy, Ill., and I submit a report (No. 452) thereon.

I ask unanimous consent for the immediate consideration of this bill and several other bridge bills which I have here.

Mr. CURTIS. Mr. President, are these bridge bills in the regular form?

Mr. DALE. They are; yes, sir.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Vermont?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CUMBERLAND RIVER BRIDGE, CLAY COUNTY, TENN.

Mr. DALE. From the Committee on Commerce I report back favorably, without amendment, House bill 9139, granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Cumberland River on the Lafayette-Celina road in Clay County, Tenn.; and I submit a report (No. 453) thereon.

I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TENNESSEE RIVER BRIDGE, MARION COUNTY, TENN.

Mr. DALE. From the Committee on Commerce, I report back favorably, with an amendment, House bill 9147, granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River, on the Jasper-Chattanooga road in Marion County, Tenn.; and I submit a report (No. 454) thereon.

I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was, on page 2, line 10, to strike out the words "cost of the bridge and its", and to insert in lieu thereof "cost of the bonds authorized under the law of the State of Tennessee for the construction of this and other bridges, and their," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the highway department of the State of Tennessee to construct, maintain, and operate a bridge and approaches thereto across the Tennessee River, at a point suitable to the interests of navigation, on the Jasper-Chattanooga Road, in Marion County, Tenn., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the cost of the bonds authorized under the law of the State of Tennessee for the construction of this and other bridges and their approaches, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 25 years from the completion thereof. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the costs of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

TENNESSEE RIVER BRIDGE, KNOX COUNTY, TENN.

Mr. DALE. From the Committee on Commerce, I report back favorably, with an amendment, House bill 9197, granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Knoxville-Maryville road in Knox County, Tenn., and I submit a report (No. 455) thereon. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate as in Committee of the Whole proceeded to consider the bill.

The amendment was, on page 2, line 10, to strike out the words "cost of the bridge and its" and to insert in lieu thereof "cost of the bonds authorized under the law of the State of

Tennessee for the construction of this and other bridges, and their," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the highway department of the State of Tennessee to construct, maintain, and operate a bridge and approaches thereto across the Tennessee River at a point suitable to the interests of navigation, on the Knoxville-Maryville Road in Knox County, in the State of Tennessee, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the cost of the bonds authorized under the law of the State of Tennessee for the construction of this and other bridges and their approaches, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 25 years from the completion thereof. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the costs of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

TENNESSEE RIVER BRIDGE, ROANE COUNTY, TENN.

Mr. DALE. From the Committee on Commerce I report back favorably, without amendment, House bill 9196, granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Decatur-Kingston road in Roane County, Tenn., and I submit a report (No. 456) thereon.

I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MEDICAL OFFICER ASSIGNED TO DUTY AS PERSONAL PHYSICIAN TO THE PRESIDENT

Mr. REED of Pennsylvania. From the Committee on Military Affairs I report back favorably, with amendments, Senate bill 3456, allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President. It would give him temporary rank, as amended, and it would not interfere with the rank of other officers on the promotion list.

Mr. ROBINSON of Arkansas. I think there are a number of precedents for the action, if I remember correctly.

The PRESIDING OFFICER. Does the Senator from Pennsylvania ask for the present consideration of the bill?

Mr. REED of Pennsylvania. I do.

The PRESIDING OFFICER. Is there objection to the request?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 1, line 5, after the word "the," to strike out "rank" and insert "temporary rank and the"; in line 6, after the word "Army," to insert "while so serving"; and, after the word "Army," to strike out "*Provided*, That the officer now assigned to that duty shall have the rank, pay, and allowances herein provided from the date of his assignment," so as to make the bill read:

Be it enacted, etc., That the officer of the Medical Corps, United States Army, who is now assigned to duty as the personal physician to the President, shall have the temporary rank and the pay and allowances of a colonel, Medical Corps, United States Army, while so serving.

The amendments were agreed to.

Mr. LA FOLLETTE. Mr. President, before this bill is passed I think we ought to be very careful to ascertain whether or not the department has approved it.

Mr. CURTIS. Does the Senator object?

Mr. LA FOLLETTE. I ask if the department has approved the bill?

Mr. REED of Pennsylvania. I understand that the department is in favor of the bill.

Mr. LA FOLLETTE. Has the Senator any written report from the department on the bill?

Mr. REED of Pennsylvania. I have no written report.

Mr. LA FOLLETTE. Then I shall feel constrained to object.

The PRESIDING OFFICER. Objection is heard.

Mr. LA FOLLETTE subsequently said: Mr. President, I withdraw my objection to the consideration of Senate bill 3456.

The PRESIDING OFFICER. The objection is withdrawn.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

ADJOURNMENT UNTIL MONDAY

Mr. CURTIS. I move that the Senate adjourn until Monday next at 12 o'clock.

The motion was agreed to; and (at 4 o'clock and 40 minutes p. m.) the Senate adjourned until Monday, March 5, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 2, 1928

UNITED STATES JUDGE

John E. Martineau to be United States judge, eastern district of Arkansas.

FOURTH JUDGE OF CIRCUIT COURT OF HAWAII

Edward M. Watson, of Hawaii, to be fourth judge, circuit court, First Circuit of Hawaii, vice John R. Desha, resigned.

PROMOTIONS IN THE REGULAR ARMY

MEDICAL ADMINISTRATIVE CORPS

To be captain

First Lieut. Willard Mortimer Barton, Medical Administrative Corps, from February 20, 1928.

[NOTE.—Capt. Willard Mortimer Barton was nominated February 24, 1928, and confirmed February 28, 1928, under the name of William Mortimer Barton. This message is submitted for the purpose of correcting an error in the name of nominee.]

To be major

Capt. George Stanley Clarke, Infantry, from February 24, 1928.

To be captains

First Lieut. Harold Paul Stewart, Cavalry, from February 24, 1928.

First Lieut. Darrow Menoher, Cavalry, from February 26, 1928.

To be first lieutenants

Second Lieut. Alden Rudyard Crawford, Air Corps, from February 24, 1928.

Second Lieut. Rochester Flower McEldowney, Field Artillery, from February 24, 1928.

Second Lieut. Thomas Merritt Lowe, Air Corps, from February 26, 1928.

Second Lieut. Kevin O'Shea, Cavalry, from February 28, 1928.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

INFANTRY

Lieut. Col. Leo Asa Dewey, Adjutant General's Department, effective May 15, 1928, with rank from April 27, 1921.

Maj. George Veazy Strong, Judge Advocate General's Department (detailed in the General Staff Corps), with rank from May 15, 1917.

AIR CORPS

Second Lieut. Demas Thurlow Craw, Infantry (detailed in Air Corps), with rank from June 12, 1924.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 2, 1928

UNITED STATES JUDGE

John E. Martineau to be United States judge, eastern district of Arkansas.

REAPPOINTMENT IN THE OFFICERS' RESERVE CORPS OF THE ARMY

GENERAL OFFICER

To be brigadier general, Corps of Engineers Reserve

Brig. Gen. Jay Johnson Morrow, from March 5, 1928.

POSTMASTERS

ARKANSAS

Ida L. Carter, Parkin.

IDAHO

Clarence P. Smith, Eden.
John E. McBurney, Harrison.
Hannah H. Bills, Kimberly.
William W. McNair, Middleton.

ILLINOIS

Bryce E. Currens, Adair.

INDIANA

Jesse Dowen, Carbon.
Joseph W. Morrow, Charlestown.
LaFayette H. Ribble, Fairmount.
Roy Sargent, Syracuse.
William I. Ellison, Winona Lake.

IOWA

Abe Abben, Little Rock.
Edna Hesser, Nichols.

MAINE

Hugh Hayward, Ashland.
Thomas E. Wilson, Kittery.
Winfield L. Ames, North Haven.
Harry S. Bates, Phillips.
Hiram W. Ricker, jr., South Poland.
George E. Sands, Wilton.
Parker B. Stinson, Wiscasset.

NEW YORK

Henry L. Sherman, Glens Falls.

OKLAHOMA

George H. Passmore, Cromwell.

WASHINGTON

Nellie Tyner, Dishman.
Harry B. Onn, Dryad.

HOUSE OF REPRESENTATIVES

FRIDAY, *March 2, 1928*

The House met at 12 o'clock noon.

The Rev. John Compton Ball, of the Metropolitan Baptist Church, of Washington, D. C., offered the following prayer:

Our Heavenly Father, we bow in Thy divine presence and invoke Thy divine blessing, that it may rest upon all the deliberations of this day, knowing full well that anything done without Thy favor is bound to come to naught, and that only as we move in conformity to Thy will can we hope for continued individual and national prosperity.

And at this time, as we are one great family, we pray especially for the wife of the President of the United States as she sits in anxiety by the bedside of her mother, and we pray that she may realize the fulfillment of the promise that underneath is the everlasting arm; and what we ask for her we ask for every citizen of these United States in the lowliest and humblest station. Bless the Speaker and every Member of this House. For Christ's sake. Amen.

The Journal of the procedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 6073. An act granting a permit to construct a bridge over the Ohio River at Ravenswood, W. Va.; and

H. R. 7921. An act authorizing A. Robbins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky.

The message also announced that the Senate had passed without amendment a bill of the following title:

H. R. 7948. An act to extend the times for commencing and completing the construction of a bridge across the Delaware River at or near Burlington, N. J.

The message also announced that the Senate agrees, with amendments, to the amendment of the House of Representatives to the bill (S. 700) entitled "An act authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes."

ORDER OF BUSINESS

The SPEAKER. Under the special order of the House the Chair recognizes the gentleman from New York [Mr. SIROVICH] for 30 minutes.

Mr. LINTHICUM. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Maryland makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. SNELL. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 40]

Allen	Drewry	Kiess	Rutherford
Almon	Edwards	Kindred	Sears, Nebr.
Anthony	England	Kopp	Somers, N. Y.
Beck, Pa.	Estep	Kunz	Sproul, Ill.
Beck, Wis.	Foss	Langley	Steagall
Beedy	Fulmer	Larsen	Stevenson
Beers	Gallivan	Leatherwood	Strong, Pa.
Berger	Gambrill	Lindsay	Strother
Boies	Golder	Lyon	Sullivan
Britten	Goodwin	Michaelson	Sweet
Burdick	Graham	Moore, N. J.	Swick
Bushong	Griffin	Morgan	Taylor, Tenn.
Campbell	Hall, Ill.	Morin	Thompson
Carew	Hancock	Nelson, Me.	Tillman
Carley	Hare	Nelson, Wis.	Tilson
Chapman	Harrison	Norton, N. J.	Tucker
Christopherson	Haugen	O'Connor, N. Y.	Warren
Connally, Tex.	Hill, Ala.	Palmer	Weller
Connolly, Pa.	Hope	Perkins	White, Colo.
Cooper, Ohio	Houston	Porter	Williamson
Crosser	Hughes	Prall	Wingo
Crowther	Igoe	Quayle	Winter
Curry	Irwin	Ransley	Wolverton
Davey	Johnson, S. Dak.	Rathbone	Wood
Douglas, Ariz.	Kearns	Reed, N. Y.	Wurzbach
Doutrich	Kelly	Romjue	
Doyle	Kendall	Rubey	

The SPEAKER. Three hundred and twenty-six Members are present, a quorum.

Mr. SNELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

QUESTION OF PRIVILEGE

Mr. CRAMTON. Mr. Speaker, I rise to a question of the privilege of the House. I observe that the gentleman from New York [Mr. SIROVICH] has brought into the House and displayed upon the table, apparently for use in connection with the speech he is about to make, various bottles and paraphernalia. My only information as to the use to be made of them comes from a newspaper article in the Washington Herald this morning, which purports to quote a statement issued by the gentleman from New York [Mr. SIROVICH] which, in brief states that he "will set up a laboratory on the floor of the House to-day, and give a practical demonstration," and, further, that he "will invite Members of the House to test the stuff he runs through his chemist's apparatus," the article having to do with the question of alcohol, denatured and otherwise. I make the point of order that the rules of the House do not permit the setting up of such a laboratory, and the other performance which this newspaper announces is the purpose of the display which is before us.

The Constitution appreciated the desirability of orderly conduct in the House when it gave the House express authority to punish for disorderly conduct. The question as to what would be the situation if the gentleman from New York should go so far as the article states and attempt to give to Members of the House liquor while the House is in session I do not need to urge upon the Speaker at this time. Until the gentleman from New York makes that attempt I shall assume that he would not perpetrate an action of that kind, which would in my judgment be disorderly conduct, which would not be in order even by unanimous consent.

I simply urge at this time that the exhibits which are to accompany the speech are akin to the reading of a paper in a speech. They can not be of a higher privilege, certainly. Whether such exhibits are of as high a privilege as the read-

ing of a paper, I am not sure. Certainly one could not claim for some inanimate object or demonstration he wished to use in connection with a speech a greater privilege than he could for a paper which he wished to read as a part of his speech.

So, for the present, I make the point of order that without the unanimous consent of the House the bottles and paraphernalia have no right on the floor of the House while the House is in session, and I object to their presence and use.

Mr. LINTHICUM. Mr. Speaker, the gentleman's citation of the article from some newspaper is merely to give color to the question before the House. The question before the House at the present time is simply this: Has the gentleman from New York [Mr. SIROVICH] the right to exhibit certain drugs used by the prohibition officials in the denaturing of industrial alcohol? Has he the right to read the greatest book on the effect of drugs ever written, the Pharmacopœia of the United States Government, from which all of the definitions of these drugs and their effect upon the human system are taken?

Further, whether he has the right to exhibit certain test tubes and raw cotton and another little exhibit here which amounts to nothing. Heretofore we have had demonstrations of various things on the floor of the House. I remember very distinctly a very able speech, and a very interesting speech, delivered by the gentleman from Connecticut, the leader on the Republican side of the House [Mr. TILSON], in which he exhibited arms of various kinds and explained their mechanism, effect, and range.

I remember another time when the gentleman from Kentucky, Mr. Stanley, who afterwards became a Senator of the United States, had a number of bottles and blended whisky on the floor of this House to demonstrate how easily it could be made.

Now the question is, if you carry out what the gentleman from Michigan [Mr. CRAMTON] says to the extreme point, you could not bring a map on the floor of this House, and you could not bring anything else to show, demonstrate, or explain your speech, which would make it more interesting and intelligent to the Members.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield there?

Mr. LINTHICUM. Yes.

Mr. SCHAFER. It may be interesting to call the Chair's attention to a precedent set about a year ago, on Lincoln's birthday, when a former Member of this House, former Congressman Upshaw, made a prohibition speech under the guise of a Lincoln memorial address, and exhibited on the floor of this House, right here, whisky bottles a great deal larger than these, which he claimed to have found in a waste basket over in the House Office Building. A precedent was thus set in this House by a man we can not say is a wet man, and this same gentleman said at a recent meeting in Washington, "Praise God, from whom all blessings flow," when it was announced that Mr. Kresge, of New York, had donated $500,000 to the antisaloon men. [Laughter.]

Mr. CRAMTON. Mr. Speaker, will the gentleman yield for a question?

Mr. LINTHICUM. Yes.

Mr. CRAMTON. Exhibits under the rule are perhaps permitted by unanimous consent, but in this instance, because of this announced publicity, which demonstrates the purpose of the exhibit, it would be to bring ridicule upon the House.

Mr. LINTHICUM. The gentleman asked me to yield for a question, not for a speech.

Mr. CRAMTON. I am simply stating that the precedent the gentleman speaks of was only by unanimous consent.

Mr. LINTHICUM. Will the gentleman give his consent to the gentleman from New York demonstrating and experimenting? The question of publicity is not before this House. The question is whether the gentleman can demonstrate and explain the dangers of deadly poisonous drugs in industrial alcohol by the exhibits which he has here, and whether he can read from the greatest book that ever was written on the subject for this information; and then the question is whether or not he can experiment. If the House does not want to allow any experiments, then there will be no experiments.

Mr. GREEN of Florida. The House the other day decided this very identical question. Therefore the matter is not before the House.

Mr. LINTHICUM. I know that the House decided several days ago to authorize the Prohibition Unit to use deadly poisonous drugs in denaturing industrial alcohol; but I do not think that action is the last word in the House on that subject. I assert that the gentleman from New York [Mr. SIROVICH] has the right to show these exhibits, and the question as to the propriety of the experiment is not before the House.

Mr. SNELL. Mr. Speaker, the gentleman from Michigan in explaining his point of order against the exhibit to be used by the gentleman from New York [Mr. SIROVICH] says this furnishing of exhibits is nearest to, or akin to, the reading of a paper or article which is covered by a rule. Granting that that is so—and I believe that statement is correct—I want to call the attention of the Speaker to Rule XXX, which provides:

> When the reading of a paper other than one upon which the House is called to give a final vote is demanded, and the same is objected to by any Member, it shall be determined without debate by a vote of the House.

I ask that without further debate that question be put to a vote of the House, in accordance with the provisions of the rule just read to the House.

Mr. BLACK of New York. As I understand it, Mr. Speaker, Rule XXX applies only to papers, and it requires a terrific stretch of the imagination to make Rule XXX cover this proposed demonstration. I think the entire situation was covered by the request of the gentleman from Maryland [Mr. LINTHICUM], when he asked that the gentleman from New York [Mr. SIROVICH] should be allowed to make this address and to explain certain data. There is no word about exhibits in the precedents. We know that from time to time we have had exhibits before the House. So the question recurs to the unanimous-consent request of the gentleman from Maryland, which included the reference to certain data. As to "data," the dictionary—Webster's dictionary, a copy of which rests over there on a shelf behind the Sergeant at Arms—says that "datum," the singular of "data," means among other things an element on which can be based the relation of other elements, and here are certain chemical elements plainly coming within the meaning of the word "data."

The time to object has gone by. The time to object was when the gentleman from Maryland made his request. It is too late now.

Mr. LAGUARDIA. Mr. Speaker, I desire to make the point of order that the point of order made by the gentleman from Michigan [Mr. CRAMTON] is premature. The gentleman from New York has not been recognized under the order of the House and has not attempted to address the House or to use any of these exhibits, and therefore the point of order made by the gentleman from Michigan is premature.

The SPEAKER. The gentleman from New York [Mr. SIROVICH] is recognized.

Mr. CRAMTON. Mr. Speaker, I want to make one additional remark. I am heartily in favor of freedom of debate, but to any attempt that will bring the House into disrepute I shall object.

I was proceeding on the basis of publicity, as understood from the press announcement from the gentleman from New York. The gentleman from Maryland [Mr. LINTHICUM] has made certain suggestions, and the gentleman from New York [Mr. BLACK] has made certain suggestions; and if the only use that the gentleman from New York [Mr. SIROVICH] will make of these bottles and other paraphernalia is purely to let them rest there on the table and be discussed in his speech, I have no objection, with the understanding, however, that there will be no laboratory experiments carried on in this Chamber and no passing of drinks in this Chamber. [Laughter.] If he proposes to confine his use of these objects and exhibits simply to explain the subject of his speech, I shall not object.

Mr. SIROVICH. I want to assure my distinguished friend from Michigan that I have no desire to humiliate any Member of the House or to bring the House into disrepute, but I desire only to deliver an address, with no personal animus to either wets or drys, but which I hope will be instrumental in bringing my views upon the subject of poisoned alcohol clearly before the membership of this House.

Mr. CRAMTON. I am not concerned about the text of the gentleman's address.

Mr. SIROVICH. To please the gentleman from Michigan, I will not perform any experiment.

Mr. CRAMTON. Mr. Speaker, I withdraw my objection and my point of order.

The SPEAKER. The gentleman from New York [Mr. SIROVICH], is recognized for 30 minutes. [Applause.]

Mr. GREEN of Florida. Mr. Speaker, I make the same point of order that was made by the gentleman from Michigan. This is no time for any such exhibition, because this is no brewery.

Mr. VESTAL. Mr. Speaker, will the gentleman from New York yield to me for a moment?

Mr. SIROVICH. I yield.

Mr. GREEN of Florida. Mr. Speaker, I made a point of order. I make the same point of order as made by the gentle-

man from Michigan [Mr. CRAMTON]. Mr. Speaker, I withdraw my point of order.

The SPEAKER. Does the gentleman from New York yield to the gentleman from Indiana?

Mr. SCHAFER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SCHAFER. The gentleman from Florida [Mr. GREEN] has just made a point of order. I do not believe he can withdraw that point of order except by unanimous consent, and I object to it. Let him go through with his point of order.

The SPEAKER. The gentleman may withdraw his point of order.

Mr. VESTAL. Mr. Speaker, I ask unanimous consent that the Committee on Patents be permitted to sit this afternoon during the session of the House.

The SPEAKER. The gentleman from Indiana asks unanimous consent that the Committee on Patents be permitted to sit this afternoon during the session of the House. Is there objection?

There was no objection.

Mr. SCHAFER. What about the point of order?

The SPEAKER. There is no point of order pending, and the gentleman from New York is recognized for 30 minutes.

DENATURANTS IN ALCOHOL

Mr. SIROVICH. Mr. Speaker, ladies and gentlemen, I want to thank the House for its gracious courtesy in granting me the unanimous consent of this distinguished body to speak for half an hour upon the subject of poison in denatured alcohol. I sincerely trust that you will not consider it an imposition upon my part if I respectfully request you to be kind enough to refrain from interrogating me until I have concluded my remarks, when I shall be exceedingly pleased to answer any questions that any Member of the House is desirous of asking me.

At the very outset of my remarks, ladies and gentlemen, I want to say to the membership of this House that I am a total abstainer and have never participated in the drinking of any alcoholic beverage, and that my sainted father, who was a clergyman, never indulged in any alcoholic beverages, either. As a doctor of 23 years' standing, practicing in my chosen vocation, and as a fellow of the American College of Surgeons, it might be of interest for you to know that since prohibition went into effect, while I have the right to prescribe alcohol for medicinal purposes, the records of the Prohibition Department will show that I have never prescribed a drop of alcohol for any human being. [Applause.] I want to say to my distinguished friend from Michigan that I am not here to talk against the drys, nor am I here to talk against the wets, but as a student of science, and as a lover of humanity, and above all as one who is anxious to see the Constitution of our United States upheld and the eighteenth amendment respected and honored and honestly and rigidly enforced so long as it is upon our statute books, that I contend that the dictates of humanity demand that our Government cease at once putting poison into denatured alcohol, which is destroying the lives of thousands of our human beings and depriving them of their inalienable constitutional rights to the pursuit of life, liberty, and happiness, and I am further convinced that the removal of poison from denatured alcohol would not be depriving honest industry of any rights it is entitled to, nor jeopardize the integrity and safety of any business that is desirous of legitimately using industrial alcohol for their respective industries. [Applause.]

What is the purpose of my address? My object in discussing poison alcohol with you is to enlighten the House membership upon a subject upon which much confusion and misgivings exist. When you take alcohol and remove the water contained in it you dehydrate it, and you will find we have left 99 per cent alcohol. In the nomenclature of chemistry we call this 99 per cent alcohol or absolute alcohol or ethyl alcohol or grain alcohol. These three terms are interchangeable and they mean one and the same thing. What is this absolute alcohol or ethyl alcohol or grain alcohol used for? It is used for three different purposes. In the first place, we use it in medicines, and for that purpose it is called medicinal alcohol. There is hardly an herb, there is hardly a drug or chemical that is soluble in any other media but that of absolute alcohol, and when any human being takes it, whether he be wet or whether he be dry, that individual is drinking alcohol given to him for medicinal purposes. In every hospital of the United States, in every city and State institution, in every hospital under the jurisdiction of the United States Army and Navy, we are to-day using medicinal alcohol when we give medicines to human beings to allay their anguish and suffering and to assuage their pain. So much for medicinal alcohol.

Let us now discuss the subject of beverage alcohol, which is alcohol that is used for human consumption. In gin, rum, cognac, brandy, or whisky you find 45 to 50 per cent alcohol. Every time you drink light wines, red wines, white wines, champagne you partake of an alcoholic content of 10 per cent to 18 per cent. When your gustatory desire prompts you to drink ale, stout, or porter you are taking alcohol containing between 4 and 6½ per cent, and when you drink plain ordinary beer you are taking between 1 to 3½ per cent alcohol. Thus one glass of whisky containing 50 per cent alcohol is the equivalent of 18 glasses of beer containing 3 per cent alcohol.

Now, there are two views in the United States concerning beverage alcohol. One is that of a group of honest, sincere, loyal American citizens, who contend that beverage alcohol is detrimental for human consumption, and is responsible for all the wickedness found in our Nation, and that from a social, physical, economic, and political standpoint beverage alcohol has destroyed the home, interfered with the economic welfare of our country, destroyed the physical welfare of our fellowmen, and is chiefly responsible in corrupting the body politic of our Nation.

On the other hand, there is the equally sincere and honest wet element of our country, who believe in moderation and in temperance, and who contend that those who believe in moderation and temperance should not be crucified upon the altar of the drunkard. The wets, so called, deny that from a social, from a physical, and from an economic standpoint temperance has ever harmed any human being; but on the other hand, they contend that from a political standpoint modern prohibition has brought more corruption to-day in Government than has ever existed in the history of our Nation. [Applause.]

On the medical side we have two groups of physicians. One who are firmly convinced that beverage alcohol serves no remedial purpose to human beings, while on the other hand we have equally great authorities on the other side who contend that beverage alcohol taken in moderation is a tonic to the system, is converted into carbon dioxide and water and heat and energy without leaving behind any refuse whatsoever.

Now, my fellow colleagues, having discussed with you the subject of medicinal alcohol and of beverage alcohol, I come to the subject I am most anxious to deal with—that is, the subject of industrial alcohol.

What do we mean by industrial alcohol? Industrial alcohol means the utilization of absolute alcohol, ethyl alcohol, or grain alcohol—which means the same thing—for use in the various industries and the great manufacturing organizations of our Nation who need absolute alcohol in their respective lines of endeavor. We use industrial alcohol in moving pictures, automobiles, paints, varnishes, furniture, leather, candies, cologne, and so forth. Pretty nearly every industrial plant in the Nation utilizes industrial alcohol.

Up to the year 1906 industrial alcohol, medicated alcohol, and beverage alcohol paid the Government of the United States a tax of $1.10 per gallon, but in 1906 the business industries of our country petitioned Congress to remove the tax on industrial alcohol in order that it might be able to compete with foreign governments who had removed the tax on their industrial alcohol. So by act of Congress, in June, 1906, the tax on industrial alcohol was removed and we never had any trouble with industrial alcohol from 1906 to 1920. However, not to have industrial alcohol compete with tax-paid medical and beverage alcohol, the Government denatured the pure alcohol with violent and toxic poisons.

In 1920, when prohibition went into effect, unscrupulous malefactors and criminals and corrupt influences, realizing the opportunities of great wealth, went into industrial avenues for the nefarious purpose of diverting and converting poisoned industrial alcohol for beverage purposes. They began to take from the Government large quantities of this denatured and poisonous alcohol in order to utilize it for bootleg purposes.

So in 1920 thousands of industries sprang up like mushrooms over night, and began to take from the bonded warehouses and from the denaturing plants of the Government industrial alcohol, ostensibly for industrial purposes, but actually for no other purpose but for bootlegging beverage purposes. So these poisons that the United States Government put in, in 1906, which were poisons like methyl alcohol, which is called wood alcohol, or carbolic acid, or bichloride of mercury, or formaldehyde, or brucine, and countless other products, were used by these unscrupulous and alleged business men for their terrible machinations, the bootleg industry, to disseminate amongst the unthinking and unsuspecting citizenry these awful Government-poisoned liquors. Mr. Chester Mills, the former Republican prohibition director of the city of New York, stated that while the total consumption of industrial alcohol in the United States was from 60,000,000 to 70,000,000 gallons per

year in and around New York City, there was diverted over 12,000,000 gallons of industrial alcohol, which fell into the hands of the bootlegging fraternity, and ultimately found its way to maim, cripple, and murder indiscreet citizens, some of which unfortunately came even from the district I represent.

These bootleggers hire half-baked chemists, who try to take out these poisons that the Government of the United States has put in, but are never successful in entirely eliminating them, and the proof of this is contained in the statement of Chester P. Mills, that the Government seizures of bootleg whisky, which amounted to 500,000 gallons last year and examined by Government chemists, were found to contain traces of poison in 99 per cent of the 500,000 gallons seized.

As a matter of courtesy and to please my good friend, the distinguished gentleman from Michigan [Mr. CRAMTON], for whom I have the highest regard, I may say that I have no intention of offending any Member of this House, but this [indicating] is only ethyl alcohol, plain grain alcohol, or absolute alcohol.

If I take this ethyl alcohol and mix it with this wood alcohol [indicating], what do you think would happen? Quoting the United States Pharmacopœia, which lies here before you, one draft taken by any Member of this Congress or his family would in 90 per cent of the users cause total blindness within 24 to 48 hours and they would remain permanently blind. Do you not think, therefore, ladies and gentlemen of this House, that I am justified in appealing to you in the name of humanity to stop these inhuman activities of which the Government is particeps criminis?

Here is another drug [indicating] which the Government uses. It is a solution of bichloride of mercury. When a human being takes industrial alcohol containing this bichloride of mercury what happens? In 48 hours to 2 weeks his kidneys diminish functioning, and in 3 or 4 weeks, when the kidneys cease entirely to function, he dies of uremic poisoning or acute Bright's disease. Shall we go on with that?

Now, take the third drug [indicating]. It is carbolic acid. When carbolic acid is not taken out of the denatured alcohol and goes into the stomach, it burns up the mucous membrane of the esophagus, destroys the coating of the stomach, then goes into the portal circulation, into the liver, and destroys the life of the unfortunate victim.

Then, take benzene [indicating]. If benzene goes into the stomach of a human being it causes hemorrhage of the lungs.

Here is brucine sulphate [indicating], which is related to strychnine. Taken into the stomach of a human being it causes paralysis of his muscles, disease of the nerves, and convulsions.

Is it necessary for me to go on and enumerate the countless things that happen to these unsuspecting citizens who partake of this denatured alcohol diverted by thousands of gallons, colored with caramel and other forms of aniline dyes?

Mr. Speaker, I yield to no man for the loyalty, for the devotion, and for the patriotism that I have for my country; but, loving it as I do, I believe the time for petition has gone by, the day for remonstrance has ceased, and the moment for action has arrived, when, in the name of God and our country, poison should be taken out from denatured alcohol and such drugs substituted that will be malodorous, unpotable, unpalatable, and nauseating to the human system. Such denaturing will accomplish the same results without maiming, blinding, and destroying life. [Applause.]

Is there anything wrong in this? Germany uses pyridine to denature alcohol. France uses malachite green. Here is a sample of pyridine, a drug that is made from decomposing animal matter. One whiff of this drug and you stop drinking at once. Here is another drug, diethylphthlate. If taken into the stomach it causes nausea and nature throws it out as vomit. What wrong does any Member of this House do, what wrong can happen to my good friend, Mr. GREEN of Florida, or my friend from Michigan [Mr. CRAMTON], or any dry or any wet Member in this House, if we help the Government and the chemists of the United States to take out the poisons that are killing hundreds of thousands and maiming others and putting in instead those drugs that are malodorous, that are unpotable, unpalatable, nauseating to the human system, and that stay in the alcohol without affecting the business industries of our Nation? [Applause.]

Mr. CRAMTON. Mr. Speaker, will the gentleman yield to me for a question at this time?

Mr. SIROVICH. I am always willing to extend any courtesy to the distinguished gentleman from Michigan. I yield. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 10 minutes remaining.

Mr. SIROVICH. Since I have 10 minutes left, in fairness to all, I am quite willing to allow the 10 minutes to be used in answering any question that any Member of the House may ask.

Mr. CRAMTON. I thank the gentleman. My only reason for rising and asking the gentleman to yield is because the gentleman has referred to me. I appreciate the speech that the gentleman has made, and I appreciate his point of view.

The harm, as I understand it, is this, that the things which the gentleman suggests might be used as denaturants would fail in two respects. First, they would not comply with the needs of the industries using the alcohol and, second, they could be so easily removed from the alcohol that it would make them ineffective as a protection.

Mr. SIROVICH. To answer the gentleman, I have here taken verbatim from an article by Mr. Chester P. Mills, former prohibition administrator of the district including New York, appearing in Collier's Magazine for October 15, 1927, an extract for the benefit of the Members of this House. Let me say that Chester P. Mills is a graduate of West Point, and one of the best prohibition administrators that the city of New York has ever had. He brought down the diverted and converted alcohol from 12,000,000 gallons to 500,000 gallons a year. Am I right, Mr. CRAMTON, in assuming that Chester P. Mills was a very efficient prohibition agent?

Mr. CRAMTON. I have no information on the subject.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. I can not yield to two gentlemen at once. I should be very glad to yield to the gentleman afterwards, but from the standpoint of physics, no two things can occupy the same space at the same time. [Laughter.]

I want now to read this extract from the article taken from Collier's of October 15, 1927, which will answer my friend from Michigan, the leader of the dry forces in the House:

> Investigation by the prohibition unit developed the suitability of certain complex oil compounds of an odorous and disagreeable nature but of themselves nonpoisonous. These when put in units of 100 gallons of ethyl alcohol will not only remain with the alcohol under manipulative treatment, but will so mar the concoction in which they may be employed that nobody can consume it unknowingly.

Mr. BLANTON. Mr. Speaker, will the gentleman now yield?

Mr. SIROVICH. Yes. I yield to my friend from Texas.

Mr. BLANTON. I think our scientific friend said that this distinguished ex-prohibition enforcer was a graduate of West Point?

Mr. SIROVICH. So I understand.

Mr. BLANTON. When he went there to get his instruction at the expense of the people of the United States, he promised the country a military career, did he not?

Mr. SIROVICH. Does the gentleman want me to defend his military career or his career as a prohibition enforcement officer? The gentleman himself seems to be an authority upon every subject, and he ought to know.

Mr. BLANTON. And, therefore, he fell down on the first obligation he undertook for the United States.

Mr. SIROVICH. I yielded for a question, and not for a speech.

Mr. BLANTON. He must have fallen down in the first undertaking of his life, as he did not stay in the Army after we educated him at West Point.

Mr. SIROVICH. I am not interested in his fall, but in lifting him up. [Applause and laughter.]

Mr. WILLIAM E. HULL. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. WILLIAM E. HULL. I have listened carefully to the gentleman's speech, all of which I know to be true, because I was a distiller for 28 years. I want to ask this question for the benefit of the gentleman and for the benefit of the House. Would it not be better if the law permitted alcohol to be delivered to the manufacturing plants without any denaturants in it whatever, and provide that those receiving that alcohol be subject to imprisonment in the penitentiary if they diverted it for any purpose except what they got it for?

Mr. SIROVICH. Mr. Speaker, the gentleman is asking a very interesting question, and for the benefit of Members of the House I want to say that when liquor is manufactured it first goes to the distillery. From the distillery it goes to the Government bonded warehouse, and from the Government bonded warehouse it goes to the third place, which is called the denaturing plant. From the denaturing plant it goes to the fourth place, the various industries that require it. What happens is that many times in the bonded warehouse, and particularly in the denaturing plant, some of our prohibition officials turn their backs when the denaturants are put in; but the greatest diversion of denatured or industrial alcohol is found mainly when it goes to the industries, and if the Members of the House will find out how many people were getting industrial-alcohol permits before prohibition went into effect and then see how the

business has grown and multiplied since prohibition, I think they would be startled and surprised. I would like the gentleman from Michigan to realize how many hundreds and thousands of new enterprises have gone into the industrial-alcohol business and have gotten permits through unscrupulous politicians and have diverted this industrial alcohol for bootleg purposes. In my district I have had prohibition agents going around before election giving constituents beverage alcohol to vote against me. Surely, it would be far better to trust honest business men.

Mr. LAGUARDIA. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Florida. Will the gentleman yield there?

Mr. ROBSION of Kentucky. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. I will yield to the gentleman from Florida [Mr. GREEN] first. I certainly would be in favor of putting alcohol into the hands of the honest business industry, which has used alcohol away back before 1915, before prohibition went into effect, and impose such a penalty as 10 or 15 years' imprisonment and a fine of from $10,000 to $25,000 for diversion of industrial alcohol in violation of the law, rather than continue the present method of being instrumental in murdering even one guiltless human being. [Applause.]

Mr. GREEN of Florida. Does the gentleman believe that our Government, in denaturing alcohol, should have in view primarily the interests of the industries of our country or the interests of those who unlawfully traffic in alcohol?

Mr. SIROVICH. My dear sir, I believe in protecting both; but if it were a question of protecting the one as against the other, I always stand for the protection of life as against the protection of property. [Applause.]

Mr. ROBSION of Kentucky. Will the gentleman yield now?

Mr. SIROVICH. Yes.

Mr. ROBSION of Kentucky. I am very much interested in the gentleman's speech. I am a dry, but I think the question is open to discussion at any time. I understand the gentleman has been a distinguished physician for a number of years?

Mr. SIROVICH. For 23 years.

Mr. ROBSION of Kentucky. And he has never prescribed alcoholic liquors and never has used them himself?

Mr. SIROVICH. That is correct.

Mr. ROBSION of Kentucky. Why has the gentleman done that?

Mr. SIROVICH. I will be glad to explain that. First, I want to inform the distinguished gentleman that my father was a clergyman and never indulged in alcoholic beverages. Second, in our home liquor was never used. Third, personally, I do not drink and do not smoke. Fourth, in my profession from the year 1906 to 1920, while prohibition was not in effect, I prescribed alcohol from time to time in the practice of my profession in such diseases as pneumonia, typhoid fever, dysentery, and other infectious diseases. Fifth, since prohibition went into effect in 1920 I have never prescribed alcohol, so that I could live under the law and honestly feel that I was upholding the Constitution of the United States and religiously observing the letter and the spirit of the eighteenth amendment. [Applause.]

Mr. SUMMERS of Washington. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. SUMMERS of Washington. Will the gentleman indicate the difference between the denaturing of alcohol in this country and in foreign countries?

Mr. SIROVICH. Yes; I shall be very glad to do that. In France and in Germany they no longer use the denaturizing constituents that our country utilizes. In France a man can get all the liquor he wants, because there is no prohibition. In Germany they use pyridine. Now, if the gentleman from Michigan [Mr. CRAMTON] will permit me, I will be pleased, if he has no objection, to pass this specimen of pyridine around so that every Member of the House may smell it. [Laughter.]

Mr. CRAMTON. Mr. Speaker, I make a point of order.

Mr. LINTHICUM. Mr. Speaker, I move that the gentleman from Michigan be allowed to smell it. [Laughter.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. CRISP. Mr. Speaker, I ask unanimous consent that the gentleman may have 10 minutes more. He is giving the House a very interesting address.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LINTHICUM. I move, Mr. Speaker, that the gentleman from New York be permitted to allow the gentleman from Michigan to smell that pyridine. [Laughter.]

Mr. SIROVICH. I ask, Mr. Speaker, that that remark be expunged from the RECORD. [Laughter.]

In Germany they use pyridine, which is made from decomposed animal matter, and the odor is so offensive and obnoxious that instead of putting poison in alcohol, one whiff of this would be sufficient to effectually denaturize it. That is the reason why I wanted to pass it around. In France they use a preparation called malachite green and a form of petroleum.

Mr. DENISON. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Illinois.

Mr. DENISON. Can these chemicals which are not poisonous be adopted for use here?

Mr. SIROVICH. Yes. It is impossible to completely remove them just as it is impossible to remove entirely methyl alcohol. However, I could take samples, if the gentleman from Michigan [Mr. CRAMTON] would permit, and show you exactly what can be removed and what remains——

Mr. RAMSEYER. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. RAMSEYER. Could you not use that in this country?

Mr. SIROVICH. The law you passed last week would not permit us to take the poison out of industrial alcohol.

Mr. RAMSEYER. Could we not use that?

Mr. SIROVICH. It is optional with the Government. But as I read the law last night, the law is mandatory, and since 1906 the Treasury Department and the collector of internal revenue are commanded to put poison in the alcohol.

Mr. RAMSEYER. You think under the existing law, what you recommend would be better?

Mr. SIROVICH. Unquestionably. Now, I want to say that I knew nothing about Mr. LINTHICUM'S amendment until I came into the House last week. I was never called upon to speak or asked to speak, but during the debate I participated in it. It was with that object that I came here, not to discuss the question of wets and drys but to present an honest statement to the House; so that we might prevent unsuspecting and innocent citizens from being poisoned by the Government of our country. [Applause.]

Mr. HUDSON. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Michigan.

Mr. HUDSON. Is it not the statement of the department that they are constantly trying, through their laboratories, to find denaturants that are not poisonous and that they have authority to use them?

Mr. SIROVICH. I have given you some light now, but I find it is mandatory upon the Government officials to use poisons in denaturing alcohol.

Mr. HUDSON. That is the gentleman's opinion?

Mr. SIROVICH. I read the law only last night.

Mr. HUDSON. But it is not the opinion of the department, and if the gentleman will be fair he will have to say that the department is constantly, through its laboratories, trying to find denaturants that will not do this.

Mr. SIROVICH. They do not have to go very far. I found these for them. [Laughter.]

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. SIROVICH. I yield.

Mr. WILLIAM E. HULL. It is true that the formulas are made by the Government, and it is a part of the law that they must use either wood alcohol or the other ingredients the gentleman has referred to. That is the law. But you can use pyridine as a denaturant, and we have used it in many cases.

Mr. SIROVICH. Exactly.

Mr. WILLIAM E. HULL. And it will do just what the doctor says, but the trouble in using pyridine in this country is that the average buyer will not buy it with pyridine in it when he can buy it with wood alcohol in it.

Mr. SIROVICH. Exactly.

Mr. CRISP. Will the gentleman yield?

Mr. SIROVICH. I will yield to the distinguished gentleman from Georgia.

Mr. CRISP. What is the cost economically of using the denaturants you have mentioned and the denaturants that are now used.

Mr. SIROVICH. They are approximately the same. There is no difference.

Mr. BLANTON. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Texas.

Mr. BLANTON. Is it not a fact that the very best whisky to some topers is absolutely abhorrent and obnoxious for them to smell, and is it not a fact that when they do drink it for its effect that many of them hold their noses when they drink it? [Laughter.]

Mr. SIROVICH. For the benefit of my friend, Mr. BLANTON, I will even enlighten him upon that. You are talking about the pathological specimens of our country, the psychological constitutional inferior groups. In our lives there are two types of worlds. One is the world of reality and the other is the world of dreams. The world of reality is the one in which we struggle, toil, and drudge in order to eke out an existence. While the world of dreams is a world of fantasy and a world of imagination. Many of these poor wretches we have been talking about can not get along in the world of reality because it is too hard for them. They can not struggle and toil. What do they do? They are the ones who become over-indulgent and become drunkards, and when they become drunkards or topers they go from the world of reality through the medium of intoxication into the world of dreams. So, under the influence of intoxication, they are millionaires, they are scientists, they are even Members of Congress. [Laughter.] And they run for the Senate. They do everything. And so I want to say to my distinguished friend that when you deny to these pathological, constitutional inferior groups the privilege of being topers, you increase the numbers in the penitentiaries of our country and throughout the dry States of our Nation who are great users of drugs, of cocaine, of heroin, and of morphine, that takes the place of liquor, and under the influence of these drugs they run away from the world of reality into the world of dreams. [Applause.]

Mr. BLANTON. Getting back to my question, is it not a fact that no matter how abhorrent and obnoxious the smell, they still use it? Is not that a fact?

Mr. SIROVICH. Well, to some people a smell is an odor, and they like it. Even a rose may smell and smell until it finally decomposes and is a stench to us. But you are speaking of pathological people while I am speaking of the citizens of our country, those who should be protected. As a matter of fact, our laws are made not only to protect the strong but they are made to protect the weak.

Mr. MENGES. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Pennsylvania.

Mr. MENGES. Is it not a fact that the industries which are using industrial alcohol would refuse to use it if the gentleman would use pyridine, which is rotten bone oil, to denature it? The industries which are using denatured alcohol would refuse to use it if he would denature it with pyridine.

Mr. SIROVICH. The industries of the United States are no more progressive than the industries of Germany, and the industries of Germany use it just the same.

Mr. MENGES. The industries of Germany do not begin to use denatured alcohol in any way, shape, or form in the quantities we are using it and for the purposes we use it.

Mr. SIROVICH. That is true, since the war.

Mr. MENGES. We use from eighty to ninety times more than they use.

Mr. SIROVICH. But will not the gentleman agree with me that some of the greatest chemists perhaps of the world are found in Germany, and that they have been the pioneers in this form of scientific investigation?

Mr. MENGES. I am not ready to concede that. I think our Government has men employed in the very business that the gentleman is talking about who are the equal of any German chemists. [Applause.]

Mr. SIROVICH. I agree with the gentleman in that.

Mr. Speaker, I want to thank you and the membership of this House for the gracious courtesy you have extended me and the patience with which you have listened to my remarks. [Applause.]

Mr. MEAD. Mr. Speaker, will the gentleman yield?

Mr. SIROVICH. Yes; I yield to my colleague from New York.

Mr. MEAD. Mr. Speaker, this lecture has been one of the most interesting and educational we have ever been privileged to listen to in the House, and I want to leave the suggestion with the distinguished gentleman from New York, that he consider finishing his splendid lecture in the caucus room, or in one of the committee rooms of the House Office Building, where those of us, who would like to see the demonstration that the gentleman intended to give us can actually be put on.

ADDRESS OF HON. THOMAS A. YON

Mr. GREEN of Florida. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by including a speech delivered by my colleague, the gentleman from Florida [Mr. YON], delivered at the annual business dinner of the Boston Boot and Shoe Club, at Boston, Mass., February 15, 1928.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. GREEN of Florida. Mr. Speaker and fellow Members of the House, under permission just given me to extend my remarks, I include herewith speech recently delivered by my colleague, the Hon. THOMAS A. YON, of the third Florida district. This speech was delivered before the annual business dinner of the Boston Boot and Shoe Club at Hotel Statler, Boston, Mass., the evening of February 15, 1928. Few Congressmen have ever had the honor of invitation to travel so long a distance and speak to an industrial organization which is so old and well known as this boot and shoe organization. In this speech my colleague stressed some of Florida's greatness as well as expounding sound economic truths.

The speech is as follows:

Mr. President and gentlemen, I was happy, indeed, when I read your invitation to be your guest at your dinner here in this old historic city of Boston. Of course, I ought to feel at home with such a splendid lot of gentlemen, engaged in the various capacities in the shoe industry, and I hope you have also some of my old comrades—"the boys with the sample cases"—that group that means so much to your industry, for were it not for the distribution from your factories to the various stores and shops throughout this country and the world at large, the factories could not operate very long. That group of good fellows—the traveling men. Those boys who meet each day the difficulties encountered in the life on the road and overcome them. Those boys that oftentimes meet a situation under the circumstances surrounding them, makes him rather frown than smile, but smile they do, and thusly turns many a bad situation to good advantage. Yes, gentlemen, these boys are the lifeblood of our commercial and business life.

Now, my hosts, I want to say in the outset that I am happy to be with you. I bring a message of good will and welcome to you that might want to visit my State, the southernmost State, that is situated down between the Atlantic and the blue waters of the Gulf of Mexico. I bring you a message from the land of sunshine and flowers and peerless Florida watermelon. I judge some or the most of you have visited my State at some time or other, and may be, no doubt, at the present time your club membership is represented there, judging from what your good secretary wrote me, Mr. Anderson.

Yes; I come from Florida to this, the "Old North State," and to its heart, the "Hub City." I have always had a desire to come here and an interest in this section. This section where landed the Pilgrim Fathers, that braved the perils of an almost unknown sea that they might plant themselves on this soil to face the dangers of savage attacks, and the hard winters that were before them, that they might worship God as their consciences dictated. To this old city, of tea-party fame, of Bunker Hill, and the land of Paul Revere, and the Minute Men, and in this section that the shoe industry first took root in America, and which has been such a source of large industrial development, reaching into almost every part of this great country of ours; and, too, my hosts, I have an especial interest in you and your factories, although, I sold shoes for an old southern firm, for many years, distributing them to the country stores, commissaries, and in the villages, towns, and cities of northern Florida. A great many of these were made by your New England factories, and for that reason, I have always, from a shoe standpoint, wanted to visit you. I guess you must make good shoes, or else I couldn't have sold myself with them, to a good constituency, God bless them, the best people in the world. I will let you draw your conclusion, but I am happy in the thought, that I really don't believe that it was any bad motive on my good people's part in honoring me thusly, one who had never sought office before, enough to send a hard-working shoe peddler to the greatest law-making body in the world. In speaking of the Congress, of course, there is a great misunderstanding on the part of the average American as to what great difficulties that body has to encounter.

With thousands of bills a session, touching on every conceivable subject; with all kinds of groups to urge some special legislation or idea before the 45 different committees of the House and like number of the Senate; and also, besides this, we have to work out and get down to the best things for the country as a whole that produce means of raising revenue for running the Government, and the appropriations to care for each and every governmental activity and paying interest on its public debt, which appropriations in the end reach the stupendous total of over $4,000,000,000 annually. These appropriations are for exercising and carrying on the official provisions of each of the departments—the Army, Navy, rivers and harbors, Government aid in local road building in the States, etc., and I will add that the appropriations for this last purpose are entirely too meager, because the relatively small appropriations made have benefited the American people per dollar more than any other moneys that the Government has provided; because, aside from the encouragement it has given the States in developing their road systems, in this development it has benefited every class and condition of our people, for these roads are used and open to everybody. One of the most difficult problems the Congress has to deal with now is our agricultural problem. You, the leaders of thought in your industry, can't afford to not lend your

assistance in helping solve it. Why? Because the country can't continue in a prosperous condition with half prosperous and half impoverished; for you may not have realized it yet, but it is a fact that millions of farms are loaded under a burden of debt and getting deeper, where possible, that we might have food and raiment, and the farms and ranches of America ought to be enabled to furnish these, and do so with a reasonable return of reward for their labor; and, too, we can't afford to have a lopsided economic condition exist, for it is dangerous.

The whole structure is in danger of toppling over. I have too often heard complaints as a shoe salesman from merchants in my territory, when crops were poor or when prices were seriously low, and that has been the condition for practically the last seven or eight years. Now, as to your industry, I know you have your problems. Since 1920 most all manufacturers, wholesalers, and retailers have had depreciation, style changes, that always creates a dead-stock problem and other things to contend with. Also, another thing, too, that is affecting a great many in your industry, is combinations, consolidations, in tanning and manufacture. The chain-store business and mass buying is affecting others. All of these are problems for you to work out, and I am sure you are capable of coping with your difficulties, but I hope that you will not make it so that the individual effort will be too difficult of attainment. The New England shoe industry has been made great by the hundreds of individuals at the head of their institutions. I would remind you that loyalty to these employers as individuals by the employees, with the feeling of individuality toward each on their part, has enabled you in the past to produce style and workmanship and merchandise that has made hundreds of your houses famous throughout the land. Now, I want to briefly refer again to my State.

We have a most wonderful State. We are not dead nor altogether broke. If we were, we couldn't have paid to the Government for internal taxes for fiscal year ending June 30, 1927, the large totals of $44,483,095, of which upward of $35,500,000 was for income taxes, or about the tenth in rank in payments of the States in the Union. We also are not collecting State income and inheritance taxes and no State bonded debt.

We have a most wonderful highway system, leading to all sections of the State, numbering thousands of miles of paved roads, leading along beautiful palm-fringed inland seas, across beautiful rivers and streams, and over hills and through dales, and where the clear waters of many thousands of lakes sparkle like diamonds in a setting hard to describe; and, I will add, that no doubt numbers of you have been to some part of Florida, but you haven't yet, many of you, been privileged to visit the "last great west," western Florida, that section that holds the capital city, Tallahassee, and beyond to the westward to Pensacola, a distance of over 200 miles, of "God's country." Western Florida, with its miles of snow-white sand of the Gulf of Mexico's beach, with its bays and bayous, its rivers and lakes, and miles of beautiful, shaded streams will ever act and attract as a magnet to ever-increasing thousands from a clime less favored than this. Western Florida, with its millions of acres of fertile, arable soil, broken by gentle, rolling hills, breaking off into peaceful, verdant valleys will provide happy homes for thousands more from less-favored agricultural regions than these. Western Florida with her cities, towns, and villages, peopled by a courteous, hospitable people, will claim thousands more to enjoy the advantages of schools, churches, and other associations that the other parts of the world are unable to provide. So, now, my genial hosts, won't you pay us a visit? We will be glad to have you. And thanking you for this happy occasion, I will close.

THE LATE HON. EDWARD COOPER

Mr. BACHMANN Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BACHMANN. Mr. Speaker, it is with deep regret that I announce to the House the death of one of West Virginia's foremost and distinguished citizens, Hon. Edward Cooper, of Bramwell, a former Member of this House, who passed away last night at Bluefield. Mr. Cooper was born at Treverton, Pa., February 26, 1873. He moved to West Virginia in 1875, in which State he had since lived. He was a graduate of Washington and Lee University and for a short time engaged in the practice of law. At the death of his father he abandoned the law and engaged actively in the development of coal properties in southern West Virginia. Mr. Cooper served as a Member of this House in the Sixty-fourth and Sixty-fifth Congresses. His death has removed from our midst one whose memory will live for years to come, and one who will be greatly missed by all who knew and loved him.

OSAGE INDIANS IN OKLAHOMA

Mr. LEAVITT. Mr. Speaker, I am directed by the action of the Committee on Indian Affairs to ask unanimous consent that the bill (H. R. 9033) to amend section 1 of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906, entitled 'An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes,'" and the report thereon be returned to the Committee on Indian Affairs for further consideration.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes; and pending this motion I would like to see if we can reach an agreement with reference to limiting general debate. We have been having very extensive general debate for some little time. My demands are about exhausted, and I would like to ask the gentleman from Texas what he has to suggest with reference to limiting debate.

Mr. BUCHANAN. Mr. Speaker, I am not in position to complain, neither am I in position to make a request for a long continuance of general debate, because the other side of the House has already yielded to me one hour more than has been consumed on that side of the aisle. While I have requests for five hours of time unfulfilled and would like to see every man have an opportunity to present his ideas to the committee, still in good conscience I am going to have to put myself upon the generosity of the other side, and I will ask the gentleman from Iowa to suggest how much time for general debate should be allowed.

Mr. DICKINSON of Iowa. Mr. Speaker, I would like to inquire if 2 hours and 20 minutes, 1 hour and 30 minutes to be given to the gentleman from Texas and 50 minutes to be in the control of myself, would be satisfactory to the gentleman from Texas?

Mr. BUCHANAN. It would have to be satisfactory, Mr. Speaker.

Mr. DICKINSON of Iowa. Mr. Speaker, I ask unanimous consent that general debate close in 2 hours and 20 minutes, 1 hour and 30 minutes to be in the control of the gentleman from Texas and 50 minutes to be in the control of myself.

The SPEAKER. The gentleman from Iowa asks unanimous consent that general debate proceed for an additional 2 hours and 20 minutes, 1 hour and 30 minutes of the time to be controlled by the gentleman from Texas and 50 minutes by himself. Is there objection?

Mr. BLANTON. Mr. Speaker, merely for information, would the gentleman indicate to the House whether he intends to read more than the first paragraph of the bill this afternoon?

Mr. DICKINSON of Iowa. We want to read as far as we can because we want to finish the bill to-morrow.

Mr. BLANTON. We did not get the printed bill until yesterday morning, and we have not yet finished checking it up.

Mr. DICKINSON of Iowa. The gentleman will have all day to-day.

Mr. BLANTON. Yes; but there are some important committee meetings intervening. I am conducting an important investigation before the Gibson committee. Could we not have an understanding that the bill will not be read to-day beyond the first paragraph?

Mr. DICKINSON of Iowa. No; we must read more than that, because we want to pass the bill to-morrow, if possible.

Mr. BLANTON. The reading of the bill under the five-minute rule will not begin before 4 o'clock?

Mr. DICKINSON of Iowa. No.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 11577), the agricultural appropriation bill, with Mr. TREADWAY in the chair.

The Clerk read the title of the bill.

Mr. DICKINSON of Iowa. Mr. Chairman, in order to help relieve the congestion of oratory on the Democratic side of the House, I yield 10 minutes to my good friend, the gentleman from Missouri [Mr. DICKINSON].

Mr. DICKINSON of Missouri. Mr. Chairman, I desire to call the attention of the committee and the country to a great Democratic convention recently held in the city of St. Joseph, in my State of Missouri, on the 28th day of February, 1928, where certain declarations of principles were written into the platform

adopted in that convention, which I shall read in the RECORD as a part of my remarks.

The platform there adopted first declared the allegiance of the Democratic Party to the time-honored principles which characterized our party as the exponent of free government and the champion of the rights of all the people, and then in well-chosen words paid tribute to the great career and public record and service and leadership, the unquestioned honesty and courage and ability of the Hon. JAMES A. REED, and concluded its platform by adopting as its declaration of principles the words of Senator REED uttered elsewhere in a great speech, which reads as follows:

Let us rally our forces to the flag of the Constitution, let us make our fight beneath banners proclaiming:

The inalienable rights of the citizens, among which are liberty of conscience, without coercion, criticism, or obloquy.

The right of every man to worship God according to the dictates of his own conscience, and that none shall make him afraid.

The right of free speech, free press, and peaceable assemblage.

The right of each citizen to regulate his own personal conduct, chart his own course through life, determine his own habits, and to control the affairs of his own household, free from all restraints, save that in the exercise of these natural privileges he will not interfere with the rights of others.

Let us reassert the truth of the doctrine that if this people are to remain free, local self-government and the sovereignty of the States must be preserved.

That Federal power should be brought within the limits not only of the letter but also within the spirit of the Constitution.

The march of centralization must be arrested.

Government by boards and bureaucracies must cease.

Let us demand:

The honest administration of government.

The swift and sure punishment of all public plunderers, bribe mongers, and other malefactors.

The equalization of the burden of taxation.

The repeal of all laws creating special privileges.

The liberation of honest business from oppressive interference by governmental agents.

The prosecution and punishment of those who by trusts, combinations, and restraints of trade make war on honest business and despoil the people.

Let us advocate the American doctrine, which places the interests of our country and our people above that of any and all other aims to make American citizens the freest, happiest, and most prosperous people on earth, and which rejects all policies calculated to imperil the rights or jeopardize the majesty and security of the United States.

Let us demand that the Government shall in all proper ways assist in the development of the natural resources of the land; that it shall immediately develop and execute a plan to control and conserve our great inland waters; harness their power, develop the arid lands of the West, protect the great valley States from inundation, and place upon our mighty rivers and lakes, argosies which will bear an immense commerce, thus commercially uniting the interior States with the Panama Canal.

We should insist upon the encouragement and development of a great merchant marine which will not only carry our commerce to all ports of the world in American ships and beneath the American flag but which will also strengthen our defense upon the seas in case of war.

Our demand should be for honest elections, the jailing of every rogue who pollutes the ballot, the expulsion from office of every man whose title is tainted with fraud or whose certificate was obtained by corrupt methods, whether practiced by himself or on his own behalf.

And then unanimously instructed the delegates there elected to the Democratic National Convention to be held at Houston, Tex., on June 26, 1928, to cast their votes for the nomination of Senator JAMES A. REED for President of the United States and to vote as a unit so long as his name is before the convention and until personally released by him. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 20 minutes to the gentleman from Nebraska [Mr. SHALLENBERGER].

Mr. SHALLENBERGER. Mr. Chairman and gentlemen of the House, I thought I had arranged with some young man in charge of the Hall to bring into the House and exhibit a display made by the Department of Agriculture, so that I might explain the purposes and the manner in which the new plan of grading of beef is being carried on in the different livestock centers of the Nation. That exhibit is now here.

The manner in which the Department of Agriculture and the principal packing houses are endeavoring to grade and stamp fresh beef so the consuming public, when they purchase it of the retailer, can be protected as to the quality of the beef they buy is quickly discovered from the placards displayed upon the easel here, and which are furnished by the Department of Agriculture.

The beef carcass in the cooler is graded and stamped by United States expert inspectors with a rolling stamp and a vegetable dye, applying it from the neck to the tail through the quarters, and also over other portions of the carcass if required, so that every portion of the beef sold to the public will bear the United States stamp. Every one of you who have been in a packing house know that every animal slaughtered and sold bears a United States stamp to show its health and fitness for food. The stamp shown in the picture is applied as a guaranty of the quality and grade of the beef so branded.

The movement to put in practice this plan of grading and branding beef so that the public will know what they are buying had its origin in a meeting called by the principal feeders and producers and processors and sellers of beef in the United States, held at Kansas City, Mo., about a year and a half ago. Hundreds of men engaged in the production and sale of beef came to the convention from every section of our country.

Many of the largest feeders and producers of beef in the different sections of the country were there. Representatives of the great packing interests and the commission men who sell beef cattle in the open market were there. Representatives of many market and retail and wholesale food associations attended.

The discussion of this question was had for almost two days. Out of that came the organization of the Better Beef Association, an organization to bring this matter directly to the attention of the Government and of the people. The men who were elected as officers of the Better Beef Association were representative men of the beef industry in the country. The president, Mr. Oakleigh Thome, is from the State of New York, a man who breeds and feeds a great number of the best beef cattle produced in the State of New York. The vice chairman of the Better Beef Association is the manager of the largest beef-producing ranch in the world, Mr. Kleeberg, of Texas. The secretary of the Better Beef Association is a representative connected with the livestock and packing business and the stockyards in Chicago, the greatest livestock center in the world. The directors of that association are from many of the principal livestock and beef producing sections of the country. I state this in order that you may know the character of the men behind this movement.

Mr. HUDSPETH. Will the gentleman yield?

Mr. SHALLENBERGER. I will.

Mr. HUDSPETH. There are two Kleebergs.

Mr. SHALLENBERGER. I know that, Mr. HUDSPETH. Our vice chairman is the younger man. After the organization had been perfected it adjourned to a later meeting at Chicago.

At Chicago the packers, representatives of the Agriculture Department, and 50 beef producers from different portions of the country finally agreed on the plan which has since been put in practice. The packers, with the Government experts approving, have established three grades—prime beef, which is the best; the second grade is choice beef; and third grade is good beef.

For the present at least it was not thought best to carry the Government grading below "good," because if you go below the three grades mentioned, it was feared by some interests there might be implications that would hurt the sale of the product.

These grades of beef are a warrant to the public as to quality in meats. The public desires good meat. There are many people who want the best beef they can buy.

Mr. CANNON. And the gentleman says that this is limited now to only 10 cities in the United States?

Mr. SHALLENBERGER. Yes; because there was a limited amount of Government money to use. We were forced to begin grading and stamping at only 10 packing centers. Since the plan has proved a success, we want to extend it so all sections may have its benefits.

Mr. LAGUARDIA. And who does the grading?

Mr. SHALLENBERGER. The United States Government inspectors. I want now to give the names of the organizations that are behind this movement, who have indorsed it, and for whom I am now speaking on this floor.

I have telegrams in my pocket from several organizations, of one I am a director myself, and I say to you in all honesty that I feel I speak on this floor as a representative of the beef-cattle industry throughout the country. First, on the list is the Natonal Livestock Association of America, and it is the largest livestock association in the world. It represents thousands of men with billions of invested capital. Second, there is the Texas and Southwest Cattle Growers Livestock Association; I think it very likely the second largest beef producers' organization in America. Next is the National Livestock and Meat Board. This is an organization of packers and beef-cattle interests

formed for the purpose of promoting the production and marketing of beef. Next is the Kansas Livestock Association. The State of my colleague, Mr. HOCH, who will tell you more about this matter. The Corn Belt Meat Producers' Association of Iowa and the Middle West represents those men who take the cattle from the great ranges and fatten them with corn. Then there is the Nebraska Livestock Association, the Michigan Beef Producers' Association, the Eastern States Aberdeen Association. The people in the Eastern States are now producing some of the finest beef cattle in the world. Cattle are grown and fattened in Pennsylvania, in New England, in New York, and in Virginia as good as can be found anywhere. The Shorthorn Breeders' Association, the Hereford Cattle Breeders' Association, and the National Aberdeen-Angus Association; and, lastly, the Better Beef Association. All stand behind this proposition and are asking for this service.

Mr. HUDSPETH. There is the cattle raisers' association known as the Highland-Hereford Association in my district, and we have taken prizes from everything in Chicago, Kansas City, and everywhere else.

Mr. SHALLENBERGER. Yes; Mr. Mitchell, who is very active in that association, is one of our directors. He is one of our best supporters.

Mr. ALLGOOD. What precautions are taken or can be taken to keep a dealer who is not responsible from counterfeiting?

Mr. SHALLENBERGER. I do not believe anyone will take upon himself the responsibility of counterfeiting a stamp of the United States Government. I am sure that there are laws in this country which apply severe penalties to anyone who would attempt to use a Government stamp on beef without authority.

Mr. ALLGOOD. There is a penalty, then, attached to it?

Mr. SHALLENBERGER. Yes; he would be guilty of fraud. Federal grading and stamping is now in force at Chicago, Boston, Philadelphia, Kansas City, Omaha, St. Joseph, Sioux City, St. Paul, and Topeka, Kans. The four great packing houses of this country—Armour, Swift, Wilson, and Cudahy—process and sell 56 per cent, or more than half, of all of the beef sold in the United States. So far we have only applied the grading and stamping service to the packers mentioned. The service is still in its infancy, but we hope, like all good children, it will grow.

Here are some reasons why we think we are entitled to this service. The beef-cattle industry has suffered perhaps greater losses in the deflation following the war in the last seven years than any other business in this country. You men who live in the beef-cattle country know that bankruptcy and disaster has practically swept out of business a great majority of the men who before the war were engaged in beef production. One-half of the income from American farms comes from sale of cattle and the products of cattle. The cow and her sons and daughters earn four and a half billion dollars of the incomes for American farmers every year, and the total income of all of the farms in the United States last year was practically $9,000,000,000. So I speak only the truth when I say that the cattle industry of America produces half of the income of our farmers and is our greatest source of food essential to national existence. This service for which I am pleading is vital to the great livestock industry.

Mr. DICKINSON of Iowa. How much of that is beef products and how much dairy?

Mr. SHALLENBERGER. About two-thirds of it is dairy products at present, because dairy products have been in the ascendency, and beef has been depressed, but it is changing now. The State of Iowa, which the gentleman so ably represents, is second in the Union in the value and number of its cattle, Texas only exceeding Iowa.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. SHALLENBERGER. Yes.

Mr. LAGUARDIA. Can the gentleman say how much this decrease has been? Because it has not been reflected in the retail price to the consumer.

Mr. SHALLENBERGER. I will touch on that later. The beef-cattle business is just beginning to get on its feet. It is the first time in seven years when there has been any money in the beef-cattle business. A decrease of 12,000,000 head of cattle on the farms of America in eight years tells the tale of the disaster that overtook the cattleman. The steady decline in the amount of beef sold has at last put the law of supply and demand to work. For the first time beef producers can look their cattle in the face with any comfort. We want your help to continue the work of the Department of Agriculture and aid both producer and consumer. Practically one-half of all the cattle that are sold for beef in the public markets are not, strictly speaking, beef cattle at all. They are simply by-products of the dairy business. There are more cattle in dairy herds than in beef herds. When a cow is no longer profitable in the dairy herd she is sold for beef. Heretofore, so far as the public is concerned, there has been no way by which the beef consumer could tell beef quality, except by his own judgment. There has been no brand or mark upon it to show the quality or grade of the beef.

And the ordinary buyer has no expert knowledge about beef. The Bureau of Economics in the Department of Agriculture made an investigation in 27 States and found that 90 per cent of the people who buy beef know little or nothing about quality of beef. This shows how essential it is to have some stamp on the beef for the information of the public. Beef is stamped by the Government in three grades, prime, choice, and good. At present only 7 per cent of beef marketed is prime.

Eight per cent is choice, about 15 per cent is good, so that the three grades now standardized and stamped by the Government is about one-third of the beef coming to the central markets.

This service is new. Yet in nine months the Department of Agriculture informs me there have been 25,000,000 pounds of beef graded and branded by the Government and sold under this guaranty of quality to the public.

You see how quickly the public is taking hold of it. Every section of the country should be given the benefit of this service. Then we will have honesty in the beef-selling business. It will benefit the public and benefit agriculture also.

Mr. LOZIER. Mr. Chairman, will the gentleman yield there?

Mr. SHALLENBERGER. Yes.

Mr. LOZIER. Would this grading of beef be reflected in increased prices, and would the spread between the prime grades and the inferior grades be accentuated by this system?

Mr. SHALLENBERGER. Not at all. I am glad the gentleman brought that question up. The first thought perhaps would be that the price of beef would be raised in consequence of this branding practice, but that has not occurred at all. It simply results in this, the beef furnished to the consumer is now sold upon its merits. The demand for the best beef does not interfere or affect prices of cheaper beef. The man who has produced first-class beef, beef that is prime and good should receive some benefit from his efforts.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SHALLENBERGER. May I have a little more time?

Mr. DICKINSON of Iowa. I have two additional minutes that were yielded back to me, and I yield them to the gentleman from Nebraska.

Mr. SHALLENBERGER. It may be asked why ask the Federal Government to pay the slight cost of grading and stamping the beef offered for public sale at public wholesale markets?

The answer is the service is in the public interest. It is for the welfare and benefit of both producer and consumer. It promotes honesty in trade and commerce. The Federal Government now inspects and stamps every carcass of beef permitted to be slaughtered and sold at public markets. A stamp is affixed—that certifies the animal's fitness for food. A Federal stamp guaranteeing the grade and quality of the food is also in the public interest and is the certificate the public will recognize. The amount asked for to continue and expand this very necessary and beneficial service is a mere trifle when compared with the amount of our annual appropriations for similar inspection services or balanced against the benefits it brings to the beef producing and consuming public.

I append some interesting tables showing the menace to our food supply because of our decreasing numbers of cattle, sheep, and hogs that is confronting the country. In 10 years it will be noted, the number of cattle on the farms has declined 12,000,000. The number of hogs since 1920 is practically at a standstill.

TABLE No. 1.—*Livestock on farms January 1*

	All cattle	Hogs	Sheep
1928	55, 696, 000	58, 969, 000	44, 545, 000
1927	56, 872, 000	54, 408, 000	41, 846, 000
1926	59, 827, 000	51, 223, 000	40, 748, 000
1925	64, 928, 000	54, 234, 000	39, 134, 000
1924	66, 506, 000	66, 130, 000	38, 300, 000
1923	67, 240, 000	68, 427, 000	37, 223, 000
1922	65, 632, 000	57, 834, 000	36, 327, 000
1921	65, 587, 000	56, 097, 000	37, 452, 000
1920	67, 120, 000	59, 344, 000	39, 025, 000

Our human population has increased 3 per cent, but our cattle available for food have decreased 20 per cent.

Table No. 2 shows variations to-day in wholesale prices of beef and pork products. It will be noted that pork loins of best quality are quoted at 15 cents per pound; best beef loins at three and one-half times as much. Here is the reason: Beef sold

for food in 1927 was 632,000,000 pounds less than in 1926. On the other hand, pork sold for food in 1927 shows an increase of 352,000,000 pounds over 1926.

The law of supply and demand has resulted in a pronounced rise in the price of beef on the farm and a decline in prices paid for hogs and hog products.

TABLE No. 2.—*Wholesale beef and pork prices February 28, 1928, at Kansas City*

BEEF CUTS	Cents
No. 1 loins	52
No. 2 loins	43
No. 3 loins	22
No. 1 ribs	37
No. 2 ribs	32
No. 3 ribs	16

No. 2 chucks	14
No. 3 chucks	12
No. 1 rounds	21
No. 2 rounds	18
No. 3 rounds	14
PORK CUTS	
Loins, light	15
Plain shoulders	11
B. S. butts	18
Spareribs	10
Loins, heavy	11½
Skinned shoulders	11
Leaves	11
SMOKED AND CURED	
First hams	21½@32½
First bacon	31@32
First grade lard	12½

The men and women who buy meat foods for the American home and who are not experts in determining the quality and grade of beef they are buying need the stamp of the Government to help them to get the benefit of expert inspection and to get what they pay for.

Gentlemen, Federal grading will give the consuming public and the producer the benefit of inspection and honesty in business. You are annually appropriating millions of dollars for all forms of agricultural activity. Ten million dollars has been appropriated for the eradication of the corn borer, and to read the hearings of this committee the farmers do not want the work done. The cattlemen of the country come to this Congress and ask for this small sum of $50,000 for protection of both producers and consumers. I hope before the Congress adjourns you will grant to them this additional appropriation. [Applause.]

The CHAIRMAN. The time of the gentleman from Nebraska has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. HOCH].

Mr. HOCH. Mr. Chairman, I regret that Governor Shallenberger did not have more time to discuss this very interesting and important subject. I want to add just a few words, in the few moments I have, on the same subject and give the practical legislative situation. This experiment has been carried on since last May and the private interests involved, the producers and others have appropriated and spent about $35,000 of their own money upon it.

When the hearings upon this bill were being held there had been no estimate from the Budget Bureau received and, therefore, the subcommittee had no estimate before it. Before the hearings were finished Mr. Mercer, of my own State of Kansas, who has been for many years our State livestock commissioner, and who is chairman of the National Livestock and Meat Board, and Mr. Gunn, of Iowa, who represents the Corn Belt Meat Producers Association, and Mr. Pollock, of Chicago, who is secretary of this National Livestock and Meat Board, came here and appeared before the committee. They had not had occasion to present the matter to the Budget Bureau. So arrangements were made, and I accompanied those gentlemen to the Budget Bureau, and this matter was fully presented to the Budget Bureau. After that presentation the Budget Bureau was so impressed with the value of this experiment, which is along the line of honest merchandising, and if it works will certainly prove to be of benefit both to the consumer and the producer, that the Budget Bureau sent in an estimate of $50,000 to continue this experiment for another year, $10,000 of which was to be made immeditely available. But that estimate came in after the hearings had been closed. The subcommittee did not include the item, largely, I must believe, because the hearing had been incomplete for the reason I have stated. I took it upon myself to write to the Secretary of Agriculture and ask him to state the attitude of the department toward this proposition, and he sent me a very interesting letter. I have not the time to read it, but I am going to ask to insert it in the RECORD. In that letter he outlines clearly the whole situation and gives earnest indorsement of the department to this very valuable work and to the proposed appropriation as recommended by the Budget.

In the minute I have left I simply want to express the hope that the department will have the opportunity to go before the Senate committee when it is considering this bill and fully present this matter. If the Senate committee after that hearing sees fit to include the item, which is certainly a small amount considering the importance of this project, I hope our conferees—and I am sure they will—will give it the most careful consideration when they get into conference.

It is not my present purpose to offer an amendment on the floor, and I understand Governor SHALLENBERGER is not planning to do it. We greatly regret that the subcommittee did not see fit to include the item, though we realize that the hearings had been somewhat incomplete, for the reason I have stated. But we do believe that if opportunity were afforded to present the matter fully the subcommittee and the House would approve it. But we realize that the House hesitates to include items not recommended by the committee, and we express the earnest hope that with the Budget estimate before the Senate committee when it gets this bill the matter will be gone into thoroughly. If that is done, we believe the Senate committee will include the item. In the meantime we ask those who will be House conferees to give further consideration to the matter. If they will do that we believe they will come to the conclusion that this small appropriation asked by all these men deeply interested in the great livestock industry of the country, and approved by the President, will conclude that this experiment is altogether worth while. If this work proves practicable it will be of great benefit to the industry and to the consuming public. If it does not, no one will ask to have it continued. Let us give it a fair trial. [Applause.]

Mr. Chairman, under the leave granted to do so, I insert the following letter from the Secretary of Agriculture:

DEPARTMENT OF AGRICULTURE,
Washington, February 29, 1928.

Hon. HOMER HOCH,
House of Representatives.

DEAR MR. HOCH: I have your letter of February 25 with reference to the supplemental estimate of $50,000 submitted by the Bureau of the Budget to continue the experiment in the grading and marking of dressed beef. This estimate also provided that $10,000 of the total amount should be made available immediately upon passage of the appropriation bill in order to continue the experiment during the remainder of this fiscal year.

This department, through the Bureau of Agricultural Economics, has been working for several years upon definite grades for meats. This work is a part of the general program to encourage the marketing of farm products according to uniform and definite standards which we believe is basic to the efficient marketing of these products. Work is also being done in formulating grades for the live animals, and these grades are being closely correlated with the grades for meats, so that when they are generally put into use producers will be able to plan their production programs according to consumer demands as measured by the consumption of meats of the different qualities.

While grading and sorting of meats has been done for years by the meat trade, no uniform quality standards have been followed. What is "choice" to-day may be called "good" or "prime" six months hence, and there are sections or markets where the "medium" grade, as recognized by the United States standards, is locally called "good" or "choice." All of this means confusion so far as a general understanding of the qualities and values of meats is concerned.

I have promulgated official grades for dressed beef which have been generally accepted in the industry. The next step in the program is a plan to put these grades into general use in such a way that the benefits of standardization will accrue both to producer and consumer. Although the meat industry has for years used trade labels, generally indicative of quality, on processed meats, it seemed to be the prevailing opinion that the same indication of quality was impracticable for fresh meats. The department, however, discussed with all interests in the industry the possibility of carrying the standardization work to the consumer in a practical way, with the result that about a year ago the National Livestock and Meat Board, which comprises all the principal livestock producers' associations, the packers, the commission merchants, and the organized retail meat dealers, suggested that an experiment be undertaken by the department in order to determine the feasibility of marking dressed beef according to uniform standards in such a way that the product itself would show the grade when purchased by the consumer.

Accordingly, on May 2, 1927, the Bureau of Agricultural Economics inaugurated such an experiment, confining it to two grades, namely, "prime" and "choice." A roller stamp was designed which could be so used that practically each retail cut of meat would be marked with its grade. The National Livestock and Meat Board also appropriated

$25,000 for the purpose of carrying on an educational campaign to inform producers and consumers of the advantages of buying and selling meats on a definite quality basis. Since the experiment was started representatives of the department have marked, or supervised the marking, of approximately 25,000,000 pounds of "prime" and "choice" beef. The experiment has been carried on in 10 cities. As a result a great deal of interest has been aroused on the part of producer organizations and retail meat dealers, but being limited to two grades, it affected only a very small percentage of the total meat slaughtered. Some of the leaders in the industry believe it should be continued for a longer period and in a larger way to determine its practical value, if applied more generally. In an effort, therefore, to make the experiment more comprehensive, we recently expanded the work to include the "good" grade, which, together with the grades of "prime" and "choice," will give a representative sample from approximately 27 per cent of the beef slaughtered.

The stamping of the grade upon the carcass shows to the consumer in a practical way the differences in the quality of meats and enables the producer to adjust his production program according to the consumer demand for different qualities. The factors that make for quality in meats are little understood by the average housewife, and it is believed that an educational program carried on in this practical way will do more to reduce misrepresentation and substitution than any other methods thus far devised. In view of the widespread interest that is being manifested in this experiment and because of its importance both to producers and consumers, I have concurred in the recommendation of the National Livestock and Meat Board that the experiment be continued for another year on a somewhat broader basis for the purpose of determining whether it is feasible and practical. The results obtained from two years' practical demonstration should provide the necessary facts to reach a sound conclusion as to the future use of this plan. Therefore, the supplemental estimate submitted by the Bureau of the Budget has my full indorsement.

Sincerely yours,

W. M. JARDINE, *Secretary.*

Mr. WASON. Mr. Chairman, I yield three minutes to the gentleman from Michigan [Mr. HUDSON].

Mr. HUDSON. Mr. Chairman and gentlemen of the committee, I want to address the committee for a moment and ask for permission to extend my remarks by the insertion in my remarks of a statement from Commissioner Doran, of the Department of Prohibition.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

Mr. LINTHICUM. Mr. Chairman, reserving the right to object, I would like to have the letter reported. I would like to know what it is.

Mr. HUDSON. I will be glad to read it if you will give me the time. It is contained in Senate Document No. 195.

Mr. LINTHICUM. What is the purport of it?

Mr. HUDSON. It explains their position on the matter of formulas and the use of denaturants.

Mr. LINTHICUM. I do not like to object to anything that is going to enlighten the House on the question of deadly poisons in industrial alcohol, but I wish the gentleman would speak about it for a few minutes and tell us what it is.

Mr. HUDSON. I am going to do that, but I want to get authority to insert this statement.

Mr. LINTHICUM. If the gentleman is going to speak on it, I will have no objection.

Mr. HUDSON. I shall be glad to do so if you will give me the time.

Mr. LINTHICUM. I yield the gentleman all of my time.

Mr. HUDSON. I am going to speak on the matter.

Mr. LINTHICUM. Mr. Chairman, I reserve the right to object until the gentleman speaks about the matter.

The CHAIRMAN. The Chair suggests that the gentleman from Michigan proceed with his statement and at the conclusion of it ask for this unanimous consent.

Mr. HUDSON. Mr. Chairman, we have listened this morning to a very interesting and in many ways able discussion of the matter of the use of poisons in the denaturing of alcohol. To my mind there were several things brought out in that discussion this morning that ought to be clearly brought into the RECORD to-day, one of those things being the position of the Government in regard to this particular matter.

We have at the present time at the head of the Prohibition department of the Treasury Department a very able and very conscientious gentleman, who, for a number of years, has been the head of the industrial alcohol and chemical division, Doctor Doran. He has stated over and over again that the department is attempting, in using denaturants, to use such as are not know as toxic and yet will be of such value that the industries can use the denaturants successfully.

I am sure the gentleman who spoke this morning did not want to convey the impression that the department is not taking all these precautions; and I am sure the gentleman did not want to carry the impression that these denaturants, as provided by the regulations of the department, do not make a liquid that even by smell or taste would reveal to the purchaser very quickly that they are not for beverage purposes. In furtherance of this policy the department places upon all these packages containing the denaturants that are of a poisonous character the skull and crossbones, so that no one can call themselves innocent if they partake of them and can not state that they do not know the contents.

To my mind, Mr. Chairman, we have got to consider the fact that in this question we are dealing with a class of criminals, as the gentleman from New York said this morning, who are of the lowest type, men who will take this industrial alcohol and try to take out of it the denaturants and attempt to make a potable liquid and place it upon the market, knowing without any equivocation that they are placing before such a consumer a drink that contains a poison. It seems to me we ought to turn our attention to the question of placing these men who are themselves criminals where they belong rather than discommoding the industrial alcohol industry.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HUDSON. Mr. Chairman, I ask unanimous consent that in connection with my remarks I may place in the RECORD this statement of Doctor Doran. I am sure my friend, the gentleman from Maryland, can have no objection to it at all. It is not controversial.

Mr. LINTHICUM. Mr. Chairman, reserving the right to object, I would like to ask whether the gentleman can get a minute or two more so I can ask a question. Then I shall not object.

Mr. WASON. I am sorry we have not more time to yield to the gentleman from Michigan.

Mr. LINTHICUM. I shall not object. I want all the information I can obtain upon the subject.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The statement referred to follows:

EXHIBIT A (7)

(T. D. 3941)

REPORT ON USE OF DENATURANTS IN INDUSTRIAL ALCOHOL

After many years of effort along educational lines, Congress, on June 7, 1906, passed the first denatured alcohol act, also known as the tax-free industrial alcohol act, that was primarily designed to promote the use of alcohol in the arts and industries by relieving the alcohol so used from the high excise tax imposed on all distilled spirits. The burden of this tax is apparent, for at the present time the tax on distilled spirits as applied to high-proof alcohol is approximately ten times the value of the commodity itself. The method adopted by Congress in 1906 and reiterated in the industrial-alcohol title of the national prohibition act was the required addition to this alcohol, which was intended for use in the arts and industries, of methyl or wood alcohol (now known as "methanol") and other suitable denaturing materials that would destroy its character as a beverage by rendering it unfit for such use. The national prohibition act employed a slightly different wording than the original act of 1906, by merely stating that the alcohol withdrawn for industrial use should be denatured by the addition of such materials as would render it unfit for use as an intoxicating beverage. At the time of the passage of the act of 1906, the United States was the only one of the large countries who had not recognized and fostered the industrial use of alcohol by relieving it from burdensome taxation. Denatured alcohol is not legally intended for any internal medicinal or food use; all alcohol so used is released pure after tax payment. Industrial alcohol plays the same rôle in organic chemical operations as is played generally by water in inorganic chemical operations. Industrial alcohol alone or in combination with other combustibles may play an important part in the future motor-fuel problem. England as far back as 1855 employed a crude grade of methanol for the denaturing of alcohol for industrial use. At the present time English methylated spirits contain 10 per cent of crude methanol.

The development of the highly organized German chemical industry was based to a very great extent on the fostering of the industrial use of alcohol; and while Germany undoubtedly had the most extensive development along these lines, there was a large development in France and England prior to 1906. The first formula adopted for denaturing alcohol in the United States followed quite closely the established European practice, and while the denaturing of alcohol in the United States has been extensively developed along rather specialized lines, the European governments have adhered quite closely to the

use of the methanol as the main basic denaturant for both general and special purposes. Great Britain and Canada use from 10 per cent up to as high as 30 per cent of methanol. The maximum ever used in the United States was the first formula authorized in 1906, employing 10 parts of methanol to 100 parts of ethyl alcohol, or slightly less than 10 per cent. Following the act of 1906, the industrial use of alcohol broadened in the United States, reaching its maximum volume in the Great War and being employed in many new industries in the active period following the Great War. The passage of the national prohibition act was coincident with the development of a large and varied chemical industry in the United States, and the further development of specialized formulas for specialized industries enabled these industries to maintain themselves through the period of adjustment incident to the taking effect of national prohibition. The special formulas primarily designed for particular industries take due account of the chemical and commercial factors making for efficient production. For example, in the rayon industry one of the principal grades is the nitrosilk, which is a colloidal solution of nitrocellulose in an alcohol-ether mixture. In this case, the denaturant employed is ether itself and its use not only renders the alcohol unfit for beverage purposes but gives a mixture satisfying every scientific and manufacturing consideration. Another example of the application of specialized formulas is the employment of a generally used basic perfume material for the alcohol designed and intended for the perfumery and toilet-water trade. This substance, known chemically as "diethylpthalate," when added to the alcohol renders it extremely bitter and distasteful, and yet the chemical is itself odorless and is a logical component of complex perfume mixtures.

It will thus be seen that in the employment of these specialized formulas it has been the effort of the department, in cooperation with the industries themselves, to devise formulas that will render the alcohol unfit for beverage purposes and yet enable the industry to employ the material in the most efficient manner. There are over 60 of such specialized formulas and about half of them were authorized prior to 1920. None of these mixtures are available to the public at large but are only procurable under the permit system in effect since 1906 and very much developed since 1920.

The permit administration of the national prohibition act has developed within the past year along more effective lines and there has been a noticeable increase in unlawful manipulation of completely denatured alcohol. Inasmuch as it is the expressed intent of the act that these formulas be available generally for lawful purposes, such as domestic fuel and automobile antifreeze solutions, it is necessary that they be of such a nature as to render the alcohol, not necessarily highly toxic, but objectionable and obnoxious when used as a beverage, making it practically impossible for any person to consume one of these treated concoctions either deliberately or unwittingly and not at the same time be fully informed that the liquid is unfit for consumption. As a further precaution against accidental use, the regulations require these formulas to be sold under skull and cross-bone label. Current scientific work of the department, therefore, is being directed with a view to strengthening these formulas, not by rendering them more toxic, but by rendering them less potable, and in the working out of these problems partial success has already been obtained. Many factors bearing on the problem require extended scientific investigation. For example, the denaturing substances employed must be of such a nature as to remain with the alcohol under a most severe manipulative treatment. The substance must be noncorrosive, and, in the quantity used nontoxic, and the compounded formula must be suitable for lawful industrial use. There is a misapprehension in the public mind as to the underlying reasons for the use of denaturing grade of methanol. There is no doubt in the mind of any well-informed chemist that the long-standing use of methanol by all countries is based on sound scientific principles. Being closely related chemically to ethyl alcohol (ethanol), having a boiling point only slightly below that of ethyl alcohol, and having the physical properties closely resembling ethyl alcohol, it is a substance that can not easily be removed. It is not employed because of the fact that methanol as such is commonly known to be a dangerous liquid to consume and, therefore, that physical harm will result to the drinker, but because of the fact that the denaturing grade of methanol carries distinctive odorous substances commonly designated as pyroligneous compounds that, by their characteristic odor and taste, at once disclose to the individual the patent fact that the mixture or liquid is unfit for consumption. The fact that methanol forms constant boiling-point mixtures with ethyl alcohol and if redistillation is attempted carries over with it in the distillate these odorous pyroligneous compounds discloses the chief reason for its world-wide employment as a basic denaturing agent.

The current investigational work by the department has developed the suitability of certain complex oil compounds of an odorous and disagreeable nature but of themselves nontoxic, which, when used with a minimum quantity of methanol, will not only remain with the alcohol under manipulative treatment but will so mark the concoction in which it may be employed by a criminal that nobody will consume the same unknowingly but only by a deliberate and willful act. The protection and encouragement of lawful industrial alcohol use, coupled with maximum protection of the public, is the aim and object of the department's scientific work on this subject. The present development of chemical industry in the United States and the fact that other countries are adopting some of our special methods is evidence of the constructive course pursued by the department. The present system of denaturation meets with the approval of those industries whose continued welfare is essential to the public good. A weak policy of denaturation would break down industry by making easy openings for illegal operations, would be contrary to sound policy, and would actually lessen the protection afforded the public. The scientific departments of industrial organizations are in continuous and hearty cooperation with the department's chemists and constant investigations are being conducted with a view to more effective administration.

J. M. DORAN, M. D.,
Head, Industrial Alcohol and Chemical Division.

Mr. SANDLIN. Mr. Chairman, I yield 10 minutes to the gentleman from Oklahoma [Mr. SWANK].

Mr. SWANK. Mr. Chairman and gentlemen of the committee, the first words I ever uttered on this floor were in behalf of a wounded soldier of the World War, and it is always a pleasure to lend assistance to our soldiers of all wars and their dependents. The first day of the Seventieth Congress I introduced the following bill for the relief of veterans of the World War:

[H. R. 347, 70th Cong., 1st sess.]

A bill to amend section 205 of the World War veterans' act, 1924

Be it enacted, etc., That section 205 of the World War veterans' act, 1924, is amended to read as follows:

"That each regional office shall have jurisdiction over all claims for benefits under the World War veterans' act of 1924 of all claimants who reside within the jurisdiction of each regional office. All claims heretofore reviewed by the central board of appeals or area board of appeals since the passage and approval of the World War veterans' act of 1924 shall forthwith be returned and reviewed by the regional office having jurisdiction over said claims, and said claims shall be rerated by the claims and rating board of said regional office. The findings and ratings of any regional office having jurisdiction of such claims shall be final and binding upon the Veterans' Bureau unless appealed to the central office or central board of appeals for review, upon application in writing by the claimant or his legal guardian.

"Except in cases of fraud participated in by the beneficiary, no reduction in compensation shall be made retroactive, and no reduction or discontinuance of compensation shall be effective until the first day of the third calendar month next succeeding that in which such reduction or discontinuance is determined."

The bill provides that the central office of the Veterans Bureau here in Washington can not appeal a rating made by a regional office, unless the soldier affected desires the appeal. It also provides that all claims heretofore reviewed by the central board of appeals since the approval of the World War veterans' act of 1924 shall be returned and reviewed by the regional office having jurisdiction of such claims.

Mr. Chairman, I believe that the regional office is better equipped and better qualified to rate a claim within its jurisdiction, near the soldier, and has a more complete understanding of the full situation, than any board here in Washington can possibly have, no matter how careful the members may be nor how fair they act. The members of the appeal boards are far away and the case is decided upon the cold facts submitted without any personal knowledge of the claimant. When the rating board of a regional office rates a claim the members of the board are many times in personal contact with the soldier, talk to him and his acquaintances, and know more about the claim than when it is submitted on paper. When a physician in that office talks to a claimant he understands his case far better than can be expressed on paper to some person 1,500 or 2,000 miles away. It is similar to the trial of a case in court. In the trial court the judge and jury not only hear the witnesses, but observe their demeanor on the witness stand, and are thereby better judges of the truthfulness of the testimony, than is any Supreme Court who decides the case from the printed record, and never sees the witness, or the parties to the suit. Many cases that are rejected by the Veterans' Bureau, would in my opinion, receive favorable consideration if the officials could see the soldier and talk with him and his acquaintances. Many times the claimant's family can go to the regional office and talk with the officials about a claim, or are near where those officials can see them and get needed information concerning many claims. I do not care how sympathetic and careful the officials of the Veterans' Bureau may be in considering the evidence filed in support of a claim, they decide the case upon the written evidence submitted, and do not see and talk with the claimant and his witnesses.

Mr. VINSON of Kentucky. It occurs to me that the Government ought to be satisfied when it has adjudicated particularly the rates and disability of the soldier. When they have all the evidence on their side, they have their physicians examine him and they make the rate.

Mr. SWANK. The gentleman is correct, and if there is a doubt it should be resolved in favor of the soldier.

Mr. HASTINGS. And the Government has charge of all the records of the soldier.

Mr. SWANK. Yes; and my bill provides that the claim shall not be appealed unless the soldier wants that action taken.

Mr. HASTINGS. It is largely a question of fact and the gentleman thinks it ought to be left to the local authority to pass on it.

Mr. SWANK. And let the soldier appeal if he wants to.

Under the present law a soldier can appeal his claim if he so desires, but I do not believe the central office in Washington should be permitted to appeal the claim and rerate the same against the wishes of the soldier. I have been informed that many times a claim has been appealed from the regional office after it has made a rating upon consideration of all the evidence surrounding the case, and that the central office has reduced the rating and sometimes disallowed the claim altogether. I am opposed to a continuance of that procedure, and the purpose of this bill is to stop such practice. If this bill is enacted into law it will also lessen the expense of the bureau for there will not be many cases appealed before the central board of the Veterans' Bureau with proper administration in the regional offices. The regional offices are well equipped to handle and rate these claims under their respective jurisdictions, and I have never seen any reason for taking appeals unless the soldier himself desires his claim considered by the central office.

I believe my colleagues want to do what, in your opinion, is the best for our soldiers. I am before you at this time because I want to better the conditions of our ex-service men, and to simplify as much as possible the rating system of the bureau, and make it as easy as we can on these boys and their dependents. Some may say that sometimes a soldier receives more than he is entitled to, but I have never seen a soldier who receives more than should be paid him, and I do know of many who do not receive a sufficient amount to compensate them for their service-connected disabilities. I handle hundreds of these claims each year, and many times claims are disallowed when the evidence could just as easily and logically be construed in favor of the soldier as against him, and his compensation be granted. In my judgment, when there is a question of a doubt as to the disabilities of a soldier or as to whether or not his disabilities were caused by his service in the Army, then in that event all doubt should be resolved in favor of the soldier.

Since the good people of the fifth Oklahoma district, that I have the honor to represent in the American Congress, sent me here, I have been successful in assisting more than 610 of our soldiers to get favorable action on their claims before the bureau. Most of my office work consists in helping with these claims, and it is always a pleasure to render such assistance. I do not know of any better service that a Member of Congress can render than to help these worthy soldiers, who have been wounded, maimed, and in broken health caused by their Army service. So long as the people keep me here I shall continue that course along with my other duties.

Do what we will and exert all the efforts we can in behalf of our soldiers, the defenders of our country and our homes, it will be impossible to reward them for their loss of health, wounds, and loss in earning capacity. More liberal construction should be given evidence filed by a soldier, and especially when he is incapacitated. There is no soldier who would not gladly give up any compensation that he receives if he could be given back his health, position, and earning power. That can not be done, and we should therefore do everything possible to relieve them, that no soldier who defended this Republic and offered his life for his country, or his dependents, should ever be in want of the necessities of life. We can not do too much. At this time I wish to congratulate the House for passing unanimously, on the 20th day of February, 1928, the bill extending for two years the time for soldiers to file their claims for adjusted compensation. I also hope that both Houses of Congress will soon enact a law granting compensation to soldiers whose disabilities prevent them from earning a living, regardless of whether such disabilities are service connected or not, and that the President of this great country will approve such a measure.

Mr. Chairman, I hope the bill I have presented here may become a law, for it will be of great relief to our soldiers.

I ask permission here to insert that part of letters and telegrams from soldiers and Legion posts relating to this bill and approving the same, as follows:

CUSHING, OKLA., *December 21, 1927.*

Hon. F. B. SWANK,
Congress of the United States,
House of Representatives, Washington, D. C.

MY DEAR MR. SWANK: It gives me great pleasure, as adjutant of the local post of the American Legion, to reply to your letter of the 17th instant with regard to bill to prevent the Central Board of Appeals in Washington from appealing and changing a soldier's rating by the regional office unless the soldier himself desires such appeal.

This bill was read, as well as your letter, and discussed thoroughly, and it is the entire post's wish that we stand back of same 100 per cent. It certainly has our approval and is a bill which will mean much to those who need all the support they can possibly receive. We also as a post of the American Legion wish to express our appreciation to you for the interest shown to those "buddies" who are so in need, and take this opportunity of thanking you and assuring you that we are behind you 100 per cent.

Very sincerely yours, DONALDSON WALKER POST, No. 108.
J. C. SMITH, *Adjutant.*

ROBERT GORDON DAVENPORT POST, No. 87, AMERICAN LEGION,
OFFICE OF SERVICE OFFICER, DEPARTMENT OF OKLAHOMA,
Pauls Valley, Okla., December 23, 1927.

Hon. F. B. SWANK, M. C.,
Washington, D. C.

DEAR JUDGE SWANK: We are in receipt of your letter of the 14th, inclosing copy of bill you have introduced to amend section 205 of the World War veterans' act. We have carefully read this bill and are enthusiastically in favor of it. We trust that Congress will pass the same without any delay.

The writer served as a claim examiner in the Veterans' Bureau at Dallas for a period of 10 months following his graduation from the law school at Norman, in 1922, and based upon his experience gained there and his experience as service officer for this post since April, 1923, we feel that we are in a position to know something of the working of the Veterans' Bureau. We believe that the passage of your bill will be beneficial to a large body of ex-service men, and the local post is glad to know of your interest in behalf of the ex-service men of this State.

With best holiday greetings for you and yours, we are

Yours truly,

JOE W. CURTIS.

SULPHUR, OKLA., *December 24, 1927.*

Hon. F. B. SWANK,
Washington, D. C.

DEAR SIR: Received your letter, and will say as an active member of our post of the American Legion here at Sulphur that your bill meets with my approval and sincerely hope it will become a law.

Yours truly,

PAUL V. ANNADOWN.

YALE, OKLA., *December 26, 1927.*

Hon. F. B. SWANK.

DEAR SIR: Received your letter and House bill 205 and its amendment, 21st instant, and will say that I took it up at my post meeting last Wednesday night, and everyone was favorable toward it. In fact, it was voted on and passed unanimously and sent to our legislative committee at headquarters. So not being the rules of the order to vote singular as a post, but we can approve of same and send it to our committee, which we did. And you can rest assured that you have the hearty approval of the whole membership of this post, and thank you very much for the actions you have taken in this and other such legislation.

We have no unlimited amount of trouble on this one point, and we hope this will be much easier handled now and should with this amendment.

Any time I can be of any assistance to you in this respect it will be a pleasure to me.

Very truly yours, EGBERT E. HAYS,
Yale, Okla., Box 291.

FLETCHER O'DELL PLEDGER POST, No. 88, AMERICAN LEGION,
Norman, Okla., December 28, 1927.

Hon. F. B. SWANK,
Washington, D. C.

DEAR MR. SWANK: At the regular meeting of Post No. 88, December 22, H. R. 347, introduced in the House of Representatives December 5 by you, was taken up and discussed. The sentiment of the service men in this post was that the amendment should be enacted immediately. A resolution was passed indorsing your amendment and authorizing the post officers to offer you any assistance which we might be able to give in gathering data or in any other way they might aid you in getting this bill across.

As commander of the Norman Post I wish to take this opportunity to thank you for your tireless effort in behalf of the disabled service

men of our community. We want you to feel that you are entitled to call upon this post at any time for any help we may render you in these matters.

Sincerely,

MILT PHILLIPS,
Post Commander.

THE AMERICAN LEGION, DEPARTMENT OF OKLAHOMA,
Oklahoma City, Okla., December 29, 1927.

Hon. F. B. SWANK,
House of Representatives,
Washington, D. C.

SIR: I certainly appreciate your promptness and interest in behalf of Mr. Hyden. I trust that we will soon be able to have his claim in the pension department adjudicated.

I also want to take this opportunity to thank you for sending a copy of H. R. 347. We heartily indorse this amendment to the World War veterans' act, and want to thank you for your introducing the bill and having it passed the first day of the session of the House of Representatives.

Very truly yours,

C. B. DOLLARHIDE, *Service Officer.*

THE AMERICAN LEGION, OKLAHOMA CITY POST, NO. 35,
Oklahoma City, December 30, 1927.

Hon. F. B. SWANK, M. C.
House of Representatives,
Washington, D. C.

DEAR MR. SWANK: Owing to a mix-up in who was to write to you in regard to the action of our post on your H. R. 347, which was read and approved at our last meeting, I'm not going to wait any longer to give you the information.

The bill was read in the regular procedure of the post meeting, on December 20, and approved by the post; many of us know the import of this bill, and are behind it and you to a man.

Thanking you on behalf of the post and also again for myself, I am

Yours truly,

FRED W. HUNTER.

LEBRON POST, AMERICAN LEGION, NO. 58,
DEPARTMENT OF OKLAHOMA,
Guthrie, December 31, 1927.

Hon. F. B. SWANK,
Member of Congress, House Office Building,
Washington, D. C.

DEAR SIR: I have at hand your good letters of December 17 and December 27 with reference, respectively, to H. R. 347, your bill to amend section 205 of the World War veterans' act of 1924, to give the ex-soldier better advantages with reference to ratings under the act, and to prevent appeals by the central board from the regional office ratings against the desire of the soldier, and to your good work in checking the list of dependents of men who lost their lives in the war, and assisting them to get their adjusted compensation.

I wish to thank you very much for your efforts and interest on behalf of the veterans of the late war, and to assure you that they are appreciated by the members of this post.

Yours very truly,

A. G. C. BIERER, Jr., *Post Commander.*

STILLWATER, OKLA., *January 10, 1928.*

Hon. F. B. SWANK,
Washington, D. C.

DEAR MR. SWANK: I have your letter dated December 17, 1927, relative to changing a soldier's rating by the regional office.

The above-mentioned matter was referred to the American Legion of Stillwater on January 5, which was the first meeting since I received your letter, with an attendance at that meeting of about 80 members. They voted unanimously to indorse the bill which you presented.

The above-mentioned bill has been referred to the legislative committee of the American Legion and you will soon receive the expression of the Legion through them.

Yours very truly,

CECIL G. JONES.

STILLWATER, OKLA., *January 11, 1928.*

Hon. F. B. SWANK,
Representative fifth district Oklahoma, Washington, D. C.:

Carter C. Hanner Post, No. 129, indorses House bill 347 and recommends its passage.

HUGH J. NESTER, *Adjutant.*

Mr. SANDLIN. Mr. Chairman, I yield 20 minutes to the gentleman from Tennessee [Mr. DAVIS].

Mr. DAVIS. Mr. Chairman, I shall be unable to say all I want to say and quote all the documents that I have, and I ask unanimous consent to extend my remarks in the RECORD by incorporating in these remarks some tables and statistics of broadcasting institutions, some Supreme Court decisions, and a few official letters.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by incorporating certain Supreme Court decisions, letters and statements from officials, and extracts from other sources, as well as tables. Is there objection?

There was no objection.

Mr. DAVIS. Mr. Chairman, radio is now a very important problem, and in which there is a very wide general interest. The public is especially interested in radiobroadcasting. There are millions of owners of radio receiving sets. It is estimated that approximately half a billion dollars is spent annually in this country for radio apparatus.

The first measure dealing with this subject was enacted by the Congress in 1912. Radio was then in its infancy, and there has been a tremendous development since that time. The need of new legislation on the subject was apparent, and various efforts to enact additional legislation were made during the past several Congresses. Prior to the last Congress the Committee on the Merchant Marine and Fisheries of the House had prepared and voted out several bills, one of which passed the House; but all of those attempts at general legislation were thwarted by the opposition and activities of the radio monopoly. During the last Congress the House and the Senate passed different radio bills, both of which went to conference. There finally emerged from conference a bill different in many respects from both the House and Senate bills, and the conference report bill was finally adopted after much opposition and approved. It was the only bill of a general nature which had the approval of the radio monopoly. Subsequent events have vindicated my criticism of features of that bill and my predictions as to what would result. My apprehension was increased when the personnel of the commission created by the act was announced.

The act created a commission of five members, one of whom should be an actual bona fide resident of each of the five zones established by this act. The act provided that this commission during the first year after their appointment should have original jurisdiction in granting or refusing licenses, assigning wave lengths and station power, the authority to revoke licenses under certain conditions, and so forth. The act further provided that during such year the commissioners should receive an annual salary of $10,000 each. The act also provides that from and after one year all the powers and authority vested in the commission, except as to revocation of licenses, shall be vested in and exercised by the Secretary of Commerce; except that it is made the duty of the Secretary of Commerce to refer to the commission for its action any application for a license or renewal or modification, as to which a dispute, controversy, or conflict arises, and any aggrieved party may appeal from a decision of the Secretary of Commerce.

Furthermore, the act provides that "the Secretary may refer to the commission at any time any matter the determination of which is vested in him by the terms of this act."

The commission is given power and jurisdiction to act upon and determine any and all matters thus referred or appealed to it.

Two of the nominees for places on the Federal Radio Commission were confirmed by the Senate, but the Senate failed to confirm the other three. After the last Congress adjourned the President reappointed the members of the commission who had not been confirmed, and the commission entered upon the performance of its duties. By reason of deaths and changed personnel and a lack of adequate funds it is conceded that the commission has been handicapped, but this does not afford any justification for affirmative action taken that was not in the public interest. Although Commissioner Caldwell stated at the hearings that he considered that 70 per cent of the work to be accomplished by the commission had been performed, yet this was apparently not the view of the other members of the commission, and it is certainly not the view of the Congress or of the public generally.

A large number do not believe that the commission has improved the situation at all, and many are of the opinion that the work they have done was worse than to have done nothing at all. They have been credited with stopping "wave jumping," which followed in the wake of the court decision which held, in effect, that the Secretary of Commerce possessed but very little authority under the 1912 act, but this result was effected by the act itself.

PENDING BILL

The Senate during the present session passed a bill, S. 2317, amending the radio act of 1927, extending for another year the original jurisdiction of the commission but restricting the period of licenses during that period and also embracing section 4, providing that the term of office of each member of the

commission shall expire on February 23, 1929, and thereafter commissioners shall be appointed for terms as provided in the radio act of 1927.

This Senate bill was referred to the Committee on the Merchant Marine and Fisheries of the House, which committee favorably reported the bill with amendments reducing the period of broadcasting licenses to three months and of other classes of licenses to six months prior to January 1, 1930, and with another amendment striking out said section 4 of the Senate bill, and with another amendment substituting for the second paragraph of section 9 of the existing law a provision designed to insure a fair distribution of broadcasting licenses as follows:

The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

It was recognized that there existed a very unequal and unfair allocation of broadcasting licenses, wave lengths, and station power, and this provision in the act for which this amendment is proposed as a substitute was designed to insure more equitable distribution.

The White radio bill, which was reported by the House committee and was passed by the House, contained a stronger and more definite distribution provision, but, like many other provisions in both the House and Senate bills which were designed to protect the public interest, the distribution provision in the House bill was changed and weakened in conference. There had been no criticism whatever of the equitable distribution clause either in the House committee or in the House. However, after the emasculation process was applied in conference, in discussing the conference report in the House on January 29, 1927, I called attention to the significance of the change and that the provision in the conference bill was ambiguous and susceptible of two interpretations. It appeared at the hearings that members of the Radio Commission differed in their interpretation of the clause, and members of the commission suggested that the clause should be clarified and made unambiguous.

As a matter of fact, the Radio Commission has utterly disregarded the equitable distribution clause in the existing law under either interpretation thereof.

The proposed amendment is clear enough that it can not be misconstrued, misunderstood, or disregarded by the commission unless they are disposed to violate an unequivocal provision of the law which they are sworn to administer. The amendment is intended to insure an equal distribution as between the zones and a fair and equitable distribution as between the different States and communities within each zone. An equal distribution as between the different zones is entirely fair, as the first four zones are substantially equal in population, and the fifth zone, while considerably smaller in population, is so much larger in area that it is considered that it should be placed on the same basis as the other zones. As the States and other subdivisions and cities in each zone vary so in population and area, it is considered proper that there should be a fair and equitable allocation among them.

Of course, it is not expected that this result can be effected immediately, but that it can be worked out in the course of a reasonable time. Furthermore, of course, this provision would necessarily be administered in the light of the other provisions in the act, including the provision in the same section immediately preceding, which is as follows:

The licensing authority, if public convenience, interest, or necessity will be served thereby, subject to the limitations of this act, shall grant any applicant therefor a station license provided for by this act.

In order that the present unfair and discriminatory allocation may be understood, attention is called to the following:

Analysis of broadcasting licenses by zones

	Population	Population, per cent	Area, square miles	Area, per cent	Number of stations	Total station power in watts	Per cent of station power	Stations with over 1,000 watts	Per cent of receiving sets
Zone 1	24,378,131	22.73	129,769	3.63	138	223,305	36.98	12	24.20
Zone 2	24,337,341	22.69	247,517	6.93	115	106,805	17.68	7	21.04
Zone 3	24,826,050	23.14	761,895	21.33	102	47,105	7.80	4	15.97
Zone 4	24,492,986	22.83	658,148	18.42	215	164,870	27.30	26	25.01
Zone 5	9,213,720	8.59	1,774,447	49.68	131	61,785	10.24	8	13.11
Total	107,248,228	100	3,571,776	100	701	603,870	100	57	100

These figures are based on the January set-up, since which there have been a number of changes of a minor nature, as such changes are taking place all the time; but such changes will not materially affect the comparative figures, so that these statistics are substantially correct.

The gentleman from New York [Mr. CELLER] made a speech on the floor the other day, in which he stated that he was just advised by the Radio Commission that there are now 680 radio stations; it is a fact that a number of small stations have either not applied for renewal of licenses or been denied renewals, but they are unimportant and the changes effected by them in the aggregate are relatively unimportant. Mr. CELLER also took the position that in view of the fact that 126 stations split time that half that number should be eliminated from the calculation. There is no logic in that insistence as we are dealing with outstanding broadcasting station licenses. The fact that 126 stations are required to split time only serves to accentuate my insistence that a comparatively few stations are given desirable wave lengths and power, and that a large number of other stations are not given proper consideration. However, following Mr. CELLER's line of argument, and considering the table given by him, the discrimination is just as apparent.

Below is the table given by Mr. CELLER, together with the percentages of population and power which I have added, based upon his figures:

Zone	Average population	Population per cent	Number of stations	Power in watts	Percentage of power
First	23,000,000	21.65	95	202,400	36.75
Second	24,000,000	22.6	93	103,700	18.82
Third	25,000,000	23.54	88	45,570	8.27
Fourth	25,000,000	23.54	166	139,000	25.22
Fifth	9,213,920	8.67	112	60,620	11
Total	106,213,920	100	554	551,000	100

The population figures furnished by me are exactly as given in the official census of 1920; Mr. CELLER is less accurate in that in most instances he gives round numbers, and furthermore he made a mistake of 1,213,920 in his addition, which I have corrected.

The gentleman from New York [Mr. CELLER] states that, in rough figures, the radio population of zone 1 is just under 50 per cent greater than the radio population of the third zone, whereas the figures of receiving sets which he himself inserts in the RECORD are that the number in the first zone are 1,144,100, whereas the receiving sets in the third zone are 1,037,950.

I shall insert in the RECORD as an exhibit to my speech the estimated number of receiving sets in the different radio zones and States. These estimates were made by a reliable radio magazine, as of January 1, 1927; I have been unable to locate a later estimate.

There are many other inaccuracies and specious arguments in the remarks of the gentleman from New York [Mr. CELLER], which I shall not take time to point out.

The following are statistics giving:

Broadcasting stations by zones and States

First zone	Population	Stations	Total station power in watts	Stations with over 1,000 watts
Maine	768,014	3	850	
New Hampshire	443,083	3	650

[1] Members of National Broadcasting Co. chain.

The foregoing statistics are likewise based upon the January set-up, since which there have been some changes which will cause but slight change in the final results, and particularly from a comparative standpoint. I have undertaken to keep up with all important changes and to correct these figures accordingly, and do not think that I have overlooked any important change.

RADIO MONOPOLY

In order to obtain a correct picture of the situation and to understand the source of the opposition to the proposed distribution clause, it is necessary to call attention to the radio monopoly.

The Committee on the Merchant Marine and Fisheries on February 22, 1923, unanimously reported a resolution requesting the Federal Trade Commission to investigate and report to the House of Representatives the facts relating to the alleged radio monopoly. This resolution was called up under a unanimous-consent request and adopted by the House without opposition March 3, 1923.

The Federal Trade Commission conducted the investigation and made its report December 1, 1923. This report, together with the appendix, contains 347 pages. I respectfully urge Members of Congress to read said report.

The Federal Trade Commission, under its own motion, filed a complaint, commencing and concluding as follows:

APPENDIX

United States of America, before Federal Trade Commission. In the matter of General Electric Co., American Telephone & Telegraph Co., Western Electric Co. (Inc.), Westinghouse Electric & Manufacturing Co., the International Radio Telegraph Co., United Fruit Co., Wireless Specialty Apparatus Co., and Radio Corporation of America, Docket No. 1115.

COMPLAINT

Acting in the public interest, pursuant to the provisions of an act of Congress approved September 26, 1914, entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," the Federal Trade Commission charges that the various persons, corporate and individual, mentioned in the caption hereof, and more particularly hereinafter described and hereinafter referred to as respondents, have been and are using unfair methods of competition in commerce in violation of the provisions of section 5 of said act, and states its charges in that respect as follows:

Then follows detailed charges of the specific written contracts entered into between these different defendants and the manner in which they are violating the laws.

The complaint concludes as follows:

PAR. 30. By reason of the facts and acts of the respondents set forth in the preceding paragraphs Nos. 8 to 29, inclusive, the respondents have combined and conspired for the purpose and with the effect of restraining competition and creating a monopoly in the manufacture, purchase, and sale, in interstate commerce, of radio devices and apparatus, and other electrical devices and apparatus, and in domestic and transoceanic radio communication and broadcasting by the following means:

(1) Acquiring collectively, directly and indirectly, patents and patent rights covering all devices and apparatus known to and used in any and all branches of the practice of the art of radio, and combining and pooling, by assignment and licensing, rights thereunder to manufacture and use and/or sell such devices and apparatus, competing and noncompeting, and allotting certain of such rights exclusively to certain respondents.

(2) Granting to the Radio Corporation of America the exclusive right to sell such devices and apparatus manufactured under said patents and patent rights and restricting purchases by the Radio Corporation of America of devices and apparatus useful in the art of radio to certain respondents and apportioning such purchases among them.

(3) Restricting the competition of certain respondents in the respective fields of manufacture and commerce of other respondents.

(4) Attempting to restrict and restricting the use of radio communication and/or broadcasting of articles manufactured and sold under said patents and patent rights.

(5) Acquiring the equipment heretofore existing in this country essential for transoceanic radio communication and perpetuating the monopoly thereof by refusing to supply to others apparatus and devices necessary for the equipment and operation of such service.

(6) Entering into exclusive contracts and preferential agreements for the handling of transoceanic radio traffic and the transmission of radio messages in this country, thereby excluding others from the necessary facilities for the transmission of radio traffic.

(7) Agreeing and contracting among themselves to cooperate in the development of new inventions relating to radio and to exchange patents covering the results of the research and experiment of their employees in the art of radio, including patents on inventions and devices which they may obtain in the future, seeking thereby to perpetuate their control and monopoly of the various means of radio communication and broadcasting beyond the time covered by existing patents owned by them or under which they are licensed.

PAR. 31. The above alleged acts and practices of respondents are all to the prejudice of the public and of respondents' competitors and constitute unfair methods of competition in commerce within the intent and meaning of section 5 of an act of Congress entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914.

Wherefore, the premises considered, the Federal Trade Commission, on this 24th day of January, A. D. 1924, now here issues this its complaint against said respondents:

The Federal Trade Commission includes in the appendix to said report numerous admitted written contracts entered into between the different members of the monopoly. I do not see how it is possible for any lawyer to read those contracts and reach any other conclusion than that on their face they violate the Sherman and Clayton Anti-trust Laws and the Federal Trade Commission act.

I regret to state that this complaint has not yet been heard by the Federal Trade Commission. It was a considerable time before the pleadings were made up, and they have not yet completed the taking of proof.

The market assets of these members of the Radio Trust aggregate about $5,000,000,000, including the subsidiaries of the American Telephone & Telegraph Co. The recent annual report of the latter company shows it to be the largest concern in the world. The radio monopoly is doubtless the largest and most effective monopoly in the world. It dominates and controls every phase of the radio industry. I shall later refer to some of its activities and unfair methods. For the present I shall call attention to its dominance of communicative service.

As evidence of the "strangle hold" which the radio monopoly has in the broadcasting and commercial radio field I call attention to the following facts, which constitute a résumé of official data filed by the Federal Radio Commission at recent committee hearings, as follows:

MONOPOLY BROADCASTING STATIONS

The Westinghouse Electric & Manufacturing Co. has five broadcasting licenses, with 70,500-watt power.

The General Electric Co. has three broadcasting licenses, with 57,500-watt power.

The Radio Corporation of America has three broadcasting licenses, with 31,000-watt power.

The National Broadcasting Co. (owned by the Radio Corporation of America, the General Electric Co., and Westinghouse Co.) has two broadcasting licenses, with 55,000-watt power.

This makes a total station power of 213,000 watts, as compared with 390,660-watt power granted the remaining 687 broadcasting stations.

Nine of these monopoly stations, with a total watt power of 206,500, are on the 25 cleared channels.

Three of these monopoly stations, with 50,000-watt power each, one with 30,000, and one with 15,000-watt power are on the cleared channels.

The Federal Radio Commission has "cleared" 25 channels or wave lengths between 600 and 1,000 kilocycles, or between 499.7 and 299.8 meters. Wave lengths within this range are decidedly the most valuable for broadcasting.

Chain stations, including the nine monopoly stations just mentioned, are placed on 24 of these cleared channels. Thirty-one of the National Broadcasting Co. chain stations are placed on these cleared channels. The stations on these 25 cleared channels are licensed to use a total of 323,700-watt power, as compared to a total of 279,920-watt power granted to the 623 other stations which are crowded together on the remaining 64 less valuable wave lengths available for broadcasting. It will thus be seen that there are an average of more than 9½ of these latter stations on a wave length.

A broadcasting license may be worthless, as most of them are. The usefulness and value of a broadcasting license depends upon the wave length, and as to whether the licensee has an exclusive or substantially exclusive wave length or is placed on the same wave length with numerous other stations, and as to the amount of station power authorized to be used.

COMMERCIAL RADIO STATION LICENSES

While the general public is more interested in broadcasting than any other phase of radio, yet there are other features, uses, and potentialities that are very much more valuable than broadcasting. In this field there has been even a greater discrimination and favoritism to the monopoly than in the broadcasting field, if that be possible.

For instance, the Radio Corporation of America has 56 station licenses, 72 calls, and 132 wave lengths, with an aggregate of 4,226,950-watt station power; 13 of these stations are each authorized to employ 200,000-watt power.

The Westinghouse, General Electric, American Telephone & Telegraph Co., and Tropical Radio Telegraph Co. have 16 commercial stations authorized to use 41 wave lengths and 188,000-watt power.

The total power granted all other commercial radio stations combined amounts to only 674,387 watts.

It will be noted that the Radio Corporation of America is granted more than seven times as much station power as all the stations combined, exclusive of monopoly stations.

With the exception of the Mackay Radio & Telegraph Co., no other commercial station other than the monopoly stations is granted more

than 5,000-watt power. The Mackay company has one station authorized to use 125,000 watts, one 75,000 watts, two 30,000 watts, and some stations authorized to use lesser power. The Mackay company has, all told, 10 licensed stations.

Excluding the monopoly companies and the Mackay company, there are no stations authorized to use over 5,000 watts and only eight authorized to use this much power, they being chiefly packers' stations in Alaska. An interesting feature is that there are 102 licensed commercial stations in Alaska, chiefly packers and canners.

Competitors of the Radio Corporation of America are begging for more commercial licenses, wave lengths, and power.

And yet the different branches of the Government are unable to procure the allocation of as many radio wave lengths as they consider they need, with the result that a fight has developed in the interdepartmental radio committee between the Army and the Navy over the division of the comparatively small number of wave lengths allocated for Government use.

EXPERIMENTAL STATIONS

According to data furnished by the Federal Radio Commission at the committee hearings, as of February 1, 1928, the monopoly stations have been favored in this field as follows:

The Radio Corporation of America has 17 stations licensed to use wide ranges of wave lengths covering the entire range and a total of 404,100-watt station power; has 2 stations licensed to employ wide ranges of wave lengths and to use unrestricted power.

The Westinghouse Electric & Manufacturing Co. has two stations licensed to use variable wave lengths and 50,500-watt power and 6 stations authorized to use variable wave lengths and unrestricted power.

The General Electric Co. has 15 stations authorized to use wide ranges of wave lengths and a total of 380,250-watt power and one station authorized to use a wide range of wave lengths and unrestricted station power.

The American Telephone & Telegraph Co. has 5 stations authorized to use wide ranges of wave lengths with 180,700-watt power; 2 stations with unrestricted wave lengths and 50,500-watt power; 1 station with wave length of 500 to 300 meters and unrestricted power; 1 station with unrestricted wave length and unrestricted power.

The Tropical Radio Telegraph Co. has 6 stations licensed to use unrestricted wave lengths and unrestricted power.

It is thus seen that these five monopoly companies have 41 stations authorized to use wide ranges of wave lengths and to employ a total of 1,072,550-watt station power; and 4 stations authorized to use wide ranges of wave lengths and unrestricted power; and 13 stations authorized to use unrestricted wave lengths and unrestricted station power; making a total of 58 stations. On the other hand, all other experimental stations licensed by the Federal Radio Commission are as follows:

Ninety-three stations authorized to use either specific or varying wave lengths and 114,380-watt station power; 21 stations with assigned wave lengths and unrestricted station power; 6 stations with unrestricted wave lengths and unrestricted station power; making a total of 120 stations.

These experimental stations are authorized to use wave lengths ranging from 1 meter to 15,000 meters; numerous stations are authorized to use the meter range assigned for broadcasting, 200 to 550 meters. Naturally they will conflict and interfere with broadcasting stations.

Mr. McREYNOLDS. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. Yes.

Mr. McREYNOLDS. Where are those unrestricted stations located?

Mr. DAVIS. At various places, particularly in the East. Naturally the Radio Trust is satisfied with the situation. The Radio Commission has given them the cream. It has favored them beyond measure. Consequently, as has always been their policy, the monopoly is opposed to any legislation which may result in breaking their strangle hold on the radio industry. They have all the high-powered stations and do not want independent stations to have any such licenses.

MONOPOLY OPPOSING EQUALIZATION CLAUSE

Wherefore, when the House committee reports a bill containing a provision designed to insure a fair equalization of broadcasting licenses, wave lengths, and power among the different zones throughout the country, the radio monopoly immediately gets very busy. Their lobbyists are infesting Capitol Hill. Their propagandists have been busily at work. Their faithful ally, Commissioner Caldwell, gave out a statement which misrepresented the purposes and effects of the equalization amendment. He gave figures and conclusions based upon an absolutely false premise. He arrogantly and intemperately criticized the committee and the Congress. I gave out a statement exposing the fallacies and misstatements in his unfair and abusive statement. Senator DILL inserted my reply in the CONGRESSIONAL RECORD, which appears on page 4011 of the RECORD of March 1.

Caldwell's criticism of Congress and pending legislation is, to say the least of it, extraordinary and a breach of propriety. In the conduct of his propaganda operations, he sent to the radio stations in the first zone the following communication:

RADIO STATIONS, FIRST ZONE

If you have followed newspaper reports of the recent discussions in the committees of Congress charged with radio legislation, you have undoubtedly detected both (1) a very evident dissatisfaction with the present distribution of radio stations, powers, and frequencies throughout the various States, and (2) a demand for these to be more "equitably" divided as between States.

In view of the fact that at present a very few States and metropolitan communities have a high concentration of radio, while nearly 40 other States are far below the average of the country, it is apparent that any redistribution in accordance with the "State rights" views of Congress must mean withdrawal of many wave lengths from centers and States now having an excessive proportion, as well as reduction of powers in such communities also.

Since such redistribution will be chiefly at the expense of the congested first-zone area (which now has by far the greatest power, and also certain excessive channel concentrations), I feel it my duty to call this impending situation to your attention at this time in order that you may duly regard it in your future plans for operation.

O. H. CALDWELL, *Commissioner.*

This letter admits our contention as to the present unfair allocation, and at the same time it is very evidently intended to arouse opposition to the pending provision on the part of the radio stations in the first zone.

Then L. S. Baker, managing director of the National Association of Broadcasters (Inc.), who always works for and with the monopoly on radio legislation, sent out communications to stations throughout the country grossly misrepresenting the facts, and unjustly and abusively criticizing the committee which reported the bill containing the provision under discussion.

The first statement in Baker's communication is as follows:

Besides unjustly and unfairly disregarding the request of others to be heard on the subject of amendments to the radio law beyond the extension of the life of the commission, the House Merchant Marine and Fisheries Committee with utter disregard for all known radio principles has favorably reported a proposal which, if it became law and was enforced by the Radio Commission under present conditions, would render useless or obsolete practically one-third of the radio sets of the country, or approximately $230,000,000 worth of equipment purchased by listeners.

This entire statement is absolutely and unqualifiedly false. The reverse is true.

He charges the House committee with "complete ignorance" and talks of a "legislative brain storm." He tries to camouflage his efforts in behalf of the radio monopoly by pretending concern for radio listeners. He concludes his infamous statement as follows:

Again if, through neglect, Congress fails to extend the life of the commission with full and constituted authority and adequate appropriation as provided for in the radio act of 1927, with confusion resulting because of a transfer of this authority from the commission to the Department of Commerce, when the job is only half done, one of the greatest crimes of the entire history of democratic representation in government, affecting millions of people, will have been perpetrated by those who are supposed to represent and protect the people's interest.

As evidence of the insincerity and duplicity of Baker and those he is serving, attention is called to the fact that he and the remainder of the radio monopoly and their allies were originally opposed to a radio commission, insisting that full authority should be left in the Department of Commerce. After the Senate had passed a bill conferring exclusive jurisdiction over radio in a commission authorized to act full time upon annual salaries, and the House had passed a bill continuing jurisdiction in the Secretary of Commerce, but creating a commission with authority to hear appeals from the Secretary, and both bills had gone to conference, this self-same Baker, along with others who are now fighting this equalization provision, sent communications to the conferees, which declared, in part, as follows:

The committee, eliminating all considerations except those of the good of the radio listeners and the industry, and the existing subject matter in the Senate and House bills, favors a control consisting of two bodies, a Federal Radio Commission and the Department of Commerce, whose functions shall be as determined in the House bill.

And yet, "if through neglect the Congress fails to extend the life of the commission with full and constituted authority," such as it possessed during the first year, and should, on the other hand, permit the initial authority to vest in the Secretary of Commerce, as Baker and his crowd insisted in Decem-

ber, 1926, should be done, he and his association state in their propaganda that "one of the greatest crimes of the entire history of democratic representation in government, affecting millions of people, will have been perpetrated by those who are supposed to represent and protect the people's interest."

Is it possible that such vicious and unconscionable assaults upon Congress as this and such misrepresentation of facts can deter the Members of Congress from performing their duty to protect the public from the machinations of the radio monopoly?

CLAIM OF VESTED RIGHTS

The arguments of Caldwell, Baker, and other defenders of the radio monopoly and their methods are also predicated upon the doctrine of "vested rights" in the air, which we emphatically deny to exist, and which are denied and guarded against in the radio act of 1927, although the provisions guarding against the acquirement of vested rights were weakened in conference. Caldwell made a spirited defense of the monopoly at the hearings, referring to their benevolent (?) work. They talk about the investments in broadcasting apparatus which would be destroyed by this equalization clause. In the first place, such property would not be destroyed. In the second place, no broadcaster has ever received a broadcasting license for a longer period than 90 days, so that he went into the business with his eyes open, and consequently acquired no vested rights. In the third place, the investments of the radio monopoly in broadcasting apparatus certainly can not mean more to them than the amounts which the hundreds of independent broadcasters have invested in broadcasting apparatus which they had to purchase from the monopoly. Under the present set-up these investments of hundreds of independent broadcasters are practically useless and valueless. Are they not entitled to quite as much consideration as the monopoly from a property standpoint? However, it is certainly the spirit of the radio act that the interests of the listeners should be first considered. The investments in broadcasting apparatus are small indeed compared to the investment of the citizens in receiving sets. Under the present situation a vast number of receiving sets are either useless or practically so.

PURPOSE AND EFFECT OF EQUALIZATION AMENDMENT

The purpose and effect of this amendment would not be to destroy but to improve the general situation. Under the present situation there exists a gross and unfair discrimination against the second, third, and fifth zones and against the citizens of nearly all of the States. Caldwell states: "Nearly 40 States are far below the average of the country." Statistics show even a larger number than that.

We insist upon a fair distribution throughout the country of licenses, wave lengths, and power. We insist that it is unfair for all of the high station power to be given to a few monopoly stations within a small area in the East. If such power is necessary to constitute a national station, why are not the Middle West, the West, the Southwest, and the South entitled to their fair quota of national stations? Are a few monopoly-owned stations to be the only ones with a national audience? Although there are three monopoly stations in the East with 50,000-watt power each, one with 30,000 and one with 15,000-watt power, yet west and south of Pittsburgh there is but one station with as much as 15,000-watt power (WLIB, owned by Liberty Weekly (Inc.), Elgin, Ill.); and within that immense area south and west of Pittsburgh there is only one other station with as much as 10,000-watt power.

Even within the first zone there exists a very unfair allocation. For instance, the six New England States have 30 per cent of the population and 31 per cent of the receiving sets in the first zone, and yet have only 8½ per cent of station power granted in the first zone; more than half of the station power granted in New England is given to one monopoly station. Substantially the same situation obtains with respect to all the other States in the first zone except New York, which has only 43 per cent of the population and 45 per cent of the receiving sets, and yet has over 72 per cent of power in the first zone.

We deny and resent the insistence that no worth-while program can come out of any except a monopoly station or a New York station. The fact of the business is that, with the exception of a semioccasional high-class program, the average advertising programs of the big monopoly stations are no better than, and in many instances not as good as, the average nightly program of numerous other stations. Furthermore, not everybody is interested in their customary advertising programs, and those who do like to hear the programs from those stations at times do not want to be compelled to listen to them to the exclusion of all other programs from worthy stations located elsewhere.

We want broadcasting licenses fairly distributed in such a manner that those who desire to do so may listen to the New York and chain stations when they want to, but may, when they so desire, listen to programs broadcast by stations elsewhere throughout the country, including their own zones, States, and cities. Most people naturally desire a variety of programs. Many mature thinking people are not as much interested in jazz, grand opera, or any other music as they are in listening to addresses, sermons, convention proceedings, agricultural and home economic information, and various other matters of sectional or State interest. Under the present situation, generally speaking, the reception of such programs is either impossible or unsatisfactory because of the fact that the stations are so crowded together on the same wave lengths that there is inevitable confusion and heterodyning; and in many other instances there is a lack of adequate station power.

A fair equalization of licenses, wave lengths, and power would not necessarily be effected by a reduction of the most-favored zones to that of the least-favored zones, as falsely insisted by Caldwell and other opponents of this distribution amendment. Such course would be exceedingly unwise and no sensible commission would pursue such course. Under the plain provisions of the amendment the equalization could be brought about by bringing the less-favored zones up to the more favored, or by both increases and reductions. As a matter of fact, the members of the Radio Commission have repeatedly stated that there should be a reduction in the congested areas. Such reduction would be beneficial rather than detrimental to the listeners in such congested areas. As it is, the air is so cluttered up by broadcasting from numerous stations within congested areas that local reception is frequently very unsatisfactory and listeners in those congested areas state that ordinarily they can not satisfactorily hear the programs of any except a very few of their stations. Furthermore, they complain that they are unable to receive programs from other sections of the country.

We want to hear New York at times, but we should also like for those citizens in New York who desire to do so to have the privilege of hearing our stations. New York is a great city, but not all of the good things come out of New York. I have a letter from a New Jersey club in which they enumerate various independent stations throughout the country which give most entertaining programs. The letter states in part:

> There is a wide difference of opinion as to what constitutes the best program. Those originating in WEAF and WJZ (New York monopoly stations) are very good, but rarely have any novelty about them. Take your own State stations WSM; I'll bet that they and WLS have a larger "air audience" on Saturday nights than any two other 5,000-watt stations in the country. Their programs are so different from what we hear from the NBC studios that I know hundreds of fans who regularly tune in for them every Saturday night.

The same letter also highly compliments station WEEI, Boston, but complains that it only has 500-watt power on a shared wave length, and that its programs are smeared unmercifully.

This letter is typical of numerous other letters I have received.

A fair distribution of broadcasting licenses will render all receiving sets much more useful and satisfactory than at present. It will likewise render all broadcasting apparatus and stations more useful and valuable with the possible exception of a few of the very high-powered monopoly stations. If they are rendered less valuable to their owners it will be for no other reason than that they will have competition in the broadcasting field which they substantially dominate under the present set-up. That is naturally undesirable from their own selfish standpoint, but is it undesirable from the standpoint of the general public?

FAVORITISM TO STATIONS OPERATING FOR A PROFIT AND DISCRIMINATION AGAINST WORTHY CLASSES OF STATIONS

There has not only been discrimination against various sections and most of the States but there has also been discrimination against certain classes of stations, chiefly educational institutions and other high types of noncommercial stations. There has been especial discrimination in favor of advertising stations. The large monopoly stations broadcasting advertising programs are being especially favored. As bearing upon this subject, I beg to quote from the recent hearings before the Committee on the Merchant Marine and Fisheries on the pending bill:

> Mr. DAVIS. In other words, as I understand, you recognize the fact that there is a useful and proper place not only for what might be termed national stations but for regional stations and State stations and purely local stations; is that correct?
>
> Commissioner PICKARD. Yes, sir.
>
> Mr. DAVIS. And you think proper provision should be made for all of them?
>
> Commissioner PICKARD. Yes, sir.
>
> Mr. DAVIS. You were formerly with the Kansas Agricultural College, were you not?

Commissioner PICKARD. Yes, sir.

Mr. DAVIS. And then you were in the Department of Agriculture at the head of the agricultural radio service?

Commissioner PICKARD. That is right, sir.

Mr. DAVIS. I assume, then, you realize the very useful service that is being rendered and is susceptible of being rendered the public by universities and particularly agricultural stations?

Commissioner PICKARD. Indeed I do.

Mr. DAVIS. In that connection I wish to call attention to the fact that at the Fourth National Radio Conference held in Washington in 1926, at which were in attendance leading representatives of radio broadcasters and of radio commercial services, dealers, the various Government departments interested in radio, together with inventors and various other representatives of the radio industry, committee No. 1, which was appointed by Secretary Hoover, who was president of the convention, was a committee of 32 members of the conference appointed to study and make a report on the allocation of frequencies of wave lengths. The chairman of that committee was Dr. J. H. Dallinger; the secretary was Col. J. F. Dillon, formerly a member of this commission; and among others on that committee were H. A. Bellows, who was formerly a member of the commission; H. P. Maxim, president of the amateur association, known, I believe——

The CHAIRMAN. That is known as the American Relay League.

Mr. DAVIS. Also Mr. M. Goldsmith, an engineer and vice president of the Radio Corporation of America, and various others. This committee made a unanimous report, which was adopted without controversy by the convention, and a part of that report states as follows:

"The committee recommends affirmative action by the conference on the resolution quoted in Appendix A, submitted by the Department of Agriculture, for provision for adequate broadcast and dissemination of agricultural educational information.

"Now, this Appendix A, which, as I recall, was the only resolution presented with any report having a direct reference to specific legislation, is as follows:

"Whereas the Federal Government, through the United States Department of Agriculture and the State governments through State universities, agricultural colleges, and departments of agriculture, are conducting public extension services in the distribution of material of an educational, informative, and economic character;

"Whereas the United States Congress and the State legislatures have provided for these services through appropriations approximating more than $100,000,000 annually, of which $70,000,000 is for agricultural support and equipment of the colleges and universities; $9,000,000 for experiment stations, and $23,000,000 for services and research by the Federal Department of Agriculture, in addition to hundreds of millions of dollars in permanent equipment;

"Whereas the distribution of the information gathered by these agencies to the public, particularly the rural districts, is a matter of national importance;

"Whereas radiobroadcasting presents the most satisfactory and economical method of reaching the public with this important information and of making effective the public investment in these agencies;

"Whereas these institutions have immediately at hand among the regular staffs abundant material for educational and public-service programs with practically no additional cost: Be it

"*Resolved*, (1) That full recognition should be given by the Department of Commerce to the needs of these services, and (2) that adequate, definite, and specific provision should be made for these services within the broadcasting band of frequencies."

Mr. DAVIS. Are you in accord with the expressions contained in that resolution?

Commissioner PICKARD. Yes, sir.

There will also be found as an exhibit to my speech a letter of January 11, 1927, from the Association of College and University Broadcasting Stations, which consists of 42 members.

And yet so little consideration has still been shown these State agricultural colleges and other agricultural institutions that on October 24, 1927, Secretary of Agriculture Jardine addressed a letter to the Federal Radio Commission calling attention to the splendid and valuable service being rendered by such stations, and asking for protection and consideration in the broadcasting field.

I quote from the said hearings further:

Mr. DAVIS. You take a State like Kansas, for instance. How much power would you say your State agricultural station would need to reach all the farmers and housewives of that State consistently?

Commissioner PICKARD. In bad weather, in bad reception weather, it would need from 5,000 to 10,000 watts to do the job. I have encouraged them to go to more power. They should have it, especially for the daylight work. I would like to point out to you, Judge Davis, that most colleges stress the daytime operation. They feel they have less competition from other stations and less interference and that more effective work can be done in the daytime.

Mr. DAVIS. These college stations are some of the stations which are broadcasting not for profit?

Commissioner PICKARD. That is right, sir.

Mr. DAVIS. But simply for public service. Is that not so?

Commissioner PICKARD. That is right; yes, sir.

Mr. DAVIS. And as indicated in this resolution, and as a matter of common knowledge, both the National Government and the various State governments and the various counties and municipalities are annually appropriating enormous sums of money to educate the youth of the country as well as to furnish information to the adults. That is true, is it not?

Commissioner PICKARD. Yes, sir.

Mr. DAVIS. I will ask you if some responsibility does not rest upon the Government and upon the representatives of the Government with respect to broadcasting, to undertake to cultivate a taste for things worth while, rather than yield to so large an extent to the desire on the part of youth for jazz music and things of that sort?

Commissioner PICKARD. Yes; I think you are entirely right, Judge Davis.

Mr. DAVIS. But at the same time, nearly all of the valuable wave lengths are given to stations which devote a large part of their program to jazz and popular music, in which a great many people are not interested at all; is not that true?

Commissioner PICKARD. I believe the program directors have tried to give their listeners what they want; I think that is an answer to your question.

Mr. DAVIS. I will say I do not think they have done it, though.

Commissioner PICKARD. I am not sure, either.

Mr. DAVIS. I think they have lacked a whole lot of doing it. I think they have given entirely too much recognition to that portion of our population which wants that character of programs and have overlooked the fact that more mature people and more serious-minded people, who perhaps are not as prone to give expression to their views by writing letters and such things as that, do not care for that but do care for things that are more worth while.

Commissioner PICKARD. Yes; I think your deduction is a correct one.

COMMISSION'S EXCUSE FOR NOT MAKING MORE EQUAL DISTRIBUTION

The chief excuse of the commission for not making a more equitable distribution of broadcasting licenses, wave lengths, and power has been that there was no demand for same in the zones and States below their quota.

Speaking with particular reference to the situation in the third, or southern zone, Admiral Bullard, former chairman of the Federal Radio Commission, stated last August:

It is a fact that the Southern States are not particularly well represented in the broadcasting field. But it is also a fact that the commission can not be held responsible for this state of affairs; because, if the people of the South do not want broadcasting stations and do not make applications for them, the commission can not take any action whatsoever.

Then Judge Sykes, when he was on the stand, in discussing this subject, made substantially the same statement; then Commissioner Caldwell made substantially the same statement, and he said, in part, that "Just as far as applications from the South have been made, they have been recognized, etc.

In an effort to defend his failure to protect the interests of his own zone, Commissioner Sykes was willing to reflect on that great section of the country by stating that his section had been backward in the matter.

In this connection, I wish to state that at first I assumed that Commissioner Sykes was naturally desirous of seeing that the intolerable situation in his zone should be improved, and that his desires and efforts were being thwarted by the other members of the commission. However, in the light of his untenable excuse for the South not receiving fair treatment and his rush to the defense of the unconfirmed nominees on the Radio Commission, including Caldwell, urging the Senate to confirm them, I have been compelled to recede from my former opinion. I can not believe that Commissioner Sykes is at heart disloyal to his own section; in my opinion Commissioner Caldwell has dominated the commission and Commissioners Sykes and Pickard have been "me-too" men, not having the courage to vigorously assert their opinions and insist upon fair treatment for the neglected sections of the country. Although Commissioner Lafount has only been on the commission for two months, yet he got busy and induced the commission to make 70 changes in his zone in order to improve the situation therein.

APPLICATIONS FOR LICENSES, BETTER WAVE LENGTHS, AND MORE STATION POWER

In accordance with a request therefor made at the committee hearings, the commission filed a list by zones of applications for new licenses, different wave lengths or more power, together

with action thereon, or the lack of action where such was the case. This information completely refutes the excuse that has been made that better treatment had not been accorded the third zone and other sections because there had been no applications therefor, and that the commission could not initiate applications.

This data in detail appears on pages 41 to 51 of the recent hearings before the Committee on the Merchant Marine and Fisheries of the House, and I invite particular attention to same. However, I wish to give a synopsis of that data as follows:

APPLICATIONS FOR NEW BROADCASTING-STATION LICENSES

FIRST ZONE

One application at Saranac Lake, N. Y., granted for 10 watts.

Nine applications from New York, Massachusetts, New Jersey, and District of Columbia still pending.

SECOND ZONE

Four applications granted for a total of 130-watt power on high kilocycle bands.

Nine applications disapproved.

Ten applications still pending.

THIRD ZONE

Eleven applications approved for a total of 1,145-watt power, all on high kilocycle frequencies.

Commissioners Sykes and Caldwell had much to say about the new licenses they had granted in this zone.

Twenty-six applications still pending.

FOURTH ZONE

Six applications granted for a total of 5,825-watt power, including a 5,000-watt station in Chicago.

The commission has also issued a permit to a company owned or controlled by Samuel Insull to construct a 50,000-watt station with studio in Chicago and transmitter out of the city.

It is stated in the application that this station is to be used by seven designated public utilities. It is also stated that "the policy of this station will be to furnish to the public a service which will foster and promote the cordial relations with the public which the station owners as public utilities now enjoy."

Attention is called to the fact that Chicago is already the most congested area in the country, except New York City. Not counting the Insull station, which is expected to be completed by April 1, Illinois—chiefly Chicago—has more station power than the other nine States in the fourth zone combined.

Thirty-four applications in the fourth zone have been denied, 3 applications in Kansas, 5 in Missouri, 2 in Indiana, 5 in Minnesota, 1 in Wisconsin, 1 in North Dakota, 1 in South Dakota, 4 in Illinois, and 9 in Iowa.

Ten applications for new licenses in the fourth zone are still pending, of which 3 are from Indiana, 2 North Dakota, 1 South Dakota, 1 Kansas, 1 Iowa, and 2 Illinois.

FIFTH ZONE

Six applications granted for a total of 750-watt power, all on high-kilocycle frequencies.

Twenty applications have been disapproved.

Two applications are still pending.

Existing stations that have applied for change in power or wave length and power

GRANTED

	Number stations	Power requested	Power granted
First zone	22	89,655	81,905
Second zone	7	6,350	2,215
Third zone	13	27,550	9,615
Fourth zone	20	141,100	27,065
Fifth zone	15	11,650	6,215

It will be noted that the first zone, which already had much more power than any other zone, was granted decidedly a larger per cent of the amount requested than any other zone. Ten New York stations were granted 60,500 watts of the power granted in the first zone.

Existing stations that have applied for change in power or wave length, which applications are

PENDING

	Number stations	Power requested
First zone	11	15,150
Second zone	5	22,100
Third zone	10	48,500
Fourth zone	15	83,900
Fifth zone	18	20,600

Existing stations that have applied for change in power or wave length, which applications are

DENIED

	Number stations	Power requested
Second zone	1	500
Fourth zone	6	10,000
Fifth zone	5	2,650

INFORMAL APPLICATIONS

The foregoing data with respect to applications only includes formal applications upon regular application forms procured from the commission. In transmitting the lists of applications and action thereon, the Secretary of the Federal Radio Commission wrote to the committee as follows:

> Besides these formal applications requested, the commission has received hundreds of casual or informal inquiries for station licenses, increased power, or channels, each of which has been promptly answered, and the conditions in the broadcasting band carefully explained with the result that no formal application has been filed.

In his speech the other day, instead of taking the magnanimous position that he did not want the radio monopoly or the stations in his city to "hog the air," the gentleman from New York [Mr. CELLER], rehashed the unfair and misleading arguments advanced by the agents of the radio monopoly against a fair distribution of broadcasting licenses. In his belabored effort to show that the third, or southern zone, was not entitled to any more consideration, he quoted some very inaccurate figures as to farmer ownership of receiving sets in that section, which had been palmed off on him by somebody. He otherwise reflected upon the citizenship of that great section. New York is a great city and has as good citizens as may be found anywhere; the same is true with respect to the citizenship in the third zone. We are perfectly willing to compare citizenship with New York City. It is true that we have a considerable number of negroes with us, but they all speak and understand the English language and they are all American citizens and loyal to their country. As a matter of fact, I have some very near and very dear relatives residing in New York City and that constitutes an additional reason why I wish to improve radio reception in that city.

While he has ordinarily taken a contrary position, yet I am surprised that the gentleman from New York is lined up in this instance with the radio monopoly. In the last Congress he made a speech in the House in which he said in part:

> We suffer tremendously in New York by virtue of our inability to control the New York Telephone Co., and this great and mighty combine, the Bell system, stretching all over the territories covered by your constituencies, gentlemen, because of the evils it is guilty of, goes unpunished and uncontrolled. There is no control whatsoever over the telephone companies, and I desire to read you the many companies that enter into this combine. There are, for example, the New England Telephone & Telegraph Co., the Chesapeake & Potomac Telephone Co., the Cumberland Telephone & Telegraph Co., the Illinois Bell Telephone Co., the Ohio Bell Telephone Co., the Wisconsin Telephone Co., the Southern Telephone Co., the Northwestern Bell Telegraph & Telephone Co., the Southwestern Bell Telephone Co., the Mountain States Telephone & Telegraph Co., the Pacific Telephone & Telegraph Co., and with all their ramifications and with all their subsidiary companies they control not only wired and wireless telephonic and telegraphic communication in all its branches, all the basic patents with reference thereto, the manufacture and distribution of all machinery and appliances used by them. They reach out in almost very direction.
>
> The American Telephone & Telegraph Co., with its various subsidiaries and associated companies, constitutes the most gigantic trust in America. Moreover, it has a tighter hold and more direct control over the lives of ordinary people and all phases of business than any other corporation whatsoever.

The gentleman from New York was correct in his characterization of the American Telephone & Telegraph Co., except that it is not the most gigantic trust in America, for the reason that it is only one of the several members of the Radio Trust, and the whole is larger than any of its parts. This shows what we have the fight when we undertake to legislate in the interest of all the people with respect to radio.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. SANDLIN. I yield the gentleman 15 additional minutes.

The CHAIRMAN. The gentleman from Tennessee is recognized for 15 additional minutes.

METHODS OF THE MONOPOLY

Mr. DAVIS. I want to say that this monopoly is no respecter of persons. I want to call your attention to one of the practices of the radio monopoly. You know the great Loyal Order of Moose, which, I believe, was organized by our distinguished Secretary of Labor. The Supreme Lodge of the World, Loyal Order of Moose, have a broadcasting station at Mooseheart, Ill. The call letters of this station, WJJD, are in honor of Secretary of Labor Davis. This station is authorized to use only 1,000 watt power, and divides time with a Chicago station. Having a large membership throughout the country, who are naturally interested in this order and its broadcasting station, they, like numerous other independent stations, have an application on file with the Radio Commission for more power, asking for the privilege of using 20,000 watt power; they have also sought at a public hearing to secure this increased power. However, these applications are still pending. In this connection, do you not think that this splendid order, with its very large membership, was more entitled to a 20,000-watt station than Samuel Insull was entitled to a 50,000-watt station to broadcast propaganda in the interest of his various utilities?

Reverting to the methods of the radio monopoly, I call attention to what has happened to station WJJD, which is typical of what has happened to other independent stations. I shall let this correspondence speak for itself. I read:

DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, February 18, 1928.

Hon. EWIN L. DAVIS,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: Replying to your letter of February 9 with reference to the use of a Western Union wire in the hook up of our radio station at Mooseheart with the Palmer House in Chicago, would say that I took this matter up with our radio manager at Mooseheart and am just in receipt of a reply from him, copy of which I inclose for your information.

I trust this explanation is satisfactory. With kindest regards, I am,

Most cordially yours,

JAMES J. DAVIS.

Here is the letter which he incloses and to which he refers:

LOYAL ORDER OF MOOSE,
Station WJJD, February 16, 1928.

Mr. JAMES J. DAVIS,
United States Secretary of Labor,
Washington, D. C.

DEAR MR. DAVIS: I am returning the letter of Congressman DAVIS regarding the use of Western Union and telephone lines in connection with our broadcasting station, WJJD.

When we connected with the Palmer House in Chicago, necessitating private broadcasting lines in Mooseheart, we procured estimates from the Illinois Bell Telephone Co., also from the Western Union. However, as the telephone company had an installation charge of some $10,000 which was not charged by the Western Union, we contracted for the Western Union lines.

Since that time, however, it has not been possible for us to connect any telephone lines with our Western Union circuits, which has prevented the broadcasting of any chain programs. It seems that the telephone company has a ruling that they will not permit any telephone lines to be connected in any way with Western Union lines, although I understand that the Western Union Co. has no objection to having the telephone lines connected with theirs.

The Western Union lines have proved very satisfactory, although I believe it will be necessary for us to replace them with telephone lines in the operation of our new transmitter, inasmuch as until we have telephone lines we will be prevented from participating in national broadcasting.

Sincerely and fraternally yours,

C. A. HOWELL.

Mr. ABERNETHY. It is a great benevolent order?

Mr. DAVIS. Of course, it is a great benevolent order.

Now, the stranglehold of this Radio Trust is such that if an American citizen or company obtains a license from his or its government to operate under a broadcasting license, that is not all; it must first pay a fee to the American Telephone & Telegraph Co.; in the case of an ordinary station some $2,000 or $3,000; and then they must buy the broadcasting apparatus from the monopoly, and then if they want any chain broadcasting they have got to make a contract for the use of a wire, not with some independent company but with a member of the radio monopoly, the American Telephone & Telegraph Co.

Then, as in the case of the Mooseheart station, before they are given the privilege of paying for radio service over a telephone wire they must make the American Telephone & Telegraph Co., or its subsidiary, a present of $10,000. Unless they comply with the terms of the telephone member of the monopoly the National Broadcasting Co. will not permit the station to receive its chain program. The National Broadcasting Co. was organized and is owned by the Radio Corporation of America, the General Electric Co., and the Westinghouse Electric & Manufacturing Co., all members of the monopoly.

The Radio Trust harasses its competitors in the manufacture of receiving apparatus in various ways. It forced 25 or 30 of the independent manufacturers to enter into written contracts under which it required each of them to pay a royalty of 7½ per cent on the full invoice price of their completed sets and a minimum of $100,000 a year, and also required the independents to buy vacuum tubes from the trust, this practically destroying the business of the independent tube manufacturers.

In the case of Arthur D. Lord, receiver in equity for the DeForest Radio Co. *v.* The Radio Corporation of America (Equity No. 670), in the United States District Court for the District of Delaware, the court on February 6, 1928, enjoined enforcement by the defendant of the contracts for the sale of tubes on the ground that such agreements constituted an unfair method of competition and would be in violation of the Sherman Act and Clayton Act.

In another case, the DeForest Radio Co. brought suit against the Radio Corporation of America in the court of chancery in New Jersey, charging that the defendant for the past two or three years had planted spies in complainant's factory in Jersey City to learn its trade and trade secrets, such spies holding jobs in the complainant's factory and all the while pretending to loyally serve both employers, for pay from each, and seeking to enjoin the Radio Corporation of America to remove the spies, discontinue the practice, and from making use of the information obtained.

The Radio Corporation of America admitted imposing its spies, as employees, on the complainant, but claiming that their purpose was to obtain information to prove that complainant was infringing some of its patented devices; it being specifically claimed by defendant that the complainant was using a certain thoriated wire in violation of what is known as the Langmuir patent, which patent the Radio Corporation was licensed to use, that issue then pending in the court to be determined. In this connection it is interesting to note that the DeForest Radio Co. won their case against the General Electric Co. within the last month in the decision rendered by the United States District Court of Delaware, in which the said Langmuir patent was held to be invalid.

The case relative to the spies was heard by Vice Chancellor Backes, who decided the issues against the Radio Corporation of America, who appealed the case to the Court of Appeals of New Jersey, where said case was heard and the decision of the lower court affirmed by all 15 members of the court of appeals, the opinion of the vice chancellor thus affirmed by the higher court concluding as follows:

I am not at all content with its explanation that the defendant's aim was solely self-protective. I am impressed that it sought a line on all of the complainant's activities, and certainly its orders to the spies were not short of that. Their espionage was general. However that may be, the case, as it stands, convicts the defendant by its confession, of unlawful conduct by mean and reprehensible methods, for no one admires a spy nor his works, not even his employer. Whether spying through debauched servants is justifiable, and whether the facts upon which the justification rests, convict the claimant of unclean hands, are matters to be settled only at final hearing, and until then the defendant will be enjoined and the information impounded. (99 New Jersey, E. Q. Rep. 456.)

These are some typical instances of methods employed by the radio monopoly, which is bending every energy to defeat the distribution amendment reported by the House committee. Not only are their lobbyists assiduously working on Capitol Hill, but their propagandists are sending communications to broadcasters throughout the country misrepresenting the facts and representing that such broadcasters will either lose their licenses or have their power substantially reduced if this equalization provision is adopted. Misled by this false propaganda, many broadcasters are wiring their Members of Congress, urging them to oppose this legislation. In the vast majority of such cases such broadcasters would not only not be disturbed but could obtain increased station power if desired. However, I regret to say that some Members of Congress, acting upon such telegrams and without investigating the true situation are apparently preparing to vote against the interests of their constituents.

The bill, including this amendment, will probably be acted upon in the House next Thursday. The radio monopoly is strongly in favor of extending the present jurisdiction of the Federal Radio Commission, as they have performed to their

entire satisfaction, but they will bend every energy to defeat the equalization provision. I sincerely hope that in the meantime the Members of the House will investigate for themselves. I respectfully suggest that they read the committee report, the statement of Commissioner Caldwell, and my reply thereto, and the various official statistics which I shall insert in the RECORD in connection with this speech.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. DAVIS. I yield to my distinguished colleague from Tennessee.

Mr. GARRETT of Tennessee. Does the gentleman think that the bill as reported from the committee, which I have not had the opportunity of examining, will give some relief from this situation, considering the amendments that I understand are proposed in connection with the extension of the life of the commission?

Mr. DAVIS. There is no question about that. It will afford great relief.

I am in favor of extending the present jurisdiction of the commission, provided the amendments restricting their power during the next year and directing an equalization of broadcasting licenses shall also be adopted, but I am opposed to extending the jurisdiction of the commission without such amendments.

There are many other measures, such as I advocated during the consideration of the radio bill in the last Congress, which, in my opinion, would do much toward curbing this monopoly, but the committee decided not to consider antimonopoly provisions at this time, although it was tentatively agreed that they would be considered later.

What we are particularly seeking in the measure under discussion is to give the commission another year within which to perform the service which they were expected to do during the first year, but to prevent them during that period from freezing the present intolerable situation by the issuance of licenses for three and five years, and also directing that they shall equalize broadcasting privileges so that we may have fairly distributed throughout the country some great national broadcasting stations, some zone or sectional stations, and State and local stations, so that the owner of a receiving set may satisfactorily receive the program from whatever station he desires, and not be compelled to listen to only a few stations, as is generally the case now. [Applause.]

Estimated number of receiving sets in the different radio zones and States, as of January 1, 1927

FIRST ZONE

State	Number receiving sets	Per cent of total in United States
Maine	44,200	0.68
New Hampshire	27,650	.41
Vermont	21,550	.33
Massachusetts	239,200	5.68
Connecticut	79,950	1.23
Rhode Island	43,500	.67
New York	655,850	10.09
New Jersey	193,700	2.98

Hawaii and Alaska included in fifth zone; no figures available.

THE ASSOCIATION OF COLLEGE AND UNIVERSITY BROADCASTING STATIONS,
University Place, Nebr., January 11, 1927.

Hon. EWIN L. DAVIS,
United States House of Representatives,
Washington, D. C.

DEAR SIR: Under date of December 30 we submitted to you a copy of certain resolutions which were drawn up by a committee representing the college broadcasting stations at the Philadelphia meetings of the American Association for the Advancement of Science. Word has just reached us from friends in Washington advising us that there is a tendency on the part of some members of the conference committee on radio to leave out the provision in the Dill bill which instructed the commission to give due regard to the needs of broadcasting stations in educational institutions in the assignment of wave lengths and program hours.

From our standpoint this clause is a very necessary one especially since great pressure will be brought to bear by the business interests to retain every possible advantage in the allotment of wave lengths. Many of our large colleges and some of our State universities are now operating on wave lengths so crowded that satisfactory broadcasting is almost hopeless, and are compelled to be in constant competition with commercial stations, whose programs consist largely of the cheapest kind of jazz and in constant efforts to sell goods. Our organization has no funds available for lobbying in order to present our viewpoint and we respectfully urge that you give us the benefit of special instructions along the lines indicated, in order that the high type of noncommercial programs presented by college stations shall not be completely lost, in the hopeless competition with the advertiser's stations, whose sole claim for time is their desire to sell goods.

Very respectfully yours,

THE ASSOCIATON OF COLLEGE AND UNIVERSITY BROADCASTING STATIONS.
By J. C. JENSEN, *Secretary.*

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. SANDLIN. Mr. Chairman, I yield to the gentleman from Illinois [Mr. ADKINS].

Mr. ADKINS. Mr. Chairman, the time for general debate having expired on this side, I ask unanimous consent to have incorporated in the RECORD a speech I made over the radio on farm relief.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks by the insertion of a speech made by him over the radio on farm relief. Is there objection?

There was no objection.

Mr. ADKINS. Mr. Chairman, under the leave to extend my remarks in the RECORD I include the following speech I made over the radio on farm relief:

Ladies and gentlemen of the radio audience, when Charlie Stengle of the National Farm News asked me to address you to-night, I knew he expected me to talk on the farm situation.

When the "bottom dropped out" of the prices of staple farm commodities in 1920 and 1921, of which we produce an exportable surplus, commodities which in most cases the world's price was the domestic price, our farm leaders after studying the situation decided that the producers of such commodities were at a disadvantage because the tariff did not protect them against the cheap labor and cheap lands of some other countries to the extent that other commodities were protected.

Observing that about every other major activity had a Federal board or commission that functioned either directly or indirectly to stabilize the price of the service these activities render society, representatives of many farmers came to Washington four years ago, asking for a law providing for such a board with power to direct, through some business agency, the marketing of certain farm commodities selling below the ratio price of other commodities, and providing for a Government loan and what has become known as an "equalization fee" collected on the commodity being marketed to pay for the service incident to disposing of the same. After long and exhaustive hearings this bill was defeated.

Then again at the second session of the Sixty-ninth Congress, these farm Representatives came back reinforced by other farm leaders, who after studying the plan had become convinced it was the best thing that could be worked out, and the combined influence of these groups tried to convince Congress that the bill proposed should be passed and Congress passed it and the President vetoed it. This bill had eliminated many features that had been objected to in the other bills.

We now have the same kind of farm relief proposed again with an attempt to eliminate all the objections raised by the President in his veto message in the last bill except the "equalization fee." I do not think this bill would be objected to if the equalization fee was left out, but the farmers do not want it without the "fee." Why? They maintain they can do all the things provided for under this bill now under existing laws, and the only new things provided for would be the board and the loan.

The cotton and the tobacco cooperatives, and, in fact, all the proponents of this bill who appeared before the Committee on Agriculture, say they do not want the law without the "fee," and they would not attempt to operate under it if we should pass it without the "fee." If they did, they would operate until they lost the money loaned and the "show would be over," and they would have no means to meet the losses. They would likely have losses except when they were operating on a rising "world market." The objection to this legislation comes largely from large consuming centers—the millers and the exchanges. It would be amusing to the farmer, if this situation was not so serious, to hear the opponents to this legislation from consuming centers "swear themselves" in as the friends of the farmer, and, in fact, about every opponent from these localities does that the first thing and then proceeds to try and show that if the farmer gets a decent price for his commodity he will overproduce and bring disaster to himself. If it should turn out that way, certainly the consumers would not be hurt. The miller would not be hurt; if he bought cheap wheat, he could sell cheap flour. The commission merchant would be benefited, for the more bushels produced the more commission he would get, and nobody be hurt but the farmer.

Then their heart bleeds for the farmer when they think of his having to pay that "equalization fee." That is what gives them the "nightmare"; why? Twenty-five years ago, when the farmers started the local cooperative elevator to remedy a bad condition in the local grain trade, they knew their competitors would pay more than the grain was worth for a time and take the trade away from them and put them out of business, so the farmers put this fee in the by-laws of their companies, except they called it a "penalty clause" then, and providing that when one of their stockholders sold his grain to their competitor he must pay to his own company a penalty or equalization fee which if the competitor should buy all their grain there would be enough money paid in through his penalty clause to keep the farmers' company running. How their competitors did complain about that, but learned they could not put the farmers' company out of business under such a system. There has been no use for such a provision in their by-laws, in most cases, for 15 years. In 10 or 15 years if cooperatives continue to develop successfully and this scheme becomes a law and operates successfully, they will not need the "equalization fee."

This "equalization fee" will not hurt the miller nor the commission man; will be strong competitor for the speculator who fears he can not compete with such a system. If this scheme stabilizes the markets as its proponents contend and prevents the violent "ups and downs" in the markets, a large army of "lambs" that operate on a "shoe string" and buy on a rising market and compelled to liquidate as soon as the market breaks and dump their contracts on the market at one time, precipitating a violent drop in the market, will not operate and the speculating will be done by strong men financially who will not have to liquidate on every break and depress the market more than supply and demand warrants. Newspapers under date of February 26, 1928, carried Associated Press item, headed "Chicago, February 25. Hugh receipts of corn send markets lower." If huge receipts of cash corn, wheat, or cotton send the price of these commodities lower, "huge receipts" of contracts thrown on the speculative market would have the same effect on the future market, temporarily at least, which does the producer harm and the consumer no good.

The legitimate speculator is a very necessary fellow under our present system of marketing. The farm organizations backing the McNary-Haugen bill think the violent changes in prices on our exchanges will be avoided through the operation of this bill. If they are right, the producer and consumer will both be benefited; if they are wrong, the farmer will pay the bill through the "equalization fee," and nobody else is harmed.

Some learned constitutional lawyers bring out the old stock argument, "unconstitutional." The opponents of this legislation as a last resort shed "crocodile tears" over the Constitution and say the "equalization fee is unconstitutional." The old Constitution is a mighty good document, and its limitations are not so rigid but what a learned judiciary can always render an opinion, within its limitations, in line with modern, sound, public policy, thanks to the wisdom of its founders.

In the evolution of our economic affairs, made necessary to develop our resources fast enough to meet the needs of our ever-increasing population, it has been necessary for various business, transportation, and manufacturing enterprises to go out of business or become a part of the new and more efficient organization. The auto builder and garage supplanted the carriage builder and livery-stable man; the shoe manufacturer supplanted the local shoemaker; the wagon factory put the local wagon maker out of business; the railroad put the stagecoach line, the freighting company, the canal boat, and other agencies of transportation out of business, all because they meet the needs of the people more efficiently and expeditiously.

Some years ago the newspapers carried a story about the opposition to encouraging the development of railroads which stated, at Lancaster, Ohio, it was proposed to debate the subject as to the advisability of encouraging the building of railroads, and application was made to the school board for the use of the schoolhouse in which to hold this debate. The school board met and adopted a resolution, which read something like this:

"The people are welcome to the use of the schoolhouse to debate all proper questions, but such things as railroads and telegraphs should not be thought of; the Lord never intended that intelligent people should ride across the country by steam at the terrific rate of 15 miles an hour." No doubt some of those old fellows owned stock in a stagecoach company, canal boat, or some other transportation enterprise serving the public at that time. The railroads were built, and the old agencies, that met the needs of the people in their time, passed on. No individual or corporation has been able to stand in the way of progress, against the "tide" of economic necessity. Neither has any political party.

The leaders of the great political parties did not have foresight enough to solve the slavery and secession question. But after long agitation, which shook the very foundation of our country, resulted in a new party which championed the cause and settled the question at great cost of blood and treasure.

The appeal of the Republican Party to a large portion of the farm population of the Middle West that the tariff will solve this problem will not appeal to them, because they do not believe the tariff is effective on products that they produce an exportable surplus of. The appeal of the Democrats to reduce the tariff to solve this problem will fall on deaf ears, because these farmers feel no Democrat will want to reduce the tariff on any commodity produced in his locality. They will very likely not ask you whether you are a Democrat or a Republican, but will ask you if you are for the "equalization fee" should you be a candidate for a national executive or legislative position.

The Republican and Democratic National Conventions put planks in their party platforms declaring for "farm relief" which, to my mind, makes this question a nonpartisan question. I think the leaders of both political parties in Congress had better give some consideration to what the farm leaders think farm relief means.

Will our political parties function to solve this problem satisfactorily to a large and important part of our people and demonstrate the efficiency of party government in a crisis of this kind; or will they encourage the development of "bloc government" and have our National Congress controlled by combinations of "blocs" instead of political parties? As a strong advocate of party government, I do not believe the leaders of the two great parties appreciate the seriousness of this situation from the standpoint of party government.

Mr. SANDLIN. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. LOZIER].

Mr. LOZIER. Mr. Chairman and members of the committee, for several years we have had "a farm problem" in the United States growing out of the adverse economic condition in which American agriculture found itself, as a result of legislative favoritism to other industries, and wrongful ex-

ploitation by other vocational groups. That problem is still unsolved. Between 1920 and 1925 American agriculture was deflated to the extent of practically twenty-one billions of dollars. According to the fourteenth decennial census, in 1920 the agricultural wealth of the American people was $78,000,000,000. In 1925, according to the farm census, the agricultural wealth of the American people had shrunk to $57,000,000,000, a loss of $21,000,000,000 in five years. At all times in our national history, prior to 1921, agriculture was the greatest of all our basic industries.

In 1920 the total capital invested in manufacturing in the United States amounted to about $44,000,000,000, having doubled in the six years between 1914 and 1920. The total property investment in the railroads of the United States in 1920 was approximately $20,000,000,000, and the total capitalization of all mines and quarries in the United States in 1920 was approximately $8,000,000,000, or a total of $72,000,000,000, which represents the combined wealth of manufacturing, railroads, and mines and quarries of the Nation, as against $78,000,000,000, the value of our agricultural resources in 1920. That is to say, in 1920 our agricultural wealth was $6,000,000,000 more than the combined wealth of railroads, manufacturing, mines, and quarry interests of the Nation.

In the last five years, from 1920 to 1925, agricultural values were destroyed or deflated, if you prefer that term, to the extent of $21,000,000,000, or more than one-fourth of the total value of the agricultural resources of this Nation. In that same period of five years the wealth of the manufacturing industries of this country increased by leaps and bounds. While no official data is available, it is fair to assume that the present value of the manufacturing interests of America is approximately $55,000,000,000.

The railroads are now claiming a valuation of something like $30,000,000,000, an increase of about $10,000,000,000 in 10 years. While the value of agricultural property in the United States has shrunk $21,000,000,000 from 1920 to 1925 and still continues to shrink, in the same period the wealth of the manufacturing industry increased $11,000,000,000, the wealth of the railroads increased probably $10,000,000,000, and the wealth of the mines and quarries increased correspondingly.

Agriculture has long since ceased to be a profitable occupation, although it is by odds the greatest of all basic industries. If agriculture fails to function efficiently, the world goes hungry.

The distress of agriculture is being strikingly reflected in the reduced activities in the industrial districts of the New England and Middle Atlantic States. The slowing up process is especially noticeable in the textile industries.

On January 31, 1928, there were 36,349,130 spindles in place in the United States, of which 31,697,876 were active during January and 4,651,254, or nearly 13 per cent, were idle during that month. Of the idle spindles, only a fraction over half a million were in cotton-growing States and over 4,000,000 were in the New England States. The active spinning hours in January, 1928, were 295,000,000 less than in the corresponding month in 1927 and less than in any preceding January since 1921. But what is more significant, for the month of January, 1928, the average spindle hours for spindles in place was 308 in the cotton-growing States and only 143 in the New England States. These figures indicate very clearly that the textile mill district of the United States is gradually moving from the New England States to the South, where raw cotton is grown and an adequate supply of hydroelectric power is now or soon will be available at a low cost. I will also add that the number of spindles in place January 31, 1928, was 1,000,000 less than on the same date in 1927 and the lowest since 1921.

By maintaining the tariff unreasonably high on commodities that the farmers must buy and by denying to the agricultural classes equality of opportunity with other industries, the buying power of the farmer has been tremendously reduced, and consequently he can not buy and pay for the commodities produced in the mills and factories of the New England States.

When the farmer is prosperous and full handed, he is one of the best customers of the manufacturers, and all branches of business derive an immediate and substantial benefit from the prosperity of the farmers. But when the farmer can not sell his commodities at a price that will return to him the cost of production and afford a living profit he can not buy the products of the highly protected mills and factories.

The industrialists are following a short-sighted policy by bearing down too heavily upon the agricultural classes, refusing to restore a proper balance between agriculture and the other great industries and denying to agriculture a fair share of the new wealth that annually accrues to the American people. No prosperity can be nation-wide or enduring if confined to a few favored groups, and prosperity in which the farmer is not permitted to participate is not the kind of prosperity that will promote our national welfare.

The great financial journals and captains of industry are now frankly admitting that our so-called prosperity can not continue unless this nation-wide agricultural distress is relieved. What a few years ago was considered a farm problem has long since become a national problem, upon the proper solution of which the welfare of all other vocational groups depends.

The condition of the agricultural classes is largely due to discriminatory legislation and wrongful and arbitrary manipulation of economic laws. Many of the farmers' burdens are the result of legislative policies enacted for the benefit of certain favored classes. Moreover, other great industries, by reason of organization and their great wealth and power, have secured control of the economic machinery of the Nation, which they have arbitrarily manipulated to their advantage and to the great detriment of the agricultural classes. These legislative and economic handicaps must be removed before agriculture can be restored to its rightful place among the profitable occupations. A delay of justice is a denial of justice, and the sooner a proper balance is restored between agriculture and the other great basic industries the sooner we will have genuine, nation-wide, and enduring prosperity.

Science tells us that life is in the blood, and if the blood of the human body be congested in the brain apoplexy results. If the blood be congested in the lungs pneumonia is inevitable. If the blood instead of being distributed properly among the various organs and parts of the body is concentrated and congested in one part of the body, the limbs from which the blood is withdrawn atrophies and decays and disease and death quickly follow. What the blood is to the human body, wealth and prosperity are to our body politic and business life. We have in the United States now an economic system which has resulted in the wrongful congestion of the wealth and prosperity of this Nation in a few sections of the country and in a few favored groups, to the exclusion of other sections and other vocational groups. I plead for economic justice for the American farmer. I plead for a square deal for those who produce the food of the Nation. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. SANDLIN. I yield 10 minutes to the gentleman from Georgia [Mr. BRAND.]

Mr. BRAND of Georgia. Mr. Chairman, in January of this year I received a letter from the Boston University School of Education, Boston, Mass., in which the writer states—

> We are undertaking a survey to determine the 10 most pressing national problems in politics, economics, history, and civics. Will you kindly list on the inclosed sheet these 10 problems as you see them and number them in order of importance?

Thereafter, and on January 27, I replied, listing what I conceived to be the 10 most pressing national problems. They are as follows:

1. The agricultural problem.
2. The necessity for national legislation protecting depositors and guaranteeing payment of deposits when a bank, a member of the Federal reserve system, becomes insolvent.
3. Legislation for flood control by the Government of the United States.
4. A sweeping reduction of freight rates, particularly on the necessaries of life.
5. Revision of the tariff in the interest of the consuming public.
6. A thorough investigation of the Agricultural Department as related to cotton in all its phases.
7. Legislation declaring nonmailable the circulation of foreign-language newspapers in America unless such newspapers contain a complete English translation of the same, if such papers advocate opposition to organized forms of government, overthrow by force or violence of the United States Government or of any State of the United States or any political subdivision thereof.
8. Reduction of taxes for the rank and file of the citizens as well as for large corporations and the wealthy classes.
9. Enforcement of the law in respect of the deportation of undesirable citizens.
10. A nation-wide system of teaching or bringing directly to the attention of the young people of the present generation the evils, as affecting the mind and body, of intemperance and the supreme importance of living sober lives.

I am making these answers a part of my speech because they express my views as to the duties of this Congress long entertained. I have tried to keep the faith and to stand by my creed in regard to the subject matters dealt with by preparing and introducing in the House of Representatives from time to time

bills the purpose of which was to make effective some of the suggestions embodied in these 10 answers.

On January 9, 1928, I introduced a resolution to investigate the Department of Agriculture and the activities of the New Orleans, New York, and Chicago cotton exchanges. This resolution can be found in the RECORD of February 17, page 3210.

Similar resolutions have not only been subsequently introduced in the House, but also in the Senate, one prior to the holidays and one since the holidays. Whether the investigation called for by these various resolutions will be had and held by Congress, and if so, what the results will be, is problematical.

On account of the price-situation report released September 15, 1927, by the Department of Agriculture, the expression of the opinion that the prices of cotton would decline had a fatal and disastrous effect upon the cotton producer and his creditors. Cotton began to decline promptly. It has never reached the level prior to this infamous assumption of authority on the part of the department in predicting the decline of the prices. Since I have been a Member of Congress there is no parallel in official misconduct, ranking in importance and magnitude with the unprecedented losses and disastrous consequences which resulted from this report since the adoption of the deflation policy of 1920. The truth is, whether the conclusion reached is just or not, the cotton producers of the Southern States have lost confidence in the Agricultural Department. The department's guesses in regard to acreage, and acreage abandoned, in regard to the probable production of cotton, in regard to the damage to crops by drought, wet weather, and the boll weevil, in regard to the amount of the carry-over, and the mistakes of the department in regard to the reports of cotton ginned, intensified and magnified by the prediction as to the decline in the prices of cotton, have in the minds of cotton producers destroyed their faith in the integrity of this department.

The only consolation I can see in sight is a strong probability that this Congress will again enact some character of farm relief legislation. It would be utterly inexcusable and indefensible if Congress should adjourn without enacting either the McNary-Haugen bill as it passed the last Congress, if that can not be improved upon, or some other proposed farm relief legislation. I voted for the McNary-Haugen bill which passed the Sixty-ninth Congress, and unless I have the opportunity of voting for some better farm relief legislation, I shall vote for this bill again, despite all the threats and rumors of another veto by President Coolidge.

On December 13, 1927, I introduced a bill which is substantially a copy of the bill I introduced at the Sixty-ninth Congress, to amend the Federal reserve act, the purpose of which amendment was to require the Government of the United States to guarantee payment of deposits to depositors when a member bank of the Federal reserve system becomes insolvent.

Such legislation as is proposed in my bill may not become a law at this session of Congress, but as sure as the tides come and go, and notwithstanding the opposition of the great bankers of this country, North and South alike, this character of legislation sooner or later will be put upon the statute books of this Government.

On December 19, 1927, I introduced a bill the purpose of which was to exclude from the mails foreign-language newspapers containing—

First. Matter in opposition to organized government.

Second. Overthrow by force or violence the Government of the United States, or any State of the United States, or any political subdivision thereof.

Third. The duty, necessity, or propriety of the unlawful assaulting or killing of any officer under the Government of the United States, or of any State of the United States, or any subdivision thereof, unless the newspaper containing the treasonable matter carries therein a full translation thereof in English.

This bill should not be construed as in any sense antagonistic to the foreign-language newspapers circulated in this country, provided their columns contain no matter which is prohibited by the bill, and whose columns are free of the treasonable conduct set forth therein, and not then if such matter is translated into English.

In February, 1928, I introduced a bill providing for canceling naturalization certificates when a naturalized citizen has been guilty of fraud or by his acts or declarations has ceased to be a man of good moral character.

Under present law there is no provision for revoking the order of the court naturalizing an alien, notwithstanding after the date of the naturalization order or certificate he may become, for instance, an anarchist—he may advise in the bombing of courthouses and other public offices—conspire to kill judges of the State and Federal courts who do not execute the laws and enter judgment and decrees according to his way of thinking.

Machinery is provided for a hearing, after giving the alien due notice before the court which naturalized him, and in no case does the law become effective beyond five years after the date of naturalization papers.

This proposed legislation has met with the approval of the United States Department of Labor. Since I introduced the bill, I have for the first time been officially informed that in the annual reports of the Commission of Naturalization for the years 1924, 1925, 1926, and 1927 substantial recommendations have been made favorable to such legislation.

On February 17, 1928, I introduced a bill to amend the World War adjusted compensation act, which is practically the same bill I introduced at the Sixty-ninth session of Congress, the purpose of which is to give the veteran of the World War the option of surrendering his insurance certificate and obtaining thereon its full cash value at the time of the surrender.

Ninety out of every one hundred veterans in my district, in my opinion, and throughout the State of Georgia, particularly in the agricultural sections, prefer to have had a cash bonus instead of a 20-year bonus certificate. This is true primarily because these boys need the money now, and it has always been my opinion, and I have so voted on three different occasions, that they should have been paid a cash bonus instead of being given a promise to pay maturing in 20 years from date. The Government called for these boys in time of national distress; they answered the call and rendered the service; in their hearts they now call upon the Government to exchange this 20-year proposition, which is practically worthless to them, and give them the cash or nothing. Congress has been willing to answer this call, and has done so, but those higher in authority, in the Treasury Department, in the Veterans' Bureau, and in the White House, Republicans and Democrats alike, up to date have been unmindful of their call.

You observe in answer to the tenth and last question propounded by the Boston University School of Education, I have confined my answer to one class of citizens, namely, the young men and women of the country. I do not assume the right or claim the privilege of counseling or advising men and women of mature years or beyond the age limit as fixed by the States. My observations and those who I have in mind is restricted to that group of young people whose character is in formative period and who are still minors under the law.

The drinking of intoxicating whiskies on the part of young people is a dangerous and perfectly useless habit. If young men knew or would inform themselves of the effect it has upon the body and the mind, they would never let strong drink pass their lips. Human experience and scientific information teaches that the drinking of intoxicating whiskies warps and impairs the mind and body, dulls the imagination, destroys ambition, dwarfs the souls of men, and shuts the door of hope to a successful life, and eliminates the promise of becoming useful citizens.

The question of drinking intoxicating whiskies on the part of young people, if reports of the press and the proceedings of the courts are to be relied upon, is fast becoming a national peril. The most effective influence for the correction of this situation is in the home. The parents in the home should impress upon their children respect for the law and the importance of observing the law.

In addition, I think it is the duty of all patriotic citizens, both men and women, in an appropriate way and from time to time to bring to the attention of the youth of this Nation the evils of intemperance as it affects the mind and body. Persuasion and friendly counsel, argument and information, is the most influential way of convincing them to lead sober lives. This can not be accomplished solely by threats of prosecution or punishment.

This is a field of greatest usefulness and wherein all civic organizations and women's clubs, the teachers in literary schools, the teachers and professors in colleges, the press, prohibition leaders and lecturers, both men and women, and the ministers of the Gospel of all religious denominations can play an important part.

History teaches that amid the great variety of treatment to which drunkenness was subjected by the ancients, all lawgivers seem to agree in treating it as without excuse. Whatever individuals may think and say, no nation treats it as meritorious. Yet Darius is said to have ordered it to be stated in his epitaph that he could drink a great deal of wine and bear it well—a virtue which Demosthenes observed was only the virtue of a sponge. At the Greek festival of Dionysia it was a crime not to be drunk—this being a symptom of ingratitude to the god of wine—and prizes were awarded to those who became drunk most quickly.

And the Roman bacchantes, decked with garlands of ivy and amid deafening drums and cymbals, were equally applauded; but at length even the Bacchanalia were suppressed by a decree of the senate 186 B. C.

Notwithstanding these exceptions, the offense of drunkenness was a source of great perplexity to the ancients, who tried nearly every possible way of dealing with it.

Severe treatment was often tried to little effect. The Mosaic law seems to have imposed stoning to death, at least if the drunkenness was coupled with any disobedience of parents. The Locrians, under Zaleucus, made it a capital offense to drink wine if it was not mixed with water; even an invalid was not exempted from punishment unless acting under a physician's order. Pittacus, of Mitylene, made a law that he who, when drunk, committed an offense should suffer double the punishment which he would do if sober; and Plato, Aristotle, and Plutarch applauded this as the height of wisdom. The Roman censors could expel a senator for being drunk. Mahomet ordered drunkards to be bastinadoed with 80 blows.

Other nations thought of limiting the quantity to be drunk at one time or at one sitting. The Egyptians put some limit, though what it was is not stated. The Spartans had some limit. The Arabians fixed the quantity at 12 glasses a man; but the size of the glass was not, unfortunately, defined by the historians. The Anglo-Saxons went no further than to order silver nails to be fixed on the side of the drinking cups, so that each might know his proper measure. And it is said that this was done by King Edgar after noticing the drunken habits of the Danes. Lycurgus of Thrace went to the root of the matter by ordering the vines to be cut down, and his conduct was imitated in 704 by Terbulus, of Bulgaria. The Suevi prohibited the importation of wine, and the Spartans tried to turn the vice into contempt by systematically making their slaves drunk once a year to show their children how foolish and contemptible men looked in that state.

Drunkenness was deemed much more vicious in some classes of persons than in others. The ancient Indians held it lawful to kill a king when he was drunk. The Athenians made it a capital offense for a magistrate to be drunk, and Charlemagne caused a law to be enacted that judges on the bench and pleaders should do their business fasting. The Carthaginians prohibited magistrates, governors, soldiers, and servants from any drinking.

Thus you see the waves of legal thought and action have, for over 20 centuries, dashed against the habitual and intemperate use of intoxicating liquors. I speak not of the moral and religious crusades which have been and are being directed against the habitual drunkard and drunkenness. I echo rather the voice of the law, and declare to you that at no time in the past have there not been legislation and enactments among all the peoples of the earth, whose purpose was to prevent men from debauching themselves by the excessive use of stimulants. The thunders of the centuries manifest their disapproval of the intemperate use of intoxicating whiskies. Holy Writ itself warns us not to put the bottle to our neighbor's lips and to tarry not long over the wine cup, describing its evil effects in that scorching, blistering saying which is written that—

> In the end it biteth like an adder and stingeth like a serpent.

[Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield five minutes to the gentleman from Louisiana [Mr. O'CONNOR].

Mr. O'CONNOR of Louisiana. Mr. Chairman and gentlemen of the committee, on yesterday I did not have an opportunity to respond to our genial friend from Iowa when he suggested that I was for flood control and not for farm relief. I am sincerely so, and at the last session was a very enthusiastic advocate of the Aswell plan, which provides for an economic and efficient system of marketing and distributing agricultural products. I think our friend from Iowa forgets for the moment that the greatest relief can be had for the entire agricultural section of our country by the adoption of a comprehensive flood-control plan. Flood control means improvement of the Mississippi River and its tributaries, which will naturally make for cheaper transportation and realize the wonderful dream of Secretary Hoover. It will bring into existence as a transportation factor newer, finer, and larger boats and barges than the steamboats of a generation ago and realize the hopes of the gentleman and his constituents who live in the imperial State of Iowa. It will meet with the views of the river cities of the Mississippi Valley, who have spoken eloquently in convention a few days ago of the bright days ahead for waterways and water transportation; and I will ask that I may incorporate in these remarks a letter with accompanying resolutions received from the secretary of that convention, which, in my judgment, are illuminating with reference to the needs of river improvement in regard to bringing about lower freight rates to the people of the Middle West. Both the letter and the resolutions express the hope of a transportation factor in developed waterways that will become not a rival but a powerful ally of our railroads, making for an enormously increased tonnage, which will cause lower freight rates and tremendously increased earnings resulting from a wonderfully expanded business.

I repeat, Mr. Chairman and gentlemen, that I do not believe that our genial friend from Iowa meant that flood control and farm relief were antagonistic and irreconciliable. I am certain that he knows or will conclude that they go hand in hand, that farm relief is largely dependent upon the improvement of the waterways of this country, and whenever that improvement comes the gentleman's constituents will receive that relief in the way of better prices for their products for which he has been fighting so long and eloquently and strenuously in this House. And I will add that I do not think the farmers and people generally have a better advocate or greater champion than our friend Mr. DICKINSON.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. O'CONNOR of Louisiana. I will be glad to.

Mr. DICKINSON of Iowa. I am glad to know that the gentleman from Louisiana is committed to the program of farm relief, but I want to suggest, when he says that the farm relief should include flood control, that there has only been two men who are in favor of the Aswell proposition; one was Mr. Yoakum and the other Mr. ASWELL. I was afraid yesterday that the gentleman from Louisiana had given him one more convert.

Mr. O'CONNOR of Louisiana. I was under the impression that the gentleman from Iowa and his associates at the last session were afraid to let the Aswell bill come to a vote on account of the number of adherents it had. [Laughter.] May I ask the gentleman from Iowa if in his brilliant efforts he has reached the White House and has been able to expose the fallacies that he thinks underlies the veto of the bill which I understand is fundamentally the same as the bill that will be reported out of the committee soon?

I notice that the gentleman from Iowa is absolutely deaf to that inquiry.

Mr. HASTINGS. Does the gentleman from Louisiana pause for a reply?

Mr. O'CONNOR of Louisiana. Yes; I pause. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by incorporating the letter and resolutions referred to.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The matter referred to is as follows:

RIVER CITIES CONVENTION OF THE UPPER MISSISSIPPI VALLEY HELD IN MINNEAPOLIS FEBRUARY 20, 1928

MINNEAPOLIS, MINN., *February 27, 1928.*

Hon. JAMES O'CONNOR,
Member of Congress, House of Representatives,
Washington, D. C.

DEAR SIR: Inclosed herewith are certain resolutions unanimously adopted at a convention of the river cities of the upper Mississippi Valley held in Minneapolis on February 20, 1928. These resolutions, transmitted to you by the direction of the convention, present certain objections to the Denison bill (H. R. 10710), to which your earnest consideration is invited. The objections in part may be briefly summarized as follows:

First. To section 3c, authorizing the Secretary of War to discontinue any part of the operation of the facilities belonging to the corporation. It is believed that such power, like the power of sale, or other disposition, should be vested in Congress and not in a Cabinet officer, in whose selection the interested communities have no voice. It would be very difficult, if not impossible, to induce these communities to invest in terminal facilities usable only in connection with the barge line, with the possbility of a summary termination of its operations. It would be very unfair to the investment already made in such terminals to destroy their value by Executive order. These investments were made in reliance upon existing law vesting in Congress the power of termination. Other objections to this section, and equally vital, will readily occur to you.

Second. To the failure of the bill to declare the policy of the Government with respect to the disposition of the line after the demonstration period has been concluded. In this connection it should be explained that a series of conferences was had in Washington the latter part of 1927 and the early part of 1928 between the Secretary of War and representative shippers from Chicago and points on the Mississippi River. Following this conference the Secretary of War, on January 18, 1928, transmitted to the chairman of the Interstate and Foreign Com-

merce Committee of the House a letter from which the following quotation is made:

"I should favor the authorization of the service as a temporary demonstration, preferably with a provision in the authorization bill indicating the conditions under which the line should be disposed of, after the demonstration had been concluded. Such general conditions might include the following suggestions:

"1. When it shall be provided by law that a private water carrier can not be controlled by any competing carrier.

"2. When a sufficiently broad structure of joint-rate and through-route arrangements with rail carriers, based upon a division of revenue which experience shall have demonstrated to be fair to both rail and water lines, shall have been created. This must be so extensive that the entire public needing this transportation facility may have on fair terms opportunity to obtain this economy in transportation.

"3. When the channels of the Mississippi system shall have been so improved or maintained that the best possible conditions for navigation have been procured, and the system of maintenance so perfected that those conducting barge-line operations shall have certainty of an available channel.

"4. When satisfactory terminal arrangements and facilities shall have been created. Occasionally there must be municipal enterprises toward the creation of which the assistance of the Federal Government is and will continue to be for some time to come a necessity."

It is submitted that the foregoing quotation, in substance at least, should be incorporated in the bill as a statement of governmental policy. Such a statement would go a long way toward allaying the feeling that has developed that the line would prematurely pass into the hands of private interests, which, even though so inclined, would be powerless to cope with the difficulties of the situation.

We earnestly request your consideration of these resolutions and the amendment to the bill in accordance therewith. The future of the Middle West, already clouded by the operation of the Panama Canal, will be most seriously jeopardized if the barge line is discontinued before thorough demonstration upon the entire Mississippi and its tributaries shall have been made.

Yours truly,

H. G. BENTON, *Secretary.*

Resolution, unanimously adopted by the River Cities Convention of the Upper Mississippi Valley at Minneapolis, February 20, 1928

Whereas the inland waterways act establishing transportation service and facilities on the Mississippi River system provides that "the operation of any such facilities shall not be discontinued * * * until authorized by Congress"; and it is proposed in the Denison bill, H. R. 10710, section 3–c, that "if the Secretary of War deems it advisable in the public interest to discontinue any part of the operation of the transportation or terminal facilities belonging to the corporation, he is authorized to do so, and to make a report thereof with his reasons therefor to Congress"; and

Whereas States, municipalities, and private industries have invested millions of dollars in terminal facilities on the faith of the continuance of those lines and depend on the use of these facilities to pay the carrying charges on their loans and retire their investments, and any recession or abandonment of service would entail widespread dislocation of business and loss of capital; and

Whereas extensive joint relations with rail and water carriers, which are of substantial value to the public, have been built up through years of effort and litigation and at great expense to the corporation, and these relations would be destroyed were the line discontinued: Now, therefore, be it

Resolved, That we are unalterably opposed to any change in the present law which would vest in others than our chosen Representatives in Congress the power or authority to discontinue the operation by the Inland Waterways Corporation of any established lines of transportation.

We hold, however, that water carriers under proper conditions should be privately operated. A body of law, therefore, must be developed which will encourage the investment of private capital in common-carrier enterprises on navigable waterways, protect such investments, and procure for such enterprises all needed joint relations with railroads without unnecessary delay or expense.

Meanwhile, the Federal Government should establish an adequate service of common carriage on the Mississippi River, its tributaries, and connecting waterways, as fast as these several projects are rendered navigable and maintain such service in the public interest until private capital can be attracted to this field of transportation.

Government operation should terminate when the following have been accomplished:

1. When it shall be provided by law that a private water carrier can not be controlled by any competing carrier.

2. When a sufficiently broad structure of joint rate and through route arrangements with rail carriers, based upon a division of revenue which experience shall have demonstrated to be fair to both rail and water lines, shall have been created. This must be so extensive that the entire public needing this transportation facility may have on fair terms opportunity to obtain this economy in transportation.

3. When the channels of the Mississippi system shall have been so improved or maintained that the best possible conditions for navigation have been procured, and the system of maintenance so perfected that those conducting barge-line operations shall have certainty of an available channel.

4. When satisfactory terminal arrangements and facilities shall have been created. Occasionally there must be municipal enterprises toward the creation of which the assistance of the Federal Government is and will continue to be for some time to come a necessity.

These principles should be embodied in a legislative definition of national policy.

Resolved further, That a copy of these resolutions be forwarded to all the Senators and Representatives in Congress of the States affected by waterways development in the Mississippi Valley system.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield to the gentleman from Missouri [Mr. NELSON].

Mr. NELSON of Missouri. Mr. Chairman, I ask unanimous consent to revise and extend my remarks by including a few findings from Missouri farmers in answer to questions that were submitted to them and some other official documents.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to incorporate in his remarks some official documents representing different farmers' organizations. Is there objection?

There was no objection.

Mr. NELSON of Missouri. Mr. Chairman, what this country needs right now is a megaphone for every farmer and an ear trumpet for every Congressman.

It is much more important that we know what the folks back home are thinking, and that we give serious heed to their thoughts, than that it be made possible, as once was proposed, for our constituents to listen in on Congress. Believing this, I recently undertook to learn what farmers of the great State of Missouri are thinking.

With so many presuming to speak for the farmer, I felt that it would be better by far that he speak for himself. And may I digress to say that the farmer would fare better if he saw to it that more of his own occupation were nominated and elected to Congress so that they might be heard in this House. The place to begin on such a program is in the primaries, where nominations are made; the time to end, not until the polls close in November.

Two years ago, in a full-page advertisement paid for by a big livestock commission firm, I read this:

A Nebraska cattle feeder at Chicago last week, when asked his opinion of pending legislation in the line of farm relief remarked: "We pay no attention to what Congress is doing; our salvation lies in work." He stressed the last word.

Most appropriately, this advertisement in headed, "For men must work and women must weep." Do the representatives of special interests, of great accumulations of capital pay no attention to what Congress is doing? Do they hold that their entire salvation lies in work? The suggestion is ridiculous. Big business not only knows what Congress is doing, but tries to direct, and seemingly with considerable success, what Congress shall do.

What are the facts as to this man on the farm, this man who despite his determination to keep a stiff upper lip, may have a tired and discouraged look in his eyes? Hoping to secure first-hand information, I have just gone through replies to questions submitted to some 500 Missouri farmers. The men answering represent every section of a State of wonderfully diversified agricultural resources, of crops of every kind from corn to cotton. Some belong to one farm organization, some to another, some to none. Missouri being rather evenly divided politically, it is fair to assume that the replies represent in about equal numbers the voters both of the Democratic and Republican Parties, as well as Progressives.

Before having these Missouri farmers speak for themselves, I believe you should be told a little more about the men who replied to the questionnaire which was circulated during Missouri farmers' week at the College of Agriculture. They represent a high average of intelligence and are among our most prosperous rural people.

To the first question, "Are farm conditions growing better or worse in Missouri?" 60 per cent answered "better," 35 per cent "worse," and 5 per cent saw no change. A summary of the replies represented by the 60 per cent indicated that such optimism was based upon the fact that after seven or eight years of hard times, during which many had lost all, farmers were slowly adjusting themselves to the tasks before them. Many frankly suggested that as conditions had been just as

bad as they could be, any change must be for the better. The 35 per cent who believed conditions growing worse mentioned, among other matters, soil depletion, impaired credit, buildings and fences run down, farm machinery used and mended just as long as it could be and which now must be replaced with new machinery at high prices.

"Are farms going up or down in price, or is there no noticeable change?" Twelve per cent answered "up"; 80 per cent, "unchanged"; and 8 per cent, "down." In connection with this question is another, "Do you think this a good time to invest in farm lands?" Answers were: Sixty-six per cent, "yes"; 30 per cent, "no"; and 4 per cent, "undecided." Among the reasons given by those who expect to see an advance in the price of farm lands were: "Because you can get farms at your own price." "If there is a bottom, we surely have reached it in farm values." "Farmers are discouraged and will sell cheap." "The sheriff is about the only man who can sell a farm these days." "Some land can be bought for interest and taxes and any amount merely by assuming the mortgage." Reasons why this is a poor time to invest in farm land included: "Most farms are being operated at a loss." "Farm taxes are too high." "Many who have little or no equity in farms having to pay high taxes on the total value." "Land is getting poorer, debts larger, and improvements are running down." "Farmers are still leaving the farms, there being 200 vacant farms in this central Missouri county."

Replying to the question, "What is the outlook for farming generally?" Twenty-seven per cent of the replies were "fair," 25 per cent "good," 14 per cent "better," 8 per cent "slightly better," 10 per cent "poor," 8 per cent "unchanged," 6 per cent "very poor," and 2 per cent "bad." Comments under this question included: "All right for well-equipped, educated farmer with ample capital." "It is impossible to tell what the outlook is." "A philanthropist might try it." "Fair, but the farmer should be slow to expand." "Under present conditions farming can mean only peasantry." "There is still plenty of work, no end of it, but at poor pay." "The slump after the war took the 'pep' out of us farmers, and hope long deferred has made the heart sick." "At present prices for what we raise, many farmers are going broke. Then they abandon their farms and go to the cities to get better wages. They will come back. This is why I think land will go up in price. The factories will overdo things. The farmer will have no money to buy and those who have gone to town will come back to the farm or starve." "Do you know that 75 per cent of the farmers are over 40 years old? What is going to happen in the next 10 years unless conditions change so that young men will be attracted to the farm?"

Some of the most interesting replies were made to the question, "Why have so many farmers failed in business since 1920"? Here summarized and in some cases in exact language are leading replies:

"Deflation." "Slump in land values and prices in everything produced on farm." "Low buying power of the farmer's dollar." "High cost of production." "Legislative handicaps, such as protective tariff, transportation act, and immigration law." "Everybody except the farmer helped through legislation, having both to sell and buy at the other fellow's price."

Some of the questionnaire sheets as filled out by farmers included a half dozen different reasons for farm failures since 1920. All these just quoted were included in the replies of more than 25 per cent of those who answered. Other reasons given for farm failures were: "Decline in prices of farm products heavier and more abrupt than drop in prices of what the farmer had to buy." "Debts contracted and low prices followed." "Land and livestock bought at high prices." "Overexpansion and sometimes bad management; the farmer is not infallible." "Inability to adjust business to changed conditions." "Because the tariff can't be made to do as much for the farmer as for the manufacturer." "High cost of marketing, especially high freight rates." "Lack of organization needed to meet organization in other lines." "Most farmers who have failed since 1920 have failed, I think, because of the deflation in prices in land and livestock and because they have tried to have automobiles and other luxuries like their town friends, and they simply can not afford them in our section of the country." "The Government caused the farmer to inflate his business, refused to allow his products to seek their natural price level in war times, as they did all manufactured products, then threw the entire cost of deflation on him. No other business on earth could have withstood the shock without cooperation from its Government. The farmer's greatest handicaps are lack of consideration and support by the Government; lack of a proper financing system, and nonappreciation of the farmer as a man and wealth producer." "When times were good, farmers, like other men, bought too heavily of lands, automobiles, and other things that could be bought on credit, and often mortgaged their lands that were free and clear, and the slump came, so that with bad crops, low prices for farm products, and what they had to buy still at war prices, with high taxes and heavy interest charges, most of them are in a very close place. Insurance companies and loan companies have to take thousands of acres of farm lands. We must have relief soon or the whole country will be bankrupt. We need economy—first, for the individual; second, for the county; third, the State; and fourth, the Nation."

Naturally, in reply to the question, "What are the farmers' greatest handicaps?" we find practically the same expressions as already given. They include "Spread between purchase and sale price." "Fluctuating markets; lack of capital or of collective buying and selling power." "Inability to control surplus production." "A dollar that will not go as far as the town dollar." "Inability to farm as well as we know, because we have had to rob the soil while trying to meet interest and taxes."

"The other fellow," comments one farmer, "says what he will give us for our goods and tells us what we must pay him for his. The farmer is the only manufacturer who does not control either the output or the price of his own product." Another answers, "Poor marketing methods and sometimes poor farming. The latter is due in part to the fact that higher wages and shorter hours in the cities attract many who would make efficient farm hands. In view of what it costs us to produce crops and at present prices we can not pay city salaries. The result is that the farmer himself has to take the lead and set the pace."

"The policies of the present administration and the one before it represent the farmers greatest handicaps. Everybody except the farmer has been doing well, and he does not seem to have many friends." "Did you ever think what would happen to any enterprise that let his competitor come in and take 10 cents out of every dollar he produced? Now, the facts are that—a part of the time since 1920—the farmer got only sixty-odd cents out of the dollar he produced and very little of the time over 81 to 83 cents. There is no reason why the investment of the farmer should not earn him interest."

"What are some of the things that would make country life more enjoyable, attractive, and desirable?" Notwithstanding the ambitious road-building program throughout the Nation, and especially in Missouri, "Roads" was the answer on which most farmers agreed, 45 per cent so replying. Evidently there is a decided demand for from-farm-to-market roads. The next reply on which most farmers agreed was, "Better rural schools," while "Farm conveniences, including some modernizing of the home," closely followed.

Some individual replies are, "A decent income only." "A square deal such as Roosevelt stood for." "A better community spirit; organizations for social recreation;" and "At par farm dollar." "Such things as a better farm income could buy." "Conditions changed so that we would not have to fight from dark until daylight for existence." "A little more profit mixed with hard labor." "Given the price, we will show the world."

"Money," was the terse answer of one, and "Profit," the short reply of another. One satisfied farmer answered, "Farm life is all right now." "The right kind of legislation; adjusting taxation; development of waterways; development of our school system, as lack of education is one of the greatest problems of the farmer. Average farmer does not know the fundamentals of soil fertility, the balancing of rations, and so forth; control of surplus would eventually break down; greater appropriation to college of agriculture and extension department would help greatly," adds another.

Illuminating replies were received in answer to the question, "What advantages, if any, does the farm family enjoy over the city folk?" Members of one group suggest, "Search me." "Few have to bother with paying income taxes." "None." "The farmer gets 12 to 16 hours of hard work, while the man in the city works from 6 to 8 hours." "City people have us skinned a mile." "There can be no apparent advantage without financial success." "Most advantages are more sentimental than real."

More optimistic are those who answer, "The farmer lives close to nature and can enjoy the great out-of-doors." "The country is the best place to rear a family." "The farmer has the right to exercise his managerial ability." "On the farm one enjoys nearness to life, the companionship of growing, living things." "On the farm, even if times are hard, as they have been, we have pure air and good food."

A question of intense interest to Congress and the country at this time is, "Would legislation by Congress help the farmer?" Replying to this, 62 per cent of those who answered the question hold that it would, 24 per cent answer "possibly," while 14 per

cent say "no." Individual replies follow: "It would help his mental attitude." "It certainly would help us." "Go easy on the tariff. Some people do not realize what the tariff does for the country." "Repeal the high protective tariff, which was framed to help New England and the East and to fool us farmers." "Repeal or reduce the tariff, thus placing agriculture and all other industries on the same basis." "Give us a tariff law that will actually protect us on prices. Manufacturers have that kind." "Gradually take away protection from the so-called 'infant industries,' which have grown to be powerful and arrogant." "No legislation will solve the problem. We might as well go to work and quit talking about it." "Pass a real farm relief bill, so we will not have to sell our crops at prices fixed on world markets."

Next to the last question was, "What would you suggest be done by way of repeal or revision of present laws or passage of new ones?" Fifty-six per cent of those who replied advocated the passage of the McNary-Haugen or similar measure with equalization fee, while the number holding that a readjustment or revision of the tariff is needed was but slightly less. Individual replies include: "Take the tariff off of steel so the farmer can get a new plow at a reasonable price." "Quit protecting machinery and clothing material or protect agriculture in an effective way." "Give us any kind of legislation which will place the farmer's dollar on an equal basis with industry's dollar." "Capper-Ketcham bill." "Reforestation, but no more reclamation." "Require stocks, bonds, and other such papers to be registered for taxation purposes." "A better marketing act." "More general and more liberal provision for agricultural teaching." "All we want is an even break with other industries. Then if we haven't brains enough to manage our own farms we ought to give up." "Repeal laws guaranteeing public utilities, rails, and others returns on investments when of questionable value. The effect of this and similar legislation has crippled our basic industry—agriculture." "Remove the handicaps and we will take care of ourselves." "Provide storage for surplus crops on which 80 per cent could be borrowed." "A bill to encourage more direct and orderly marketing." "Lower freight rates and development of inland waterways would be of great benefit to all concerned." "No more reclamation projects until land now under cultivation can be made to pay." "Lower tariff, lower freight rates, water transportation in the interior, Government aid for rural education." "Lower protective tariff on commodities other than farm articles to a place where farm products have equal show." "The McNary-Haugen bill should be given a trial to see if it would work. It might cost something to find out, but it would be worth it." "Either pass laws favoring the farmers or repeal laws favoring big business, so the farmer can compete on equal terms." "Give the farmer the same protection that industry and labor have." "The revision of the tariff and some kind of legislation that will help the farmer market his produce and livestock in an orderly way." "All farm products should at least have a high protective tariff. American markets for American farmers. Keep out China's eggs and Danish butter. Keep out Argentine beef and corn. Enforce pure food act and advertise the value of meat as food." "The passage of some law or measure to protect the farmer similar to the protective tariff for manufacturers." "In regard to legislation by Congress, unquestionably something should be done; but what? I do not believe in price fixing or control, but under present conditions the farmer is entitled to be placed on an equality with labor and industry. My idea is that, given an equal opportunity, the law of supply and demand will govern equitably, and any industry that can not stand on its own feet should fall." "If the tariff were taken off of what we buy, perhaps we wouldn't need any price fixing to help us on what we sell." "Either repeal the high protective tariff or pass a bill such as the McNary-Haugen bill to make tariff effective on farm products."

The final question was, "If not legislative action, what then is the greatest need of farmers?" "Organization," answered 26 per cent; while 24 per cent replied, "Cooperation." Among the replies to this questionnaire we find a great diversity of opinion, much of which had been expressed in answer to preceding questions. A few individual answers were: "Better selling agencies." "Drop politics and vote for the best man for the place." "Quit talking and keep hitting." "To stand up and fight for our rights." "Reduction in taxes and economy in Government." "Too much advice and too many people telling us how to run our business." "To take more interest in government and politics instead of leaving everything to the other fellow who generally is not for us." "The question of the farmer will not be solved by legislation, but rather by education. Farmers must reduce the cost of production, and this must be done by means of education. Legislation and cooperation will not have much influence on cost of production. Agriculture must be emphasized in the rural schools so it will reach more children."

Some seven years ago and near the close of the Wilson administration, in a speech here in the House, I briefly reviewed the seven years through which the country had just passed, years marked by unprecedented prosperity for the farmer. At that time I expressed the fear that, as in Pharoah's dream, the period of plenty, the years of the fat kine through which we had just passed, might be followed by years of adversity, years of "lean kine" and "blasted corn upon the stalk." So far as the farm is concerned, my fears were well founded. Until recently, though, the great cities continued to enjoy prosperity, the people there piling up fortunes, while in the rural regions there was wreck and ruin.

A year ago, in discussing the farm situation, I gave it as my opinion that the big, self-satisfied cities could not hope permanently to prosper at the expense of the country. I predicted that the time would come when they, too, must "take the count." Washington papers tell of the arrival here of "General" Coxey, who 34 years ago led upon Washington his famous "army" of 5,000 unemployed, and who holds that with 5,500,000 people now out of work, present conditions are similar to the crisis in 1894. This unemployment is confined to no one city. The New York Times tells of "lodging houses crowded to capacity with men who want work but can not find it, while the employment agencies struggle with hordes of applicants for jobs that do not exist."

The seriousness of the situation, long denied, is now generally conceded. As to conditions in the country, few now claim that there is prosperity for the farmer. In fact, more figures than anyone will ever take the time to read have been inserted in the RECORD to show farm losses since 1920. I shall insert none of these official figures. A fact now conceded by all needs no such proof.

I might quote at length from the rural press, ever close to the farmer and his family and always the champion of the country community. I shall, though, include but one clipping. This is from a county seat weekly, Republican in politics, whose able editor says:

> Farmers are coming in and saying they don't know how they are going to pull through. They say their debts and their interest is eating them up like a cancer. People living in town say they are harder pressed than they ever were. Everything considered, the day is dark as night for a lot of people. What is true in and around our little city is true all over the State of Missouri, in the big towns and in the little towns. This is the report brought here by the big daily papers and by traveling salesmen. These traveling salesmen declare that they are selling fewer goods to retail merchants than ever before.

A letter from one farmer in my home county is typical of hundreds. He says:

> I hope you can see your way clear to do all you can for the passage of the McNary-Haugen bill. It may not be a cure-all for our farm ills, but we are anxious to give it a trial. Farmers are grabbing at straws, just as a drowning man would. We are staggering under taxation and increased cost of our farm operations, together with lower prices for what we have to sell. Taxes are increasing at an alarming speed. If the eastern capitalist could see the number of farm owners who are being closed out through sheriffs' sales, they surely would be willing for us to have some relief. While big business is being looked after, why should the farmer be neglected?

The country approaches a crisis. The farmer after a long, hard fight asks, "What can we do?" He can not work harder, he can not put in longer hours. There is an end to human endurance. He is not a bolshevist. The replies from the hundreds of Missouri farmers to which I have referred are not intemperate. They make no demands and suggest no action that is unreasonable. In short, all that the farmer asks is a "square deal" for himself and his family. Longer denied this, he knows that he must fail. But I would warn this Congress that when he goes down he will not go alone.

Mr. BUCHANAN. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, at the south entrance to the basement of the House Office Building there is a truck, the body of which was specially built in Philadelphia to transport between cities, with a secret compartment in it, one hundred and twenty 5-gallon cans of intoxicating liquors. The body is built specially on a Republic chassis. The tires on the front wheels are half again as large as the ordinary tires on a truck to carry the load it is expected this truck would carry. I wish every Congressman would go there and look at it. Unless you know the combination it would take you 30 minutes to find that

secret compartment, but when you are on to the combination, by removing three bolts you open a secret panel, and there is the compartment that holds one hundred and twenty 5-gallon cans. The owner of that truck testified before our Gibson committee to-day, under oath, that he had it specially made to transport liquor, that he was under contract with three prominent bootleggers, whose names and addresses he gave us here in the District, and that they were to pay him $175 a load for bringing it into Washington; that since last summer he has been engaged with that truck in doing nothing else than bringing in liquor. He has brought here load after load from Philadelphia, from Lancaster, from Chester, and from Baltimore, under police protection, and he said that when he had it built he was assured by these three bootleggers that he would have police protection, both in the places where he got it and here in Washington, and that he has had it for every load but one, when recently he was hijacked here by policemen and had his truckload of whisky stolen from him.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In a moment, and then I will yield. His two drivers, who have driven that truck for him on all these loads, testified before our Gibson committee under oath to-day that since last summer they had been engaged in bringing that truck here into Washington full of liquor from these various places under police protection, and that they knew when they engaged in the business that they would have police protection; and that they have never been bothered by police anywhere except on the last load, when they were hijacked by two policemen and their liquor stolen from them. They said they were bringing in the last load from Philadelphia, which embraced not only these 5-gallon cans of intoxicating liquors but also five kegs of Scotch malt from which these bootleggers make Scotch whiskey; that when they reached Washington and came in on the Bladensburg Road and down Maryland Avenue to Fourteenth Street at 5 o'clock in the morning, when it was still dark, a policeman—whose name they gave and whom they identified among five different policemen—stopped them and had them get out, and told them to show him that special compartment where the liquor was; and then he had them drive around another street where another policeman met him; and they told these drivers that if they had any regard for their future and their families to skin out and run, and that they would not be caught; that the policeman said: "We can not run fast; we won't catch you," and deliberately let them get away; and then the two policemen hijacked that load of liquor. Then in the secret hours of night, at a professional bondsman's house here, after the policemen had been identified by these drivers, we learn that these policemen with these three bootleggers had a secret conference and agreed to give most of the liquor back to the bootleggers if they were not to be prosecuted by them.

That is what goes on in this Nation's Capital, when we have such distinguished scientific speeches as we had to-day from our distinguished friend from New York [Mr. SIROVICH].

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. That is what goes on in the Nation's Capital when the bootleggers think that Congress applauds subjects that they are specially and vitally interested in.

Mr. O'CONNOR of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In a moment. No one has a higher regard personally than I for our distinguished and talented colleague from New York, Doctor SIROVICH. I think just as much of him as you do. I think his speech was just as scientific as you thought, but it is improvident; it is not for the good of the cause nor the good of the law that such speeches are made in the Halls of Congress.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield there?

Mr. BLANTON. In a moment I will yield.

Mr. SCHAFER. All right; we will remember that.

Mr. BLANTON. During my investigation of former Commissioner Fenning, I called attention to the fact that there were White trucks that for so much per truck load by the prince of bootleggers in Baltimore would bring not corn whisky but the finest Scotch, which came on his own yacht to Baltimore—that for so much a truck load they had been bringing it into Washington under police protection, and it has been going on ever since. It did not stop with the ousting of Commissioner Fenning. There is a higher up now in that police department that must be put out of office, because he is not enforcing the law.

We have one of the finest police departments here in the world. Most of the men are splendid, fine men, who want to do their duty, but when there is rottenness at the head of it, that demoralizes the whole force.

It ought to be stopped, and word ought to go out from the Halls of Congress to every bootlegger in the Nation and to the police force of this District, and to the commissioners, that this Congress stands for the strict enforcement of the law. Will the gentleman from Wisconsin [Mr. SCHAFER] O. K. that?

Mr. SCHAFER. I am always in favor of enforcing the laws on the statute books, and as to all prohibition legislation; but I also assert my right to favor the amendment of the existing law and the amendment to the Constitution.

Mr. BLANTON. You would have to modify the Constitution first, would you not?

Mr. SCHAFER. No. The Constitution does not say that five-eighths of 1 per cent is in violation of the Constitution.

Mr. BLANTON. The modification that would satisfy the gentleman from Wisconsin and his thirsty constituents would have to be such that you could buy intoxicating liquor. Is not that so?

Mr. SCHAFER. No; I do not believe that 2¾ per cent by weight is intoxicating.

Mr. BLANTON. Oh, the gentleman from Wisconsin is splitting hairs. I do not believe the gentleman to be socialistic, but he is getting perilously near the border line on that subject.

Mr. O'CONNOR of Louisiana. In view of the fact that the effect of the speech to which the gentleman refers would tend to decrease the quantity of liquor drunk, why should you object to it?

Mr. BLANTON. I will tell you. When a man now buys liquor from a bootlegger he knows that he takes his life into his own hands, and that knowledge deters him from buying it. But if you can send a specially constructed truck that transports liquor forbidden by law and bring it here to the United States Capital, 600 gallons at a load, if it were not poisoned you would have it sold and used indiscriminately by the people of this District to their great detriment. But those, many of them, who otherwise might buy and drink it do not do so generally when they realize that it may be poisoned, as many of them are as much afraid of it as they are afraid of the bite of a rattlesnake.

We, who are Members of Congress, who have made these laws ought to uphold the strict enforcement of them. You will remember that two years ago this month one of our House Office policemen, a fine fellow, named George H. Chorley, apprehended a bootlegger named George L. Cassidy bringing whisky into the House Office Building. You will remember that Cassidy was called the "Green hat man." He had already delivered one load of bottled whisky into the House Office Building and was seeking to bring in his second load when Chorley caught him. He then had four quart bottles of whisky in his satchel. I personally saw this whisky. Our colleague from Ohio, Mr. MURPHY, saw it. Our colleague from Michigan, Mr. CRAMTON, saw it. Our colleague from Ohio, Mr. COOPER, saw it. Several other colleagues saw it. Policeman Chorley has been ready at all times to appear and testify against this bootlegger, yet the district attorney of this great city of Washington has never yet brought this bootlegger to trial, and it was a whole year before he had him indicted. And he has been indicted now for about a year, and yet this district attorney's office has never yet brought him to trial. There ought to be a complete cleaning up made of our district attorney's office from top to bottom of it.

You will remember the colored brute who confessed to assaulting and murdering in cold blood the poor telephone girl between the Capitol and the Congressional Library has not yet been electrocuted. Why has he not been? What is causing the delay? The white man who, several months later, murdered a woman in Virginia near by has been hung months ago, so long that people have almost forgotten about it. Just why is it that the law is enforced so slowly, and many times not at all, by our district attorney's office here? There must be a housecleaning before long, and we must do some clean sweeping when the time comes.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SANDLIN. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. MEAD].

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes.

Mr. MEAD. Mr. Chairman, Members of Congress, in bringing to the attention of the Congress and the country the serious question of unemployment, I am not prompted by partisan motives, but with a sincere desire to join with others who are interested in securing the approval of legislation which shall provide for a broad and comprehensive study of the question as well as to suggest to Congress and the country a policy or pro-

gram which will reduce the number of our unemployed to its lowest possible minimum.

Next to universal peace the biggest problem of our day in this country as well as in every other country is the great problem of unemployment. Its proper solution will relieve many other perplexing problems, including our agricultural problem. It will also reduce the tax burdens now overwhelming our cities, towns, and villages. It will greatly lessen the work now forced upon social service and charity organizations. It will decrease the number now housed in almshouses and other abiding places throughout the land. It will sharply decrease the temptation that prompts men to crime, with a consequent diminishing number of those held in solitary confinement. In a word, it will supplant the misery and grief that accompanies great periods of industrial depression with the contentment and happiness that goes with steady, uninterrupted employment.

Much of our trouble has its source in the tremendous increase in production brought about by modern machinery, mass production, and the consolidating and merging of separate industrial units into one gigantic corporation, which permits of more efficient methods of production. I find the following information on this subject in the 1926 edition of the Yearbook of the United States Department of Commerce and also from the Handbook of Labor Statistics from the United States Bureau of Labor Statistics.

The increase in production as well as the increase in production per worker and per hour of work has been tremendous in the last generation. The United States Department of Commerce made a study of the question for the period between 1899 and 1925. Nearly half as much again is produced in agriculture. Three and a half times as much is produced in mining. Two and three-fourths times as much is produced in manufactures. Nearly three times as much output has occurred in railway transportation.

More workers have been occupied in these industries except in agriculture. Output per worker, therefore, is important. In agriculture, manufactures, and railway transportation output each worker in 1925 produced nearly one and one-half times as much as 25 years ago. In mining each worker produced almost exactly twice as much.

These are not expressed in terms of prices but in terms of things themselves. For example, it would mean that the miner of 1899 produced a ton, whereas the miner of 1925 produced about two tons, or to be exact, one and ninety-nine hundredths tons.

If it is value of output that is wanted, though this does not tell us as much, the output per farmer in prices was three and a half times as much; per miner was four times as much; per manufacturing worker was nearly three times as much; and per railway man was over twice as much

The Department of Commerce presents figures for the period since the war. By 1925 there were from 7 to 9 per cent fewer workers in agriculture, manufactures, and on railways than in 1919 and the same number of miners. Yet those still at work produced from 5 to 30 per cent more, varying from industry to industry, and each worker produced from 15 to 40 per cent more than each worker had produced the year after the war ended.

The United States Department of Labor adds to those figures and places them on an hourly basis. Anthracite workers produced no more and even slightly less in 1924 than in 1913. Bituminous workers per shift produced, however, nearly a ton more.

In a New England cotton mill each worker per hour of work produced eight times as much as in 1838 and two and a third times as much as in 1890. In 1925 each worker produced nearly three-fifths more per hour than at the end of the war.

Here are the figures for the increase in production per hour of work: Boots and shoes, one-sixteenth more; tanning, slaughtering, and cane-sugar refining, one-fourth more; flour milling and paper and pulp, one-third more; blast furnaces, one-half more; steel works and rolling mills and cement works, three-fifths more; petroleum refining, four-fifths more; automobiles, two and three-fourths more; and rubber tires, over three times more. For each hour of work done per man on railways now there is two and a half times as much traffic hauled as 35 years ago. There is 40 per cent more traffic hauled per man per hour than before the war.

In any well-organized society this increase in the volume of production would mean a similar increase in welfare of all classes of society. However, this is not the case; wages have not gone up equally with the increase of production, although average wages have shown an increase in the more recent part of this period of larger production. The result is that one class of our industrial society has not received its fair share of this larger productivity. Nearly all the excess which should have gone to the working forces has been received by the richer classes of our society. They in turn saved and converted this surplus into capital and instruments of production and in that way further increasing the total products of industry. The result of this unjust system is that our country is now in a condition of industrial depression. By some it is termed a mild depression or a slowing down of the wheels of industry. Nevertheless it is general; it embraces nearly all industry in every part of the country. We are producing more goods to-day than we are able to sell, but this excessive production does not by any means exceed the popular wants of our people. If those who would and need to consume more had the necessary money to satisfy their desires all of the goods produced by industry would find no difficulty in securing a ready market.

Many of our industries as a result of the present situation are operating only part time. Among these industries can be listed the textiles, shoes, flour, steel, agriculture, railroads, and many others. Every one of these industries could be maintained in steady operation if an increase of wages with its attendant greater buying power could be given to the workers who are now receiving meager incomes. If necessary, and I for one believe that it is, a shorter work day must be given to the employees of industry so as to provide sufficient employment to take care of those who are supplanted by machines and other labor-saving devices. Thirty years ago John A. Hobson, a British economist, stated the problem as it actually exists today.

It is a problem of underconsumption and not one of overproduction. Too much of the national income is saved and not enough consumed. Those who have the power to consume more have not the desire while those who have the desire have not the power.

Therefore, our remedy is to increase the consuming power of our working class and to decrease the saving power of the wealthier class. Business can not be kept going unless its products are consumed and unless our workers have steady employment and the necessary power to make their wants effective, the products of industry will not be consumed. In theory the remedy is simple enough. Increase the income of the lowest paid classes, the working classes, and by doing so you increase their power to consume and in that way you bring about an increase in employment. However, we are up against a practical proposition that will not be solved as easily as all that. To shorten the workers' hours may necessitate a general minimum wage law but a recent decision of the Supreme Court takes that out of the question. Minimum wage laws in the several States as well as by agreement with labor unions will be most helpful. Outlawing the 10 and 12 hour day, substituting a 5-day week would amount to an increase in wages in some occupations but its benefits would not entirely relieve the situation. Other suggestions include pension and retirement legislation as well as the adoption by private enterprise of a uniform retirement system which would take from industry many of our aged workers, better child labor laws in some of the States where they are not on a par with the more progressive commonwealths of the Nation. All of these recommendations should be considered by a legislative committee which my resolution would create in connection with this unemployment crisis.

I am not optimistic about the adoption of an effective remedy in the near future. However, we must realize the seriousness of the evil and when it is appreciated by the intelligent business men of our Nation I am sure they will join in its proper solution. The problem to-day is one of distribution and if our industrial leaders who have proven their superb efficiency with regard to increasing production will turn their attention to this present evil they will soon remedy the present methods of distribution.

I am therefore going to introduce a resolution calling for the creation of a joint committee to be appointed by the House and Senate to investigate this question of unemployment. Living in what has been termed by our President a most prosperous era, we find an army of nearly 4,000,000 people tramping the streets of our industrial cities and our rural communities looking for work. We find the almshouses and the other abiding places of the Nation filled with our unfortunate fellow Americans who want work, not charity.

This joint committee, in conjunction with the Labor Department, could initiate a study of the question and recommend remedial legislation to Congress, and they could authorize the Labor Department to furnish us constantly and regularly with information as to the number of men unemployed as well as the nature and the character of the work they had been doing, so that with this information we could intelligently consider this all-important problem of unemployment. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. SCHAFER].

The CHAIRMAN. The gentleman from Wisconsin is recognized for five minutes.

Mr. SCHAFER. Mr. Chairman, ladies and gentlemen of the House, I did not want to discuss prohibition at this time, but in view of the interjection of the prohibition questions by the distinguished gentleman from Texas [Mr. BLANTON], who aspires to sit in the body at the other end of the Capitol in the near future, I will say a few words on the matter that he has brought to our attention.

I wish to state that if any bootlegger has violated the law and has received protection from police officials, I am in favor of having those police officials, be they in high or in low positions in the department, sent to the penitentiary at Atlanta.

I can not let the moment pass by without referring to the criticism by the gentleman from Texas of the wonderful address delivered this afternoon by our distinguished colleague from New York [Mr. SIROVICH]. The able, interesting, and educational speech of the gentleman from New York was appreciated and applauded by both those classed as "dry" and "wet," clearly showing that the gentleman's speech was not a bad thing for the country, as believed by the gentleman from Texas [Mr. BLANTON]. I would like to call the attention of the gentleman from Texas, who is not here at present, although I asked him to remain after delivering his speech——

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield there?

Mr. SCHAFER. In a minute. I would like to call his attention to the fact that about a year ago, on Lincoln's birthday, the then acknowledged leader of the dry forces in the House of Representatives, the gentleman from Georgia, Mr. Upshaw, delivered a prohibition address in the guise of a Lincoln memorial address, and he had on this very table, not pint bottles which formerly contained intoxicating liquor but quart bottles, much larger than any of the exhibits of the gentleman from New York [Mr. SIROVICH], which exhibits were objected to by the present dry leader in the House, the gentleman from Michigan. Mr. Upshaw in the course of his remarks informed the House and the people of the country that the bottles exhibited by him were found in the Capitol and in the House Office Building.

If the gentleman from New York in making his constructive address to-day will cause citizens of the Nation to disrespect the laws and go wrong because of bringing in exhibits, as the gentleman from Texas believes, then I say the former dry leader, the gentleman from Georgia, Mr. Upshaw, established a precedent, which should have been criticized by his assistant dry leader, the gentleman from Texas [Mr. BLANTON].

I sincerely hope that in the forthcoming presidential campaign the Anti-Saloon League will put a complete ticket in the field on the Prohibition ticket and confine the issue upon which candidates will run to that of prohibition. I would suggest that they name the distinguished gentleman from Texas, who is now a candidate for Senator, as their presidential candidate, and have the very notorious gentleman from New York, Mr. Kresge, as his running mate for the Vice Presidency. I refer to the Mr. Kresge who was recently found by the courts of this land to be maintaining a love nest, and who a few months ago was the financial angel who contributed $500,000 to the slush fund of the Anti-Saloon League.

Mr. MEAD. Will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. MEAD. I would like, in justification of the great State of New York, which I represent, to move Mr. Kresge to Michigan, because I think he is a citizen of Michigan, the home of Mr. CRAMTON, rather than a citizen of New York, the home of Mr. SIROVICH.

Mr. SCHAFER. But was not that love nest in New York?

Mr. MEAD. Yes; he had the love nest there.

Mr. SCHAFER. And was not his wife's divorce, suit for which was filed after her discovery of the love nest, granted in New York?

Mr. MEAD. Yes; but New York is such a big city that he might have been able to maintain a love nest there, but we pride ourselves on the fact that he does not belong to New York.

Mr. SCHAFER. After these distinguished dry gentlemen are elected on the prohibition ticket, I would suggest that the bellwethers of the Anti-Saloon League be appointed to positions in the Cabinet and that Cabinet should certainly include the former dry leader in the House, Mr. Upshaw, who, at the meeting where Mr. Kresge donated his $500,000 to the slush funds of the Anti-Saloon League, sang "Praise God from whom all blessings flow."

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

The CHAIRMAN. All time having expired, the Clerk will read the bill for enactment.

The Clerk read as follows:

For Secretary of Agriculture, $15,000; Assistant Secretary and other personal services in the District of Columbia, including $7,294 for extra labor and emergency employments, in accordance with the classification act of 1923, and for personal services in the field, $642,000; in all, $657,000, of which amount not to exceed $633,800 may be expended for personal services in the District of Columbia: *Provided*, That in expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade except that in unusually meritorious cases of one position in a grade advances may be made to rates higher than the average of the compensation rates of the grade but not more often than once in any fiscal year and then only to the next higher rate: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade, in the same or different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923, and is specifically authorized by other law: *Provided further*, That the Secretary of Agriculture is authorized to contract for stenographic reporting services, and the appropriations made in this act shall be available for such purposes.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration H. R. 11577, the Agricultural Department appropriation bill, and had come to no resolution thereon.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 7201. An act to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds;

H. R. 5818. An act authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis.;

H. R. 7948. An act to extend the times for commencing and completing the construction of a bridge across the Delaware River at or near Burlington, N. J.;

H. R. 9136. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes;

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.;

H. R. 10635. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes;

H. J. Res. 141. Joint resolution to authorize the President to invite the Government of Great Britain to participate in the celebration of the sesquicentennial of the discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein; and

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. J. Res. 88. Joint resolution authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers.

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval a bill of the House of the following title:

H. R. 8227. An act authorizing the Sunbury Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Susquehanna River at or near Bainbridge Street, in the city of Sunbury, Pa.

AGRICULTURE APPROPRIATION BILL

The committee resumed its session.

Mr. DICKINSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 11577), making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11577, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of H. R. 11577, the Agricultural Department appropriation bill, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. JONES. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JONES: Page 3, line 11, after the word "purposes" insert: "*Provided further*, That no part of the funds appropriated by this act shall be used for the payment of any officer or employee of the Department of Agriculture who, as such officer or employee, or on behalf of the department or any division, commission, or bureau thereof, issues or causes to be issued, any prediction, oral or written, or forecast with respect to future prices of agricultural products or the trend of same."

Mr. DICKINSON of Iowa. Mr. Chairman, I make the point of order that that is not germane to this paragraph of the bill.

Mr. JONES. Mr. Chairman, I would like to be heard on that. This amendment is offered where the salaries of the department are provided for. That is the place where a limitation would naturally be placed. I provide that no part of the funds appropriated by this bill shall be paid for the salaries of these people if they give out these predictions. Some years ago, when an amendment was offered to the naval bill, in which provision was made for the discharge of minors, it was made to the salary provision and had to be made that way in order to make it in order as a limitation.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. JONES. Yes.

Mr. DICKINSON of Iowa. There is not a single, solitary item in this section of the bill that has to do with the Bureau of Economics. This is absolutely for the Secretary's office.

Mr. JONES. If the gentleman will read it, he will see that it is for the Secretary of Agriculture, Assistant Secretary, and other personal services in the District of Columbia, and there are also two or three provisions providing not only for the people here in Washington but for those in the field service.

Mr. DICKINSON of Iowa. But it has nothing to do with the bureau that issues these forecasts.

Mr. JONES. As a limitation on the salary provision it has a tendency to restrict expenditures and by terms applies to all the bill, and therefore, as I see it, it can only come at this point in the bill, without being subject to the point of order that it is legislation on an appropriation bill. The provision of the amendment is that no part of the funds herein appropriated shall be used for the payment of any official or employee of the department who gives out these price predictions.

Mr. DICKINSON of Iowa. And none of the employees paid under this provision gets out any price prediction, unless the gentleman wants to make it apply to the Secretary.

Mr. JONES. I say that no official who is provided for under the first paragraph of the bill shall receive his salary if he gives out these predictions. In other words, it is strictly a limitation on the expenditure for salaries. It could not go anywhere else. There was quite a contest when we had up the provision about the discharge of minors enlisted in the Navy, as to whether it was permissible to offer this kind of an amendment, and the Chair ruled that it was in order.

That was offered where the salary provision appeared, and it provided that no part of the funds appropriated by the whole bill should be used for the payment of any officer who enlisted a minor or a boy under 21 years of age without the written consent of his parents or guardian. It is strictly a limitation, if the rulings heretofore made are right, and strictly a restriction.

It does not make any difference about the substance, because it is not a question of the germaneness of the activity itself, but is a question of a limitation on the expenditure.

The CHAIRMAN. Will the gentleman permit an interruption by the Chair?

Mr. JONES. Certainly.

The CHAIRMAN. Will the gentleman quote the paragraph of the naval bill to which he refers where the provision with respect to minors was inserted?

Mr. JONES. I do not recall that; but I can quote almost literally the amendment, because I helped at the time to draft the amendment, and am therefore familiar with its provisions.

The CHAIRMAN. Can the gentleman offer the citation?

Mr. JONES. I can not offer the citation just now, because I thought general debate would last all day, and I did not expect this item to be reached this afternoon; but it was some two or three years ago when the appropriation bill for the Navy was up, and, as I remember, the gentleman from Texas [Mr. CONNALLY] offered an amendment worded practically in this way. It was offered to the salary provision with respect to officers and the amendment provided that no part of the funds appropriated by the act should be available for the pay of any officer who enlisted a boy under 21 years of age without the written consent of his parents or guardian. I also offered an amendment to the amendment, and both amendments were adopted.

There was quite a discussion in the committee as to whether or not it was germane, and as to whether or not it was a limitation. The Chair ruled that, being strictly a limitation, this was the proper place to offer the amendment, and also ruled that the amendment was not subject to the point of order.

This is practically the situation we have here. The Chair will note the suggestion that the only way this kind of an amendment can be put on an appropriation bill is to put it in the form of a limitation. This is the only way in which any such provisions can be put on an appropriation bill, because otherwise it would be legislation. This is a limitation on expenditures. Under the provision which sets out the compensation and provides for the compensation of the Secretary and all of the employees in Washington and in the field there is a general provision for the employment and pay of these officers. I am now putting the limitation in a form that would tend to reduce expenditures, and that is the theory on which a similar amendment was held in order; that is, if any officer does these things, it will reduce the expenditures because his salary could not be paid. This is the theory on which it may be presented, and it is the theory on which it is germane to this paragraph; and if it is not germane to the paragraph where the salaries are provided for, as a limitation, I pray the Chair where would it be germane and where would it be applicable?

Time after time this kind of an amendment has been offered. The question was clearly discussed when this question was up before with respect to the Navy bill, and a number of citations were given. The Chair, after thoroughly considering all of them, ruled that it was a limitation, and it was held in order. As I see it, the only theory on which this amendment could be offered anywhere in the bill is on the theory that it is a limitation on expenditures placed in an appropriation bill, and is therefore germane.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard?

Mr. DICKINSON of Iowa. Mr. Chairman, a careful reading of this amendment shows it is not a limitation but is purely a penalty clause upon the officers of the department for doing certain things. If it is to be a limitation applying to the entire department, it would come at the end of the bill. I do not see how it can affect anything here except the item of $91,000, and none of these employees is involved in this type of work.

The CHAIRMAN. The Chair would call the gentleman's attention to the fact that the gentleman from Texas does not offer the amendment after line 14, page 3, where the $91,000 appears, but at the end of line 11, after the word "purposes."

Mr. DICKINSON of Iowa. Yes; that is true.

The CHAIRMAN. So the Chair would consider it relates back to the other sum, near the top of page 2.

Mr. DICKINSON of Iowa. With reference to the entire salaries of the department.

The CHAIRMAN. The amendment as offered by the gentleman from Texas is to be inserted on page 3, line 11, after the

word "purposes," and the gentleman from Iowa has just referred to $91,000. These figures do not appear until the end of line 14, on page 3, and therefore it would seem to the Chair that the limitation, if it is a limitation, would apply to the figures further back, and therefore the argument of the gentleman that it applies only to the employees of the mechanical shops and power plant of the Department of Agriculture would not be well taken.

Mr. DICKINSON of Iowa. I suggest for the consideration of the Chair that this is only a penalty clause rather than a limitation.

Mr. JONES. That same point was made as to the other provision which I have called the Chair's attention to.

Mr. DICKINSON of Iowa. The proper place would be at the end of the bill.

Mr. JONES. A substitute for the whole bill can be offered after the first paragraph.

Mr. DICKINSON of Iowa. That is where the substitution is in the nature of an amendment?

Mr. JONES. Anything that affects the whole bill actually comes at the beginning or at the conclusion of the bill.

Mr. SANDLIN. Will the gentleman yield?

Mr. JONES. Yes.

Mr. SANDLIN. Does the gentleman's amendment apply to appropriations further on in the bill?

Mr. JONES. Yes.

Mr. SANDLIN. From what the Chair has just said it would imply that he thinks it only goes to the part preceding the amendment.

Mr. JONES. It would apply to appropriations further on.

Mr. SANDLIN. If it did not apply to appropriations carried further on in the bill it would not accomplish the purpose which the gentleman seeks.

Mr. JONES. It will apply to appropriations further on in the bill.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Texas offers an amendment at the end of line 11 making provision that none of the funds appropriated by this act shall be used for the payment of the salary of any employee of the Department of Agriculture who makes a forecast as to the future price of agricultural products or the trend of the same.

The gentleman from Iowa regards this as not germane to the paragraph and in the nature of a penalty rather than in the nature of a limitation. The gentleman from Texas made reference to language similar to this in the naval bill in March, 1924. On that occasion there appears to have been a series of amendments offered by the gentleman from Texas [Mr. CONNALLY], and a point of order was made against the amendments by the gentleman from Ohio [Mr. BEGG]. After argument the Chairman of the Committee of the Whole, the gentleman from Illinois [Mr. GRAHAM], after quoting a decision made the previous year by the gentleman from Ohio [Mr. LONGWORTH], held that it was a proper amendment, that it was a limitation, and overruled the point of order. In view of the decisions of these high authorities the Chair feels constrained to hold that the amendment offered by the gentleman from Texas is in order and overrules the point of order.

Mr. JONES. Mr. Chairman, I think the committee should accept this amendment. The provision in the bill for giving facts in reference to matters that might affect prices is not interfered with in any way. The amendment which I have drafted will only forbid the actual forecast of prices. Everyone from the cotton section remembers that last fall the department, when cotton was selling at a good figure, gave out a forecast of lower prices and cotton tumbled several dollars a bale. This caused great losses to the cotton grower. I am told that price predictions were given as to wheat two or three years ago, though I have no personal knowledge as to that. I think it is perfectly all right for the department to give all the facts. I think the committee wisely put an appropriation in the bill providing that the department may give out the facts, but when they try to determine what the price is going to be that is a mere conclusion from facts which anyone else is at liberty to draw, and in many instances other people are in a better position to forecast these prices.

Mr. BLACK of Texas. And an added vice to it is that whenever the department or the Government makes a forecast of that kind it inevitably has resulted in a lower price. It can have no other effect. I am heartily in favor of the amendment and I hope it will be adopted by the House.

Mr. JONES. I thank my colleague for that suggestion. He is entirely correct. He has made a thorough study of this problem, and I wish to thank him. I think the committee should agree to the amendment for the further reason that these predictions, when they have the effect they had last fall, get the people out of humor with the department and it tends to hamper their work in other lines. They resent the activity of the department and it tends to bring it into disrepute and into a bad light without accomplishing any good purpose. The department can furnish all the facts that are necessary on which conclusions can be drawn. This amendment will not interfere in any way with their legitimate activities. They can secure those facts and make them known to the public. If there is any good purpose that can possibly be served by the department predicting a change of prices, and especially lower prices, which they did last fall, I do not know what it is.

Last fall it was given out during the marketing season, or at least it was taken advantage of during that season. There was an upward trend at the time. That is when the farmer sells the most of his commodity. The price immediately tumbled several dollars a bale, causing a great loss.

The same thing might happen in wheat or other commodities. The department should, in my judgment, limit its findings to the facts themselves. We want any and all facts. When they go into the realm of speculation, then a desk man who has accumulated these things is more likely to make mistakes than a man whose business it is to handle the practical side. I hope the committee will adopt the amendment.

Mr. GARRETT of Tennessee. Mr. Chairman, of course, we all recognize the fact that this is rather a crude way to reach an end. That is not the fault of the gentleman from Texas [Mr. JONES]. He is dealing with the question in the only way that he can deal with it under the parliamentary situation. I am going to vote for the amendment. I am not given to trying to find things in the departments of the Government at which to level captious criticism, but in my deliberate opinion the action of the Department of Agriculture last September, in giving out that statement, expressing an opinion as to the nonjustification of the price that was then being paid for cotton, was the most unwarranted, the most brutal act unaccompanied by corruption that has occurred within my service in the Congress of the United States.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. LAGUARDIA. Was it the information that was sent out in the usual bulletin, or was it the construction that was put on that information by some manipulators in my city and sent down into the cotton section of the country? Was it not the latter that did the most damage?

Mr. GARRETT of Tennessee. The statement resulted in a fall in the market, and whether it was by the manipulation of gamblers——

Mr. LAGUARDIA. That is my understanding.

Mr. GARRETT of Tennessee. I do not know. Certainly I know that the statement could have been of benefit to nobody on earth except those who had theretofore sold cotton short. Here is what was the situation, and I hope that the committee will bear with me for a moment, because I do hope that this thing will never occur again. The early estimates based on facts, such as the Department of Agriculture had been gathering for many years, were given as to how many bales of cotton would be produced.

The market adjusted itself to that sort of condition, based on the information that was had from this Government source coupled with other information, and upon the basis of those reports spot cotton became bullish. The price of cotton began to go up and suddenly, without warning, there came from the Department of Agriculture a statement, not of fact, not one to the effect that there would be more cotton produced than the earlier estimate indicated, but a gratuitous statement of opinion that notwithstanding the accuracy of the estimate of production, the price that was then being paid was not justified. I do not know whether the Secretary of Agriculture had anything to do with it or not. He may never have seen that statement before it was issued. I do not undertake to say about that. He later assumed responsibility for it. He ought to have seen any such statement as that before it was issued, certainly.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. COLE of Iowa. Admitting that an error was made in that particular case—and, from the gentleman's statement, I am inclined to agree with him—would it be a good policy to adopt at the present time to take away from that department the power to issue informative information?

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GARRETT of Tennessee. Mr. Chairman, I ask unanimous consent to proceed for five minutes longer.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. This amendment, as I caught the reading of it, and I am sure that I am correct, does not take away from the department the authority to issue estimates of production based on the information which they gather. What it undertakes to take from the department is the authority to express a guess about the trend of prices. What is expected of the Department of Agriculture is to give the best information they can as to how much cotton is going to be produced or how much wheat is going to be produced, based on the crop conditions on the day that the reports come in. Here the Secretary of Agriculture, not giving the facts as to the production of bales of cotton, apparently not even basing his idea on the number of bales that he thought were going to be produced, volunteers to give out an official statement to the effect that the price being paid was too high. Let us follow that up for a moment. When they came to give out subsequent estimates of production, almost every estimate went down and down and down, and in the end there were actually fewer bales of cotton produced in 1927 than it was first thought in the early estimates would be produced. Nevertheless this peculiar thing occurred, one of the most remarkable things in the history of cotton marketing in all the years. Starting out with a crop estimate and prices based upon that crop estimate, and with the estimate thereafter, of actual production going down, down, down, notwithstanding the fact that in the end it was demonstrated that there was less cotton produced than the first estimate indicated would be produced, cotton continued to fall in price. That is an artificial condition. Bear in mind that the 1926 crop of cotton had been more nearly exhausted in the spinning, notwithstanding its tremendous size—nearly 19,000,000 bales—than any crop of cotton for many years. In other words, the spinners had taken more, and the 1926 crop was out of the way, and was nowhere where it could influence the market. The Secretary did not base anything on any hang-over cotton from 1926, but simply gave out the statement and lost to the South $80,000,000 to $100,000,000 by a paragraph not more than an inch long in the average newspaper, and then the surprising thing was that when called to task concerning it, the Secretary of Agriculture seemed surprised that anybody would pay any attention to anything that he said.

That was his explanation about it to the farmers. However, it had been done; it vitally affected the interests of the farmers, because you must remember that was in the very midst of the cotton marketing.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. LAGUARDIA. Did this particular report which caused all the trouble differ to any extent in phraseology and estimate from other previous reports?

Mr. GARRETT of Tennessee. This report did not have any estimate of production at all. It simply had the statement, without referring to production, that the trend of prices was downward, and the idea of it was that the price then being paid to the farmer—because it was the farmer who was then getting the money—the price then being paid to the farmer was not justified by the conditions.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, in every farm-relief bill that has been introduced into this House in the last five years most of the machinery of that whole bill revolved around the question of outlook and the forecast with reference to agriculture. It is my judgment that if you adopt this amendment you are not only going to prevent them from including the outlook and forecast but you are going to curtail the entire scope of the work of the Bureau of Economics in the Department of Agriculture.

I have already had before me the question of whether or not this matter of price and the limitation with reference to price was going to materially affect the work of this department. I have taken the last forecast issued in February, 1928, the very latest bulletin we have, and I have marked in red the amount of that work which would be cut out if you were to limit this department in the matter of price forecasts, and you are going absolutely to disorganize the whole outlook and forecasting work of the department and rendering hopeless much of the agricultural legislation that you are proposing here, because you would then have nothing in the Department of Agriculture which would give you information upon which a farm board could act.

And I want to say this, that when they are advised on the agricultural outlook, in the planting season, it is very necessary for the farmers that the matter of crop acreage and production would be reflected in the price when the crop matures.

Mr. GARRETT of Tennessee. There is no objection to that, but that is not what the department did. There is no objection to be made to the department's telling how much is produced and telling how many acres have been planted. That is desired.

Mr. DICKINSON of Iowa. But the very fact that you can not make any references to price simply means that they are going to give out here the announcement that you are going to have so many million bales and take your chances and let the speculators run their course. Now, if this information is going to be of any use to anybody, it ought to be of use to the producer, and it ought not to be a mere guess.

Mr. GARRETT of Tennessee. It should be information. The farmer does not want a guess.

Mr. DICKINSON of Iowa. If a price was given on cotton in the harvest season, that is something I do not approve of, but I do not approve of the price outlook they announced. I think they made a mistake. I do not think they should have gone into the matter of price determination, so far as that is concerned; but I do not want you to disorganize the bureau here and render it helpless by limiting this work simply because it has made one mistake.

Mr. JONES. I have so worded my amendment that it applies only to conclusions as to price. It has nothing to do with the factors that affect the price. They can give all the outlook as to production and the factors that might go to a man's conclusion as to the probable price. Some of the bills now pending would do that. But this amendment simply forbids their making predictions as to price.

Mr. DICKINSON of Iowa. The suggestion I make is simply this, that when you are giving out an outlook in the spring, very naturally the thing that determines the farmer in determining his acreage is the question of whether he will get reasonable return from his crop. On the whole the farmer naturally looks to a downward trend in these commodities, and this downward trend is indicated in these outlooks published in February, and that naturally has an effect on the farmer in determining his acreage.

Perhaps the Department of Economics made that one mistake. But I wonder whether, because the department made one mistake, you are going to disorganize this whole machinery of the bureau that has taken six years to build up; the machinery on which most of the agricultural activities discussed in this House are based, and the outlook and conditions which are going to guide the producers of this country in the future.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. DICKINSON of Iowa. I ask for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. OLDFIELD. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. OLDFIELD. I recall, Mr. Chairman, the statement in regard to the trend of the price in cotton, and I know that the farmers believe that that beat down the price of cotton very materially.

Mr. DICKINSON of Iowa. Just before this was given out by the Department of Agriculture, was not the price of cotton going down?

Mr. GARRETT of Tennessee. No, indeed; it was rising.

Mr. CRISP. The tendency was up.

Mr. OLDFIELD. The question I would like to ask the gentleman is this: Did the Secretary of Agriculture also forecast a downward trend in others products, like wheat and corn?

Mr. DICKINSON of Iowa. I am not familiar with those various commodities.

Mr. OLDFIELD. I never heard of it if he did. I am sure that if the Secretary of Agriculture had made the same sort of prediction about corn, wheat, and livestock, and it had the same effect it had on cotton, there would not be any objection to this amendment.

Mr. DICKINSON of Iowa. Is it not true that all of this simply emphasizes the fact that the department made one mistake in issuing a bulletin?

Mr. OLDFIELD. I am afraid the Secretary of Agriculture will make the same mistake, and we do not want him to make that mistake again.

Mr. GARRETT of Tennessee. We want to guard him against any possibility of making another mistake of this kind.

Mr. DICKINSON of Iowa. I do not want the department hampered in this way.

Mr. OLDFIELD. This man might not always be Secretary of Agriculture, and his successor might make the same mistake. I do not think this Secretary would make the same mistake, and he ought not to make it.

Mr. DICKINSON of Iowa. Gentlemen, talk about making one mistake. Let me read this to you from the annual report of the Secretary of Agriculture:

OUTLOOK CROP FORECASTS ACCURATE

Considering the recent development of this work and the lack of complete information on many points that must be considered, the conclusions presented in the outlook statements have been remarkably accurate. In even the earliest reports nearly 90 per cent of the outlook statements on individual commodities turned out to be correct, and in the 1925 report and the 1926 report subsequent events proved that more than 95 per cent of the statements were correct.

Mr. OLDFIELD. That does not say anything about prices. It only refers to the number of bales of cotton and the number of bushels of wheat, and so on.

Mr. DICKINSON of Iowa. All of this has to do with the agricultural outlook and the forecast as to what we are going to do in the future.

Mr. CARSS. Does it mention the price or the number of bales of cotton or bushels of wheat that will probably be produced?

Mr. DICKINSON of Iowa. It gives everything. The thing which I think is worrying most people about this is the advisability of these forecasts being made when the time of the harvest period comes on. I do not know how we can limit the time when that can be given out.

Mr. CARSS. If it did not mention the price that would probably prevail, would not the report be as informing and useful? Would it not be just as effective as if it did include the price?

Mr. DICKINSON of Iowa. Let me ask the gentleman this: Suppose you say we are going to have so many million bushels of corn or wheat—shall we leave it for the farmer to interpret it? As a matter of fact, he does not usually interpret it; the speculator interprets it, and I believe that is what has happened here; the speculators took advantage of this, and would you rather have the speculator make this interpretation for the producer or would you have the department do it for him?

Mr. CARSS. I do not want either one to make the interpretation.

Mr. DICKINSON of Iowa. Somebody has got to do it.

Mr. CARSS. I want to say that the farmer is not half as foolish as some people think. The farmer, when there is liable to be a great production, naturally figures on it.

Mr. BYRNS. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. BYRNS. I think the gentleman has already indicated his answer to the question I have in mind. Do I understand the gentleman from Iowa to take the position that an employee in the Agricultural Department, whose judgment may or may not be good, and who may or may not have full information with reference to what may occur in the future, should be given the authority to issue an opinion relative to the future prices of products under the stamp of the Government?

Mr. DICKINSON of Iowa. It is my judgment he should be permitted to indicate a future price trend, in view of the information he can secure under this bill—and if he has not the proper facilities for getting the information I want to give them to him—I believe he ought to be able to indicate the price trend on a commodity, because that is the very thing that determines the outlook with reference to the production.

Mr. BYRNS. The amendment offered by the gentleman from Texas does not in any way interfere with the right of the department and the duty of the department to acquire all that information?

Mr. JONES. Not at all.

Mr. DICKINSON of Iowa. But what about the price trend?

Mr. BYRNS. And the gentleman's amendment does not interfere with the right of the department to furnish that information to the public, but I can not agree with the gentleman that an employee in the Agricultural Department, whose judgment, as I say, may or may not be good, and who may know nothing about the subject, should be permitted, under the authority and stamp of the Government, to issue a statement to the country saying that in his opinion the future price is going to be high or low.

The CHAIRMAN. The time of the gentleman from Iowa has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. If we have competent men in the Bureau of Economics—active men—I think we should give them the fullest authority, and if we do not have such men we ought to get them. We believe they now have in that bureau the most competent men to be secured under existing circumstances. They have the best facilities and probably the most far-reaching facilities for acquiring this information. Now, if you take away from them the right to issue an indication as to the price trend you are curtailing the work we are organizing this whole department to do, and that is the question as to whether or not we should have an additional acreage of land planted in certain commodities.

Mr. BYRNS. The trouble with the gentleman's position is this: That he seeks to give these officials in the department—and I am not questioning their ability or their sincerity or honesty—the authority to issue an opinion as to what may happen in the future, and that opinion is backed by the whole Government of the United States.

Mr. DICKINSON of Iowa. Let me suggest to the gentleman from Tennessee that there are forecasts being issued by practically every business concern in this country. You get them from the National City Bank of New York on business affairs. They have to do with whether or not certain investments are going to be good or bad, and what is going to happen in business. Now, what you are to do here is to say to the Department of Agriculture, that is trying to be the friend of the farmer, that they can not go into this field and do the same thing for the farmer and the producers of these commodities, although business concerns do it for the man who is interested in the business lines of this country.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. DICKINSON of Iowa. I yield to the gentleman.

Mr. GARRETT of Tennessee. Let me say to the gentleman, first, we want no more such friends as those who, when cotton is selling at a good price, give out a statement of opinion which brings the price down. This is not friendly to the farmer, and let me say to the gentleman, that the gentleman is defending a policy which was never adopted before as to cotton. Whatever of policy there is about this, price-trend utterance in regard to cotton was new. It was never indulged in before last summer. The policy of the Congress has been to let the Department of Agriculture get facts as best it could, in regard to cotton production, and wheat production, and corn production, and potato production, and the production of various other farm products, and give out the information where all mankind might have it, but the Congress of the United States has never authorized the Department of Agriculture to give to the country its guess about price tendency or price trend, and I do not think it should ever do so.

Mr. DICKINSON of Iowa. Does the gentleman from Tennessee believe in forecasts at all?

Mr. GARRETT of Tennessee. As to facts of production. I do not want that fellow's opinion about what the price is going to be. Give me the facts of production. This is the way Congress, if I understand it correctly, has tried to limit the activities of the statistical or the economic bureau of the Department of Agriculture.

Mr. DICKINSON of Iowa. As a matter of fact the very purpose of this work is for the benefit of the producer. I concede that the prediction was not justifiable with reference to this one estimate on cotton and the price trend. I think they made a similar prediction with reference to wheat sometime ago.

Mr. GARRETT of Tennessee. The gentleman from Texas so stated. I do not personally know.

Mr. DICKINSON of Iowa. And I do not believe it is a bad thing for the farmers of the country to be told that if they raise so many hogs in the season of 1928 they are going to get a lower price for them in the fall of the year.

Mr. GARRETT of Tennessee. But that is not what they told the cotton farmers of the South.

Mr. DICKINSON of Iowa. I would like to say to the gentleman from Tennessee that I have already admitted they made a mistake, and I am willing to do my best to try to get them not to make a mistake of that kind again; but I believe that if you limit them on the question of outlook and forecast in price trend you are materially limiting the usefulness of this bureau, which is a most important bureau of the Department of Agriculture.

Mr. BUCHANAN. Mr. Chairman, let us not grow hysterical over a mistake of the past and by precipitant action injure the future.

There is a time, a place, a manner, and a method for doing all things that ought to be done. There is one way that this legislation ought to be framed, and an attempt to remedy an

evil, or a so-called evil, by an amendment or a limitation upon an appropriation bill that will run through the entire Bureau of Economics and cut into it here and there and cripple its activities is not the way this should be done.

My colleague, the gentleman from Texas [Mr. JONES], is on the legislative Committee on Agriculture. I understand there are several bills pending before that committee where they can conduct hearings and shape the legislation so they can accomplish what they want to accomplish and what I believe should be accomplished without injuring the other activities of this bureau.

Mr. JONES. Will the gentleman yield?

Mr. BUCHANAN. Yes; I yield.

Mr. JONES. But there are appropriations carried in this bill that might be under way before general legislation can be had, and this amendment affects this year's appropriation bill.

Mr. BUCHANAN. Oh, this appropriation is not effective until the next fiscal year and your legislative bill that would come out at this session would not be effective until the next fiscal year. They would go into force at identically the same minute.

Mr. JONES. Yes; but you have in this bill the same kind of provision you had last year and they gave out these price forecasts this last year and I do not want them to do it under the appropriations we are making now, and this limitation is for this bill.

Mr. BUCHANAN. Let us see whether the gentleman's statement is correct or not. The Bureau of the Budget sent to us certain estimates carried under certain language, and here is part of the language that the members of the Committee on Appropriations cut out from the language as approved by the Bureau of the Budget:

> And for collecting and disseminating information on the adjustment of production to probable demand for the different farm and animal products, including the influence of production and demand on prices of agricultural products.

Now, listen to this:

> Including the influence of production and demand on agricultural products.

These lines were cut out of the bill.

Mr. BYRNS and Mr. JONES rose.

Mr. BUCHANAN. I can not yield to two men at one time. I yield to the gentleman from Tennessee.

Mr. BYRNS. The gentleman says the committee cut out that language and did so by practically a unanimous vote. Does not the amendment of the gentleman from Texas emphasize the very same thing and do the very same thing that the committee indicated it wanted to do when it struck out that language?

Mr. BUCHANAN. Yes; the amendment of the gentleman from Texas emphasizes the same thing, and if it stopped there I would not say a word, but the amendment of the gentleman from Texas goes back further and reaches through the entire Bureau of Agricultural Economics.

Let me tell you what it does. It prohibits any prediction in long-range or short-range predictions on future prices and visits that prediction with a severe penalty. The Bureau of Agricultural Economics publishes every year not the immediate prices, but it tells you the supply on hand of hogs, cotton, wheat, and other agricultural products throughout the world. It tells you of the demand and consumption and whether a probable surplus is coming, and whether you ought to plant largely that product or raise a great many hogs or cattle and what the probable demand and supply will be, and what influence they will have on the price for the following year and enables the farmer to regulate his planting by the supply, the demands, and price. But the amendment of the gentleman from Texas would prohibit the publication of this information. Therefore I say that his committee should take that question up, work it out, and present to this House a carefully drawn bill, clearly defining the duties and limitations of the department relative to price trends and this without injuring other activities of the Department of Agriculture.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BUCHANAN. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BUCHANAN. Now, let me read the report of this Appropriations Committee. After striking out the language I referred to it indicates clearly to the department that they must not predict as to short-range prices, the report says:

> Price prediction: The committee has striken out new language contained in the Budget under which the department proposed to continue its forecasts of prices and price trends for the various agricultural products. It is believed that the department may properly gather and disseminate statistics and other data pertaining to the supply of such products and the demand therefor, but that the Government should not sponsor conclusions to be drawn from such data.

Now, I submit that the action of this committee in striking out the language of the Budget and that the action of this committee as reflected in this report is binding upon the department without taking the risk of adopting a radical amendment, without investigation, without consideration, and without proper safeguards.

Do not misunderstand my position. I agree with my friends, the gentleman from Texas [Mr. JONES] and the gentleman from Tennessee [Mr. GARRETT], that it was an unfortunate mistake the department made last year in predicting that the price of cotton would go down. When that was published in the papers I was in my home town and I wired the department promptly that I felt the province of the department was to gather data and get facts and publish the data and facts and let the people draw their own conclusions. That was my position then and it is my position now. But let us not take hasty action on an ill-considered and hastily drawn amendment and irreparably injure the Bureau of Agricultural Economics in its commendable efforts to advance the agricultural interests of the Nation.

Mr. CRISP. Mr. Chairman, I rise to support the amendment of the gentleman from Texas, and I do it because I do not desire the Department of Agriculture to have the power to do again what they did last year in the midst of the harvesting of the cotton crop when they issued the statement that prices were to go down. As to the prediction of prices on wheat, corn, and other things, I am willing to vote for it or not, as gentlemen who represent those States where they raise them desire.

Here are the facts relative to the statement issued by the department last September. The department, on September 8, had just issued a statement and forecast on the production of cotton during 1927. That statement showed a lower expectant yield than the August statement issued by the department of about 800,000 bales. Cotton went up on the statement, and in my community cotton was selling for 23 cents a pound, and the New York future price was a little over 24 cents. I want to say to the gentlemen not from cotton States that the farmers who raise the cotton do not get the price you read in the paper that cotton is bringing in New York. They get about a cent and a quarter less than the New York price, which the buyers of cotton say is required for freight to get the cotton to New York, where the price is fixed. Cotton was selling in Americus, Ga., my home town, for about 23 cents a pound and had gone up on the September estimate of the Department of Agriculture. Under the law the Department of Agriculture could not issue another statement as to production until October. The Department of Agriculture, on September 15, without authority of law, issued a statement that the price on cotton was to go down. The price of cotton immediately dropped from seven to ten dollars a bale.

Now, what was the vice of that unauthorized statement?

If any big cotton house like Anderson, Clayton & Joy or Hubbard & Co. had issued a statement of that kind, that the trend of the price of cotton was downward, it would not have had much effect on the trade, for the public would have thought they were bears on the market and wanted the price to go down, but when the Department of Agriculture issued the statement the world consumers of cotton naturally assumed that the Department of Agriculture had some inside information—possibly that their estimate of production was wrong, that they knew what they were talking about, that the Government had inside information—and cotton broke and it has never reached 22 cents in Georgia since. To-day it is selling in my State for 17 or 18 cents, and that unwarranted, unjustifiable act of the department cost the farmers of the Southern States over $200,000,000.

Mr. GARRETT of Tennessee. Then the cotton crop ultimately was shorter than the department predicted?

Mr. CRISP. Yes. The production of cotton in 1927 was about 4,000,000 bales less than the production in 1926, and the world's consumption of cotton in 1927 was the largest the industry has ever known.

If the law of supply and demand was justly operating, cotton to-day ought to be selling for at least 25 cents a pound. Our people who had toiled to make this cotton felt outraged at the action of the department. From my home town I wired the Secretary of Agriculture and the President, asking them to correct the evil, calling attention to the vice, and pointed out the effect on the trade, stating that that statement coming from the Department of Agriculture had broken the price of cotton. Secretary Jardine sought to mitigate the damage. He gave out a statement referring to the department's

statement of August, in which the prediction was made cotton would go lower. That the department's information showed the growing crop was in a less favorable condition than when the September statement was published. Friends, the August statement had no publicity. The September statement was given wide publicity. You can shatter the vase, if you will, but the scent of the roses will linger still. This action of the department broke the price of cotton, and it has never reached the price it was bringing on September 15 and where under the law of supply and demand the production of cotton entitled it to go, and I for one am not willing to take the chance of permitting the Department of Agriculture to have the authority to make a similar statement at any time in the future, and I propose to support the amendment.

My friend from Texas [Mr. BUCHANAN] says that this is not the method or the place to correct this evil, but that the Committee on Agriculture is the proper committee to report such legislation. Bills are pending before that committee. The Lord knows whether or not they are going to report them out, and, if so, when; and if they report them out, it is a question as to whether or not they will be considered by the House or by the Senate. Now is the accepted time, because you know that this appropriation bill is going to pass, for it is one of the necessary supply bills. Therefore those friends who desire to stop this sort of thing should exercise common sense and judgment and vote for this amendment.

Mr. JONES. Mr. Chairman, I first drafted this amendment as applicable only to cotton, and at the suggestion of some Members on the committee I included all other agricultural products. If gentlemen prefer, I am willing to limit it to future cotton prices or the trend of the same, and then I do not think anybody can object to the amendment.

Mr. DICKINSON of Iowa. I will say to the gentleman from Texas that I think it is an unfortunate amendment, even if we limit it to cotton, but if you limit it to cotton it will decrease its undesirability.

Mr. STRONG of Kansas. But why limit it to cotton?

Mr. JONES. I am interested in getting this thing through, and I ask unanimous consent to modify the amendment.

Mr. BLANTON. You can get it through without emasculating it.

Mr. KETCHAM. It is not emasculating it if he gets what he wants.

Mr. JONES. Mr. Chairman, some of these gentlemen want to vote on the amendment as it is. I shall let the committee vote on it, and if it is defeated, then offer it the other way; that is, I shall then offer it as to cotton alone.

Mr. DICKINSON of Iowa. Mr. Chairman, I move to amend the amendment by striking out the words "of agricultural products" and inserting in lieu thereof the word "cotton."

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment to the amendment offered by Mr. DICKINSON of Iowa: Strike out the words "agricultural products" and insert in lieu thereof the word "cotton."

Mr. BYRNS. Mr. Chairman, if that amendment to the amendment is adopted, is it not an express invitation to the Department of Agriculture to make forecasts as to prices of every other agricultural product?

Mr. DICKINSON of Iowa. No.

Mr. BYRNS. In other words, when we have this amendment now pending and the House by a vote limits it to cotton, it is an express invitation to the Department of Agriculture to make its forecast as to prices on all other agricultural products. They can not construe it in any other way.

Mr. DICKINSON of Iowa. Let me say to the gentleman that we think we have sufficient safeguards in the bill elsewhere and that we are perfectly willing to risk the department. If the cotton boys want their limitation on cotton, then they have the opportunity to get it.

Mr. BLANTON. But we are corn boys as well as cotton boys.

Mr. BYRNS. If it is inherently wrong as to cotton, then it is equally wrong as to wheat and corn and every other product. I can not see why any exception should be made.

Mr. DICKINSON of Iowa. I do not think it is wrong with reference to either.

Mr. KETCHAM. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. KETCHAM. Mr. Chairman, it seems to me that the amendment proposed by the gentleman from Iowa [Mr. DICKINSON] is altogether in the interests of fair play. So far as I know, in the hearings held before the Committee on Agriculture on these various bills, they were only directed toward one crop of cotton, and the sentiment here seems to be unanimous on the part of those who represent the cotton districts that these price trends shall be eliminated. It strikes me that this is a happy solution to a rather difficult situation. The only word of admonition that I would give is this: That it is a very dangerous proposition in a half hour at the close of a day's session to take an action that may possibly upset the very carefully arranged program of the Department of Agriculture, which has been built up with reference to rendering the very best service that department can render, and certainly the years of effort in the department on the part of conscientious men ought not just simply to be cast aside with a mere gesture, saying that because it happens to have affected us adversely in this particular the whole scheme relating to price trends ought to go into the discard. On the other hand, if you men who have gone into this thoroughly and have had the experience you say you have, ask that it shall be done, I can see no reason why you should not have your remedy. I believe you will ask that the price trends will be restored. At your request, however.

Mr. BLANTON. We have had months to think it over.

Mr. BROWNING. And the gentleman does not take into consideration what the Department of Agriculture in less than 30 minutes did to us.

Mr. ADKINS. Mr. Chairman, Mr. Tenny, of the Department of Agriculture, before the Committee on Agriculture, stated on August 15, 1927, the department issued a statement that the trend of cotton prices would be lower at that time; their chart shows cotton was a little more than 19 cents; it advanced to 24 cents, then had dropped to 21 cents when the September 15 statement was issued, and still continued to decline. You will find this testimony on page 24 and page 30, Serial F, Hearings of the Committee on Agriculture.

But be that as it may, the situation with me is this: Our grain trade, the men in the grain trade, after they get the grain in their hands, or the cotton, for that matter, have just as good facilities for getting knowledge of the situation as to prices in the future of their commodity as the Government has, and they use that information in feeding their grain or their cotton back on the market. Now, the only information that the farmer can have, with the crop in his hands, which he does not have to sell immediately, is the information he can get from the Government, or he must buy this information of private enterprise. If the farmer has 2,000 bushels of wheat to sell, he goes to his grain man and consults with his neighbors and reads the papers and gets all the information he can get of the probable future trend of prices. He naturally likes to sell at the most advantageous time, and if the privilege is taken away from the Department of Agriculture of furnishing the farmer with information, he would be at a very great disadvantage in the first sale, because he can not get the information that the trade has.

They have just as good facilities as the Government has, but the farmer has not got those facilities, and he must rely upon the newspapers and the reports that he gets. So far as I am concerned, representing a purely corn and oats and wheat community, I know my constituents are glad to get that information.

Mr. STRONG of Kansas. Suppose, while the planter is debating the question whether or not he will sell his crop or not, the announcement comes from the Department of Agriculture that the price trend is downward?

Mr. ADKINS. If that is true, and it is only true eighty-nine times out of a hundred, as is the case with our weather predictions; their statistics only in eighty-six times out of a hundred have been true—if that is true, the trade has got that information before the farmer gets it. Why should not the farmer be placed on the same footing and sell before the long trend downward begins?

Mr. STRONG of Kansas. He does not have that information, because, when the announcement comes out the next morning, the price has gone down before the farmer can unload.

Mr. ADKINS. If the speculator got that information, would not the market go down just the same, and the speculator would have the same chance that the farmer has to unload? I contend the farmer should have the same opportunity that the speculator has.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The question is on agreeing to the amendment offered by the gentleman from Iowa to the amendment offered by the gentleman from Texas.

The question was taken, and the amendment to the amendment was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Texas, as amended.

Mr. HOWARD of Nebraska. Mr. Chairman, may we have the amendment again reported?

The CHAIRMAN. Without objection, the amendment will again be read.

The amendment was again read.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. JONES. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 62, noes 48.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read on page 3 down to line 15.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes had come to no conclusion thereon.

FARMERS' FINANCE CORPORATION

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of proposed farm relief legislation and to insert a statement by myself on this subject before the Committee on Agriculture of the House, and in connection therewith certain colloquies between members of the committee and myself.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks on the subject of farm relief legislation by inserting a statement made by himself on that subject before the Committee on Agriculture and certain colloquies in connection therewith. Is there objection?

There was no objection.

Mr. LANKFORD. Mr. Speaker, under leave to have printed in the RECORD a statement made by me before the Committee on Agriculture of the House on February 25 last I submit the following:

Mr. LANKFORD. Mr. Chairman and gentlemen of the committee, I have attended all these hearings before this committee, which have lasted for six weeks or longer, and wish to state that I have enjoyed them very much. I have received much very valuable information from the various witnesses who have appeared here, and from the suggestions and questions of members of the committee. I have ascertained the slant of various people on this great problem of farm legislation. There is one thing, though, that I knew before I came to these hearings, and my information has not been strengthened in that respect; that is, that the American farmer really needs some helpful legislation. There is a real farm problem to be solved by this Congress, some future Congress, or left unsolved.

I sympathize with the farmer. I was born on a farm, and can truthfully say I was born "way down South in Dixie," "way down upon the Suwanee River," in a country log house, in a Georgia cotton field, at "home, sweet home."

Mr. CLARK. On Sunday?

Mr. LANKFORD. I am not sure whether I was born on Sunday or not. But I was born on the 7th day of the month, 1877, and seven has been a lucky number with me from that day to this. I will say furthermore that a man who was born out in the country on the farm and worked six days does not worry about resting on the seventh day. He is perfectly willing that there be enacted a law providing for one day of rest in seven.

I wish to say this, that I have introduced a bill for Sunday observance, but I am not here to push that bill at present. I have asked that no hearings be held now on that bill simply because I want to give all of my time to an effort to work out something worth while for the American farmer. I have that at heart, because I was born and raised on the farm. I helped plant cotton when I was a boy; I crawled on my hands and knees and thinned that cotton until I felt like my back would break; I plowed it day after day until I could hardly get one foot ahead of the other; then I picked it until my back was almost blistered in the sun where my waist and trousers did not happen to come together; and then I saw my father, with that cotton ginned, go to market, and heard him ask the merchant, "How much will you give me for it"—saw him sell it, and then walk in the store and say, "How much will I have to give you, Mr. Merchant, for the coffee pot, for the potash, for the Arm & Hammer brand of soda," and for the various articles that my father bought and carried back home. I did not believe it was fair for a man who was buying that cotton we had grown to name the price and also to name the price at which my father bought the stuff we needed at the home.

Mr. KINCHELOE. What is your theory on the McNary-Haugen bill?

Mr. LANKFORD. I voted for the Haugen bill before, and I will talk about that a little later.

The real question before this Congress is to work out some plan to help the farmer get a better price for his products. Let me say just here that I voted for the McNary-Haugen bill every time; I voted for the NcNary-Haugen bill, Mr. KINCHELOE, when I was the only member of the delegation from Georgia to vote for it. I voted for it later when some other Members from Georgia joined me.

Mr. ASWELL. Are you for it now with the equalization fee in it?

Mr. LANKFORD. I would probably vote for it with the equalization fee in there, although I am not an enthusiastic supporter of the equalization-fee idea.

I wish to say I think it would be better for this committee to report the McNary-Haugen bill out without the equalization fee if it is reported at all. I would much prefer for the committee to do that. I have never been a strong advocate for the equalization fee. It was suggested a little while ago that the equalization fee is not a tax. That is true. It may not be a tax in the accepted term. But, regardless of whether a tax or not, the farmer, when he pays it, will think it is a tax. He will feel it is a tax, and not only will he feel it is a tax, but he will resent it being left in the bill.

Mr. ASWELL. Do you think you ought to vote your conviction whether you get a law or not?

Mr. LANKFORD. I am in favor of so amending the bill as to secure the passage of a good law at this time, if possible. I would not be in favor, let me say, of so amending this bill as to make it objectionable simply because we want to secure a law. There is danger always in legislation, as I see it, that goes just far enough to amount to an excuse of a bill, and yet not do what it ought to do for the farmer; and then the American farmer would feel like we had passed something for him, later on become dissatisfied with it and disheartened and not be willing even to have a stronger and better bill passed; and those who oppose real farm relief would later on say, "You have done this. You have passed a bill for the farmer. It is a failure. Why take up more time with farm relief?"

I do favor the passage of a bill which will be real farm relief. I would not favor a bill which I thought would not help the farmer, but which might wreck his hopes for a measure in the future.

Mr. KINCHELOE. Mr. LANKFORD, is the McNary-Haugen bill as it is drawn and pending before the committee, with the equalization fee eliminated, your choice of the bills so far pending before the committee?

Mr. LANKFORD. No; I would prefer the bill I introduced, Mr. KINCHELOE. But of the bills other than mine to which the committee has given consideration and upon which you had hearings before you came to my bill, I would prefer the McNary-Haugen bill with the equalization fee eliminated—I would prefer that to the Crisp-Curtis bill.

Mr. KINCHELOE. Or the debenture plan?

Mr. LANKFORD. I think the debenture plan could be passed along with the McNary-Haugen bill; as they are not inconsistent. You might pass the debenture plan and raise money for the farmer in that way through the sale of debentures, and still pass the McNary-Haugen bill. They are not inconsistent at all, as I see it; they could be worked in harmony; they could be worked both at the same time. I do not see that the passing of the debenture plan would prevent the passage of the McNary-Haugen bill. I think you could pass the McNary-Haugen bill with the equalization fee or without it, and also pass the debenture plan, if you wished.

I like the debenture plan. I think the debenture plan would help the American farmer. I believe it would cause him to get more for his products. I do believe that the debenture plan falls down on one proposition. I do not believe the debenture plan solves sufficiently the question of overproduction, and I think that is the greatest problem of all. The one problem which must be solved eventually is the control of production and marketing in behalf of the farmer.

Mr. KINCHELOE. Do you think the McNary-Haugen bill would do it with the equalization fee eliminated? That is the question which has been bothering my mind a long time.

Mr. LANKFORD. Of course, it would enable the board to take cotton off the market, as has been explained here. I have never been very strong for the McNary-Haugen bill. I voted for it, however, as the best bill in sight.

Mr. KINCHELOE. I mean overproduction. You take the Curtis-Crisp bill and these other bills—and I am not saying that in a criticizing way. I know it is as fundamentally sound as anything in the world that whenever you increase the price of agricultural products in this country—that is, if the seasons are favorable—you are going to increase production.

Mr. LANKFORD. You are going to increase production.

Mr. KINCHELOE. Absolutely.

Mr. LANKFORD. And you wreck the very machinery by which you propose helping the American farmer. So the greatest problem is the control of overproduction or the problem of marketing what has been produced. It would be all right for the American farmer to produce an abundance if he was able to keep it off the market. If he is able to look the world in the face and say, "It does not make any difference

what I produce, I am not offering it for sale at all, and you can not get it."

Mr. PURNELL. What, in substance, is your plan?

Mr. LANKFORD. I intend to get to that.

Mr. PURNELL. I want you to present a skeleton, at least, of your plan you have in mind.

Mr. LANKFORD. I would be very glad to do that, as fully as possible before time of adjournment this morning.

Mr. PURNELL. I think you had better go right to it.

Mr. LANKFORD. The bill I introduced is H. R. 77, patterned along the line of the war finance corporation act. I used the war finance corporation act as a basis for my bill. I used the first six or seven sections of that act, simply changing the name of the agency to the farmers finance corporation.

Mr. PURNELL. How much of an appropriation would be involved in your bill?

Mr. LANKFORD. I think I mentioned $500,000,000. That would be a matter for the committee to figure out, provided my plan is worthy of acceptance. That is a mere matter of detail. I provide in section 8—if I may have the attention of the gentleman from New Jersey, Mr. FORT, and others——

Mr. FORT. I was just asking what had been going on before I arrived, Mr. LANKFORD.

Mr. LANKFORD. Section 8 provides—

"that the corporation shall be empowered and authorized to make advances on farm products as collateral security to any bank, banker, trust company, or farm organization in the United States which has rendered financial assistance to any farmer, group of farmers, or farm organizations."

And this plan is a little different from the plan of ordinary bills, and I want to get it thoroughly before this committee.

Let me go over that again. The bill provides for the advance of money to certain banks, provided those banks have made advances to individual farmers of money.

"Provided"—

now, here is the milk of the coconut and the gist and heart of the bill, if it has any—

"these advances are made through the banks only to the individual farmer: *And provided*, The farmers receiving such financial assistance shall have entered into contract with the corporation, as set out in section 11 of this act, and shall have kept and abided by all contracts so made."

Now, this contract which is set out in the bill is a rough, crude contract drawn by me—which could be amended by the committee—provides that these farmers shall control their production as dictated and as determined by the cotton advisory council or the wheat advisory council, or other commodity advisory council.

It provides further that not only shall these farmers control the acreage which they plant each year, but they agree and obligate themselves not to sell any cotton whatever after they begin obtaining these loans, unless the cotton advisory council determines that a sale shall be made.

Mr. PURNELL. In other words, they borrow money on their crop and hold it on their own farms?

Mr. LANKFORD. On their own farms, or in warehouses, or in whatever way is necessary, so as to make the cotton to be produced actually for the debt. The plan is simply this, stated in other words, that we will create the farmers' finance corporation, which will loan money through the banks to the individual farmers, to enable them to hold their cotton, provided the planters of 75 per cent of the acreage of cotton in the United States shall have signed the contracts agreeing to the control of their acreage planting and agreeing to a control of the marketing.

Mr. PURNELL. What percentage of the value of the crop held by each individual farmer would you permit him to draw a loan upon?

Mr. LANKFORD. The bill provides for loans to the full value of the commodities. I say in the bill that he shall be authorized to borrow the average price at which that cotton has sold for the last 10 years.

Mr. ASWELL. Do you think you could get 75 per cent of the planters to sign that?

Mr. LANKFORD. I do not know; I believe we could. I believe you would be offering the farmers so much under this bill that they would sign up. I have great faith in the American farmer signing up contracts if you once offer him something to sign for.

Mr. PURNELL. In other words, you give him a loan on the basis of the full market value at the time the loan is made?

Mr. LANKFORD. No; I would go further. The bill provides for the full market average value for which the commodity sold for the preceding 10 years, which might be higher than the value at time of the loan.

I realize this, Mr. PURNELL, that if you loan the farmer the average price at which cotton has sold for the last 10 years, or the average price at which wheat has sold for the last 10 years, and cotton is selling at 4 or 5 cents below that, or wheat is selling at several cents below that price, it would be a foolish thing for the Government's agency to make that kind of a loan without additional safeguards.

Mr. PURNELL. Suppose the market price is below that average and a loss is sustained. Who is to pay that?

Mr. LANKFORD. That is a proper question and I am glad to answer it.

If 75 per cent of the producers of a commodity sign contracts that they will control their production, and, furthermore, that not only will they control their production but that they will not offer for sale a single bushel of wheat or a single pound of cotton when the operation begins, but that they will hold it; if they need money, they will borrow it from the bank and only sell for a fair price; there will be no loss. The price can not drop below that average price at which they can borrow money. Why? Because the farmer will not sell below a price at which he can borrow money under the provisions of this bill. I provide in the bill that the commodity itself shall be the sole and only collateral for the debt, and that no judgment can be taken against the individual farmer for any loss.

Mr. ADKINS. Will you yield for a question?

Mr. LANKFORD. Yes; I will be glad to, Mr. ADKINS.

Mr. ADKINS. In my own country, where they have only 5 per cent of the storage facilities for wheat and oats, do you think you can get them to go into a contract of that kind?

Mr. LANKFORD. I am not so sure about that in the wheat section. Of course, if they could get them to go into it, I believe it would work. You know more about the wheat proposition than I do.

I provide in the bill that there shall be such storage as shall be necessary, and I provide further in the bill that if possible and practical and feasible that the farmer be allowed to keep his commodity and store it himself, by properly insuring it, and making him responsible for it.

Mr. ADKINS. The point I had in mind is that practically all of them have practically no storage facilities for that, whether they would go into a contract of that kind or not, and then have to build storage bins.

Mr. LANKFORD. I believe it can be worked out. It can be worked out for them to hold it separately or that wheat to be stored in bins and shipped to places where it could be held, but for the farmer still to retain his title in so many bushels of wheat of a certain grade, stored for his use. He could hold the receipt instead of holding the actual wheat.

Mr. SWANK. Do you make any provision for the acquisition of warehouses?

Mr. LANKFORD. I left that as a matter of detail to be worked out later. If the committee should decide that my bill embodies a good idea, that is properly a matter that can be worked out later.

I provide, if possible, that you would let the individual farmer hold his own commodity. He might conceivably ship it off, but it would be a crime, and I believe the average farmer can be trusted to hold it; and the loans being made through the banks, and the banks, knowing that that commodity is put up as collateral, would keep in touch with the collateral.

Mr. JONES. Just a question there: If you put that plan into operation and had your 75 per cent to sign, what would there be to prevent the other 25 per cent from increasing their acreage or making their sales any time they wanted to and taking advantage and possibly getting a higher price than those who had signed?

Mr. LANKFORD. The bill would prevent that.

Mr. JONES. What would there be to prevent new acreage by people who had not theretofore been in business?

Mr. LANKFORD. The question of new acreage would be solved under provisions in the bill. I provide this, however, that these loans shall only be made when planters of 75 per cent of the acreage for the ensuing year have signed the contract, to control the production and marketing. The bill provides that 10 per cent more must sign within 12 months from the time operations begin, and therefore 85 per cent must come in within 12 months after operation. Then I provide, further, that 10 per cent more must come in within the next year; and then that 7 per cent more shall come in within the next year, running it up to 97 per cent of the planters.

If the bill does work, if the plan is a good one, and if the American farmer finds he can borrow at the average price of his commodity and that there has been an organization perfected which enables him to control his production, which enables him to control the price, and name his price within reason, they will sign up 10 per cent more each year until they have 97 per cent in. The other fellows will be forced in just like labor unions force them in when they cry "scab," "not friends," "not in sympathy with the laboring man," "not dealing fair," etc. In other words, I believe they will sign up these contracts. If they do sign up these contracts, then it would solve the overproduction problem and marketing problem, and would enable the farmer to do exactly what I said that my father could not do in the way of naming the price of his cotton. It would enable the farmers by this organization to get together and simply say, "We will not sell cotton or wheat except at a certain price. We produced this year an alleged overproduction, but that overproduction does not hurt you; it is not for sale." Or "We have for sale as much wheat as you need at a reasonably fair price. We have only as much cotton for sale as you are willing to pay us a fair price for."

The farmer for once in the history of the world by this organization could look the rest of the world in the face and say, "Cotton is so much a pound; how much do you want?" Or "Wheat is so much a bushel; how much do you want?" He could not do that to an unreasonable extent; he could not name a price of $5 a bushel for wheat; he could not name a price of a dollar a pound for cotton. But he could name a price for his commodity within reason, just like the producers of steel and the producers of shoes and the producers of hats and clothing name the price of the articles which they produce, within reason.

Mr. JONES. Unfortunately, he could do that, if he could get anything like approximately a hundred per cent, law or no law. If you got 97 per cent in you would not need any law.

Mr. LANKFORD. This is true, that if it worked at all the Government could not lose any money on it and then, again, in a little while the farmer would be absolutely independent; he would be absolutely master of his own fate and his own destiny.

The bill has another idea, Mr. JONES, and I will come to you, Mr. MENGES, later; I see your hand up for a question.

There is another feature of the bill which I think is really worth while, and that is this: It has a complete referendum in it. If you pass the McNary-Haugen bill the farmer may say he does not want it. If you pass my bill it enables 75 per cent of the producers of commodities to sign contracts and organize. Suppose they do not do it? No harm has been done. Suppose they sign up 75 per cent, and then decide they do not want it next year; it goes out of force and out of effect: they determine whether the bill shall go into operation; they determine whether 75 per cent under the bill shall begin operations as to any particular commodity. They might decide they want to operate as to cotton and let the McNary-Haugen bill apply as to wheat and other commodities. If they liked it, they would get the additional signers; if they did not like it, they would not get new signers and they would repeal the bill. That is a most perfect referendum, not to the voters of the country, but to the producers themselves; not to a majority, but to three-fourths of them. If the bill is not good, it would not go into effect; if it is good and they keep it in effect, it provides for the control of production and marketing, not by force, not by low prices, not by an equalization fee, not by anything else, but by a contract entered into mutually for the farmers themselves. All right, Mr. MENGES, I will be glad to yield to you.

Mr. MENGES. Your bill would not go into operation, then, until 75 per cent of the farmers had signed your contract?

Mr. LANKFORD. It would not. Let me say here, gentlemen of the committee, I have done this: Not only have I introduced this bill with this contract idea in it, but I have modified and reintroduced some of the other bills. I took the McNary-Haugen bill and I made it "Title I"; I took my bill and made it "Title II"; reintroduced the two fastened together as one bill. This committee can pass the two—the McNary-Haugen bill as Title I and my bill as Title II. Let them go into effect as far as being the law of the land is concerned. But suppose the cotton growers in Georgia and in Texas, in the district of Mr. JONES and in the district I represent——

Mr. JONES. Why did you not introduce the debenture bill as "Title III"?

Mr. LANKFORD. I am getting to that a little later. I will take care of your bill also just as much as I did the others. Suppose the two pass; suppose that the cotton growers in Georgia say, "We will sign up; we will take the provisions of bill 77," and they sign up and begin to operate under that. They would not need the terms of the McNary-Haugen bill.

Suppose the people out West and the farmers there decide they want to have the McNary-Haugen bill and they do not care to operate under my plan. Then you could let them operate under the McNary-Haugen bill. They are not at all inconsistent.

Now, Mr. JONES, I will say that I did not introduce the debenture plan along with the other bills, but I thought of doing that. I have not done it. I will tell you what you can do, I believe, and I will submit it to the committee after consideration to say whether or not I am right: The McNary-Haugen bill could be put in the bill as Title I, or put yours in as Title I, if you had rather have yours first; the debenture plan as Title II, and put my plan as Title III. Wherein are the three inconsistent? The farmers would be getting their help under the debenture plan. They might not need the provisions of the McNary-Haugen bill. It might not be necessary to declare the operating period if the debenture plan was in effect. It would not be inconsistent with the McNary-Haugen bill. You could use my plan and work it with either one. So, as I say, the three plans are not at all inconsistent. If one part does not work, you have got the other part to fall back on, and vice versa. I think that may be a pretty good idea.

Mr. ADKINS. Your contract idea is all very good, Mr. LANKFORD, but haven't we got a law to do all that. The Supreme Court has recently ruled favorably on the validity of these contracts; and yet the farmers wherever they have tried that have fallen down under it until they do not proceed to operate. Do you think they would operate any better by providing that authority for them?

Mr. LANKFORD. This would be true in reference to the contract: The bill provides that 75 per cent of the farmers must have signed these contracts and be living up to them. Suppose one man did not sign up the contract. You get another man in his stead.

Mr. ADKINS. I understand that. We already have authority of law to do that. The contracts have been tried out by the courts and found to be constitutional. Do you think that passing another bill is going to be a greater inducement for the farmer to do that?

Mr. LANKFORD. Mr. ADKINS, that is a very proper question, and I am glad you asked it. This is true: The farmers say, perhaps, if they sign up contracts they have no knowledge the other fellow will sign. A man signs a contract and he will say, "I am no better off than I was before. I am reducing acreage and the other man is not reducing acreage. I do not know whether my commodity is going to be any higher in price because of the fact I signed the contract." He has no reason to sign a contract.

Under my plan he signs the contract. He says: "Now, this contract is not binding on me because it is so provided in the bond that unless 75 per cent of the producers for the particular year sign, this contract is not binding on me, and if enough sign it, my price will be stabilized at the average price." And he says: "Furthermore this contract is not binding on me unless enough people sign it to enable the farmers to be masters of their own fortune and control the market, naming their prices within reason and thereby naming their profits within reason."

Mr. ADKINS. You did not quite get my question.

Mr. LANKFORD. All right.

Mr. ADKINS. The point is, they do not operate under your system now, when they have a right to do it. Do you think there is anything in your bill that would make it an inducement for them to operate?

Mr. LANKFORD. Absolutely.

Mr. ADKINS. They have a right to go into all that stuff—and sign contracts to limit production and marketing now.

Mr. LANKFORD. They have a right to that now.

Mr. ADKINS. And they do not operate under it?

Mr. LANKFORD. That is right.

Mr. ADKINS. They have tried it and fallen down. The point I have in mind is whether simply passing this bill of yours would induce them to do it.

Mr. LANKFORD. Simply because with my bill there would be machinery set up to establish borrowing powers at the average price at which a commodity had been sold for the last 10 years. Therefore their price would be stabilized at a very satisfactory amount to them, and there would be all kinds of reasons for them to sign the contract.

Mr. ADKINS. Do you think the additional borrowing power would be an inducement?

Mr. LANKFORD. Absolutely. The great trouble with the farmer to-day is that he can not control his sales. He can not control the time when he is going to sell his commodity. Why? Because his taxes are due, his interest is due, or because his bank note is due. He must sell his cotton. But cotton is down in price. He can not wait for it to go up. But if my bill goes into effect he can borrow the average price at which the cotton has been selling for the past 10 years and put his cotton up as the sole security. My bill would stabilize the price at the figure at which he could borrow. He would sign the contract because he would know that unless enough signed it to make it effective the contract could not go into effect, and he would know that whenever enough signed it to carry it into effect then the price would be stabilized.

So I think that the plan is really worth while, and I submit it to the committee for their careful consideration.

Let me say this—I presume the committee is anxious to adjourn, and I will hasten to a conclusion.

Let me say just this much on the McNary-Haugen bill before I resume my seat: I feel that a man has a right to criticize his own self, and I think a man who votes for the bill should be permitted to criticize that bill, especially when he may vote for it again. I started to say a little while ago—and some one interjected a question and changed my line of thought—that the equalization fee was dangerous for political reasons; and then I said we should not be controlled by that to a great extent, and yet we are all more or less selfish, some more so than others. But let us get away from the political side of it.

Here is another danger in the equalization fee: If the McNary-Haugen bill passes it will either make the cooperatives of the country or break them. They will have had their opportunity. People will say: "The cooperatives got the law they wanted and it failed to work." It will either mean their destruction or their salvation.

All right. Now, will the equalization fee be popular with the American farmer? Will the American farmer want to pay it? Will it force the American farmers to go into the cooperatives, or will he feel like he is being mistreated? Will he feel like he is having to carry a burden he does not want to carry; will he feel like unjust pressure has been put on him; will he feel that it is not a square deal and that you are trying to force him to do something he does not want to do and therefore say, "I will not join"? He will pay the fee under protest, I

fear, and even though the bill works well, will it not be more or less unpopular and hard on the cooperative associations?

Then there is another objection I have to the McNary-Haugen bill which I hope this committee will remedy, if possible, before they vote the bill out, either with the equalization fee or without it. I am concerned about the individual American farmer. I am concerned about the farmer who carries his cotton to market, as my father did, and sells one bale or two bales.

Now, the McNary-Haugen bill would provide for taking a certain amount of the commodity off the market. The organization would buy that commodity from the poor fellow who has to sell. That commodity passes out of his hands; it passes into the control of the cooperative association. They may hold it off the market; they may dispose of it as they please. Prices may be boosted by operations, but the poor fellow has already sold out. He has lost. And he has lost because his cotton was sold too low. Cotton may go up. People may say, "Oh, well, the South is getting a good price for its cotton. Cotton is bringing a better price," but the poor man who sold it lost. He is out. That is the objection I have to the export plan. That is the objection I have to the plan of my good friend from Georgia, Mr. CRISP. That is the objection I have to nearly all these plans that do not take care of the poor fellow who planted and made the cotton where you boost the price after it is too late for him.

Now, if you can work out some plan in the McNary-Haugen bill through the drafting service or through members of the committee, providing that when cotton is bought from a fellow who does not belong to the cooperatives, and later on the cotton goes up that in some way you will take care of him so he will not lose, you will thereby improve the bill very much. It will be a wonderful help to the bill if you can work that out and put it in the bill. I am for the plan I suggest here in my bill, because I have drawn that plan in the interest of the individual. He holds his own cotton. He may borrow money on it, and manipulate any way he pleases. But he does not sell it at a sacrifice; he holds it, and when cotton goes up he gets the benefit of the increase.

I have another suggestion which I wish to make to the committee. I took the McNary-Haugen bill and performed a simple, painless, bloodless operation by trimming out of that bill the equalization-fee provisions and inserting in lieu thereof the debenture plan in a modified form. I provided that the debentures be issued not to the exporters but that the proceeds go into the stabilization fund of the McNary-Haugen bill so as to make unnecessary the equalization fee and yet give the farmers the benefit of the other provisions of the McNary-Haugen bill. I believe this plan is preferable to the present plan of an equalization fee. I know that I like the idea much better.

I also took my contract, production, and marketing control plan and grafted it into the McNary-Haugen bill and reintroduced it as an independent bill as a suggestion, but I am free to confess that I think my original plan is much better for many reasons, which I shall be glad to explain to this committee should the committee ever wish to take up the idea of comparison of the two plans.

In fact, Mr. Chairman, my faith in my farmers' finance corporation plan, with its production and marketing control by contract features, has been very much strengthened from day to day as I have attended these hearings. I am sure that real farm relief can only come with a proper control of production and marketing and that there can only be established proper control by contracts entered into by the farmers with all concerned under an enabling act of Congress such as my bill provides. All the other bills introduced by other Members fail in this most essential respect.

Proper control of production and marketing means control of prices by the farmers themselves and hence the naming by them of their own profits in reasonable bounds.

I have studied this problem for years and for the last six weeks I have attended hearings of this committee for two hours each day and worked until midnight each night reading bills and speeches, drawing bills and collecting data on this matter, and my very best judgment is that we must work out a plan to enable the farmer to name within reason the price of the commodities which he sells as other businesses and enterprises do, or else we must leave this problem unsolved for the present.

Another most important feature of my bill is that it provides for the selection of the various commodity councils by the governors of the commodity growing States at first, until the farmers become properly organized and then by the farmers themselves. Some may suggest that these must be appointed by the President. It will be seen though that these councils are in no sense composed of Federal officials but only a part and parcel of an organization, the functioning of which is recognized by the bill under its contract features. These officials are no more Federal officials than are the road officials of a State Federal officials, because they and their works are recognized by the contract or law whereby the Federal Government matches State road funds in the construction of good roads in the country. This feature of the bill safeguards the rights of the farmer and makes sure the selection of his friends for the administration of the farmer's most important affairs under this bill.

Some may suggest that my bill provides for price fixing and is therefore objectionable. Let me say I think that it is clearly price fixing in its nature and provisions and that is just the reason I am so much in favor of it. Congress has passed laws to help everybody else fix prices of what they sell. Why not extend this privilege to the farmer? I have no patience with any plan of so-called farm relief which attempts to help the farmers without helping them get a better price for their products.

Too many farm relief bills attempt to please the farmer without giving him any real relief. They attempt to work out a plan satisfactory to the farmer and yet leave him to be preyed upon by those who speculate on his products. They propose to help the farmer and yet leave him at the mercy of the middlemen. Real relief can not be secured in this way. Again, many of the bills seek to help some one help the farmer indirectly and charge too much for the service, or help the farmer by handling his commodities at an exorbitant charge for the service. All this is wrong.

Again, Mr. Chairman, many object to all bills which vote any financial assistance to the farmer on the idea that the farmer should not receive a subsidy from the Treasury. Subsidies have been from time to time granted to other folks. Why not grant a subsidy to the farmers? The farmers will never, by any scheme we may pass, get back one-tenth of what has been unjustly taken from them by discriminatory legislation. But, Mr. Chairman, my bill does not provide for a plan that will lose the Government any amount. It only provides for the elimination of unnecessary profits of certain middlemen who are unnecessary and really amount to parasites, living on what they do not at all produce.

I have taken many of the bills which have been introduced by others and amended them so as to make them much more effective in the way of helping the farmer. I reintroduced them in their modified form to get before this committee and the country just how simple is the remedy of real farm relief if we will only determine to pass such a measure. I hope this committee will bring out the very best possible bill.

I have been glad in the past to suggest and help secure many splendid changes in the McNary-Haugen bill and know the bill is very much improved over its original form, but it is yet far, far from a perfect bill. I believe that it can only be made perfect by giving the farmers complete control of their products and the sale of the same.

I have been glad to attend all the hearings of this committee at this Congress and am glad now on the last day of these hearings to submit my conclusions on this great question. I realize that my plan may not be accepted just now, but I hope for it to be eventually written into law.

I have submitted my bill to many farmers, farm organizations, Members of Congress, Senators, and Cabinet members, and have yet to find the first man to say it will not work if the farmers want it and sign up the contracts. I am offering it because I feel it will work and that the farmers will approve it and sign the contracts.

The farmers will organize if we will make organization really worth while to them. They are a little shy of organizations because too often they are led into organizations by those who wish to exploit and to plunder them. My bill provides for the most effective farm relief ever offered, provided the farmers themselves will approve the plan and put it into effect.

So the only question in doubt is, Will the farmers sign the contracts suggested by my bill?

The farmers organized and won our independence more than a century ago. They have organized and given their country assistance in every war. They helped to put over the Liberty loan drive during the last war and sent their sons across the seas to fight at the call of their country. So, Mr. Chairman, I am sure they will enter into a plan with their neighbors to win for them and their children a new freedom of naming within reason the price of the products of their own toil. Let us do our part, and knowing the farmers as I do I vouch for their faithful discharge of their duty in full, as they have ever done.

Mr. Chairman, I wish to thank you and this committee for the courtesies shown me and for your most attentive attention to my presentation of this matter, in which we are all so much interested.

The CHAIRMAN. Thank you, Mr. LANKFORD; your statement is greatly appreciated.

PERMISSION TO ADDRESS THE HOUSE

Mr. HOWARD of Nebraska. Mr. Speaker, I ask unanimous consent that to-morrow morning I may be permitted to make a verbal report of the House membership which attended the Interparliamentary Conference in Paris last August, to occupy the space of eight minutes, I reckon.

The SPEAKER. The gentleman from Nebraska asks unanimous consent that to-morrow, after the reading of the Journal and the disposal of business on the Speaker's table, he may be permitted to address the House for eight minutes. Is there objection?

Mr. SNELL. Reserving the right to object, Mr. Speaker, we are very anxious to complete this bill to-morrow. I think many Members are anxious to get away and finish it to-morrow. I suggest that the gentleman defer his request until a later day.

Mr. HOWARD of Nebraska. I can not resist the tearful pleading of my brother from New York, and I withdraw the request.

ADJOURNMENT

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 8 minutes p. m.) the House adjourned until to-morrow, Saturday, March 3, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, March 3, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned farm areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects (H. R. 6091).

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10 a. m.)

To amend the World War veterans' act, 1924 (H. R. 10160).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

Relative to the appropriation for additional expenses at the naval mine depot, Yorktown, Va. (H. Con. Res. 20).

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

To amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the countries of continental America and adjacent islands (H. R. 6465).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LINTHICUM: Committee on Foreign Affairs. S. J. Res. 30. A joint resolution to provide for the expenses of participation by the United States in the Second Pan American Conference on Highways at Rio de Janeiro; without amendment (Rept. No. 814). Referred to the Committee of the Whole House on the state of the Union.

Mr. LINTHICUM: Committee on Foreign Affairs. S. J. Res. 31. A joint resolution to provide that the United States extend to the Permanent International Association of Road Congresses an invitation to hold the sixth session of the association in the United States, and for the expenses thereof; without amendment (Rept. No. 815). Referred to the Committee of the Whole House on the state of the Union.

Mr. MORROW: Committee on Indian Affairs. H. R. 9483. A bill to provide for the acquisition of rights of way through the lands of the Pueblo Indians of New Mexico; with amendment (Rept. No. 816). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. S. 2569. An act providing for horticultural experiment and demonstration work in the semiarid or dry-land regions of the United States; without amendment (Rept. No. 819). Referred to the Committee of the Whole House on the state of the Union.

Mr. HERSEY: Committee on the Judiciary. H. R. 9588. A bill to amend the national prohibition act, as amended and supplemented; without amendment (Rept. No. 822). Referred to the House Calendar.

Mr. DYER: Committee on the Judiciary. H. R. 5724. A bill to prevent desecration of the flag and insignia of the United States and to provide punishment therefor; without amendment (Rept. No. 823). Referred to the House Calendar.

Mr. BLANTON: Committee on Indian Affairs. H. R. 5479. A bill to provide for the purchase of land, livestock, and agricultural equipment for the Alabama and Coushatta Indians in Polk County, Tex., and for other purposes; with amendment (Rept. No. 824). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. JOHNSON of Illinois: Committee on Military Affairs. H. R. 4204. A bill for the relief of Thomas M. Richardson; without amendment (Rept. No. 817). Referred to the Committee of the Whole House.

Mr. MORROW: Committee on Indian Affairs. H. R. 10475. A bill to authorize the Secretary of the Interior to issue a patent to the Bureau of Catholic Indian Missions for a certain tract of land on the Mescalero Reservation, N. Mex.; without amendment (Rept. No. 818). Referred to the Committee of the Whole House.

Mr. WOODRUM: Committee on War Claims. H. R. 5944. A bill for the relief of Walter D. Lovell; with amendment (Rept. No. 820). Referred to the Committee of the Whole House.

Mr. HILL of Alabama: Committee on Military Affairs. H. R. 10139. A bill for the relief of Edmund F. Hubbard; without amendment (Rept. No. 821). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 11659) for the relief of the Charlestown Sand & Stone Co., of Elkton, Md., and the same was referred to the Committee on War Claims.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HUDSPETH: A bill (H. R. 11682) to provide for the construction of an addition to the post-office building at San Angelo, Tex.; to the Committee on the Public Lands.

By Mr. JAMES: A bill (H. R. 11683) to create the reserve division of the War Department, and for other purposes; to the Committee on Military Affairs.

By Mr. JENKINS: A bill (H. R. 11684) to amend section 24 of the immigration act of 1917; to the Committee on Immigration and Naturalization.

By Mr. SINNOTT (by departmental request): A bill (H. R. 11685) to accept the cession by the State of California of exclusive jurisdiction over the lands embraced within the Lassen Volcanic National Park, and for other purposes; to the Committee on the Public Lands.

By Mr. WAINWRIGHT: A bill (H. R. 11686) to provide for the placing of the names of certain individuals on the rolls of the War Department, and to authorize the Board of Regents of the Smithsonian Institution to make certain recommendations; to the Committee on Military Affairs.

By Mr. BOX: A bill (H. R. 11687) to increase the immigration border patrol for the purposes of enforcing the immigration laws on and adjacent to the boundary between the United States and the Republic of Mexico and elsewhere; to the Committee on Immigration and Naturalization.

By Mr. CRAIL: A bill (H. R. 11688) for the correction of the naval records of officers and sailors who served on the *Harvard* and the *Yale* during the Spanish War; to the Committee on Naval Affairs.

By Mr. TEMPLE: A bill (H. R. 11689) to repeal section 3583 of the Revised Statutes; to the Committee on Banking and Currency.

By Mr. ROWBOTTOM: A bill (H. R. 11690) to extend the time for construction of a bridge across the Ohio River between Vanderburg County, Ind., and Henderson County, Ky.; to the Committee on Interstate and Foreign Commerce.

By Mr. COHEN: A bill (H. R. 11691) to establish a landing field for aircraft at Governors Island, N. Y., and for other purposes; to the Committee on Military Affairs.

By Mr. BRIGHAM: A bill (H. R. 11692) authorizing the Gulf Coast Properties (Inc.), a Florida corporation, of Jacksonville, county of Duval, State of Florida, its successors and assigns, to construct, maintain, and operate a bridge across Lake Champlain at or near East Alburg, Vt.; to the Committee on Interstate and Foreign Commerce.

By Mr. ZIHLMAN: A bill (H. R. 11693) to provide an additional method for collecting taxes in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 11694) for the relief of Ella Kepner; to the Committee on War Claims.

Also, a bill (H. R. 11695) granting an increase of pension to Amelia O'Donnell; to the Committee on Invalid Pensions.

By Mr. BACON: A bill (H. R. 11696) granting an increase of pension to Abby J. Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11697) conferring jurisdiction upon certain courts of the United States to hear and determine the claim by the owner of the steamship *San Tirso* against the United States, and for other purposes; to the Committee on Claims.

Also, a bill (H. R. 11698) conferring jurisdiction upon certain courts of the United States to hear and determine the claim by the owner of the steamship *W. I. Radcliffe* against the United States, and for other purposes; to the Committee on Claims.

Also, a bill (H. R. 11699) conferring jurisdiction upon the United States Court for the Southern District of New York to hear and determine the claim of the owner of the French auxiliary bark *Quevilly* against the United States, and for other purposes; to the Committee on Claims.

By Mr. BEERS: A bill (H. R. 11700) granting an increase of pension to Rebecca E. Hefright; to the Committee on Invalid Pensions.

By Mr. BLANTON: A bill (H. R. 11701) to authorize payment of withheld earned salary to Albert J. Headley, an inspector of the Metropolitan police department of the District of Columbia; to the Committee on the District of Columbia.

By Mr. BRIGHAM: A bill (H. R. 11702) granting an increase of pension to Minnie C. Holland; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 11703) for the relief of James Henry Hicks; to the Committee on Naval Affairs.

Also, a bill (H. R. 11704) granting a pension to Gabriel Bolier; to the Committee on Pensions.

Also, a bill (H. R. 11705) granting a pension to Matilda Towers; to the Committee on Invalid Pensions.

By Mr. DEAL: A bill (H. R. 11706) to provide for an examination and survey of Lafayette River, Va.; to the Committee on Rivers and Harbors.

By Mr. DE ROUEN: A bill (H. R. 11707) to provide for a survey of Bayou Plaquemine Brule with a view of securing increased depth and width in the present navigable channel; to the Committee on Rivers and Harbors.

By Mr. EVANS of California: A bill (H. R. 11708) to provide for appointing Benjamin H. Griffin, sergeant, Reserve Officers' Training Corps, detached enlisted men's list, a warrant officer, United States Army; to the Committee on Military Affairs.

By Mr. FENN: A bill (H. R. 11709) granting an increase of pension to Marie Emelie Allen; to the Committee on Invalid Pensions.

By Mr. HOUSTON of Delaware: A bill (H. R. 11710) for the relief of George E. Megee; to the Committee on Claims.

By Mr. LOZIER: A bill (H. R. 11711) granting an increase of pension to Hariette J. Cochran; to the Committee on Invalid Pensions.

By Mr. MAJOR of Illinois: A bill (H. R. 11712) granting an increase of pension to Elzora Barnes; to the Committee on Invalid Pensions.

By Mr. MARTIN of Massachusetts: A bill (H. R. 11713) granting an increase of pension to Helen S. Cates; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11714) granting a pension to Catherine M. Howard; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 11715) to correct the military record of Charles W. Bendure; to the Committee on Military Affairs.

By Mr. SEARS of Florida: A bill (H. R. 11716) authorizing and directing the Secretary of the Interior to issue patents to Ethel L. Saunders, and for other purposes; to the Committee on the Public Lands.

By Mr. SEARS of Nebraska: A bill (H. R. 11717) granting an increase of pension to William H. Gray; to the Committee on Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 11718) granting an increase of pension to Sarah Gallagher; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4791. By Mr. BACON: Petition of citizens of the town of Babylon, Suffolk County, State of New York, protesting against the proposed compulsory Sunday observance law; to the Committee on the District of Columbia.

4792. By Mr. BLAND: Petition of citizens of Hampton, Fort Monroe, and Fort Eustis, Va., opposing compulsory Sunday observance legislation, especially House bill 78; to the Committee on the District of Columbia.

4793. Also, petitions of citizens of Newport News, Va., opposing compulsory Sunday observance legislation, especially House bill 78; to the Committee on the District of Columba.

4794. By Mr. BROWNE: Petition of the board of Lafayette County, Wis., urging Congress to pass such legislation that the present import duties on Swiss, brick, and Limburger cheese be increased about 50 per cent; to the Committee on Ways and Means.

4795. By Mr. CARTER: Petition of local joint-executive board of the Allied Culinary Workers and Beverage Dispensers of San Francisco, Calif., urging legislation prohibiting the entry of Philippine laborers into this country; to the Committee on Immigration and Naturalization.

4796. By Mr. CHAPMAN: Petition of C. W. Rule, B. F. McGruder, G. Wade Hampton, V. B. Snowden, Lucien Rule, and Mary P. Wilhoyte, and 24 other citizens of Goshen, Oldham County, Ky., protesting against a big Navy program; to the Committee on Naval Affairs.

4797. Also, petition of J. H. Gay, Newt M. Gay, Hervey McDowell, Robert S. Hart, James Gay, and R. M. Garrett, and 13 other citizens of Pisgah, Woodford County, Ky., protesting against a big Navy program; to the Committee on Naval Affairs.

4798. By Mr. COCHRAN of Pennsylvania: Petition of Wesley V. Fox and other residents of Russell, Warren County, Pa., protesting against the passage of House bill 78, or any other compulsory-observance legislation; to the Committee on the District of Columbia.

4799. By Mr. CONNOLLY of Pennsylvania: Petition submitted by the Federal Employees Union No. 23, of Philadelphia, Pa., signed by sundry citizens of the fifth congressional district, favoring the passage of the Welch bill (H. R. 6518) to reclassify and increase the salaries of Federal employees, and the Lehlbach bill (H. R. 492) to amend an act entitled "The classification act of 1923," approved March 4, 1923; to the Committee on the Civil Service.

4800. By Mr. CORNING: Petition of sundry citizens of the city of Albany, N. Y., in opposition to the passage of House bill 78, known as the Lankford bill, relating to Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

4801. By Mr. CRAIL: Petition of Chamber of Commerce of San Pedro, Calif., indorsing House Bill 5543; to the Committee on Naval Affairs.

4802. Also, petition of R. B. Hale, president California Development Association, requesting and urging certain provisions be included in census bill as follows: A sufficient general appropriation to provide for a more complete and accurate farm census; appropriation for a special census of irrigation and drainage as was taken in 1920 and previous decades; that the agricultural census be taken not later than the month of January; to the Committee on the Census.

4803. Also, petition of sundry citizens of Los Angeles County, Calif., against the passage of the Brookhart bill (S. 1667); to the Committee on Interstate and Foreign Commerce.

4804. Also, petition of sundry citizens of Los Angeles County, Calif., for the passage of the Tyson-Fitzgerald bill (S. 777 and H. R. 500); to the Committee on World War Veterans' Legislation.

4805. By Mr. CULLEN: Resolution of the Loggia Ortigia, requesting the President to proclaim October 12 as Columbus day for the abservance of the anniversary of the discovery of America; to the Committee on the Judiciary.

4806. By Mr. DRANE: Petition of citizens of Florida, against compulsory Sunday observance legislation (H. R. 78); to the Committee on the District of Columbia.

4807. By Mr. GALLIVAN: Petition of L. C. Wason, president Aberthaw Co., 80 Federal Street, Boston, Mass., recommending passage of House bill 5772, known as the Day labor bill; to the Committee on Labor.

4808. By Mr. HADLEY: Petition of residents of Snohomish and King Counties, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4809. By Mr. HOWARD of Nebraska: Petition signed by William P. Jones, of Winnebago, Nebr., and about 202 other signatures, protesting against the passage of the Lankford Sunday observance bill, or any other legislation providing for such compulsory observance of the Sabbath in the District of Columbia; to the Committee on the District of Columbia.

4810. By Mr. JOHNSON of Texas: Petition of Mrs. Percy V. Pennybacker, of Austin, Tex.; Dallas Chapter, No. 43, Disabled American Veterans of the World War, of Dallas, Tex.; and Lieut. Col. Uel Stephens, Infantry Reserves, of San Antonio, Tex., indorsing the Tyson-Fitzgerald bill (S. 777) for the retirement of disabled emergency officers; to the Committee on Military Affairs.

4811. By Mr. JOHNSON of Oklahoma: Petition of John H. Bell and 21 other citizens of Rush Springs, Okla., asking for legislation to increase pensions for Civil War veterans and their widows; to the Committee on Invalid Pensions.

4812. By Mr. HOOPER: Petition of D. D. King and 18 other residents of Oshtemo, Mich., in favor of the enactment of compulsory Sunday observance legislation for the District of Columbia; to the Committee on the District of Columbia.

4813. By Mr. KING: Petition against compulsory Sunday observance signed by Ralph Hart, 442 South Chambers Street, Galesburg, Ill., and a number of other citizens of Galesburg, Ill.; to the Committee on the District of Columbia.

4814. Also, petition against compulsory Sunday observance, signed by W. R. Quarterman, 883 Arnold Street, Galesburg, Ill., and a number of other citizens of Galesburg, Ill.; to the Committee on the District of Columbia.

4815. By Mr. LINDSAY: Petition of the New York Photo-Engravers' Union No. 1, New York City, approving Senate bill 1482 and similar bill by Mr. LaGuardia; also favoring Cooper-Hawes bill (H. R. 7729 and S. 1940); to the Committee on the Judiciary.

4816. Also, petition of Apprentice National Organization Masters, Mates, and Pilots of America, opposing favorable report on House bill 11137, on basis of resolution passed at regular meeting February 28; to the Committee on the Merchant Marine and Fisheries.

4817. By Mr. MAPES: Petition of Rev. Edward Huibregtse and 61 other residents of Byron Center, Mich., recommending the enactment by Congress of House bill 78; to the Committee on the District of Columbia.

4818. By Mr. MICHENER: Petition of sundry citizens of Washtenaw and Wayne Counties, Mich., protesting against the passage of the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4819. By Mr. O'CONNELL: Petition of the Maritime Exchange of New York City, protesting against the appropriation of $12,000,000 for reconditioning the steamers *Mt. Vernon* and *Monticello;* to the Committee on Naval Affairs.

4820. By Mr. QUAYLE: Resolution adopted by the board of directors of the Maritime Association of the port of New York, protesting against the appropriation of $12,000,000 for reconditioning the steamers *Mount Vernon* and *Monticello;* to the Committee on the Merchant Marine and Fisheries.

4821. By Mr. RATHBONE: Petition signed by 8,971 persons of Chicago, Ill., protesting against House bill 78, providing for compulsory Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

4822. By Mr. REID of Illinois: Petition of citizens of Will, Kane, and Kendall Counties, Ill., protesting against the Lankford compulsory Sunday observance bill; to the Committee on the District of Columbia.

4823. By Mr. STRONG of Kansas: Petition of A. K. Mills and 28 other citizens of Salina, Kans., protesting against the passage of the Lankford compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4824. By Mr. SWING: Petition of citizens of Arlington, Calif., and communities, protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4825. Also, petition of citizens of Rialto, Calif., and vicinity, protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4826. Also, petition of citizens of San Bernardino, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4827. Also, petition of citizens of Riverside, Calif., and other communities protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4828. Also, petition of citizens of San Diego County, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4829. By Mr. VINCENT of Michigan: Petition of residents of Eagle and De Witt, Mich., protesting against compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4830. By Mr. WYANT: Petition of New Kensington Post, No. 347, the American Legion, approving passage of naval bill; to the Committee on Naval Affairs.

4831. Also, petition of 67 citizens and voters of Export, Pa., protesting against proposed naval building program; to the Committee on Naval Affairs.

HOUSE OF REPRESENTATIVES

SATURDAY, *March 3, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Infinite Spirit, from behind the veil of sense and force in that golden land of the unseen, there is the source from where flow the sweetest harmonies of the soul. Lift us up and away to those upper ranges, where the breath is not stifled and the room is not cramped, and where our divine natures can climb on and on. Lead us above the level of our own poor understanding and into the paths where God's hand is upon us, where the charm of character is so focused in our personality that it shall emit good influences even as the sun sheds his rays. Definitely direct us so that ambition to rule shall be supplanted by the passion to serve. Father, in the shadow of Thy holy presence let us walk; then we shall know of the newer, richer, and deeper meaning of life. Through Jesus Christ, our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 81. An act to authorize the coinage of silver 50-cent pieces in commemoration of the one hundred and fiftieth anniversary of the discovery of the Hawaiian Islands by Capt. James Cook, and for the purpose of aiding in establishing a Capt. James Cook memorial collection in the archives of the Territory of Hawaii;

H. R. 84. An act to approve Act 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the district of Waimea, on the island and in the county of Kauai, Territory of Hawaii";

H. R. 204. An act to authorize an additional appropriation for Fort McHenry, Md.;

H. R. 230. An act to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees;

H. R. 233. An act to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J.;

H. R. 234. An act to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1 cent a mile for subsistence of candidates in going to and returning from camp;

H. R. 235. An act to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields;

H. R. 238. An act to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army;

H. R. 248. An act to authorize appropriations to be made for the disposition of remains of military personnel and civilian employees of the Army;

H. R. 449. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a toll bridge across the Atchafalaya River at or near Morgan City, La.;

H. R. 519. An act for the relief of Joseph F. Ritcherdson;

H. R. 2524. An act for the relief of Mary M. Jones;

H. R. 4536. An act for the relief of Fred R. Nugent;

H. R. 5635. An act to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 5686. An act granting a right of way to the county of Imperial, State of California, over certain public lands for highway purposes;

H. R. 5727. An act to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, La.;

H. R. 5783. An act to grant extensions of time of oil and gas permits;

H. R. 5803. An act authorizing the Interstate Bridge Co., of Lansing, Iowa, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Lansing, Iowa;

H. R. 6194. An act for the relief of Frank Stinchcomb;

H. R. 6476. An act authorizing the Wabasha Bridge Committee, Wabasha, Minn., to construct, maintain, and operate a bridge across the Mississippi River at or near Wabasha, Minn.;

H. R. 6973. An act authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 6989. An act to amend the Hawaiian Homes Commission act, 1920, approved July 9, 1921, as amended by act of February 3, 1923;

H. R. 7030. An act to amend section 5 of the act of March 2, 1895;

H. R. 7195. An act to provide for the purchase of horses and mules for the Military Establishment;

H. R. 7199. An act granting the consent of Congress to the Oregon-Washington Bridge Co. to maintain a bridge already constructed across Columbia River near the city of Hood River, Oreg.;

H. R. 7213. An act to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound per mile, and for other purposes;

H. R. 7371. An act to legalize a bridge across the Snake River near Heyburn, Idaho;

H. R. 7375. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Guntersville on the Guntersville-Huntsville road in Marshall County, Ala.;

H. R. 7909. An act to authorize the maintenance and renewal of a timber frame trestle in place of a fixed span at the Wisconsin end of the steel bridge of the Duluth & Superior Bridge Co. over the St. Louis River between the States of Wisconsin and Minnesota;

H. R. 7914. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Whitesburg Ferry on the Huntsville-Laceys Spring road between Madison and Morgan Counties, Ala.;

H. R. 7915. Granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Scottsboro on the Scottsboro-Fort Payne road in Jackson County, Ala.;

H. R. 7925. Granting the consent of Congress for the maintenance and operation of a bridge across the Monongahela River between the borough of Glassport and the city of Clairton, in the Commonwealth of Pennsylvania;

H. R. 8530. Granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River near Cedar Bluff in Cherokee County, Ala.;

H. R. 8531. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road between Talladega and Shelby Counties, Ala.;

H. R. 8726. An act authorizing Oscar Baertch, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis.;

H. R. 8740. An act granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 8741. An act authorizing the Dravo Contracting Co., its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 8743. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, Minn.;

H. R. 8818. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La.;

H. R. 8837. An act authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Cassville, Wis.;

H. R. 8896. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia road in Escambia County, Ala.;

H. R. 9036. An act to increase the salary of the Librarian of Congress;

H. R. 9064. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River at or near Pell City on the Pell City-Anniston road between Calhoun and St. Clair Counties, Ala.;

H. R. 9139. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Cumberland River on the Lafayette-Celina road in Clay County, Tenn.;

H. R. 9196. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Decatur-Kingston road in Roane County, Tenn.;

H. R. 9842. An act to provide for the survey, appraisal, and sale of the undisposed lots in the town site of St. Marks, Fla.;

H. R. 9849. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Quincy, Ill.; and

H. R. 10715. An act to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 484. An act for the relief of Joe W. Williams;

S. 851. An act to amend an act of Congress approved July 3, 1926, being Private Act No. 272, and entitled "An act conferring jurisdiction upon the Federal District Court for the Western Division of the Western District of Tennessee to hear and determine claims arising from the sinking of the vessel known as the *Norman*";

S. 1095. An act to require registration of lobbyists, and for other purposes;

S. 1186. An act to provide for the construction of the Deschutes project in Oregon, and for other purposes;

S. 1341. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes, approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 1434. An act for the relief of Mattie Halcomb;

S. 1456. An act to authorize an appropriation for a road on the Zuni Indian Reservation, N. Mex.;

S. 1691. An act for the relief of William A. Light;

S. 1755. An act for the relief of Nellie Kildee;

S. 1756. An act for the relief of Lyn Lundquist;

S. 1822. An act to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions;

S. 1825. An act to amend section 12 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended by the act of June 1, 1926 (44 Stat. L. 680), so as to authorize an allowance of 3 cents per mile, in lieu of transportation in kind, for persons using privately owned conveyances while traveling under competent orders;

S. 1828. An act to amend the second paragraph of section 5 of the national defense act, as amended by the act of September 22, 1922, by adding thereto a provision that will authorize the names of certain graduates of the General Service Schools and of the Army War College not at present eligible for selection to the General Staff Corps eligible list to be added to that list;

S. 1829. An act to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes;

S. 1833. An act to amend the act approved June 1, 1926 (44 Stat. L. 680), authorizing the Secretary of War to exchange deteriorated and unserviceable ammunition and components, and for other purposes;

S. 1852. An act to correct the naval record of John Lewis Burns;

S. 1989. An act to amend the third paragraph of section 13 of the Federal reserve act;

S. 2030. An act to provide for research into the causes of poultry diseases, for feeding experimentation, and for an educational program to show the best means of preventing disease in poultry;

S. 2061. An act for the relief of W. H. Kaufman;

S. 2258. An act to give war-time rank to certain officers on the retired list of the Army;

S. 2342. An act providing for a per capita payment of $25 to each enrolled member of the Chippewa Tribe of Minnesota from the funds standing to their credit in the Treasury of the United States;

S. 2537. An act to amend section 110, national defense act, so as to provide better administrative procedure in the disbursements for pay of National Guard officers and enlisted men;

S. 2545. An act to authorize the sale of certain lands near Garden City, Kans.;

S. 2657. An act for the relief of George W. Boyer;

S. 2725. An act to extend the provisions of section 2455, United States Revised Statutes, to certain public lands in the State of Oklahoma;

S. 2827. An act granting the consent of Congress to the States of South Dakota and Nebraska to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.;

S. 2858. An act to authorize the use of certain public lands by the town of Parco, Wyo., for a public aviation field;

S. 2926. An act for the relief of the Old Dominion Land Co.;

S. 2948. An act to amend section 6, act of March 4, 1923, as amended, so as to better provide for care and treatment of members of the civilian components of the Army who suffer personal injury in line of duty, and for other purposes;

S. 2950. An act to amend the second paragraph of section 67, national defense act, as amended;

S. 2965. An act authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind.;

S. 2972. An act for the further protection of fish in the District of Columbia, and for other purposes;

S. 2998. An act granting double pension in all cases where an officer or enlisted man of the Navy or Marine Corps dies or is disabled as the result of a submarine accident;

S. 3058. An act to amend that provision of the act approved March 3, 1879 (20 Stat. L. 412), relating to issue of arms and ammunition for the protection of public money and property;

S. 3097. An act for the relief of the State of North Carolina;

S. 3118. An act to authorize the construction of a temporary railroad bridge across Pearl River at a point in or near section 35, township 10 north, range 6 east, Leake County, Miss.;

S. 3119. An act to authorize the construction of a temporary railroad bridge across Pearl River in Rankin County, Miss., and between Madison and Rankin Counties, Miss.;

S. 3131. An act to provide additional pay for personnel of the United States Navy assigned to duty on submarines and diving duty;

S. 3201. An act for the relief of Paul D. Carlisle;

S. 3292. An act providing for turning over to the Ohio State Archæological and Historical Society two dedication stones formerly a part of one of the locks of the Ohio & Erie Canal;

S. 3294. An act for the relief of certain newspapers for advertising services rendered the Public Health Service of the Treasury Department;

S. 3325. An act for the relief of Horace G. Knowles;

S. 3456. An act allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President;

S. J. Res. 41. Joint resolution directing the Comptroller General of the United States to reopen, readjust, and resettle the account between the State of Nevada and the United States; and

S. J. Res. 61. Joint resolution to provide for an agricultural day.

The message further announced that the Senate had passed with amendments, in which the concurrence of the House is requested, the following bills:

H. R. 66. An act authorizing B. L. Hendrix, G. C. Trammell, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill.;

H. R. 242. An act to amend section 90 of the national defense act, as amended, so as to authorize employment of additional civilian caretakers for National Guard organizations, under certain circumstances, in lieu of enlisted caretakers heretofore authorized;

H. R. 3510. An act to authorize the President, by and with the advice and consent of the Senate, to appoint Capt. George E. Kraul a captain of Infantry, with rank from July 1, 1920;

H. R. 7183. An act authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill.;

H. R. 8309. An act to amend an act entitled "An act to prohibit the unauthorized wearing, manufacture, or sale of medals and badges awarded by the War Department," approved February 24, 1923;

H. R. 9197. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Knoxville-Maryville road in Knox County, Tenn.;

H. R. 9147. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Jasper-Chattanooga road in Marion County, Tenn.; and

H. R. 9202. An act to authorize construction at the United States Military Academy, West Point, N. Y.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills and joint resolutions of the following titles:

H. R. 5818. An act authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis.;

H. R. 7201. An act to provide for the settlement of certain claims of American nationals against Germany, Austria, and Hungary, and of nationals of Germany, Austria, and Hungary against the United States, and for the ultimate return of all property held by the Alien Property Custodian;

H. R. 7948. An act to extend the times for commencing and completing the construction of a bridge across the Delaware River at or near Burlington, N. J.;

H. R. 9136. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes;

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.;

H. R. 10635. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes;

H. J. Res. 141. Joint resolution to authorize the President to invite the Government of Great Britain to participate in the celebration of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein; and

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton.

PHILIPPINE INDEPENDENCE

Mr. DYER. Mr. Speaker, the Commissioner from the Philippine Islands [Mr. GABALDON] is resigning shortly and returning to the Philippines, and he has asked me to make the unanimous-consent request for him that he may be allowed to extend his remarks in the RECORD.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the Commissioner from the Philippines [Mr. GABALDON] may be permitted to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. GABALDON. Mr. Speaker and gentlemen of the House: Once more and for the last time I shall avail myself of your courtesy and tax your indulgence in the interest of the cause

of Philippine freedom. I say for the last time, because, although my term does not expire until March 4, 1929, I have fully decided to heed the urgings of the inhabitants of my Province to again represent them in the lower house of our legislature and consequently to tender my resignation as a Resident Commissioner from the Philippine Islands to the United States.

I have served with you for seven years. Personally, I love you, one and all, and admire the spirit of fair play that characterizes the conduct of this, the greatest and the fairest legislative body in the world. Here a man may speak his sentiments, whether he be right or wrong, and without being shot at sunrise. But even in spite of my affection for you on all these grounds, I am leaving disappointed because independence has not been granted my people as solemnly promised.

I do not blame you individually, gentlemen of the House, for the failure of the United States to grant us independence. I only wish that our fate was in your hands. But forces more powerful, forces that you do not see, and that you do not individually come in contact with, insiduous forces that threaten the ultimate success of this the greatest Republic on earth to-day, are responsible for the denial of freedom to the Filipino people.

In these, undoubtedly my last remarks to appear in the CONGRESSIONAL RECORD, I intend to speak frankly. Some man, I do not know whom, but he was a wise man, said: "When in doubt what to say, tell the truth." That is what I shall now do, not the truth perhaps as some of you may see it, but the truth as I see it. I shall do this not to be harsh, but to do what I believe is my duty. If I record here the sincere feelings of my heart, no matter what the consequences, I will have fulfilled my obligations to myself and to my people. But if I leave without uttering those convictions I would forever have to reproach myself with the thought that my conscience had pointed out my duty, but that I had not had the manhood or the courage to obey. Better, then, for me to speak plainly but honestly and submit myself and the case of the Filipino people to your judgment.

First of all, allow me to call your attention to the apparent tendency of those who were sent to the Philippine Islands to represent and exercise the sovereignty of the United States in those islands during the last seven years to discredit the Filipinos and to depict them before the world as utterly incapable of managing their own affairs and thus justify a curtailment of the governmental powers already granted to them. The records of the Sixty-eighth, Sixty-ninth, and the present Congresses contain evidence of the efforts made to nullify the avowed policy of the United States in connection with the Philippine Islands from the very moment that those islands came under the political tutelage of this Republic down to the time of the enactment of our present organic act, in which it is clearly stated that "it has always been the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein."

During the present session of this Congress, two bills bearing all the earmarks of unrestrained imperialism have been favorably reported—one by the Senate Committee on Territories and Insular Possessions, taking away from the Philippine Senate the power vested in that body by the Jones Act to confirm appointments of officers for the non-Christian provinces without any reason to support such a reactionary step except the complaint of the Governor General of the Philippines that he could not obtain the assent of the Philippine Senate to certain nominations submitted by him, and the other by the House Committee on Insular Affairs, setting aside yearly the sum of $125,000 out of the taxes levied on Philippine goods imported to this country, which, to this day, have been disposed of only by an act of the Philippine Legislature, for salaries and traveling expenses of certain assistants to the Governor General.

My colleague and myself have strenuously opposed the enactment of the measures to which I have just made reference at the time of their consideration by the respective committees of this Congress, but the sentiments expressed by us in behalf of our constituents seemed of no avail, while the letters addressed by the newly appointed Governor General of the Philippines to the chairmen of the Senate Committee on Territories and Insular Possessions and the House Committee on Insular Affairs on the eve of his departure to assume his post urging the passage of such measures, apparently carried more weight in the minds of those who voted to report them favorably to their respective bodies than the opposition of 12,000,000 Filipinos as voiced by us.

It has been alleged that the President of the Philippine Senate and the Speaker of the House of Representatives of the Philippines have agreed on the necessity of providing the Governor General with additional assistants besides those granted to him by the laws of the Philippine Islands. Mr. Speaker and gentlemen of the House, I only have to refer you to the testimony of the President of the Philippine Senate before the Committee on Territories and Insular Possessions of the Upper Chamber of this Congress offered in December of last year, to convince you that the Philippine leaders agreed to provide the necessary funds for the payment of the salaries and traveling expenses of the governor's assistants, but not to a curtailment of the powers granted to and enjoyed by the legislative branch of our Government as it is intended by H. R. 8567 reported by the Committee on Insular Affairs of this House. The President of the Philippine Senate said on that occasion:

> When the Philippine Legislature, without pressure on the part of anyone, gracefully meets the wishes of the administration here and appropriates the money that they say is required for help to the Governor General, it seems to me inexcusable to insist that the same thing should be done by the Congress. It looks to me like a deliberate invitation for trouble.

STIMSON'S PHILOSOPHY SHOULD MAKE FILIPINOS LAUGH

The new Governor General of the Philippines, the Hon. Henry L. Stimson, has now arrived in Manila and has made public the views that will guide him in his Philippine policies. His words and his views are those of the late Governor General Wood; therefore I disagree with them.

Governor Stimson suggests to the Filipinos, in effect if not in exact words, that the way for them to hurry independence is to accelerate development of our natural resources.

For the benefit of Americans who may not know what is in the back of his mind, I will explain that what he really means is for the Filipinos to let down the bars for the influx of enormous sums of American capital.

For a man to look me in the face and tell me that the greater the American investments in the Philippines the more quickly we will be given our independence is to convince me that he intends that assurance only as humor. Now, if this philosophy is intended as a joke, I am willing to laugh heartily with the Governor General, for I must admit it is a perfectly good joke.

The very reason that we have not been given our independence is the investment of American capital in the islands. Every additional dollar of American investment there is an additional nail in the coffin of our independence. This statement is not original with me. It has been frequently made in the Philippines. I do not know the name of its author, but whoever he was, he was right. It is the Americans who have investments in the Philippines who are working the hardest against our independence. I am not opposed to American investments in the islands, but I am opposed to the investment of a single additional dollar of such capital until after we have been made a free and independent people.

Said Governor Stimson in his inaugural speech:

> I believe that nowhere in the world are relations of capital to the public watched with more jealous eyes than to-day in the United States. The abuses of capital which excited criticism a generation ago have been cured. The American captains of industry to-day have a very different standard of duty toward the public from their predecessors of the nineteenth century.

Then God forgive those "predecessors of the nineteenth century." If they had anything on that great captain of industry of this twentieth century, Harry F. Sinclair, multimillionaire oil man, and former United States Senator Albert B. Fall, they must indeed have been bad.

According to sworn testimony, Fall, while Secretary of the Interior in the cabinet of the late President Harding, leased to Sinclair Government oil lands, which had been reserved for the United States Navy, worth $300,000,000. Following this generosity with the property of the American people, Sinclair had $100,000 delivered to Fall "in a suitcase," and placed in a safety deposit box in the name of "A. B. Fall" $230,000 more in Liberty bonds. All this happened more than three years ago, and neither Sinclair nor Fall have ever served a day in jail.

And now it comes out that Sinclair secretly contributed $260,000 to the campaign funds of the National Republican Party. What frightens me as a Filipino is the knowledge that those American "captains of industry" who have millions invested in the Philippines are also heavy contributors to the campaign chest of the Republican Party. In the name of God, Members of the American Congress, I beseech you to give us our independence before the Philippines, like the "Teapot Dome" and the naval oil lands, are donated to campaign contributors whose mouths are watering for our golden natural resources.

MY CHOICE IS COMPLETE INDEPENDENCE, NOT MERE AUTONOMY

It may be that some of my countrymen would be satisfied with some form of local self-government, or autonomy, under the sovereignty of the United States, in lieu of complete and absolute independence. I question neither the sincerity nor the patriotism of those of my countrymen who so believe, but for myself nothing will be satisfactory to me but to see my beloved Philippines as free and independent a nation as is any other free and independent country of the world. Only by being as free and independent as other nations will Filipinos or the Philippines ever be as respected as are they. No subservient race or nation will ever receive the consideration or the respect accorded a free people. There are several South American nations which do not begin to possess the area, population, natural resources, foreign or domestic trade, or, according to the United States Bureau of Census, anything like the percentage of literacy that the Philippines possess, yet their ambassadors, their ministers, their governments, and their nationals, are treated to the same respect, consideration, and on the same basis of equality as the representatives of the greatest nations on earth. Their slightest complaint is accorded immediate and respectful consideration by the American Department of State. You never hear of lecturers and propaganda bureau in the United States conducting systematic campaigns to defame their people and ridicule their customs. The United States Government would not tolerate within its borders such campaigns of villification and abuse against the people of a friendly independent nation.

There are no Katherine Mayos going to independent nations and later picturing their peoples as "no more capable of self-government than the cattle in the fields" and their governments as orgies of "destruction, decay, loot, bribery, and graft," as she did the Philippines. These vile propagandists for imperialism, who confine their "investigations" to the sewers, and then represent the filth they find there as typical of an entire people or country, are only sent to lands inhabited by dependent peoples who are aspiring for independence, and against whom campaigns of misrepresentation are conducted solely to ridicule their claims for freedom.

THE MOTIVE

The motive behind Miss Mayo's bitterly prejudiced articles is not far to seek. The plain object was to prejudice Members of Congress against early Philippine independence.

It is pertinent in this connection to direct attention to the fact that the organization which was most conspicuous at that time in gloating over the infamy that the Mayo articles heaped upon the Filipino people was the American Chamber of Commerce of Manila, which is composed of Americans having investments in the islands and which almost immediately after the appearance of the Mayo articles opened American headquarters for opposing the aspirations of the Filipino people, at 66 Broadway, New York City.

A sympathetic and laudatory review of the Mayo articles was contained in a pamphlet issued by the organization mentioned, dated December 27, 1924, which was sent to all Members of Congress and broadcasted throughout the United States.

Furthermore, while the heads of the second Philippine Parliamentary Mission were still on the high seas en route to the United States to ask independence, the American Chamber of Commerce at Manila passed resolutions calculated to undermine the influence of and prevent the success of the mission, the official spokesmen of the Filipino people. The resolutions asked the cooperation of chambers of commerce of American cities to bring about a territorial form of government in the Philippines, and criticized the mission for incurring the expense for the trip to the United States.

I take advantage of this opportunity to warn the American Chamber of Commerce of Manila that by such conduct and by encouraging such exaggerated and insulting propaganda as the Mayo articles and book, it is sowing an ill wind. For it is not to the best interests of American capital in the Philippines to thus poison the mind of the American people against Filipinos.

I do not think it wrong for American business men to aspire to broader markets and profitable business in the Philippines. If they are willing to abide by our laws for the safeguarding of our natural resources for the Filipino people, I will not oppose an increase of American capital after independence is granted. I oppose it now only as a matter of self-defense.

Filipinos who prefer autonomy to independence may speak for it, but I have had enough experience to convince me that there is no use for Filipinos longer to deceive themselves.

As long as they have merely autonomy and not independence they will be obliged to submit to abuse, ridicule, misrepresentation, and calumny, carrying on their backs a horde of evil muckrakers whose mission and profession is to represent those races seeking to throw off gratuitous alien rule either as "helpless little children," as peoples essentially ignorant, irresponsible, and inefficient, or else as vicious near humans just emerged from savagery.

If under autonomy we have an American Governor General—in whose selection, by the way, we have no voice—the only type of an American who can receive the appointment under an administration like the present one is some one known positively to be opposed to independence. Believing, therefore, the Filipinos should not be granted independence, and with the Filipino leaders pressing their rights and readiness for independence, such a Governor General is soon forced into the natural position of wanting to convince others that his position against the readiness or capacity of the Filipinos for independence is right. To do so he must necessarily contend that the attitude of the Filipinos is wrong. Always henceforth he must depict himself right, the Filipinos wrong. He, being an American and a prominent one, will have the ear of the President of the United States and the support of the American newspapers. Always the President and the press of his own people will proclaim him in the right, and to place him in the right they also must and will place the Filipinos as in the wrong.

Now let us assume we obtain such a measure of autonomy as would permit a Filipino Governor General. If a Filipino should be appointed by the present administration, or one similarly conservative and similarly opposed to independence, it would undoubtedly be a Filipino who would be recommended by or be satisfactory to the opponents of independence, i. e., one who, no matter how many times he might have declared himself to be for immediate, absolute, and complete independence, was known secretly to be "satisfactory" to the "powers that be." I regret to say that I believe Filipinos could be found who would consent to fill such a rôle, and that there will always be such men, not only in the Philippines, but in every country on earth. I very much fear such an appointee would be unsatisfactory to the Filipino people, because he would either serve his masters through whose recommendations he was chosen, or he would soon be supplanted by another Filipino Governor General who would. If, after his appointment, he should work openly and frankly for the cherished goal of his people, he could expect nothing but early dismissal.

Now, let us assume that the United States were willing for us to elect our own Governor General, and the Filipino people would in turn elect a genuine Filipino patriot who would put forth every effort to make his people free and independent. In that case, his every act would be seized upon as an opportunity for criticism and denunciation and made to appear as an argument against Philippine independence. Filipinos need not doubt that such would be the case. Most Americans resident in the islands, most Americans having as much as a single dollar invested there, 90 per cent of the Army and Navy officers who have ever seen service there or who ever expect to, have always, as Filipinos know only too well, been bitterly opposed to the very suggestion of independence, and always will be. These forces may be relied upon without the least possibility of failing us to see a mountain in the tiniest molehill of a mistake that an elected Filipino Governor General might make. It is only necessary to recall what a campaign of misrepresentation and abuse these men carried on against Francis Burton Harrison simply because he honestly and sincerely favored Philippine independence, to imagine what lies they would concoct in order to make anti-independence publicity for American newspapers.

What I want for my country is independence, and because I want independence, I am opposed to the acceptance on the part of the Philippines of autonomy as even a temporary substitute for it. I take this attitude because I want independence at the very earliest day I can get it, and the acceptance of autonomy will not be a step in the direction of independence, but a step away from it. Under present conditions the Filipinos are always placed on the defensive. For instance, the pending Kiess and Willis bills places us on the defensive, because the supporters of those measures claim that the authority now reposed in the Philippine Legislature under the Jones law should be transferred to the Governor General, and we are placed in a position where we must defend the justice of and the justification for the present provisions of the Jones law in order not to lose powers of self-government that we already possess. The Wood-Forbes report put us on the defensive because we had to deny the many counts contained therein against our readiness to govern ourselves. The Katherine Mayo articles and book placed us on the defensive because she misrepresented us in the most vile and venomous manner that a human being could stoop to, and we were obliged to answer her.

Every committee of Congress that visits the Philippines puts us on the defensive, because there will always be some mem-

bers of it who will come back and oppose us. Just as long as we have a system of government short of complete independence, we are going to be eternally lied about, belittled, and placed on the defensive. There is no form of autonomy that will save us from it; Filipino Governors General will simply constitute a new source of anti-independence propaganda, and thus delay independence that much longer. Independence, and that, alone, will stop the ever-recurring, humiliating and vengeful attacks upon our race, our culture, and our country, because independence alone will remove the cause of these attacks.

The United States has definitely, officially, and, therefore, legally promised us independence. Even as great as it is, the United States can not refuse to carry out its compact without dishonoring itself before the whole world. If we Filipinos stand steadfast to an insistence that America's pledge be redeemed in full, as written on the statutes and before God, the United States will be honor bound to fulfill it, and ultimately will actually do so. But an agreement on our part to anything short of independence will be considered in the United States, especially with those unseen powers that be but that actually control the policies of the United States, as a "final solution of the Philippine problem," and independence will be lost forever. To the Filipinos I say this: Stand firm. Insist upon that which has been promised us. Autonomy will perhaps give our leaders more power, but only more power over you. Independence alone will place power exclusively in your own hands. I am not speaking for my own personal gain or for my own political advancement. I am speaking now for the Filipino race and for the Philippine nation to be. And if the present generation is unable to agree with me, I still desire to submit our case for the consideration of the generations of Filipinos to come.

AUTONOMY NOT A SOLUTION BUT A DELUSION

For my race to depend upon any form of autonomy as a solution of their problems will be to depend upon a mighty slender reed. In the first place, I predict that Congress will never grant, even substantially, local self-government unless the Filipino leaders previously pledge themselves to consider it a "solution of the Philippine problem" for a good many years to come and agree themselves to refrain from advocating complete independence for that period. That was the offer substantially made at the time that the Fairfield "commonwealth" bill was pending in June, 1924. The theory, or at least the hope, is that at the end of a long period of non-agitation for independence the Filipinos may not want independence.

But if the leaders would subscribe to non-agitation, I predict that even then the United States, at least with an administration in power that is anything like the present one, would not concede to a form of autonomy that would make us real masters of our own affairs. It will be recalled that one of the four recommendations of the Wood-Forbes report of October 8, 1921, was this:

4. We recommend that under no circumstances should the American Government permit to be established in the Philippine Islands a situation which would leave the United States in a position of responsibility without authority.

This philosophy was not original with Messrs. Wood and Forbes, for the Republican Party heads, convened in Philadelphia on June 19, 1900, had adopted the slogan concerning the Philippines:

Our authority can not be less than our responsibility.

In other words, as long as the United States holds the slenderest string to the Philippines, under whatever form of autonomy, it will place its authority above that of the Filipinos and be our master. It is foolish, therefore, for the Filipinos to expect that any form of autonomy that can be devised will be satisfactory even as a temporary substitute for independence. The mere suggestion that there could be a satisfactory substitute for a people's liberty is a travesty. There is one statement at least in the Wood-Forbes report that I agree with, and that is the assertion that—

independence under the protection of another nation is not true independence.

AUTONOMY WILL MEAN A NEW, RADICAL POLITICAL PARTY

If Filipino leaders agree to a compromise short of complete independence, it will not, in my judgment, "solve the Philippine problem" at all, nor will it have a "quieting" effect on Philippine politics. On the other hand, I believe that any Filipinos who agree to such a compromise will sooner or later be retired to private life. And if this does not happen, it may very easily lead to the formation of a new party that will honestly work for complete independence. If all Filipinos who want complete independence affiliate with one party, and those who are satisfied with something less affiliate with another, I believe an out-and-out complete independence party will ultimately gain the ascendency.

I can never be convinced that the soul of the Filipino people is not for independence. I can not believe that there will be no more Rizals, Mabinis, Bonifacios, or Del Pilars spring from a race that gave those patriots to the world. I am eagerly awaiting and expecting some man, possibly some young man who has been trained in the United States, to prove himself the leader that can unite the Filipino people behind him and win them the independence that our race for centuries has aspired to so consistently.

To those Filipinos whom my position may not be for the immediate moment understandable, I plead for their sympathetic consideration on the ground that I, like themselves, have independence as my one and only political wish in this world. And I believe that if we are to attain it, we Filipinos must continue to insist upon complete independence, and to take the position that nothing less will be satisfactory to us. Unfortunately, Americans have, with or without justification, become imbued with the conviction we do not really desire complete independence. We therefore have before us now the necessity of convincing them to the contrary. The only way we can do so is to refuse our consent to anything less than absolute and complete independence. Solicited autonomy is but a beautiful phase of voluntary slavery. Even if there should develop a strong sentiment for it, I will never personally yield to such a compromise. In all my life-long advocacy of independence, I have been sincere about it, and I would rather have conditions remain exactly as they are now than accept anything less than independence. This is not unreasonable to the United States. I ask only for that which has been repeatedly promised us. That is my defense to this and future generations, and I make no apology.

NO INDEPENDENT COUNTRY WOULD CHANGE PLACES WITH PHILIPPINES EVEN TO BE ASSOCIATED WITH UNITED STATES

Even if Americans should obtain a contrary opinion from these remarks, I am not against the United States or the people of the United States. I believe the American people are the most altruistic people on earth, and if it were within their power to vote on the subject they would grant us independence. Unfortunately, however, they can not vote on this subject specifically. The United States is the greatest nation on earth to-day, and promises to continue to be so for as far ahead as anyone can now foresee.

What I am objecting to, however, is the action of the United States in failing to give the 12,000,000 people of the Philippines the independence that it promised them. As great as the United States is, there is not an independent country on earth to-day that would care to exchange the sovereignty of its own people for that of this great country.

Let us imagine that at the recent Pan American Conference at Havana, Mr. Hughes, the American delegate, had addressed the representatives of the South American Republics as follows:

You all know that the United States has been exercising its sovereignty over the Philippines for more than a quarter of a century. We consider that the Filipinos are therefore a very fortunate people. Although they have been deprived of political independence, they have had the benefit of American culture and tariff-free access to American markets for Philippine products. To the end that these incomparably valuable blessings may be enjoyed by the largest possible number of fellow men, the United States desires to offer indisputable evidence of its generosity by its willingness to extend its sovereignty to any of our sister Republics desiring it under the same conditions that it is being enjoyed to-day by the people of the Philippines. This offer will remain open indefinitely.

What would have happened? Why, every delegate would have considered himself insulted. The tiniest, most insignificant South American country would not only have rejected it with scorn, but its every man, woman, and child would be willing to give up their lives on the battle field rather than have such an arrangement forced upon them. Now, if the tutelage which the United States is forcing upon the Philippines is such a godsend as the imperialists assert, why is it that no other country wants it?

It certainly appears that independence to those possessing it and therefore familiar with its defects as well as its virtues is held greatly preferable to any form of mere local autonomy that can be devised. And because independence has been so satisfactory, without exception, to those nations that have it, including our guardian, the United States, the Filipinos would like to enjoy its blessings themselves.

The inability of our imperialist friends to understand why we should not be satisfied with the heavenly political arrangement under which we now exist reminds me of a story I heard

of a slave who had been liberated in one of the Southern States at the close of the Civil War and had made his way to one of the free States of the North. He was interrogated by one of those species of the genus homo who can not understand why anyone but himself should want to be free.

"Well, Rastus," he asked, "didn't you have a good master down South?"

"Yas, sah; yas, suh; indeedy, I did, suh; one of de best marsters anybody could want, suh."

"Well, didn't you get enough to eat?"

"Yas, suh; plenty to eat, suh; plenty, suh."

"Didn't you have a good place to sleep?"

"'Deedy I did, suh; jes a fine place to sleep, suh."

"Well, Rastus, why wasn't you satisfied then?"

"Well, suh," replied Rastus, "it's jes dis way, suh, when I left down dar, my job was still open, and if you want it, suh, you're welcome to go down and git it."

To be governed by an alien people over our protest is oppression. To govern oursleves, however badly, is liberty. Under the former, a people is helpless to correct misgovernment; under the latter, they may correct abuses by changing their officials, and if they do not do so they then have no one to blame for existing conditions but themselves.

AUTONOMY DENIES US EVEN THE RIGHT TO BE PATRIOTIC

Under any form of autonomy, we are denied even the right to be patriotic. Patrick Henry said: "Give me liberty, or give me death." And the Americans have immortalized him. If Filipinos should say it in the sense that Patrick Henry did, our portion would be death. Americans proclaim the principle of: "Our country, right or wrong." Antonio D. Paguia declared the late General Wood was like a big tree that cast no shadows, and he went to jail.

Americans celebrate their great men like Lincoln, but the Coolidge administration is certainly lax in carrying out the principles of Lincoln. The great emancipator said: "No man is good enough to govern another without that other man's consent." The American Declaration of Independence declared that "governments derive their just powers from the consent of the governed." If this political philosophy is right, the United States has no just powers in the Philippines. We have been governed without our consent and in spite of our protest for 30 years. Lincoln also said:

> Those who deny freedom to others deserve it not for themselves, and under a just God can not long retain it.

If, then, God is just, the United States must either keep its pledge to give us our independence, or else it deserves to lose its own. That's according, not to me, but to Abraham Lincoln.

"Observe justice and good faith toward all nations," advised George Washington. We were promised ever-increasing self-government terminating in independence, and are now offered "backward steps." Is this the observance of justice and good faith?

Congress promised us, in the Jones law, the withdrawal of American sovereignty and the recognition of our independence "as soon as a stable government could be established therein." That act was supported by both Democrats and Republicans and signed by the President of the United States.

The stable government provided for in this act was established at once. It has continued to function from that time to this. It is as stable as any other government in the world.

For almost 11 years the condition exacted by this covenant has been loyally fulfilled and for almost 11 years the United States on one pretense and another has been evading its solemn obligations and disregarding its plighted word.

Let us have the plain truth. You would not do this with any nation capable of compelling you with armed forces to keep your covenants. You would not enter into an agreement with Great Britain or France or any other country that has armies and battleships and then for 11 years sidestep the promises you had made. You are fond of saying that right makes might and that the faith of the United States is unimpeachable whether with small nations or with great. Before that assertion is repeated again I think the American record with the Philippine Islands should be carefully reviewed.

I call your attention to the fact that there is much in history to back up the warning of Lincoln. Rome fell. Its fall was as much due to its action in governing peoples against their will, to its imperialism, as to any other one reason. Is the United States, then, to take no lesson from the sad experiences of the Roman Empire?

I must say to you plainly, but in no unkind spirit, that we do not need your tuition in self-government. We can manage our own affairs a great deal better than you can manage them, and even if we could not, that would be no just concern of yours. The records of this world are full of the failure of the men of one clime, environment, tradition, and psychology to dominate the lives of men of a totally different clime, environment, background, and psychology. All such attempts have ended in but one of two ways; in the annihilation of the subjugated people or the destruction of the empire that sought to subjugate them. If in the face of all the demonstrations in history you are determined to walk that path of dissimulation, proceed. But I should like to record a prophecy now that the historian of the future will date the downfall of the American Empire from the time when in defiance of its solemn undertakings the United States undertook to manage the affairs of a people 10,000 miles away, of a different and irreconcilable temperament.

WORDS AND ACTIONS DO NOT HARMONIZE

President Coolidge, speaking before the Sixth Pan American Congress at Habana, Cuba, said:

> Our most sacred trust has been, and is, the establishment and expansion of the spirit of democracy. We have put our confidence in the ultimate wisdom of the people. We are thoroughly committed to the principle that they are better fitted to govern themselves than anyone else is to govern them. It is better for the people to make their own mistakes than to have some one else make their mistakes for them.

Charles E. Hughes, chairman of the United States delegation at the same congress in Habana, said:

> We have no policy of aggression. We wish for all of them, not simply those great in area and population and wealth, but for every one, to the very smallest, strength and not weakness.
>
> We do not wish their territory. We have troubles enough at home without seeking responsibilities abroad.

These are noble sentiments, worthy of Washington, Jefferson, and Lincoln. They are in accord with the immortal Declaration of Independence. But they are not in accord with America's relationship with the Philippine Islands. I call upon the whole world to witness the fact that they are not. If President Coolidge is sincere in his statement that "it is better for the people to make their own mistakes than to have someone else make their mistakes for them," why is he so determined in his unwillingness to allow the 12,000,000 Filipinos make their own mistakes, and the opportunity to profit from those mistakes if they do make them?

"We have no policy of aggression," said Mr. Hughes. What, then, does he call America's action in the Philippines? The Wood-Forbes report states that the United States obtained the Philippines "by conquest." Does Mr. Hughes maintain that "conquest" is not "aggression"?

WE CAN EXIST WITHOUT FREE ACCESS TO AMERICAN MARKETS; ALL OTHER COUNTRIES ARE EXISTING WITHOUT IT

Retentionists are fond of asserting that independence would annihilate Philippine commerce and destroy Philippine industries, because Philippine products now entering the United States duty free would be barred by America's tariff wall. The answer to this is that the foreign trade of practically every republic on earth, however small, shows a higher percentage of increase in recent years without American sovereignty and tariff-free access to American markets, than does that of the Philippines with both. If the little South American republics, with less population, less resources, and much lower literacy, can thrive commercially with independence, why assume a Philippine Republic could not also exist?

In this connection I desire to insert a self-explanatory chart on this subject taken from The Philippine Republic magazine, and based on figures reported in the New York World Almanac:

Comparative gains in foreign trade of Philippines and South American Republics

Country	Area in square miles	Population	Foreign trade		
			1921	1924	Per cent gain
Philippines	115,026	[1] 11,568,494	$203,953,896	$243,355,500	20
Ecuador [2]	118,627	1,500,000			61
Costa Rica	23,005	498,435	21,061,773	28,568,249	39
Salvador	7,225	1,550,000	16,948,042	35,326,000	113
Guatemala	48,290	2,119,165	25,747,328	42,728,538	68
Venezuela	393,976	3,000,000	44,192,402	[3] 59,713,527	31
Chile	289,796	3,774,485	297,497,313	375,226,935	28
Brazil	3,276,358	30,635,605	437,314,937	765,013,350	75
Argentine	1,153,418	9,548,092	1,267,790,000	1,771,587,710	39

[1] Estimated.

[2] For Ecuador export figures only were available for 1923 and 1924, as follows: 1923, $18,655,770; 1924, $29,776,209. Gain in exports in one year, 61 per cent.

[3] Foreign trade for 1923.

LET US CONSIDER HAWAII

Let us take the case of Hawaii. Hawaii has been under the American flag longer than the Philippines. It is prosperous, but not for the Hawaiians, but for the Americans who have gained control of the richest regions of the islands. Hawaiians are lucky even to get the opportunity to earn their daily bread from the foreign owners of their own soil. I want no such a condition for the Philippines.

I call attention to the following editorial from the Tribune, Manila, which deserves careful consideration, especially by Filipinos who imagine that autonomy will protect us:

[From the Manila Tribune]

REMEMBER HAWAII

It would not be hard to visualize a prosperous Philippines a decade or more from to-day if our leaders would agree to plans which would make the magnates invest millions of dollars in the rubber industry in this country. Plantations would push the wilderness back; new roads would connect the interior country with maiden seaports; the land settlement problem in Mindanao would be solved; a railroad system would connect distant ports in that island; the scale of wages would rise and the standard of living correspondingly; the demand for articles of necessity and luxury would increase, and so would the volume of business.

Yet our leaders have acted most wisely in making haste slowly. For the capital that comes to a colonial possession makes for the perpetual retention and tutelage of the subject race. If capital would only be content with vast returns on investments, if it would not look to the flag of its nation as a guaranty for the permanence of its business, if it would accept the hazards that are predicated on its location in a country not permanently under its own government as part of the game of business without trying to influence federal legislation affecting these islands, its entry here would be a blessing. But it must not only have material rewards but also seek the perpetual subjection of a race. Its dividends are dollars and the submission of the nationals to foreign domination. Its gospel is written in characters from which are omitted the right of a race to self-sovereignty; and the pride and the dignity that go with freedom. It simplifies life in the colony, but it degrades the human soul to the level of abject submission.

Remember Hawaii! A paradise of the Pacific, it is true; but a paradise for whom? Not for the Hawaiians, who, living in miserable hovels, are now a race with no ambition to assert themselves, their memory of their days of complete freedom fast fading before the omnipotence of vested interests. The story of their disappearance as a nation is a warning to be heeded. The lesson of how gradually they have fallen should not be lost to us whose destiny would be identical with theirs were we to sacrifice to temporary material benefits the restoration of our republic.

It is moreover a strange coincidence that the power which has brought about the circumstances leading to the conquest of Hawaii is also the power which to-day controls us and has the authority to render final decision on the Philippine question. We have faith in the rectitude of America's purpose here in spite of recent happenings that would make us lose our confidence in her vaunted altruism. But Hawaii is like a message to us; a land of prosperity, yet also the graveyard of a whole race, and we can not forget Hawaii.

Remember Hawaii!

AMERICANS WILL NEVER TREAT FILIPINOS ON BASIS OF SOCIAL, RACIAL, OR POLITICAL EQUALITY

Filipinos can never expect to enjoy the maximum of happiness under American sovereignty. Although itself made up of nearly every race under the sun, the American people are the most race conscious people in the world to-day.

No matter what benefits we might derive through political connection with the United States, Filipinos can never be completely happy because Americans will never treat us on a basis of social, racial, or political equality. The Filipino people are modest, but they also have pride and self-respect. This holier than thou attitude assumed by Americans resident in the Philippines—who as a matter of fact are not a bit holier than ourselves—is an affront to our intelligence and sense of observation.

Allow me here to quote a few excerpts from an article in the Nation, New York, by Mrs. Frances Parkinson Keyes, wife of Senator HENRY W. KEYES, of New Hampshire, who was a visitor in the Philippines during Christmas season of 1926:

"I don't know at all how they live—in a very slack, haphazard way, I suppose; but since I have never been in a Filipino house, I really can't judge."

"You've never been in a Filipino house?" I echoed stupidly, staring at my hostess across a table bright with poinsettias, and glittering with wafer-thin, cut shells which served as place cards. Her casual statement, a nonchalant fragment of dinner-party small talk, was to me so astonishing as to be stunning. She was the wife of a United States official who has been for years in the Philippine Islands, and she lived in the "best" residential section of Manila, surrounded on every side by Filipino neighbors. And when she had reiterated, with slightly more detail, what she had said before, it was all I could do to keep from exclaiming, "Well, you certainly have missed a great deal!"

For I had come to this dinner almost directly from a Filipino house; and the picture of elegant and ordered living which I had carried away with me was still as softly vivid as if it had been colored on my consciousness by a master painter: At the end of a driveway which wound quietly up a little hill stood a large garden, the generous green of its central plot fringed with roses; and my hostess, as she greeted me at the open door, handed me a bouquet of dusky roses, their perfume as heavy as their own rich crimson heads. Her satin saya was looped up on one side to show a petticoat of fine lace; the same fine lace was etched against the sheer piñar cloth, made of pineapple fiber, of her camisa (bodice); and her neckerchief was fastened with a superb diamond brooch.

"You would like to go upstairs, perhaps," she suggested, "before you take your place in the receiving line?"

She led me up a stairway with a balustrade of dark hardwood, exquisitely carved, into a bedroom where this hardwood and this carving were repeated in every piece of furniture—in the immense, canopied four-post bed, in the dressing table, cheval glass, wardrobe, and chairs. I could not refrain from exclamations of admiration; and I received my reward when I was taken into four other bedrooms, each more beautifully furnished than the last. Then I was conducted downstairs again, to the spacious drawing room. The portrait of my host's mother, painted by a Filipino artist when she was 16—a dainty, wistful, expectant 16, as the artist had understood and interpreted—hung over the grand piano; the casement windows, with their tiny square panes of opalescent shell—that same shell which my American hostess used for dinner cards, and which serves, in the Philippines, so many beautiful and varied purposes—were thrown open to let the mellow afternoon light stream in over burnished brass bowls filled with flowers over bits of golden brocade gleaming down the length of polished tables, over Chinese rugs of Ming blue spread across a shining floor. Here, in course of time, after I had met a hundred or so women, all dressed, like my hostess, in that lovely costume which is surely one of the most suitable and striking of national dresses, and nearly as many men, in spotless linen and pongee, all cordial, sophisticated, and charming, my hostess brought refreshments to me—pale tea in a thin, priceless cup; sherbet in carved crystal; frosted cakes on a pierced silver salver * * * yes, certainly, the woman who lives for years where she might go daily to houses like these, and never enters one of them, misses a great deal.

I spoke of this episode to another American woman, also long resident in the Philippines. Her comment, also, was surprising.

"Oh, their houses are pretty, many of them," she said, with a little disparaging laugh, "and they're pretty, quite pretty, often. I agree with you that the costume is lovely, and the women are really hospitable, charming, and gracious. But they haven't any mentality. Their education is superficial. They don't read. You never see a book in a Filipino house."

Passing over, for the moment, the rather formidable array of women doctors, lawyers, and educators who had been presented to me during my brief stay. I nevertheless ventured to disagree with her. For I had sat, the greater part of the evening before, with another old friend, a Filipino woman whom I had known before coming to the Islands, in her library. This library so far surpassed my own—and I am proud of my library—that I was green with jealousy. It was a large room—much larger than mine—and the books were crowded on three sides, clear to the ceiling, row after row; on the fourth side, under the broad windows, three more rows of books were squeezed in. The large central table was covered with magazines and newspapers in several languages; the latest works of fiction, biography, history, and travel were scattered lavishly about; and as the owner of these envied treasures talked with me about what she had "recently read" my sense of being almost illiterate myself grew stronger and stronger, such was the variety, depth, and extent of her reading.

The Spaniard, with all his faults as a colonist, did not shut his eyes to the fact that the Philippines were producing men and women of culture, refinement, and intellect, and mingled with them socially as a matter of course. The American colonist, loudly proclaiming his superiority, refuses to do anything of the kind. The line of cleavage between the two races—Anglo-Saxon and Malay—has been drawn as it certainly is not drawn in Java, where the Dutch, it would seem, are facing much the same problem which confronts us in the Philippines, with another Malay race.

And how are the Dutch dealing with it? By recognizing, first of all, the Javanese as a social equal, if, by birth, breeding, and education he is entitled to such recognition. The native sultans and regents have been shorn of all but nominal power; but the Dutch residents and governors and the governor general invite them to dinner and dine with them in return, display and exact respect for their religious and

domestic customs, and address them in terms of brotherly affection. This may be merely surface courtesy; but it certainly results in a smooth and pleasing surface.

* * * * * * *

Is it possible that in denying social privileges to a race peculiarly sensitive in regard to such recognition we have been guilty not only of an offense against good manners, but of a national blunder the consequences of which may be grave? Mr. Hughes is generally supposed to have forfeited the Presidency because of his failure to shake hands with Senator JOHNSON. Are we to forfeit the Philippines because we have, so to speak, refused to shake hands with the Filipinos? We need not go as far as the Dutch; we may leave aside all question of racial intermarriage, the advisability of which we shall probably always question, and which—let us not forget—the races with which we *decline to* intermarry question quite as anxiously as we do. Might it not be well to admit that there are Filipinos who are our social equals, and to accept the hospitality which they, more than any other race with which I have come in contact, offer so lavishly and so whole-heartedly? Might it not be well perhaps to offer them a little in return?

It is no idle epigram, more graceful than veracious, which states that the fate of nations has often been decided over a dinner table. It is the sober truth. And it is a truth to which we might listen with profit in considering the problem of the Philippines.

FILIPINOS WILL NEVER BE SATISFIED UNDER RULE OF A DIFFERENT RACE

Were my people of the same race as that of our sovereign, as in the case of Canada and Great Britain, my position toward autonomy under the sovereignty of the United States might be conceivably different. It would not be so humiliating to be governed, even against my will, by people of my own race, but to be governed over my protest by a people who consider themselves superior, and are not always too careful to let us know it, and whose convictions make it impossible for them to frankly shake hands with me on a basis of political and social equality, creates an atmosphere about my daily life that is intolerable and against which I desire to be considered as protesting with all the power of my being. Americans may understand my feelings by imagining how they would feel to be governed by a race as different from their own as Filipinos are different from Americans.

America's administration of the Philippines is far more satisfactory than was that of Spain, I admit. But before American occupation of the islands, a Filipino, General Azcarraga, became Prime Minister of the Spanish Government. Right now, one of the ablest military leaders of Spain, Lieut. Gen. Castro Girona, is commanding the Spanish troops in Melilla, Morocco. He was born in the island of Palawan in the Philippines. Lieut. Gen. Aleguer Felio, commanding the Spanish troops in Andalusia, is also a Filipino; in fact, there are many Filipinos in the Spanish Army to-day. The assistant secretary of finance in the present Spanish régime is a Filipino. It is hardly necessary to suggest that if we were American territory in whatever form, even as a State of the Union, no Filipino, no matter how brilliant and how worthy, not even if he were Jose Rizal, could reach such positions in the American Government. Even right now, Filipinos graduated from the United States Naval Academy at Annapolis are not permitted to serve aboard American vessels, but can only be transferred to the Army to command Filipino troops in the Philippines.

Filipino graduates from the United States Military Academy at West Point are likewise restricted to the command of Filipino troops. And allow me to call the attention of Congress to the fact that only recently mobs in various points in the State of Washington attacked law-abiding Filipinos and threatened them that if they did not depart within 24 hours their lives would not be worth a dime. Some of my countrymen there were obliged to apply to the police stations and request to be locked up for their own protection. I protest against this treatment on the ground that it is absolutely opposite to the treatment we accord Americans in the Philippines. If a single American had been so treated in the Philippines, the American Army and Navy would have been called out if necessary to protect him, and the American press would have denounced us as savages.

Rev. Samuel W. Stagg, in a recent article entitled "Why I respect the Filipino," printed in the Observer, Manila, described Filipino hospitality to Americans in the islands, as follows:

I respect the Filipino because he respects himself. There is an innate manliness about him. He has a deep-seated personal pride. No one could ever make a Filipino pull a rickshaw. While he is seldom overbearing, he insists on fair and respectful treatment. There is nothing that stirs the heart of the Filipino more quickly than disrespect. The present nationalistic movement of the country is an outgrowth of this Filipino trait. Because he respects himself he wishes to govern himself.

I respect the Filipino because he is innately a gentleman. In my travels throughout the archipelago I have yet to be treated disrespectfully by a Filipino. Everywhere I have been received with unfailing courtesy and kindness.

I respect the Filipino because of his hospitality. One day while traveling in Cagayan Valley my tire blew out. Fixing it was a hot, dirty task. I had hardly finished when an old lady beckoned to me from a near-by nipa hut. She had prepared a big bowl of cold water, soap, and a clean towel for me. While I washed, she filled a glass of cool coconut milk for me to drink. Why did she do this? I was a perfect stranger to her. I probably would never see her again. Her hospitality was as free as sunlight. I could multiply such instances by a hundred. I can never repay the Filipino for the hospitality he has extended to me.

PHILIPPINES WEAKENS UNITED STATES AND STRENGTHENS JAPAN

Two other contentions of the opponents of Philippine independence that I desire to take issue with are, first, that American sovereignty in the Philippines is a protection to us; and, second, that it is a source of military strength to the United States in the Pacific.

The American flag flying in the Philippines is not a protection to the Philippines, but a menace. Should Japan and the United States ever go to war, Japan would undoubtedly immediately seize the Philippines if the American flag should be still flying there at that time. There is nothing in the world to prevent Japan from taking the Philippines any time she desires. American military authorities so admit. Should the United States attempt to recapture them from Japan, the Philippines would be reduced to a no-man's land by the time the Americans and the Japanese got through fighting for its possession. Philippine lives and Philippine property would pay the penalty.

In case of war with the United States Japan would be fully justified in taking the Philippines if the American flag flew there. If the flag of a Filipino republic flew there, however, it would be no military menace to Japan, and the latter could not justify before the world the seizing of the Philippines, and there is no reason to believe she would do so.

If the principle of the Monroe doctrine by which the United States justifies its action in forbidding any outside power to acquire possessions in the Americas is well taken, then the United States is not justified in flying its flag in Asia almost under the nose of Japan. The United States is now in a position of doing to Japan what it will not allow Japan to do to the United States.

Japan makes no protest, however, because it is of the greatest interest to Japan to have the American flag in the Philippines. In the event of war—and nations build battleships because of the possibility of war—Japan would have but to take the Philippines, and thus force the United States to come to the Orient, her own home waters, to fight the war. This advantage would be worth to Japan the fighting strength of an additional entire battle fleet, hundreds of thousands of men, and enormous sums of money, as compared with a reverse situation. A reverse situation would be one in which the Philippines were a republic and not a possession of the United States. In that case the Philippines would not be a factor in the war, and Japan would face the necessity of traveling across the Pacific to America's own battle grounds, where she would have neither a naval base nor military depots. It would undoubtedly be very difficult for the United States to defeat Japan in the Orient, and would require enormous expenditures and sacrifices. On the other hand, Japan could not hope to defeat the United States on this side of the Pacific. The insistence of the United States in retaining the Philippines very clearly gives Japan the opportunity to herself select the site for a struggle with the United States, should that ever eventuate.

Japan is therefore not doing a single thing to aid Philippine independence, assertions by our opponents to the contrary notwithstanding. Japan, however, fully understands the Filipino's aspirations for a government of Filipinos, by Filipinos, and for Filipinos, and, placing herself in the shoes of the Filipinos, she heartily sympathizes with their feelings. The Japanese—the very poorest, lowest, most down trodden individual of them—would rather die a thousand deaths than be governed for a single 24 hours by men of another race, and particularly by men of the white race.

It is said that Japan hopes and expects some day to be able to amalgamate and obtain the moral support of the colored races of the earth by leading the campaign for racial equality. This issue is coming more and more to the forefront with each passing year. The colored races know that the United States has promised to give the Filipinos their freedom, and that instead of doing so is only making one excuse after another.

Japan will be in a position to make use of this fact for anti-American and anti-white-race propaganda purposes as long as the United States continues to violate its pledge to give independence to the Philippines.

While it is greatly to the interest of Japan to have the Filipinos denied independence, for the reasons stated above, the Premier of Japan some years back declared that that nation would be one of the first to agree to the neutrality of the islands if they were made independent. I have no fear of Japan seizing the Philippines if we are given independence. It is not the American flag that would protect us if Japan did wish to take the islands, but the certainty that not only the United States but Great Britain, France, and Holland also, would come to our rescue for their own selfish interest, for the Philippines in Japanese hands would constitute a direct menace to Australia, India, and the other possessions of these nations in Asia. Great Britain, even if the United States had no interest itself, would never stand by idly and permit the Japanese flag to be raised in the Philippines. The strategic and commercial importance of the Philippines, instead of being a source of danger to us, is, on the contrary, what makes for our safety. Mutual jealousies among the powers will be our best and, as a matter of fact, only protection against any nation attempting to seize us if we become independent. It is the old game of diplomacy.

Moreover, Japan's desire is for peace and not for conquest. She knows very well that to throttle a Philippine Republic after the United States had set it up as such would bring the greatest naval powers in the world down upon her overnight. Japan naturally desires her share of Philippine trade, which she has a perfect right to aspire to, and the better she treats Filipinos and a Philippine Republic, once it is set up, the more good will there will be between the two nations—and the more good will, the more business.

If Japan had wanted the Philippines she could have taken them easily either before or during the Spanish-American War. If Japan is such a land grabber as some aver, why is it that she does not take independent Siam, or Java? The latter is populated by 35,000,000 people, is far richer than the Philippines, and owned by the Netherlands, whose navy is absolutely hopeless as compared with that of Japan. Personally, I have no fear of Japan's good intentions toward us; I regret to say that it is the United States that I most fear. The flag of our Republic was hauled down not by Japanese soldiers, but by American soldiers after we had helped them to defeat Spain, and although 30 years have passed, and although we have been promised our independence, the American flag still flies in the Philippines.

PROPOSED LEGISLATION WOULD SUBSTITUTE AUTOCRACY FOR DEMOCRACY

Mr. Speaker, certain legislation is proposed in bills already favorably reported by the House Committee on Insular Affairs, and the Senate Committee on Territories and Insular Possessions, which I desire to condemn in the strongest words that I can command.

I refer to H. R. 8567 and S. 2787. The latter measure would amend the Jones Act to permit the appointment of governors of non-Christian Provinces in the Philippines by the Governor General without the advice and consent of the Philippine Senate, which at the present time has the power to either approve or reject such appointments.

H. R. 8567 would also amend the Jones Act by having Congress allow the Governor General $125,000 annually from internal revenues collected on Philippine products in the United States, for the purpose of hiring "civilian assistants and technical advisers," or "emergency assistants," all of whom would thus be independent of the Philippine Legislature. The effect of such legislation would be to provide a legal and permanent private or "kitchen cabinet" for the Governor General in the selection of whom neither the Philippine Senate or any Filipino would have the slightest voice, and who would yet be in a position to exert, as the advisers or cabinet of the Governor General, a tremendous if not a deciding influence on his every act. We have every ground to fear that such an influence would be exercised in Philippine affairs, and that the Governor General would place the counsel of such a body above that of Philippine legislators and Filipino heads of departments, because we have witnessed such a result time and again in the last seven years, when the late Governor General Wood accepted the advice of his private "military cabinet" and rejected the viewpoint of Filipino officials.

H. R. 8567 would also authorize an increase of the annual salaries of the Governor General from $18,000 to $25,000; vice governor, from $10,000 to $15,000; chief justice of the supreme court, $8,000 to $10,500; associate justices, $7,500 to $10,000; auditor (Ben T. Wright), $6,000 to $15,000; assistant auditor, $3,000 to $7,500, and a second assistant auditor from $3,000 to $6,000.

As the result of inroads made upon Philippine autonomy during the incumbency of the late Governor General Wood, very little of that measure of it granted us in the Jones Act still remains.

These bills promise to be the beginning of the end of what does remain. They will in effect be substituting autocracy for what democracy still exists in the islands.

BILLS CONTEMPLATE "BACKWARD STEPS" IN AMERICA'S PHILIPPINE POLICY

If these bills are enacted into law, it will mean that the United States has broken faith with the Filipino people. It will mean that the great confidence that the Filipino people have placed in the promises and the assurances of American officials has been misplaced; that the Filipino people have from the very first been fooled and deceived. Every proposal embraced in this threatened legislation is an indisputable and irrefutable "backward step" in America's policy toward the Philippines, whereas we have been officially assured from the very outset of our relations with the United States that there would be no backward steps, but that, on the other hand, America's policy would be ever-increasing powers of local self-government, ending in complete independence. This has been up to this day the consistent policy of Congress and the policy throughout the administrations of five American Presidents.

Dr. Jacob B. Schurman, president of the first Philippine Commission, in 1899 construed America's policy to mean:

> Ever-increasing liberty and self-government, * * * and it is the nature of such continuously expanding liberty to issue in independence.

President Coolidge, upon taking office, expressed his intention of following the general lines of the Harding administration. And President Harding, in his letter to the visiting Philippine Mission in the summer of 1922, had said:

> No backward step is contemplated, no diminution of your domestic control is to be sought.

In the same letter, referring to the Jones Act, which is the identical law that the bills in question propose to emasculate, President Harding said:

> The progress made toward self-government in that act (the Jones Act) is not to be challenged, and I think there is no American authority, in Congress or out, suggesting any backward course.

The bills H. R. 8567 and S. 2787 would strip the Philippine legislature of vital powers, rights, and responsibilities, and give the Governor General a correspondingly increased power, constituting the most reactionary backward steps in America's Philippine policy that have been attempted in 20 years.

In view of what the United States has promised us time and again it would not do, and what these bills now propose to do, I can not perceive how Congress can enact this legislation without admitting before the whole world that it has all along been deceiving its wards, the 12,000,000 inhabitants of the Philippine Islands.

ARGUMENTS AGAINST BILLS PRESENTED TO HOUSE COMMITTEE

In further description of the bills under discussion, I desire here to include in my remarks extracts from my arguments in opposition to the measures before committees of Congress:

> I am opposed to the salary increases specified in section 1 of H. R. 8567 as a matter of principle. It will be recalled by some of the gentlemen present at this hearing that the Jones Act, or the act of Congress which is proposed to be amended by the bill under consideration, was enacted with the acquiescence of the constitutional representatives of the Filipino people, and, therefore, the United States Congress, in fixing the salaries set forth in the present Philippine organic act, can not be accused of having imposed a burden upon the Filipino taxpayer without his knowledge and consent. In the present instance, however, I believe that Congress would incur in the undemocratic act—regarded as nothing short of tyrannical by the founders of this great Republic—of taxing a people without giving that people the opportunity to be heard. The Philippine Legislature, the only official agency in the insular governmental system entitled to speak for that people, not being now in session, it is impossible to obtain its opinion on the proposed salary increases, and certainly I do not regard either myself nor any one else claiming to represent the people of the Philippines authorized to speak for them on this subject without specific instructions from the Philippine Legislature.
>
> While I fully recognize and accept the authority of the United States Congress to enact laws for the Filipino people with or without that people's consent, it would seem that the representative system of government implanted in the islands imposes upon this Congress the duty of adhering to that fundamental principle of government that "taxation

without representation is a tyranny." The least that this Congress could be expected to do in the present instance is to extend to my constituents that courtesy and regard for the rights of others which have ever been present in the dealings of this great and powerful country with another of lesser importance and strength. The Filipinos, as many of you perhaps know, due to their long association with Spain, have imbibed many of the traits and characteristics of all Latin races, and among those traits and characteristics stands in bold relief what we call "amor propio" or individual and race pride. In other words, they are very sensitive, and discourtesy or disregard of that pride is deeply resented by them. On the other hand, they are so appreciative of the things done for them, no matter how insignificant, that they are always ready to please those who treat them courteously and squarely, irrespective of the discomforts and even hardships that that action may later bring forth.

Since the proposed salary increases are not in my estimation of an urgent nature, I would propose that this matter be left in abeyance until the next session of the Philippine Legislature in order that the constitutional representatives of those who pay the taxes from which such salaries are to be paid out may express their opinion on the subject.

In regard to section 2 of the bill, I find myself constrained to also oppose it, for the fundamental reason that it is a reflection upon the sense of duty of the Filipino legislators. If the civilian assistants and technical advisers are needed, I am sure that the Philippine Legislature will not hesitate to appropriate the necessary funds for their salaries and traveling expenses. In fact, that body included in the appropriation bill for 1928 the sum of $75,000 for such advisers and assistants, but the Acting Governor General vetoed the item. On the other hand, it would seem as though the Congress of the United States, sitting at a distance of over 10,000 miles from the Philippines, knows more about the needs of the Filipino people and their government than the official agency created by that very Congress to look after the domestic affairs of that people and which functions right in their midst and is composed of men selected by and from amongst such people. The Filipino legislators have already expressed their views on the subject, and I am sure I voice their sentiments when I say that I would rather the Government of the United States withdraw from the control of the Philippine Legislature the whole amount derived from taxes levied and collected in this country upon goods or merchandise brought into the United States from the Philippines for other than insular purposes, than change the present system of disposing of that amount.

I regret exceedingly that I have now to make reference to certain statements made before this committee by Governor General Stimson, in his absence. But as on the previous meeting of this committee the Resident Commissioners from the Philippine Islands were not given the opportunity to express their views on the measure under consideration, I was unable then to present my objections to those statements which I consider of vital importance for the proper elucidation of the phases of the Philippine question dwelt upon by him. I refer to his assertion that one of the greatest burdens that rests upon the shoulders of the Governor General of the Philippines is the supervision and control over the workings of the insular government. He claimed that to carry out properly that power of supervision and control, it is essential that he be given the means with which to accomplish such an important task. It is indeed surprising that Governor Stimson should find it necessary to secure the services of men thoroughly prepared to advise him on the varied and complicated problems of government besides those of the officials designated by law to render him and the Philippine government such services. In other words, he wants a legal adviser in spite of the fact that there is an attorney general in the Philippine Islands who is charged by law with the duty of rendering him advice on legal matters; he wants an adviser on questions of sanitation and health, notwithstanding the fact that we have a director of health.

To give you an illustration. It would be as if the President of the United States, despite the fact that he is given by law the assistance of an Attorney General, a Secretary of the Interior, a Secretary of Labor, a Secretary of Commerce, a Postmaster General, etc., should insist upon employing men supposedly experts on the subjects coming within the sphere of activities of these different officials, disregarding them and their opinions when taking action on matters which come properly under their respective jurisdictions. If those holding corresponding positions in the Philippine government are incapable of performing their duties to the satisfaction of the Governor General, this official should remove them and appoint in their stead others who, in his estimation, could better perform such duties. It may be asserted that because of the fact that the appointment of said officials is subject to confirmation by the Philippine Senate it is impossible for the Governor General to obtain that confirmation whenever the persons nominated by him are not agreeable to the Philippine Senate for reasons other than their capacity to perform the duties and discharge the responsibilities prescribed by the statutes. This is, however, a puerile assertion and is without foundation.

The United States Government, and particularly this Congress, has the power to change at any time the organic law of the Philippines, and I am sure that that change will be made if the Governor General could prove that the men who are supposed to be his advisers under the law are incapable of performing their duties to his satisfaction and the Philippine Senate refuses to replace them with others better fitted to perform such duties. This is exactly the thing that you would do in connection with your own Government should a situation such as I have just referred to present itself, instead of authorizing your President to employ advisers who have no constitutional or statutory standing. In the case of the Philippines, the interference of such advisers in governmental affairs is more to be resented for the reason that the Governor General of the Philippines, as you well know, is not responsible to the Filipino people as the President of the United States is to the American people. To make a long story short, permit me to remind you that the avowed policy of the United States Government and people as expressed by those authorized to speak for that Government and that people is to train the inhabitants of the Philippines in the arts of self-government, and certainly you would be doing the opposite of that policy if you make the Philippine participation in governmental affairs a mere fiction instead of a real fact.

Furthermore, you would be saving our people a great deal of expenditure and you would teach us a lesson in sincerity if, instead of resorting to subterfuge, you should come out squarely and frankly and enact a law making of the Governor General of the Philippines the whole Philippine government.

In closing I wish to reiterate my opposition to the whole bill, for the further reason that it practically takes away from the Philippine Legislature powers granted to it by present acts of Congress without sufficient reason for such withdrawal and because the bill under consideration nullifies the purpose of the present Philippine organic act, which is the granting of "a more autonomous government" to "those islands."

RECEPTION BEFORE SENATE COMMITTEE

My reception by the Senate Committee on Territories and Insular Possessions convinced me more than ever, if I needed further conviction on that point, of the necessity of Philippine independence if the affairs of the Philippines and the Filipino people are ever to receive the sympathetic consideration that they are entitled to.

Being informed the day previous that my colleague, Resident Commissioner PEDRO GUEVARA, and myself would be given a hearing on February 1, I informed the committee that Commissioner GUEVARA had been stricken with a heart attack and pneumonia, and was confined to the Emergency Hospital, and requested a postponement of the hearing, but this was declined.

Therefore I appeared before the committee and presented my objections to the bills, but only two of the 15 members of the committee were present to hear them. Immediately after this hearing the two members retired in an executive session, and reported and recommended the passage of the bill I had just opposed.

I have no doubt that the necessary majority of the committee had orally or in writing agreed to the favorable reporting of the bill, but they must have done so without hearing my argument against it.

My experience of seven years as Resident Commissioner in Washington has convinced me that the average Member of Congress is too busy with affairs concerning his own country to give Philippine matters the attention they must receive to be intelligently and fairly passed upon. The Philippines are 10,000 miles distant from Washington, the American Representative or Senator has few if any constituents there, and the result is he does not have a direct personal interest in Philippine affairs. It is but natural that he should neglect them, because he is too busy with matters concerning his own people. Since American legislators are really too busy to give close attention to the government of the Philippines, they should grant us independence in order that Philippine problems will not be slighted. Philippine legislators have more interest in the correct solution of problems concerning their own people and their own country than even the best-intentioned American legislators can possibly have. This is not intended as a criticism of Members of Congress, but is merely recorded as a fact that fair-minded men can not deny.

STATEMENT BEFORE SENATE COMMITTEE

An excerpt from my statement before the Senate Committee on Territories and Insular Possessions on February 1, 1928, is presented here to further reveal what handicaps confront the representatives of the Filipino people in Washington:

Commissioner GABALDON. Mr. Chairman, it is with deep regret that I have to announce the inability of my colleague, Commissioner PEDRO GUEVARA, to be present at the hearing this morning, due to illness. Mr. GUEVARA yesterday suffered a heart attack a few moments after leaving the House Committee on Insular Affairs and had to be taken to the Emergency Hospital. I asked the secretary of this committee to make this fact known to the chairman and requested postponement

of this hearing. While I was at the Emergency Hospital yesterday afternoon to inquire as to the condition of my colleague, I was notified by the office of the chairman of this committee that my request was declined.

I came fully prepared to discuss in detail with the members of this committee the provisions of Senate bill 2292, and it was my intention to dwell upon the meaning and effects of Senate bill 2787 when I learned that this proposed legislation was to be taken up also at this meeting. However, in view of the fact that there are only two members of the committee present, the chairman and Senator BINGHAM, I consider it unnecessary and a useless expenditure of your time as well as of mine to proceed as I intended at first. Mr. Chairman, there could not, there can not be full discussion and thorough comprehension of the nature and scope of these bills, and most important of all, of their far-reaching effect upon the system of government you have implanted in the islands and upon the relations of the American and Philippine Governments and the American and the Filipino peoples were they enacted into law, unless both sides, your committee representing the American Government, on the one hand, and the Resident Commissioners representing our Government and speaking for our people, on the other, sit together and all discuss the various aspects of the proposed measures, but as it is, there are only 2 on your side out of 13 members composing the committee and myself alone on the other. The two bills that are to be considered this morning are of vital interest to the Filipino people because both propose to curtail the autonomy you have already granted to us—one bill taking away the right to appropriate and the other removing the power, even only in part, to confirm appointments.

Mr. Chairman, in the official letter received by my colleague and myself notifying us of this hearing, we were told that between us we could have only 45 minutes; and when the chairman opened the session this morning at almost a quarter of 11, he declared that he would adjourn the session at 15 minutes after the hour of 11. I leave it to the chairman of the committee and to the only other member of that body here present to say whether it is humanly possible for us within that short period of time to convince the committee that the measures under consideration should not be reported. I am absolutely certain that were the chairman, as a Member of the Senate, and his colleague, Senator BINGHAM, faced with the same situation that I am now facing—the consideration of measures curtailing the rights and prerogatives of the body to which they belong—they would not only insist on a full discussion but most vigorously protest against a seeming attempt to railroad these bills through the committee without giving ample opportunity to both sides to fully acquaint themselves with the magnitude of the questions involved. In view, however, of the announcement made by the chairman that the committee would adjourn this session at 11.15, as stated in the communication notifying us of this hearing, irrespective of whether we have completed the presentation of our arguments against the bills under consideration, the best that I can do in this connection is to beg leave to insert in the record of these proceedings written statements by my colleague and myself regarding these measures, even though I am aware that they will not in the least influence the members of this committee in so far as the reporting of these two bills is concerned, for they would have no time to peruse our statements since the chairman has announced that an executive session is to be held at the expiration of the time granted us to present our testimony.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11577, the agricultural appropriation bill, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11577, which the Clerk will report by title.

The Clerk read the title of the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF INFORMATION

For necessary expenses in connection with the publication, indexing, illustration, and distribution of bulletins, documents, and reports, including labor-saving machinery and supplies, envelopes, stationery and materials, office furniture and fixtures, photographic equipment and materials, artists' tools and supplies, telephone and telegraph service, freight and express charges; purchase and maintenance of bicycles; purchase of manuscripts; traveling expenses; electrotypes; illustrations, and other expenses not otherwise provided for, $379,500, of which not to exceed $338,000 may be used for personal services in the District of Columbia in accordance with the classification act of 1923.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. I rise at this time for the purpose of adding a statement in the RECORD in connection with the statements made yesterday by the gentleman from Nebraska [Mr. SHALLENBERGER] and the gentleman from Kansas [Mr. HOCH]. They both recommend appropriations and indicate that appropriations will be added in the other body to carry on permanently an experiment which is now going on in the market of dressed beef. They have given it a great deal of study from the standpoint of the cattle raisers and the producers, but like all these matters that come up the consumer has no opportunity of being heard and we do not know how it will affect the consumer.

I am sure that gentlemen coming from agricultural districts will admit that those of us coming from industrial and consuming districts are always willing to cooperate. In turn, however, we would ask that you take into consideration more than you do the plight of the consumers.

It was suggested yesterday that the price of beef had gone down, but I can assure you gentlemen that if the price of beef has gone down it has not been reflected in the retail price paid by the consumers in the cities. Meat in New York City to-day, gentlemen, is a luxury. You can not add another fraction of a cent to the retail price of meat in New York. I do not know where it is going. I tried to find out something about the matter some time ago. I conferred with cattle raisers and I went to Chicago to see what was going on there. The packers say they are not getting it and we knew the cattle raisers were not getting it, yet the retail price of meat in New York City was simply exorbitant.

The producers, after all, have the Department of Agriculture to go to and they can bring about changes, but at no stage of the study made in connection with these systems of marketing has the consumer a chance to be heard.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SUMMERS of Washington. Some of us believe that this would be especially to the advantage of the consumer, and the main purpose of it is to let him know what he is buying, so that he may buy the higher price or medium price or low price beef and not have to pay a high price for the low-price beef.

Mr. LAGUARDIA. In response to that I will say that there is not a woman in New York City who is keeping house that needs to have the brand of the Department of Agriculture to tell her whether meat is prime meat or choice meat or no good meat. She knows it.

Mr. SUMMERS of Washington. I will admit that the housewives in New York City are brilliant, but that does not conform to the situation over the country.

Mr. LAGUARDIA. If you were paying 75 cents a pound for steak, and if the only good prime roast beef you could get was by seeing it in the window of a butcher, and you had to wait until the 4th of July to buy it, I will tell the gentleman from Washington he would become an expert in the selection of meat. [Applause.] We do not need a rubber stamp on meat to tell us whether meat is good meat. What we need is this: We need meat at prices which we can afford to pay, and if you keep on adding more rules and more regulations, and if you keep on playing in with the packers, I will tell you that the people in the industrial centers of the East will soon be on an absolutely meatless diet.

Mr. ARENTZ. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. ARENTZ. At the present time high-class beef is classed as prime, choice, and good; below that you have about 10 other grades. If you go into a market to buy a high-class piece of meat without this regulation or without this classification you are liable to get meat from an old cow from some dairy herd instead of choice western beef. The provision under discussion assures a purchaser of high-class meat in a retail shop of just what he or she is entitled to obtain for the price paid. If that is not in the interest of the consumer I do not know what is. If you pay 75 cents a pound for a high-class piece of beef, under this arrangement you know it is high class and that it is not a part of an old dairy cow.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LAGUARDIA. I ask unanimous consent, Mr. Chairman, to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LAGUARDIA. In reply to the gentleman from Nevada I will say that the gentleman himself does not believe that

the retail butcher is going to say, "This is prime beef, this is choice beef, and this piece is no good; it comes from the prairies or comes from somewhere else and is no good at all." He will sell anything he has in his refrigerator.

Mr. ARENTZ. He will tell you, "All the beef I have here is prime beef"; but if the consumer is taught to understand that there is a mark on that beef stamping it prime, choice, or good, the butcher can not tell the consumer that all of it is prime beef when, in fact, little or none of the meat in his shop is other than cheaper-grade meat.

Mr. LAGUARDIA. And my reply is that the housewives of New York know beef when they are buying it, and a rubber stamp is not going to change matters.

Mr. ARENTZ. They do not know good beef or choice beef when they see it.

Mr. LAGUARDIA. Oh, yes; you just give us an opportunity to buy it. I would like to appeal to the cattle raisers and the gentlemen from cattle-raising districts to establish a more direct contact with the consumers. If you commence to play with the packers we will both get "stuck." There is no doubt about it. The producer is not going to get a fair price and the consumer will have to pay an exorbitant price.

What we want is the opportunity of buying your beef, and if the only reason you have for stamping your beef in this way is to educate the housewives of New York City, I say do not worry about that, because we know good beef when we see it. What we do want is to cooperate with you in bringing about a marketing condition that will permit the cattle raiser to get a fair price for his beef and also put the retail price of meat in the industrial centers, especially New York City, within the reach of the average working man and woman. If you keep on adding new burdens, if you keep on adding more inspections, if you keep on making the marketing more cumbersome, I repeat now what I have said before, that even the limited use of meat in New York City to-day will be reduced and we will soon be on the meatless diet of the Russian peasant.

I submit that when a matter like this comes up and is flashed upon us, we do not know what is going on out in Chicago. We do not know of your conferences with the stockyards of Chicago and the packing houses. We do not know of your conferences with the Department of Agriculture. I submit when these things happen you ought to get in touch with the department of markets of our great cities, and you ought to get in touch with some of the consumers' organizations so that we at least will have a "look in."

Mr. SUMMERS of Washington. Will the gentleman yield for a moment?

Mr. LAGUARDIA. I yield.

Mr. SUMMERS of Washington. As I understand, the big packers are the only ones who are not favoring this plan.

Mr. LAGUARDIA. Well, that much is in your favor, but let me suggest that before you flash anything like this on us you give the consumers a chance anyhow. If the increasing price of meat continues, I will tell you now that we are going on a meat strike in New York. We will stop eating meat for a while.

Mr. DICKINSON of Iowa. Oh, no; eat pork.

Mr. LAGUARDIA. No; they can not eat pork in my district, and the gentleman knows it. [Laughter.]

Mr. COCHRAN of Missouri. Mr. Chairman, I move to strike out the last two words.

The paragraph just read and the paragraph to follow deals with the Bureau of Information, and also has to do with the distribution of the publications of the Department of Agriculture.

This is one Government agency Members of Congress are required to contact almost every day in the year. This applies to the Representatives from the cities as well as the ones from the country. We receive our annual allotment of bulletins and various other documents from this department, and as it is now the policy to advertise the publications over the radio and through the press and tell the people to write their Congressmen, we receive requests daily for Farmers' Bulletins and various other publications of this great department. As the bulletins deal with matters of interest to the residents of cities, I distribute them among my constituents who accept my invitation to write for them. I am now sending out the general letter to the residents of my district.

In order to arrive at some definite idea of the time it would take to get the bulletins in the hands of my constituents, I sent three letters to friends in St. Louis, and at the same time I sent an order to the Department of Agriculture requesting them to send bulletins to the same three people. In one instance it took 10 days, in another instance it took 11 days, and in the third instance it took 12 days to get the publications to my constituents.

I then investigated the matter and found in the distribution branch of the division of publications they are about six days in checking up the lists before they are sent to the Superintendent of Documents. That is, so many orders have been received that this division is six days back in its work. At the Printing Office I found many of the employees are working until 9 o'clock at night, but still they are three or four days back in filling the orders. In all you see it takes about two weeks to get the publications in the mail after the request is made.

During my 16 years of dealing with Government agencies I have found three men who stand out among many other efficient employees of the Government in possessing a most complete knowledge of not only the laws, rules, and regulations, but of every detail in connection with the department in which they are employed. They are our good friend Andy Smith, the CONGRESSIONAL RECORD clerk, with whom every Member of Congress comes in contact almost daily; Francis Cleary, assistant chief of the congressional distribution section of the Department of Agriculture; and Jesse Powell, the chief clerk of the division of information of the office of The Adjutant General of the Army.

Now, I am calling this matter to the attention of Members of the House because it is your constituents and mine who are required to wait for the bulletins and other publications requested, due solely to the fact that at this season of the year we are flooding the department with requests and not providing any additional help. You all know Mr. Cleary practically occupies a dual position in that while he is under the general supervision of the Department of Agriculture, he receives specific instructions regarding distribution of publications direct from the various congressional offices. We also know that we find it necessary to consult with Mr. Cleary and secure from him information and advice which will enable us to place before our constituents publications best suited for their needs. This contact is either by correspondence, telephone calls, or personal visits to the office of the Members.

Millions of lists and bulletins pass through his hands. It is probably due to the efficient work and general cooperation of this man that the work is not further behind. The keeping of the accounts of the allotment of publications to Members is also under his jurisdiction, and this is a very important duty, because information in reference to the number of bulletins to the credit of a Member is confidential. It is a clearing house for all congressional requests for agriculture information. As you know, this bill carries $132,308,849.88. Hundreds of millions of dollars have been heretofore appropriated for this department, as a result of which most valuable data and information has been acquired; in fact, the department is a veritable storehouse of information on agriculture and kindred subjects, and it would seem to me a very poor policy to have researches, experiments, and investigations of every character and then not take proper means to get this great mass of information to the public when it is desired without unnecessary delay; and it is for this reason alone I am suggesting that some steps be taken to expedite the handling of congressional requests.

I will not offer an amendment, but I will ask the chairman of the subcommittee, the gentleman from Iowa [Mr. DICKINSON], if he will get in touch with officials at the department or make a quiet investigation, and if he finds my information correct provide, say, three or four thousand dollars to employ extra help during periods when the regular force can not take care of the work.

Take, for instance, a man in your district who is raising chickens, and he writes for information on poultry diseases. If it is going to take two weeks from the time the request reaches Washington to get the information to him, he might lose his entire flock.

I believe in giving prompt service to my constituents. I do not go home of an evening until the mail received in my office during the day is answered. There is no fault in the bureau; the fault rests with Congress. We flood them with requests at a certain period of the year and make no provisions for additional help.

You are not going to get this information from the division chiefs, because, as we all know, they are being daily schooled in economy.

When the Department of the Interior appropriation bill was pending I called the attention of the gentleman from Michigan [Mr. CRAMTON] to the fact that the bureau was 6 to 12 months behind in settling claims. The gentleman from Michigan told me that the Commissioner of Pensions refused to tell the subcommittee that it needed additional help. Two days after the bill reached the Senate a letter from the other end of the Avenue came down asking the Senate Appropriations Committee to give them more money for additional

help, and it was allowed. It appeared the commissioner's lips were sealed. You will find this in all departments.

You will have to make the investigation in some other way. If the committee wants the delay in sending out these bulletins to their constituents in order to save a few dollars, that is another matter.

Now, one thing more. Here is a bulletin called the Radio Cook Book, advertised over the radio and through press releases. I was flooded with requests for that publication. I called on the Department of Agriculture and was only allowed 100 copies. They have made a reprint, but have declined to give an additional hundred copies to Members of Congress. It is a publication couched in plain language, so that any child can understand. It is credited to the Bureau of Home Economics. For some reason they will not print it as a Farmers' Bulletin. It is the best publication that has come from the Agricultural Department for use in large cities.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. COCHRAN of Missouri. I ask for two minutes more.

The CHAIRMAN. Without objection, the gentleman will proceed.

Mr. COCHRAN of Missouri. Our best friends, our good wives, issued a congressional cookbook which was advertised all over the United States. The word "congressional" being used, I received 150 or more requests for this $3 or $5 book. I used this publication of the Bureau of Economics trying to square myself with my constituents. [Laughter.] I ran out of them and could not get any more. If you are going to publish a book of this character it certainly ought to be issued in some way so that Members can distribute it in large cities, especially if the department proposes to advertise over the radio and in the press the value of the publication. The department denies it ever suggests in broadcasting that the publications can be secured from Members of Congress, but we receive the requests nevertheless.

The pro forma amendment was withdrawn.

The Clerk read as follows:

To carry into effect the provisions of an act entitled "An act to authorize the more complete endowment of agricultural experiment stations," approved February 24, 1925, $2,400,000.

In all, payments to States for agricultural experiment stations, $3,840,000.

Mr. HOUSTON of Hawaii. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 7, line 8, after the end of the paragraph insert a new paragraph, as follows:

"To carry into effect the benefits of the act of March 2, 1887, and supplementary acts in the order and amounts designated by those acts for use in the Territory of Hawaii, $15,000."

On page 7, line 9, after the word "States," insert the words "and Territories"; on page 7, line 10, strike out "$3,840,000" and insert "$3,855,000."

Mr. HOUSTON of Hawaii. Mr. Chairman, the Territory of Hawaii comes before this House at the present time and asks that that which we feel has already been legislated upon be put into this law in order that by administrative action there can be no miscarriage of the clear intent of the law. At the present time the University of Hawaii, which is the agricultural college, is in receipt of $50,000 per year allowed to all agricultural colleges by the second Morrill Act and the Nelson amendment. It is not, however, in receipt of the Federal aid coming to the agricultural colleges by reason of the Hatch, Adams, and Purnell Acts nor the Smith-Lever Act. The first three acts specifically provided for States and Territories and, therefore, should apply to the Territory of Hawaii; the second ground on which we claim this is not new legislation is that the organic act of the Territory of Hawaii in section 5 as passed by this Congress provides as follows:

The Constitution, and except as otherwise provided, all the laws of the United States, including laws carrying general appropriations, which are not locally inapplicable shall have the same force and effect within the Territory of Hawaii as elsewhere in the United States.

Now, the administrative decision on the application of these various benefits to Hawaii is based upon an opinion rendered to the Secretary of Agriculture by the Attorney General of the United States.

In that opinion, rendered in answer to a letter in which Territories and possessions, mind you, were involved, as though they were the same thing, the Attorney General failed absolutely to take into consideration section 5 of the organic act for the Territory of Hawaii. It should be remembered that the Territory of Hawaii is the only Territory in this country which is an organized one, and which contains that particular and specific provision in its organic act.

Mr. CLARKE. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON of Hawaii. Yes.

Mr. CLARKE. Has the gentleman taken this matter up with the Attorney General?

Mr. HOUSTON of Hawaii. The matter was taken up with the Secretary of Agriculture, and he asked the opinion of the Attorney General. Recently I sent a letter to the Attorney General and received a reply that the opinion having been given to the Secretary of Agriculture, he could not review that opinion except upon the receipt of a request to do so by the Secretary of Agriculture. We have not yet been able to get them to do that. I come now at this late hour because of the fact that I tried to put in a special act, wherein these matters would be all taken care of in a special bill; and although the sum called for was exceedingly small, we reduced it to $15,000 per year for the first year, it was held to be against the financial program of the President; and, therefore, without having had an opportunity to appear before the Committee on Agriculture, I come here before the House and ask that upon this showing it may be accepted as an amendment. If, however, the chairman of the subcommittee feels that the showing is not sufficient, I shall withdraw the amendment.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON of Hawaii. Yes.

Mr. CHINDBLOM. I observe that the gentleman increased the total of payments to States and Territories for agricultural experiment stations by $110,000.

Mr. HOUSTON of Hawaii. That is a mistake. I acknowledge that. That should have been $15,000, and I ask that the correction be made.

Mr. CHINDBLOM. It would be necessary to modify the amendment.

Mr. HOUSTON of Hawaii. Yes. I ask unanimous consent that that modification be made.

The CHAIRMAN. Without objection, the modification will be made in accordance with the request of the gentleman from Hawaii.

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON of Hawaii. Yes.

Mr. DICKINSON of Iowa. These various acts have never been extended to Territories or to possessions beyond continental United States. There is already a program proposed, as I understand it, whereby both Alaska and Hawaii want to be brought within the provisions of this act. I think it is the opinion of the Budget officer that if one is brought in both ought to be brought in, and if they are brought in it ought to be under legislation and not by amendments of this kind. I assure the gentleman that I am perfectly friendly to the interests of both Alaska and Hawaii, as is shown by this legislation, but that I feel that it should be the legislative committee that should bring about the extension of this service, because the extension service is the child of the legislative committee and not the child of the Appropriations Committee.

Mr. HOUSTON of Hawaii. Will the gentleman permit me to call his attention to the fact that the Purnell Act, passed in 1925, refers specifically to the Territories, and at that time there were no noncontiguous Territories in the Nation except Alaska and Hawaii, and it certainly must have been the intention of Congress when legislating at that time to mean something by those words "and Territories," because it is always assumed that Congress does not use words that have no meaning in particular. But we are not insisting on that point. We are making our plea on section 5 of the organic act. That is the thing to which I shall always come back. It says specifically that all laws carrying general appropriations which are not locally inapplicable are in full force in the Territory of Hawaii. This is a general appropriation bill and it should be applicable to Hawaii; the legislature has petitioned to that effect.

Mr. DICKINSON of Iowa. It is my feeling that this is a matter that should be brought before the legislative committee, and it is my hope that when the gentleman consumes his time that he will withdraw the amendment so that it will not be necessary to make the point of order.

Mr. HOUSTON of Hawaii. Mr. Chairman, I withdraw the amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

Mr. ELLIOTT. Mr. Chairman, let me ask the gentleman from Hawaii a question. Is it not a fact that the Territory of Hawaii came into this Government by treaty, and by the terms of that treaty it was understood that the Territory was to have the same rights as a State, without having statehood?

Mr. HOUSTON of Hawaii. That is true, and we feel that we have certain rights in the matter that are not lived up to.

The treaty of annexation negotiated in 1897 consummating the annexation of the Republic of Hawaii contains these words:

* * * That those islands shall be incorporated into the United States as an integral part thereof.

We feel that to agree to this amendment will only be keeping faith with Hawaii in accordance with that treaty and the organic act passed by this Congress.

The CHAIRMAN. The time of the gentleman from Hawaii has expired.

The Clerk read as follows:

Total, Office of Experiment Stations, $4,216,400, of which amount not to exceed $122,574 may be expended for personal services in the District of Columbia.

Mr. McKEOWN. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

That the Secretary of Agriculture is hereby authorized, for the crop of 1928, to make advances or loans to farmers in the pest-stricken areas of Oklahoma, South Carolina, and Georgia, and the flood-stricken areas of Minnesota and North Dakota, where he shall find that special need for such assistance exists, for the purchase of cottonseed and seed grain for seed purposes, and fertilizers for crop production, and, when necessary, to procure such seed and fertilizers and sell same to such farmers. Such advances, loans, or sales shall be made upon such terms and conditions and subject to such regulations as the Secretary of Agriculture shall prescribe, including an agreement by each farmer to use the seed and fertilizer thus obtained by him for crop production. A first lien on the crop to be produced from the seed obtained through a loan, advance, or sale made under this section shall, in the discretion of the Secretary of Agriculture, be deemed sufficient security therefor. The total amount of such advances, loans, or sales to any one farmer shall not exceed the sum of $300. All such advances or loans shall be made through such agencies as the Secretary of Agriculture shall designate. For carrying out the purposes of this act there is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $1,500,000, to be immediately available.

SEC. 2. That any person who shall knowingly make any false representation for the purpose of obtaining an advance, loan, or sale under this act shall, upon conviction thereof, be punished by a fine of not exceeding $1,000 or by imprisonment not exceeding six months, or both.

Mr. DICKINSON of Iowa. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Iowa reserves a point of order on the amendment.

Mr. McKEOWN. Mr. Chairman, I am aware that this amendment is subject to a point of order under the rules of the House, but I had hoped that no one would make the point of order, for this reason: I have pursued the method inaugurated here under the Budget system. I wanted this to apply to the whole of the United States. I introduced a bill applying it to Oklahoma. But here was the situation: The Budget Bureau will not approve this small seed loan for the distressed farmers. I want to ask gentlemen of the House in all fairness and candor what other course is a Member of this House to pursue if his bill is vetoed by the Bureau of the Budget before it comes before the House rather than after it has passed the House and Senate?

Now, I have a letter here from the Secretary of Agriculture which shows the desperate situation existing in the State of Oklahoma. There are 22 counties in the State of Oklahoma where the boll weevil last year absolutely destroyed the cotton crop. The farmers there are in wretched shape. They went out of that district in hundreds, in wagons and cars, into neighboring areas to pick cotton on which to live. I am simply asking that Congress do for Oklahoma what it has done for other parts of the country. I voted for measures for relief last Congress and during other Congresses. We granted seed loans to the Northwest, and I voted for it; and now, when we come to my section of the country the Budget Bureau says, "This is not in accordance with the President's financial program." There is nothing else to do after an ineffectual appeal to the Bureau of the Budget but to appeal to the Committee on Appropriations and to this House. The Secretary of Agriculture had an investigation made, and what does he say? He says:

DEPARTMENT OF AGRICULTURE,
Washington, D. C., March 2, 1928.

Hon. GILBERT N. HAUGEN,
Chairman Committee on Agriculture,
House of Representatives.

DEAR MR. HAUGEN: In response to your request of February 2 for a statement with reference to H. R. 7942, introduced by Mr. McKEOWN, authorizing an appropriation of $1,000,000 for the purchase of cottonseed and other seeds to be supplied to farmers in the pest-stricken areas of Oklahoma, I am transmitting herewith such information as we have on crop-failure areas in Oklahoma and other States in 1927, and, in accordance with the expressed desires of the Committee on Agriculture at a hearing on this bill on February 2, a suggested draft of the bill to make it applicable to crop-failure areas generally.

Weather conditions during the summer of 1927 in southern Oklahoma were extremely favorable for the development of the cotton boll weevil and as a consequence destruction of the cotton crop by this insect was unusually severe. The statistician in Oklahoma for the division of crop and livestock estimates of the Bureau of Agricultural Economics of this department reports that abandonment of acreage planted to cotton in 1927 ran as high as 92 per cent in Johnston County, 85 per cent in Marshall County, 60 per cent in Carter County, and 56 per cent in Bryan County. Ginnings of cotton in Johnston County prior to December 1, 1927, were reported as 623 bales as compared to 8,037 bales for the same date in 1926. Corresponding figures for Marshall County are 742 and 6,870 bales; for Carter County, 1,645 and 14,216 bales; and for Bryan County, 2,167 and 9,131 bales, respectively. In 12 counties in south central Oklahoma ginnings to December 1, 1927, amounted to 81,618 bales, while those to December 1, 1926, were 203,014 bales. Of the 81,618 bales ginned in 1927, 67,000 bales were in the three counties of Stephens, Jefferson, and Garvin, so that less than 15,000 bales were produced in the other nine counties. Serious curtailment of the cotton crop occurred also in certain counties in southeastern and east central Oklahoma.

Conditions favorable for the development of boll-weevil damage also prevailed in 1927 in sections of eastern and southern South Carolina and southeastern Georgia. Average yields of cotton in the lower half of South Carolina in 1927 were less than half those obtained in 1926. Because of failure of farmers to repay advances made on the 1927 crop it is reported that banks and merchants in many cases will be unable to make the usual advances for seed and fertilizer for the 1928 crop.

In the spring and summer of 1927 continued rains and floods prevented planting of much of the normal acreage of crops in several counties of northwestern Minnesota and northeastern North Dakota, particularly Marshall, Kittson, and Roseau Counties in Minnesota, and Grand Forks, Walsh, and Pembina Counties in North Dakota. These counties in the Red River Valley are normally among the most productive in the spring-wheat region, but because of inability to sow the usual acreage of spring grains and because of bank failures some farmers are said to be without means to finance their spring seeding.

It is our understanding that the American Red Cross has sufficient funds available to provide for the needs of flood sufferers in the Mississippi Valley and in Vermont, including planting seed for those who do not have seed nor facilities with which to obtain it. For this reason we have not given consideration to these regions in this discussion. If the Congress provides a broad, general authorization for loans to farmers in flood-stricken and pest-stricken areas and it later appears desirable to supplement the activities of the American Red Cross in the flood regions in which that organization is operating, this action will be taken in cooperation with that agency to avoid duplication of effort.

While crop failures were severe and credit conditions are now unfavorable in the sections mentioned in the foregoing paragraphs, the areas are much smaller than those for which appropriations were made for loans in 1921 and 1922 and authorized in 1927. Attention of the committee is also called to the fact that no previous authorization has been made for loans in pest-stricken areas, the previous loans having been made in regions in which crop failure was due to drought or flood.

In accordance with the request of the committee, the bill has been drafted to authorize an appropriation for loans in the flood-stricken and pest-stricken areas of the United States. If the Congress determines that such an appropriation should be made, the department would prefer to have the areas in which loans are to be made definitely established by the Congress. The department has no reports of serious crop failures in sections other than those discussed in the Committee on Agriculture on February 2 and in the preceding paragraphs of this letter.

* * * * * * *

Very truly yours,

W. M. JARDINE, *Secretary.*

(Inclosures: Referred to the Budget Bureau, as required by Circular No. 49 of that bureau, and under date of February 24, 1928, the department was advised by the Director of the Bureau of the Budget that the legislation proposed in H. R. 7942 and in the substitute drafts sub-

mitted with the foregoing report would be in conflict with the financial program of the President.)

You will observe that the Secretary says he wanted the bill to name the specific places that he had investigated, so that he could go ahead and make the loans in that particular territory. You will notice he says:

If the Congress determines that such an appropriation should be made, the department would prefer to have the areas in which loans are to be made definitely established by the Congress.

Now, those facts are true. Those people are in a desperate shape. Congress has followed the policy heretofore of aiding the other parts of the United States, and here comes Oklahoma, which pays into the Treasury enormous sums of money, and asks that it be given similar relief. The bankers of the country are trying to save the banks of that part of the country. In one county in the district of one of my colleagues all the banks have failed.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. McKEOWN. May I have two minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. McKEOWN. My amendment is subject to a point of order. I had hoped that no Member would make the point of order. I appeal to you, gentlemen, to grant this relief. We have no other way to get it. And I want to say to you that if the policy is to say "no" to the poor, unfortunate farmer in one section of the country when you have granted relief to another section of the country, the farmer wants to know it. The farmers in Oklahoma want to know, if you can not make a loan to them of $1,500,000, where do you get the money to build the $750,000,000 Navy, as is proposed? I put it up to you, gentlemen. If you want to make a point of order, you have to make it; that is all. [Applause.]

The CHAIRMAN. The gentleman from Iowa [Mr. DICKINSON] reserves a point of order.

Mr. HASTINGS rose.

The CHAIRMAN. Does the gentleman from Oklahoma desire to be heard?

Mr. HASTINGS. Mr. Chairman, I just want to say a word to supplement the statement of my colleague from Oklahoma [Mr. McKEOWN] as to the real necessity for this appropriation at the present time.

What my colleague states about the farming conditions in the eastern part of Oklahoma is quite true. Along with the other members of the Oklahoma delegation and members from other State delegations we appeared before the Budget Bureau on this legislative bill, and in that hearing, I think, we conclusively showed the true conditions with reference especially to cotton in eastern Oklahoma and elsewhere throughout the country. It was shown that in perhaps 22 counties in eastern Oklahoma the yield of cotton was less than 19 per cent of the normal crop, and there really was much distress there and necessity for this appropriation.

It is really difficult to overdraw the conditions in certain agricultural sections of our country. In the first place, 1927 was a very rainy season and it made the ravages of the boll weevil much more disastrous. The boll weevil has only recently been extended as far north as the middle part of Oklahoma. I am not overdrawing the picture when I say that while there was on an average of less than 19 per cent of a cotton crop in 22 counties of eastern Oklahoma, from quite a number of fields not a lock of cotton was picked. As a result we have had business depression in certain sections. The farmers deserve and need help. They have appealed to their representatives in Congress. Some weeks ago a bill was introduced in the House authorizing such an appropriation to assist the farmers in securing a loan through the Department of Agriculture to buy seed and fertilizer such as is contemplated by this very same amendment. This bill was referred to the Committee on Agriculture, and following the usual course it was in turn referred to the Secretary of Agriculture for a report. We had every reason to believe that the Secretary of Agriculture was sympathetic. His department then referred the bill to the Bureau of the Budget, following the custom in all bills calling for an appropriation from the Treasury.

We presented the matter in very great detail to the Director of the Bureau of the Budget. The delegation that presented it came away feeling it had received a sympathetic hearing and that the director understood the situation and that the report would be favorable. You may imagine our surprise, therefore, when we were advised that it was disapproved on the ground that it was against the financial program of the President.

Last year about $8,000,000, as I now recall, was authorized to be appropriated for the very same purpose, largely to be applied to the wheat-growing States of the Northwest. Some, however, was to be used in the South. The same principle was involved. It is difficult to understand the philosophy upon which this bill was disapproved. We are more than disappointed. While this amendment is subject to a point of order, without a favorable recommendation from the Bureau of the Budget, we had hoped that the necessities of the case would so strongly appeal to the Members of the House that the point of order would not be made.

Mr. DICKINSON of Iowa. Mr. Chairman, I am compelled to make the point of order, because the legislative committee is the committee through which we always do these things.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

Mr. LANKFORD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The Chair has just sustained a point of order on the pending amendment, so there is nothing now before the committee. The gentleman may move to strike out the last word of the former paragraph.

Mr. LANKFORD. Mr. Chairman, I make that motion.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. LANKFORD. Mr. Chairman, at this time I wish to call the attention of the committee to this particular bill. If you will take the bill and read it through from start to finish and look for appropriations in the bill in the way of helping farmers produce more you will find there have been a great many appropriations made in that respect. There are plenty of appropriations to fight the various pests and diseases.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. DICKINSON of Iowa. Does the gentleman contend that in order to help relieve the farmer of pests which destroy his crops that you are helping him produce more? We are simply helping him to produce better and on a scale where he can be efficient and where he knows his product is not going to be destroyed and that he will have a market for it.

Mr. LANKFORD. That is true; and I am not wishing to criticize that line of appropriations.

Mr. DICKINSON of Iowa. All of the extensions in this bill are for that very kind of work.

Mr. LANKFORD. That is true; and I do not wish to criticize appropriations made for fighting those pests. I do not mean to criticize appropriations made for helping the farmer to experiment in production. I do not mean to criticize appropriations made for schools which experiment in producing and helping the farmer to produce more. I do not wish to criticize the appropriations made for soil tests and all of those various kinds of things in the bill. Neither do I wish to criticize appropriations made to print cookbooks for the purpose of helping the housewife and the consumer prepare the food after it gets to the ultimate consumer. What I wish to do is to call the attention of the committee and Congress to the absence of any appropriation in this bill—and that is not a criticism leveled at the committee or the Department of Agriculture, but at the failure of the law to authorize the appropriations—there is an absence of any appropriation in this bill for the purpose of experimenting in getting the food of the producer from the producer to the ultimate consumer at the least possible cost.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. DICKINSON of Iowa. We have expanded in the news service; we have expanded in the marketing machinery; we have expanded in all of the experiments having to do with inspection and assistance; and there is in the bill provision for research work which will develop additional facts and information on the question of how to avoid the complications that are now facing the farmer in marketing and having proper transportation for these commodities. I am afraid the gentleman does not compass all there is in this bill.

Mr. LANKFORD. I would be glad to have the Members of the House take the bill, go through it, and find where there is any appropriation in this bill to experiment in selling the food of the producer directly from the producer to the consumer and trimming out the unnecessary middleman, who makes a profit out of that food. The great problem to-day is getting the food from the producer to the ultimate consumer. Now, there may be appropriations in the bill to experiment in cooperative marketing, but those appropriations to a large extent, if not entirely, go to the organization of farmers in producers' clubs which sell wholesale. What I mean is this: I was out West last summer——

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. LANKFORD. Let me make this point, and then I will be glad to yield. I was out West last summer and I saw that the farmers there had organized to sell eggs in large quantities to the consuming public. I asked them to whom they sold the eggs. They said they sold them to one big concern in New York City. I said, "Do the men of that concern eat all of those eggs?" They said, "No; they sell them to the jobbers, to the retail men, and finally down to the ultimate consumer." The point I am making now and the point I was making then is that we have never brought the ultimate consumer in close enough touch with the producer. I saw great canneries there, men who were canning large amounts of salmon. They told us how they were working together in cooperation in the sale of the salmon. I said, "To whom do you sell your salmon?" They said, "Why, we sell them to some concern in the city of New York."

They seemed delighted with the situation and said, "We have a wonderful marketing system. That great concern of distributors take all the salmon we can place on the market." I said, "Do the members of that concern themselves eat all that salmon which they buy from you?" Of course, they said "No" as I expected. I then said, "My good friends, to my mind, your marketing organization is only half organized. You have only organized the selling part of the machine and still let the middlemen make unconscionable profits out of you and the ultimate consumers. You need more organization of the consumers, and you need to be in much closer touch with the ultimate consumers."

I found that the same defects were in the marketing of cream and other milk products and also in the marketing of the fruits of that great western country.

Cooperative marketing is fine in so far as it goes, but it has only begun in the great work that should be done in the way of bringing the producer and ultimate consumer in closer touch. Proper organization of producers, to my mind, would bring about the practical elimination of most middlemen. As now, in effect, cooperative marketing only collects food and food products as well as other farm products in large quantities, so that the speculator can the more easily get possession of practically all, if not all, of a certain commodity and thus form practically a monopoly as to that particular product. Of course, the producer finds a market for his product and possibly gets more for this product than he would get, if acting separately and as individuals, but the ultimate consumer does not get any additional advantage and the producer fails to get as much for his product as he should receive.

There should be complete organization at both ends of the line, and the producers and the consumers should have the fullest control of both organizations. There should be only such intermediaries as the producer and consumer desire and as they find to be necessary. Practically all middlemen who handle perishable food products are expensive, unnecessary parasites and only cause the food to deteriorate and rot while they are attempting to squeeze out their profits and thus rob the farmers and consumers by charging not for a real service but for a rank injustice.

Congress seems to have never made a serious effort to pass legislation to bridge the yawning, hungry, awful chasm which is between the producer and the ultimate consumer, except it has refused to help eliminate this great gap and has assisted the profiteer and speculator to become more thoroughly entrenched between the producer and the consumer. The thing that alarms me, Mr. Chairman, is that it is almost impossible to get many of those who pose as the friends of the farmer to give serious consideration to this awful means of robbing both the producer and the consumer.

Read the so-called farm relief bills and you will find that practically all of them are so worded as to take care of the middleman. Very few of them strike at the real evil. Those that go to the heart of the trouble have very little, if any, chance of passing in the near future. The real farm problem with most people seems to be just how little can be done for the farmer and yet secure his approval of a further extension of a general scheme to exploit him.

The middleman and speculator names the price at which he buys from the farmer and then names the price at which he sells to the consumer. Even the peanut parcher tells the farmer what he will give him for the peanuts and then when he gets them he tells the farmer what he will charge him for a paper sack of parched peanuts.

Again let me say—and it can not be said too often—that the farmer can never be placed on a parity with other businesses and enterprises until he is empowered to name within reason the price of the products of his own toil.

Let me repeat what I have tried to say before. It is reasonably easy to secure appropriations to help the farmer produce and enslave his family to yield an abundant harvest, but as soon as the commodity is ready for sale he is left at the mercy of the middleman without any real help from appropriations or other governmental agencies. Then, again, there is help for the consumer after he gets the food or food product from the middleman, but only then. There is no governmental assistance to either producer or ultimate consumer in their efforts to span the great gulf which separates them.

Now, let us look at the present agricultural appropriation bill, which carries approximately $140,000,000.

The first two and a half pages make appropriations for salaries, not of farmers but of employees here in Washington. Last half of page 3 and first part of page 4 make appropriations for stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, ice, fuel, water, newspaper clippings, washing towels, automobiles, motor cycles, and so forth and so on. Nothing here helps the farmer to sell at a better advantage. No doubt the speculator makes a profit and a large one out of some of the articles which are sold to the department.

Pages 4 to 10, inclusive, provide for appropriations for bulletins, printed data, and experiment stations, together with exhibits at fairs, and so forth, all of which is for some purpose other than helping the farmers sell their products for a better price and more directly to the consumer. Page 11 is for forestry and is good, but in no way helps the farmer to solve his marketing problems. Page 11 provides also for money to help rehabilitate flood-stricken areas so more can be produced, but in no way helps the poor fellows sell what they produce.

Pages 12 to 49, inclusive, provide appropriations for the following purposes in the order named, to wit: Weather Bureau, Bureau of Animal Industry, meat inspection, eradication of foot-and-mouth disease, and so forth, Bureau of Dairy Industry, Bureau of Plant Industry, Forest Service, Bureau of Chemistry and Soils, Bureau of Entomology. These are all splendid activities, but not a one of them is engaged in the all-important matter of helping the producer get a fair price for what he produces. They all only help in production. The farmer needs not only help to produce, but also help to sell what he produces.

From the top of page 50 to the middle of page 53 appropriates money to protect game preserves, all of which in no way helps the farmer in his most important problem of securing a proper marketing system.

From middle of page 53 to the middle of page 55 provides help for good roads, a splendid cause, but not used as they should be, for furtherance of the sale of farm products directly from the producer to the consumer. Then again, if good roads had never been needed by anyone except the farmer and his mule and wagon, they would have never all been built. They have been built for everybody and their automobiles. Of course, I am in favor of good roads. I am just stating that money appropriated for good roads may swell the amount of the agricultural appropriation bill, but like many other items it is not for the farmers solely and only, but also for other folks. In fact, there is very little appropriated for the farmer without a large part of the appropriation eventually finding its way to the pockets of those who do not farm. A large amount of so-called agricultural appropriations never reach the farmer at all. It has been estimated that only one dollar out of every seventy so appropriated for the farmer ever actually reach the farmers' pockets.

But let us look at the present agricultural appropriation bill just a little further. Beginning at the middle of page 55 appropriations are made for the Bureau of Agricultural Economics. First, as usual, comes $268,000 for salaries, so forth and so on, in the District of Columbia. Then there is provided $372,250 to investigate and encourage the adoption of improved methods of farm practice and farm management, but not a red cent to help the farmer sell directly from the producer to the ultimate consumer. Then there follow several pages of provisions in the way of appropriations for investigations, securing information, compiling data, making research, issuing bulletins, diffusing information, telling the farmers about technical matters, broadcasting scientific conclusions, predictions as to supply and demand, and almost everything else that can be thought of in connection with farming which helps the speculator about as much as it does the farmer, or more, but nowhere is there to be found a genuine bona fide effort or appropriation to honestly endeavor to help the farmer sell his products free from the profits of unnecessary middlemen. Thus it is that from the middle of page 55 to the top of page 63 there is no appropriation to help the farmer with his real problem of getting a rea-

sonable price for what he sells. There are, of course, appropriations which may or may not help the farmer to some extent. For instance, there are appropriations in connection with the United States cotton futures act, United States cotton standards act, and the grain standards act, but these only help the farmer remotely, if at all.

On page 63 to the middle of 64 are appropriations for the Center Market here in Washington, in which is operated a general market business in which farm products are sold, in most cases after a half dozen or more unnecessary profits have been made out of what the farmer produced. Center Market is maintained, evidently, for the encouragement and promotion of the speculation by middlemen in farm products. It is certainly not operated for the purpose of encouraging the sale of farm products directly from the producer to the consumer without unnecessary profits to middlemen.

From the middle of page 64 to the end of the bill are appropriations for the Bureau of Home Economics, plant quarantine and control administration, enforcement of grain futures act, food, drug, and insecticide administration, and miscellaneous appropriations in which are included everything that can be thought of that is not included in the first part of the bill, except appropriations to help the farmer sell his products to the very best advantage regardless of the favored middlemen.

Mr. Chairman, I am not now criticizing these appropriations, except to show that they are mere chicken feed as compared to what we should do for the farmers of the Nation. Most of these appropriations help the middlemen and profiteer more than they do the farmer, and many of them very probably are a real detriment to the best interest of the farmer. None of them are for the purpose of helping the farmer sell to a better advantage by elimination of the unnecessary middlemen's profits. Some of them, it is true, help the farmer to sell, but they also help others to make unconscionable profits out of the farmer.

I repeat again and again, we are not attempting to solve the farmers' problems in the right way. Real relief can only come by helping the farmer sell not only his perishable products but also the basic commodities at a better price and under a system whereby he can name the price of his own products within reason and thereby become free and independent.

Nearly all the farm relief bills are, to my mind, vicious, because they attempt to help the farmer and yet leave him the prey of all other businesses and enterprises. The farmer should be placed on an equality with other folks, and there is no real farm relief except that which places the farmer on an equality with other folks, businesses, and enterprises.

I have worked out a system and introduced it in the form of a bill which, to my mind, will solve the farmers' problems in so far as cotton, tobacco, and other basic commodities are concerned. I have urged the Committee on Agriculture of the House to favorably report my bill in this respect. I shall also urge this committee to give favorable consideration to my bill to authorize the Department of Agriculture to embark in a line of experiments in the organization of consumers' clubs and producers' clubs and the sale of food and food products more directly from the producer to the ultimate consumer.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. LANKFORD. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for five additional minutes. Is there objection?

Mr. DICKINSON of Iowa. Mr. Chairman, reserving the right to object—and I am not going to object—we are very anxious to get this bill through. We were exceedingly liberal with general debate, and most of the Members had every opportunity to express themselves, and I am not sure but what the gentleman had some time in general debate.

Mr. LANKFORD. I had 20 minutes, but yielded it back, as I was busy preparing my statement for use before the Committee on Agriculture.

Mr. DICKINSON of Iowa. As a matter of fact, we yielded to your side two hours more than we used on this side.

Mr. LANKFORD. I did not use a minute in general debate.

Mr. DICKINSON of Iowa. I hope gentlemen are not going to continue to ask for additional time, because I would like to get home early on Saturday afternoon.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANKFORD. Mr. Chairman and gentlemen of the committee, I wish to impress upon you the fact that we are only organizing the marketing proposition at one point on the line. What we need is this: We need an organization not only of the producers, but an organization of the consumers and the elimination, so far as possible, of the unnecessary middlemen, who make a profit without really rendering any service.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. SUMMERS of Washington. Does the gentleman have an idea that Georgia watermelons, for instance, could be marketed direct in Washington?

Mr. LANKFORD. I am absolutely sure of it. I know of no reason why a Georgia watermelon should not be marketed direct just as a 5-cent newspaper is sent direct to the man who reads it. I know of no reason why a watermelon should not be sent to a man's home who wants that melon, just as the dairyman sends a bottle of milk to your front porch every morning. I know of no reason why the market basket, made up by the producer of that market basket, should not be sent to the ultimate consumer direct under a proper contract, helping that consumer buy the commodities direct from the producer and trimming out the unnecessary middlemen, just the same as newspapers and other articles are distributed.

I realize, when you begin to figure on legislation to eliminate the middleman, there are a great many people who seriously object; but, gentlemen of the committee, the great problem to-day of farm relief is to work out some plan whereby the man who produces can sell his commodity at a better price. I am not criticizing the Department of Agriculture, but the great problem with the wheat grower, with the cotton grower, and the producers of vegetables and other farm products is not so much that he can not produce but that he can not receive what he is entitled to when he goes to sell it; and all of our legislation in the past has been along the line of helping the farmer produce more.

We appropriate money to fight boll weevil and fight corn borer, and that is all right; but we do not appropriate any money to fight the two-legged, 200-pound corn borer and boll weevil, who occupies a cushioned seat, and who destroy that commodity, in so far as the farmer is concerned, after it is produced. You want the farmer to produce. You want the farmer to toil; you want him to labor; you want him to produce in abundance; but when he does produce you do not take care of him sufficiently when he goes to sell his commodities.

Let me say we can never settle the farm problem until we work out for the farmer a better marketing system. We must do it. It matters not whether we pass the McNary-Haugen bill, it matters not what legislation we pass, until we can help the farmer sell his product to better advantage and get a better price for it and eliminate the unnecessary middlemen, we can not solve the problem.

Mr. HASTINGS. Of course, the gentleman is in favor of the McNary-Haugen bill?

Mr. LANKFORD. I voted for the McNary-Haugen bill, and I may vote for it again; but I know of some very much better bills than the McNary-Haugen bill that I would like to support. I have introduced one myself that is an improvement over that bill in that it does the very thing I have suggested. My bill seeks to enable the farmers themselves by proper organization and by proper contract to control their production and marketing and thus eliminate unnecessary and expensive middlemen and within reasonable limits name the price at which they sell the products of their own toil.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For cooperative agricultural extension work, to be allotted, paid, and expended in the same manner, upon the same terms and conditions, and under the same supervision as the additional appropriations made by the act of May 8, 1914 (38 Stat. L. 372), entitled "An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture," $1,300,000; and all sums appropriated by this act for use for demonstration or extension work within any State shall be used and expended in accordance with plans mutually agreed upon by the Secretary of Agriculture and the proper officials of the college in such State which receives the benefits of said act of May 8, 1914: *Provided*, That of the above appropriation not more than $300,000 shall be expended for purposes other than salaries of county agents.

Mr. GARRETT of Tennessee. Mr. Chairman, I offer an amendment.

The CHAIRMAN (Mr. RAMSEYER in the chair). The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GARRETT of Tennessee: On page 10, line 11, strike out the figures "1,300,000" and insert in lieu thereof the figures "1,580,000."

Mr. GARRETT of Tennessee. Mr. Chairman, in my opinion one of the most valuable works which the Department of Agriculture performs is this cooperative demonstration work. It brings the individual farmer in direct contact with the expert. He does not have to obtain his information by reading and he does not have to follow theories, but has the actual work done for him there.

This work was established in Tennessee a good many years ago and has been gradually spreading. I ascertained from a reading of the hearings that 465 agents are needed in order to fill the applications that are before the department. It seems to me we could very well afford to increase this appropriation by the $280,000 which I understand to be the amount that would be required to fill all the requests pending before the department.

Mr. DICKINSON of Iowa. Mr. Chairman, the subcommittee is very friendly toward the extension service. It is true there are now a good many applications on file for agents that apparently have not been supplied on account of the limitation of funds.

It seems to me that this amount of $280,000 would be a little beyond the requirements, because all of the different counties certainly would not be able to arrange their machinery and get cooperation of other States at one time. I am wondering if it would be satisfactory to the gentleman not to include so large an amount as $280,000, but make it $150,000?

Mr. GARRETT of Tennessee. I would be willing to take what I could get agreeably rather than make a fight for more and lose it. It is my thought that there are in fact now applications where the requisite procedure has been had in the counties amounting to 465 of all classes. That is the understanding I got from the hearings.

Mr. DICKINSON of Iowa. I would be inclined to accept an amendment for $150,000 without a contest.

Mr. BUCHANAN. If the gentleman will yield, I think the Budget should have included the $280,000. That is the figure the department says is necessary in order to meet the demands for all the applications that are now on file.

Let us analyze that for a minute. Here is a great fund, a part of it an annual appropriation, an automatic appropriation. Forty-seven States have made application, which are on file. Mind you, this is a cooperative fund. The Federal Government pays a portion, the State pays a portion of the salary, and the county in which the county agents are pays a portion of the salary.

Forty-seven States have filed applications and the counties and States have set aside their portion of the salaries. The question is, Are we going to treat them all alike—are we going to give the money to some agents in some counties? And if so, all should receive it.

I will say to my colleague on the committee that the $280,000 increase which the gentleman from Tennessee has offered in his amendment will meet only the applications now on file, and before the next Congress convenes there will be further applications on file, so that instead of this amount being too large it is really too small, because it does not anticipate the future.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. DICKINSON of Iowa. I yield.

Mr. GARRETT of Tennessee. It is a fact that in many of the States—I know it is true in my State—the authorities that handle the funds have discouraged the counties from making application. There would be more on file from my State than there now are on the waiting list were it not for the fact that they have been discouraged by the statement that the Federal appropriation was not sufficient. I hope the gentleman from Iowa will be willing to accept my amendment.

Mr. DICKINSON of Iowa. I will say to the gentleman that I am a friend of the extension service, as everybody knows. I know that these applications are on file. I thought I could get the gentleman to reduce the amount, but if he persists in making it $280,000, I shall not object.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. GARRETT].

The amendment was agreed to.

The Clerk read as follows:

Flood-devastated farm area relief: To enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act for the purpose of rehabilitating farm lands in the flood areas," approved January 26, 1928, including the employment of persons and for traveling, subsistence, and other necessary expenses, $400,000, of which amount $110,000 shall be immediately available.

Mr. GARRETT of Tennessee. Mr. Chairman, just a word in order to get some information. I have been through the hearings, and this $110,000 to be immediately available seems to be all that the department itself can use.

Mr. BUCHANAN. It is, between now and the time the bill becomes a law.

Mr. GARRETT of Tennessee. The original authorization was $500,000, but I note that that is reduced, and the department seems to be agreeable to it.

Mr. BUCHANAN. That was based on commencing on January 1 of this year.

Mr. GARRETT of Tennessee. The original authorization passed the House was $500,000, but I note the Secretary of Agriculture stated that it might not be necessary to use that because of the fact, as the gentleman now says, that they would begin on the 1st of January. I withdraw the pro forma amendment.

The Clerk read as follows:

Cereal crops and diseases: For the investigation and improvement of cereals, including corn, and methods of cereal production and for the study and control of cereal diseases, including barberry eradication, and for the investigation of the cultivation and breeding of flax for seed purposes, including a study of flax diseases, and for the investigation and improvement of broomcorn and methods of broomcorn production, $728,000, together with not to exceed $17,000 of the unexpended balance of the appropriation for this purpose for the fiscal year 1927: *Provided*, That $375,000 shall be set aside for the location of and destruction of the barberry bushes and other vegetation from which rust spores originate: *Provide further*, That $75,000 of this amount shall be available for expenditure only when an equal amount shall have been appropriated, subscribed, or contributed by States, counties, or local authorities, or by individuals or organizations, for the accomplishment of such purposes.

Mr. NEWTON. Mr. Chairman, my purpose in offering this pro forma amendment is to call attention to the appropriation of $375,000 to be used for the detecting and destruction of the barberry bushes and other plants from which rust spores originate.

Black-stem rust has cost the farmer of the upper Mississippi Valley States many millions of bushels of grain annually. The scientists tell us that a single barberry bush is capable of producing 50,000,000,000 rust spores, and that each one of these spores, after it has left the barberry bush, can create a rust pustule on a stem of grain which will contain approximately 500,000 spores, and that each one of these can, in turn, produce new rust pustules every week or so during the growing season. Under certain climatic conditions the spread of the disease is much more favorable. This was illustrated during the last year, when conditions were ideal for the spread of the rust spores. The rust parasite appears to develop best in rather warm, moist weather.

Probably the greatest loss occurred in 1916, when it ran about 180,000,000 bushels. During the years 1915–1920 the average annual loss amounted to 44,300,000 bushels. During the years 1921–1927 the average annual loss had been reduced to 12,300,000 bushels. This was largely due to the extending of the work of the Department of Agriculture for rust eradication. This extension was in a large measure due to the efforts of Mr. Sydney Anderson, then representing a Minnesota district in the House. He was chairman of the subcommittee in charge of appropriations for the Department of Agriculture. The saving to the farmer is perfectly obvious.

This last year the loss was substantially above the average for the past seven years. It amounted to just under 20,000,000 bushels. Weather conditions were perfectly ideal for rust propagation and development. If it had not been for the previous good work of the Department of Agriculture the loss this last year might possibly have reached the tremendous losses of the year 1916.

Mr. Chairman, the average annual loss has been reduced in the period of a very few years from 44,000,000 bushels to 12,000,000 bushels. This is remarkable progress. I note from the hearings that the subcommittee suggests the possibility of decreasing the appropriation this coming year and further decreasing it in succeeding years. I presume that this suggestion was merely made with the idea generally of keeping appropriations down. I hope that was the case, for it would be a great mistake to reduce this appropriation in the near future—in fact, it would be better if the committee could see its way clear this coming year to recommend a substantial increase in this appropriation. The sooner the barberry bush is eradicated the sooner losses from rust will practically disappear. An outlay

of $375,000 is a small amount of money compared to the gross saving annually by this prevention work. My purpose, therefore, in offering this pro forma amendment is to call to the attention of the distinguished chairman of the subcommittee in charge of this bill the desirability of not only continuing this work but of extending it.

Mr. ADKINS. Mr. Chairman, will the gentleman yield?

Mr. NEWTON. Yes.

Mr. ADKINS. In addition to that, it has gotten to be a splendid adjunct to the schools, in making a berth for the football boys during the summer vacation, so that they may go around hunting barberry bushes.

Mr. NEWTON. If that comes in as incidental to this work, as one who enjoys that sport, I certainly would not object to it.

Mr. ADKINS. It serves a double purpose.

Mr. NEWTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

Western irrigation agriculture: For investigations in connection with western irrigation agriculture, the utilization of lands reclaimed under the reclamation act, and other areas in the arid and semiarid regions, $142,095.

Mr. LOZIER. I move to strike out the last word.

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. LOZIER. Mr. Chairman, the nation-wide distress of the great basic industry of agriculture has become so acute and is affecting other lines of business so tremendously that it has ceased to be a farm problem and is now a national problem. Other occupations are beginning to realize that the prosperity of the agricultural classes is the foundation of genuine national prosperity, and unless the farmers enjoy a reasonable degree of prosperity the welfare of all other vocational groups will be injuriously affected. I quote from a recent issue of the St. Louis Globe-Democrat:

A representative committee of railroad executives and industrial heads probably will be formed by H. M. Bixby, president of the chamber of commerce, to study the economic conditions confronting farmers in St. Louis territory at first hand, it was learned yesterday.

Prosperity of farmers in St. Louis trade territory has its reflection on the industrial and commercial life of St. Louis, and it has been pointed out that business leaders here will be anxious to cooperate in such a plan, which will redound eventually to their own benefit.

It seems that the thoughtful leaders in the industrial, commercial, and transportation world have awakened to the gravity of the agricultural situation and realize that the railroads, factories, and business groups can not expect a continuance of their present prosperity unless there is a speedy and substantial improvement in the economic condition of the agrarian population. Indeed, a very considerable part of the tonnage carried by the railroads consists of farm products, for many of which the farmer gets less than the cost of production, which means that he can not continue indefinitely to produce at a loss the food supplies which are necessary to satisfy the hunger of the American people.

Unless farm commodities can be produced at a profit, the farmer will be forced by the logic of the situation to only produce a sufficient supply to meet his own needs, and will cease to produce the surplus which is required to feed the tens of millions of men and women in the United States who depend on the farmer for their food supplies. The far-reaching effects can scarcely be exaggerated. Those who do not produce their own food supplies will quickly feel the pangs of hunger. The railroads will face a radical reduction in their revenues. The manufacturer will lose his best market, because the buying power of the agricultural classes has been destroyed.

It is therefore not strange that Mr. Bixby, president of the St. Louis Chamber of Commerce, is alarmed at the disaster which threatens the agricultural classes. He well knows that the commercial, industrial, and transportation classes can not permanently prosper unless a fair degree of prosperity comes to the 30,000,000 American people who either directly or indirectly depend on agriculture for a livelihood. Nor can Mr. Bixby and other captains of industry overlook the all-important fact that the great prosperity of the industrial, commercial, financial, and transportation classes is largely due to legislation that has stabilized the price of these other great industries and artificially inflated their profits. Without legislative favoritism these other vocational groups would not be enjoying their present unprecedented prosperity.

The eastern bankers and big business groups have viciously opposed the McNary-Haugen bill, in fact all legislation designed to stabilize and advance the price of farm commodities to higher levels. In view of this hostility of the eastern bankers, it is significant that the Illinois Bankers' Association recently went on record as approving the revised McNary-Haugen bill. Evidently this is because the farm problem is better understood in the West than in the East, and also because in the Middle West there is a closer relation between the city and farm populations. The bankers in the great agricultural States realize that their prosperity, yes, their existence, depends on the welfare and prosperity of the agricultural classes, and therefore they are more sympathetic in their views as to farm-relief legislation.

The sensible, thoughtful, long-headed and far-seeing western banker knows that his bank can not be prosperous if the great basic industry, agriculture, is in distress and facing insolvency. Hence, he is less inclined to find fault with farm-relief measures and more disposed to assist the farmers in securing legislation that will increase their purchasing power and aid in placing agriculture on a stable and prosperous basis.

The Illinois Bankers' Association boldly asserts that the farmers' deplorable condition is not due alone to natural and economic factors but results, in a large measure, from governmental favoritism and discriminatory legislation enacted for the specific purpose of aiding the manufacturing industries and other groups that have long been the beneficiaries of paternalistic supervision and legislative bounties.

The Illinois Bankers' Association, in the face of this nation-wide agricultural distress, after years of thoughtful and intelligent investigation and consideration, has reached the conclusion that the enactment of the McNary-Haugen bill will materially aid in restoring a proper balance between agriculture and the other great basic industries.

The President and his party leaders in and out of Congress preach the doctrine of patience and procrastination to the farmers, well knowing that the industrial, commercial, financial, and transportation classes are being "babied," favored, and protected by special-privilege laws which stabilize these other industries and insure them excessive profits, even under adverse economic conditions, and this is being done at the expense of the American farmer. It can not be denied that the farmer has been given "a raw deal" by the President and his party, and it remains to be seen whether or not the President and his advisers will stubbornly continue to block farm-relief legislation and thereby deny to the agricultural classes the consideration and equality of opportunity so generously granted to other vocational groups.

It is to be hoped that the industrial, financial, commercial, and transportation groups will lend their powerful influence toward giving agriculture a square deal by relieving it of the artificial, economic, and legislative handicaps with which it is now burdened. It is imperative that a proper balance be restored between agriculture and the other great basic industries. If this is done, we will have a well-balanced, nation-wide prosperity, in which all sections and occupations will participate, which will certainly be an improvement over the sectional, jug-handled, lopsided prosperity that is now enjoyed by only a few favored groups. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

The Clerk read as follows:

Total, Bureau of Plant Industry, $4,216,436, of which amount not to exceed $1,488,400 may be expended for personal services in the District of Columbia.

Mr. JONES and Mr. LANKFORD rose.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. JONES. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. JONES. Mr. Chairman, I just want to thank the House for adopting the amendment which I offered yesterday. It means much to the people of the South. The matter came up rather unexpectedly, and some of the Members have asked for the report from the department in that connection. I will read from the report of the department the paragraph containing this forecast and the paragraph preceding it. I read:

Crop conditions in the United States on September 1 indicate a production of only 12,692,000 bales, a decline of 800,000 bales during August. Declines occurred in all States except New Mexico, Arizona, and California, the principal decline being registered in Oklahoma. In all important cotton States the weevil is the dominating factor in the situation. Propagation of this pest has been accelerated by wet weather over much of the belt. Infestation increased materially in all infested areas, and the area where weevils were prevalent extended

northward materially during the month of August. The extent of infestation has quite generally checked fruiting and the probability of any important top crop is small over large areas.

As the size of the crop is becoming more definitely established, the market should become more stable, and the tone in the yarn and finished-goods market should be more settled. Due to the fact that the prospects of a top crop are very small, cotton will be ginned unusually early this year. As was indicated in last month's report, should the present estimate of production be realized, and past relationships between supply and price prevail, it is likely that prices will decline in the next few months.

The last part of that statement sounds peculiar, following the statement about the decline in the production of cotton and the extent of the ravages of the boll weevil. It would seem that the first part of the statement would justify a forecast of price advance rather than a price decline. I assume, however, that they took into consideration other conditions which they did not mention. But when the trade saw fit to use that—and this occurred, mind you, during the marketing season—they picked out these last few lines and circulated them generally throughout the United States. What was the result? Here is a report in the Dallas Morning News, September 15, 1927, and the same thing, practically, appeared in the Wall Street Journal and in the newspapers generally, giving the account of the market the day before this report was issued. I read:

Cotton soars $3 a bale again. Late dealings bring gain of $6.50 over Tuesday's low mark.

What happened on the day the forecast was given out?

The Dallas News of the next day, giving an account of the market for the day on which this price forecast was issued, contains the following statement:

Market disrupted. Decline of $7.50 per bale in New York as New Orleans protests.

In other words, the last three or four lines of this report was sent hurtling through the United States, and the market broke from $6.50 to $7.50 per bale, causing untold losses to the cotton section. The Associated Press article carrying the story of the result uses the following language:

Bombarded with protests from the Southland and telegrams of inquiry concerning the validity of governmental opinion on the future prices of cotton, which Thursday sent the market down $6.50 a bale at New Orleans, the Bureau of Agriculture Economics Thursday night withheld a statement of its position pending a conference of its chiefs with Secretary Jardine.

Quoting the article further in reference to the explanation made by Mr. Marquis of the department, we find the following:

The chief of the bureau, was absent from his office Thursday. In his absence J. C. Marquis, director of publicity for the bureau, buffeted the storm with a declaration that the statement was contained in a publication of limited circulation intended primarily for economists and field agents. It was almost identical with a cotton-price review published a month ago, he said, adding that if carried by the press in its entirety it would not have caused the New Orleans reaction.

"It was a long-range forecast," Marquis said, "and should not apply to the present market." The statement, he explained, was not issued as a regular press release.

Marquis's explanation was given after earlier in the day it had been declared at the bureau that there was no new prediction regarding cotton prices which warranted Thursday's break. The suggestion was given at that time that the report credited to the bureau was based "on a mere fragment" of the review of last month, and no reference was made to the statement released for Thursday.

In other words, it was claimed that a part of the report of the Department of Agriculture was used and the market thus disrupted.

It seems that not much attention was paid to the report until some of the bears wanted to use it for the purpose of running down the market. I object especially to these reports being made during the marketing season.

We had some hearings before the Committee on Agriculture recently upon a bill introduced by Mr. McDUFFIE, who, by the way, made a very fine statement in behalf of his bill, which covers what is sought to be accomplished by this amendment. A number of other Members have introduced bills reflecting the sentiment of those who represent the cotton section. Representatives of the department also appeared at that hearing and gave their reasons for the work they were trying to do. One of their reasons for wanting to give cotton-price forecasts was in order to give farmers information, so that the farmer might be able to gauge his cotton acreage so as to avoid too great a surplus. But the trouble is that it was given out not at planting time but at marketing time. I may add, in justice to the department, that cotton had broken some several days before this forecast. But for the last few days before the forecast it had had an upward trend. It had gone up $3 per bale the day before and there had been a net advance for the previous few days of several dollars per bale. But when the price-decline forecast was given out it immediately declined several dollars per bale and continued to have a net decline for several days thereafter.

The department does some fine work in gathering statistics, in furnishing information. It has some wonderfully able men who do some fine work in this regard. Mr. Lloyd S. Tenney is one of the ablest men in the Government service. He has some very able lieutenants and assistants. Let them learn all the facts and give us all the facts. But I think they should not give conclusions and guesses as to future prices.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. JONES. Mr. Chairman, may I have five minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. JONES. What I quoted from is a statement on the price trend that the department had given out and about which we were talking yesterday. It was a statement covering the price trend, and yet these speculators who had evidently sold short took the opportunity to use it. While cotton had gone up the day before the statement was issued, the price went down $6.50 and $7.50 a bale the moment it was issued, and it continued on the 16th and 17th and 18th and 19th in the month of September, with slight fluctuations on the downward trend from the day the announcement was made. It finally recovered after five or six days and came back two or three dollars a day from the low mark.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. RANKIN. The gentleman is aware of the fact, of course, which was brought out here, that 250,000 or 300,000 bales in New York were used, it is alleged, to depress the market?

Mr. JONES. Yes.

Mr. RANKIN. I wondered if the gentleman had gone into this proposition sufficiently to see how much of that cotton was offered on the day this report was issued or a few days following.

Mr. JONES. I have not that data before me, but I will state to the gentleman that it is my understanding that 150,000 to 200,000 bales of low-grade cotton is always kept on hand by the New York Cotton Exchange simply for the purpose of tendering and retendering, that it is not of a quality that can be used by the spinners, or at least much of it is not, and they simply bandy it about tendering the same cotton again and again, knowing that it will probably not be accepted. In fact, they would probably be disappointed if it were accepted.

Mr. RANKIN. It is a fact that Senator SMITH, of South Carolina, is going to begin an investigation next Wednesday? That is a fact, is it not?

Mr. JONES. Yes; I understand so.

Mr. RANKIN. They not only propose to investigate the concentration of this cotton in New York but also propose to investigate the activities of the Bureau of Economics in the Department of Agriculture in giving out these reports?

Mr. JONES. I do not know just how much the investigation will cover, but I am glad to know that is to be done. I think the cotton exchange should be investigated, nor can I see any objection to the other phase of the investigation. If the department gave out the price forecast in good faith it is to its advantage to have that fact established, and if it did not we want to know it. I do not question their motive, but I do think the issuing of the forecast at that time was a great blunder.

In that connection I want to call attention to a suggestion by my colleague [Mr. BLACK], who has studied this question a good deal. He said that in order for the Department of Agriculture to function in the best manner it must have the confidence of the people, and that price forecasts of the kind mentioned tend to undermine that confidence. I do not think anything can be done that would shake their confidence more than these conclusions or guesses at a thing that is labeled price. They can and should give to the public all the factors that go into it—the production, the weather conditions, the acreage that has been planted, and all of the other facts that go into cotton and the production of other commodities. But I do believe, especially during the marketing season, that it is unwise to have the people who sit here at a desk in Washington and mull over these statistics—and they have some very valua-

ble men there; I am not criticizing the ones who do that as men, but I am just criticizing the system—guess at matters of price and give price forecasts and forecasts as to the trend of prices. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

In all, for the use, maintenance, improvement, protection, and general administration of the national forests, $6,344,000: *Provided*, That the foregoing amounts appropriated for such purposes shall be available interchangeably in the discretion of the Secretary of Agriculture for the necessary expenditures for fire protection and other unforeseen exigencies: *Provided further*, That the amount so interchanged shall not exceed in the aggregate 10 per cent of all the amounts so appropriated.

Mr. LANKFORD. Mr. Chairman, I move to strike out the last word. I just wish to call the committee's attention again to the same proposition I was speaking about a few minutes ago, that this entire appropriation bill provides money to take care of agriculture up to the place where the farmer finishes production. Every item so far has been along the line of helping the farmer up to where he has done all he can do—has toiled, has labored, has produced, and has his commodity ready for the market—but the bill is strangely silent as to anything in the way of help for the farmer in getting that commodity to the ultimate consumer. I would be glad right now for the gentleman from Iowa [Mr. DICKINSON] to tell me just what appropriations in this bill he contends are intended for the purpose of helping the farmer sell his commodity more directly to the consumer than is now in vogue under the present system, if any. I am making the contention that there is a great gap between the producer and the consumer which has not been properly covered.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. DICKINSON of Iowa. The gentleman is making the contention that it is the business of the Government to take his watermelons from the patch in Georgia and deliver them to me individually out in Iowa. The Government is never going to do that.

Mr. LANKFORD. Does the gentleman contend it is not the duty of the Government to experiment in the sale of farm products directly from the producer to the consumer?

Mr. DICKINSON of Iowa. Let me suggest to the gentleman that we have in the bill an item reading as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing, handling, utilization, grading, transportation, and distributing of farm and nonmanufactured food products.

Mr. LANKFORD. That may be in the bill.

Mr. DICKINSON of Iowa. It is in the bill. We are doing work under it and spending money for it.

Mr. LANKFORD. Are there any experiments being made in the way of selling the farmers' products directly from the producer to the consumer and eliminating thereby the unnecessary middlemen and the unnecessary profits made by middlemen?

Mr. MADDEN. Will the gentleman yield to me?

Mr. LANKFORD. I will be glad to yield to the chairman of the committee.

Mr. MADDEN. The gentleman must have a comprehensive knowledge of the conditions under which we do business between the producer of agricultural products and the consumers, and he is anxious to see that the most expeditious and the most economical method is pursued in the sale and distribution of such commodities. Now, I wish the gentleman would suggest the plan he has in mind, because we will be very happy as a committee to look into it very carefully, and perhaps we will be given some knowledge and experience that we do not now possess.

Mr. LANKFORD. I will say to the gentleman that I have introduced a bill—H. R. 79—which does that identical thing; and I think that bill, if adopted, will help to carry into effect the very purpose I have in mind. That is a bill authorizing the Department of Agriculture to experiment in the organization of producers' clubs and the organization of consumers' clubs and the sale of food and food products directly from those producers' clubs to those consumers' clubs.

Mr. MADDEN. I wish the gentleman would make a map of it so we can see what it means.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. LANKFORD. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for two additional minutes. Is there objection?

Mr. DICKINSON of Iowa. Mr. Chairman, I have been very friendly to the gentleman and I do not think he should ask for additional time.

Mr. MADDEN. This is an academic question and I do not think we should take the time to discuss academic questions.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

Mr. MADDEN. I object.

The Clerk read as follows:

FOREST-FIRE COOPERATION

For cooperation with the various States or other appropriate agencies in forest-fire prevention and suppression and the protection of timbered and cut-over lands in accordance with the provisions of sections 1, 2, and 3 of the act entitled "An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote continuous production of timber on lands chiefly valuable therefor," approved June 7, 1924, including also the study of the effect of tax laws and the investigation of timber insurance as provided in section 3 of said act, $1,100,000, of which $41,900 shall be available for personal services in the District of Columbia and not to exceed $3,000 for the purchase of supplies and equipment required for the purposes of said act in the District of Columbia.

Mr. CARTWRIGHT. Mr. Chairman, I ask unanimous consent to extend my remarks on the McKeown seed amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. CARTWRIGHT. Mr. Chairman, I have taken the floor at this time in behalf of the McKeown amendment, which provides, among other things, that the Secretary of Agriculture be authorized, for 1928 crops, to make advances or loans to farmers in the pest-stricken areas of Oklahoma.

I had contemplated introducing a bill to take care of the situation, but decided it would be better to have an older Member introduce it, and sought the cooperation of my colleague, Mr. MCKEOWN, from my adjoining district. We, in company with others, went before General Lord, the Budget officer, and showed the true conditions. Our hopes were high that we would receive a favorable report, but were unpleasantly surprised when the Budget Bureau reported:

This is not in accordance with the President's financial program.

So there is nothing left but to offer this amendment as a means of last resort to help the pest-stricken farmers.

I want to read you a letter from one of the best citizens in my district which will give some idea of the desperate situation in our part of the country.

BOSWELL, OKLA., *February 23, 1928.*

Hon. WILBURN CARTWRIGHT,
Washington, D. C.

DEAR MR. CARTWRIGHT: Am just in receipt of your favor telling me about the revival of the appropriation bill and the chances for help for our people.

This is the best news we have received in a long time, and we certainly hope you and your faithful friends will be successful in getting this over, as it means far more to our people than any of you can imagine. It touches the very life of every hungry child in this country. It touches the life of every farm and fireside. It would be hard for the man who has plenty to eat, and the wherewithal to be clothed, and no fears of the future, to realize what this means to us. It will place hope where no hope exists; confidence in the strong arm of the Government, where suspicion now exists; prosperity, where the wolf now howls. If you could only see how the farmer has worked up until now, hoping against hope, that we would get the help to finish—how downcast he was when the bill seemed lost a few days ago, you could then realize what it means to us.

Here is hoping that our great Government will remember that if God can see the raven's fall and hear its cry, surely our representatives will not pass unheeded, the hungry children here.

Your friend,

R. L. LOWDERMILK.

I have received many such communications from individuals and organizations in Oklahoma, especially from the Red River part of the State.

I am here to tell you that these farmers are in dire need. If you will adopt this amendment you will confer a benefit that will save a people and help a good farming country. All they want is a chance to make this crop. They will return

this money with interest and the department will not be out anything in the long run. These people have pride and would rather not have the aid than to be placed in the attitude of beggars, when they know that they only need a chance to repay. They want help without humiliation. With several crop failures, so many of them are stranded and the future looks hopeless. They have the muscle and grit, but no seed to start their spring planting, and if something is not done these people, our own honest, hard-working American farmers, will actually face starvation. If you could understand the necessity for quick action I am sure you would act speedily.

I am not taking into consideration the few who own their own homes and have assets that enable them to get accommodations at the bank. I am sponsoring the cause of the man who rents, who is willing and anxious to work and be a decent citizen, who believes in his country, yet has no funds to make a crop, nor to move where he can get work. And, Mr. Chairman, it is not sentiment that moves me to plead in their cause, however that may appeal to me, but it is a matter of business, common sense, and fair play. It has been done in many similar instances throughout the United States.

These people do not want cars, gasoline, nor luxuries—they do not want these things until conditions with them will justify same. They are asking for a fund that will furnish them the real necessities of life until they can make another crop. During the last failures they have been making ties and posts for sale, but now practically all the timber is gone, and there is nothing to aid them with their endeavors to make another crop. They have no assets on which to borrow money except their future crops, and the banks will not take this as security. I am not censuring the banks by any means, for they must meet regulations which do not cover such cases.

In fact, the banker, the individual, and the merchant are in about the same boat. In consequence of the crop failures we have had one bank failure after another and one business failure after another. There were five banks in my home town, and four of them have failed. At one time there was not a bank left in one of the best counties in my district. There have been 209 bank failures in the State of Oklahoma during this distressing period.

This unfavorable condition is largely due to the destructive operation of the boll weevil; but even with those who produced some cotton, they were robbed of a fair price, due largely to an unfavorable forecast of prices on the part of the Department of Agriculture here at Washington, and because of the further fact of the prediction of the ginnings by Secretary Jardine. In Oklahoma alone his guess was over 60,000 bales too high. Such erroneous forecasts and uncalled-for price predictions cost our farmers an enormous sum.

Fellow Members, I believe in every angle of self-reliance; but a real condition exists here, and these people are in dire need of governmental aid. I was reared on a rented farm, and all my people know hardships. There is no phase of farming conditions that I have not had experience with. I am here to tell you that no set of calamity howlers can fool me. I can understand a real condition when I see it. I know these people; I have been with them in town and country; I know the situation exists as I have described it.

Will you meet the situation? If you say "no," they are going to ask where you get the $750,000,000 for the proposed Navy. I have put the proposition up to you.

Mr. LEAVITT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Montana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEAVITT: On page 43, line 17, after the word "act," strike out the figures "1,100,000" and insert in lieu thereof "1,200,000."

Mr. LEAVITT. Mr. Chairman and members of the committee, the purpose of this amendment is to restore to the bill the amount that was approved by the Bureau of the Budget for forest-fire cooperation under the Clarke-McNary Act.

The facts are that the Forest Service in carrying out the purposes of the Clarke-McNary Act having to do with cooperative fire control presented to the Budget an estimate of $1,500,000. In the Budget this was reduced to $1,200,000, and in the committee another $100,000 was removed from the item.

The seriousness of this situation lies in the fact that the national policy which was undertaken under the Clarke-McNary Act of cooperation in protecting the forests from fire, between the Federal Government, the States, and the private owners, can not go ahead according to the purposes of that act and the established national policy if we do not in Congress supply the funds that are required from the standpoint of the Federal Government.

Thirty-three States, beginning in 1926, under the Clarke-McNary Act, have been cooperating in the protection of privately owned and State-owned forests. One new State came in during the fiscal year 1927—Mississippi. Three States are qualifying for the fiscal year 1928, namely, Delaware, Florida, and South Carolina. There are three States remaining which will probably qualify in the fiscal year of 1929—Arkansas, Illinois, and Indiana.

There are areas that are intended for protection under the Clarke-McNary Act totaling 381,000,000 acres. At the present time the area protected under this cooperative plan is 196,000,000 acres, and there are still remaining 185,000,000 acres to be brought in under the plan.

Here is an interesting thing as to the efficiency of the cooperative plan:

In 1926 there were 33,867 fires on these protected areas that burnt over 4,755,000 acres, which is only 2.41 per cent of the areas under these cooperative protective agreements, while on the unprotected area there were 57,926 fires, and they burned over 19,561,000 acres, or 10.6 per cent of the area that had not been protected. That was over four times the percentage of the area on the protected areas.

Under the Clarke-McNary Act the existing authorization is up to $2,500,000 per year, or one-fourth of the cost of protection is to be paid by the Federal Government. The principle behind the Clarke-McNary Act is that 50 per cent of the cost shall be borne by private agencies, 25 per cent shall be borne by the States, and 25 per cent by the Government.

Here is the sad fact about the progress of this work: The job is now less than half done, and negotiations are under way to bring other States within the agreement. Forty-seven per cent of the total necessary annual outlay is all that is available, and from the entire forestry standpoint there is nothing so basic and so necessary as fire protection.

The whole cooperative program halts if the Federal Government halts in its appropriations, as the States and the private agencies are ready to cooperate. I think there must have been some error on the part of the committee in leaving out this increase. It was agreed to by the Budget, although the Budget had decreased the proposal of the Forest Service, which was originally $1,500,000. The Budget decreased it by $300,000, and the committee, without giving any reason in the hearings, has reduced it another $100,000.

Mr. DICKINSON of Iowa. Mr. Chairman, in reference to this cooperative fire control, I will say we have put in very liberal allowances for fire control in various provisions of the bill. This is one of the places where we felt there might be some reduction. We believe if there is a showing that the additional amount will be required, as suggested by the gentleman who just left the floor, there will be ample time for that showing before the Senate. It is my hope that the committee will not see fit to include this amendment at this time.

Mr. ABERNETHY. Will the gentleman yield for a question?

Mr. DICKINSON of Iowa. Yes.

Mr. ABERNETHY. The gentleman in his remarks the other day referred to me as the "blueberry" man from North Carolina, and I am wondering if the blueberry investigation is included in this bill.

Mr. DICKINSON of Iowa. The blueberry investigation is included in the bill and the credit therefore goes to the gentleman from North Carolina.

Mr. ABERNETHY. I understand it will be the continuing policy of the committee to carry on this work?

Mr. DICKINSON of Iowa. Yes.

Mr. BYRNS. As long as they keep the gentleman from North Carolina in Congress.

Mr. ABERNETHY. I thank the gentleman.

Mr. GREEN of Florida. We are interested in that in Florida, too.

Mr. DICKINSON of Iowa. I want to say that the gentleman from Maine was also included in the campaign. So the gentleman from North Carolina is not alone.

Mr. ABERNETHY. But is there enough appropriation to take care of all of us?

Mr. DICKINSON of Iowa. Yes, indeed.

Mr. GREEN of Florida. I would like to know if it takes care of us in Florida, because we have thousands of acres in Florida producing blueberries.

Mr. SINNOTT. Mr. Chairman, the amendment offered by the gentleman from Montana is a very important amendment. It raises the question of whether or not Congress is going to keep faith with the principles announced in the Clarke-McNary Act.

The principles announced in the McNary-Clarke Act, with the policy adopted by the Secretary of Agriculture and the Chief Forester, provides that the State shall put up $3 to the Gov-

ernment's $1. The States have endeavored to do this, and yet we have been unable to get sufficient Government funds appropriated to match State moneys. The Agricultural Department actually needs $1,500,000 in order to cooperate with the States and meet the funds that the States and the organizations in the States have provided for this work.

The $1,500,000 estimate of the Agricultural Department went to the Budget Board. The Budget Board cut it down to $1,200,000, and the Forestry Service felt that they might try to get along with that amount, and yet the committee has cut it down an additional $100,000.

Now, what does that mean to the State of Oregon? Oregon put up this year $240,000—put up by the State and associations interested in preserving timber and the protection from forest fires. The Government ought to put up $80,000 to meet the $240,000 in a ratio of 1 to 3. If this bill is passed with this limitation we will get in our State for forest-fire protection on these lands $44,000, $36,000 less than is necessary and less than the Government's share.

This does not concern Oregon alone, but it concerns every State in the Union that has any timber in it, and I hope the amendment of the gentleman from Montana will be adopted, so that we will keep faith not only with the States, but with the policy adopted by Congress when the McNary-Clarke bill was passed.

Mr. ENGLEBRIGHT. Mr. Chairman, I move to strike out the last word. Mr. Chairman and gentlemen of the committee, there are some 17,000,000 acres of valuable timber lands in the State of California that will be given greatly reduced fire protection if the $100,000 amendment as offered by the gentleman from Montana is not carried. This morning I received the following telegram from the California Forest Protective Association:

Forest-protection funds approved by Bureau of Budget under Clarke-McNary Act are urgently needed. Budget figures have been cut 100,000 by House committee. Hope this amount can be reinstated to figure approved by Budget Bureau. Rainfall deficiencies indicate need for increased forest protection in California this season.

Also, a telegram from M. B. Pratt, state forester of California, as follows:

I urgently request your aid toward reinstatement of 200,000 Clarke-McNary increase.

The State forester of California, the owners of private timber land, and the Federal Government will be greatly hampered if this amount is reduced. I trust the committee will consent to put back in the bill the amount recommended, and, as the gentleman from Oregon says, to keep faith with the States, and especially the States on the Pacific coast.

Mr. LEAVITT. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. LEAVITT. Mr. Chairman, I think the reason for reduction of $100,000 should be stated to the House. I do not believe the committee can present any good reason. This proposal does not pertain to certain Western States alone but to all the States. It has nothing to do with the national forests. It has to do with the timber of the States and privately owned timber land. It goes directly to the question of whether or not this Congress is going to keep faith with the States in its own proposal for the protection of the forests from fire, necessary to the welfare of the entire community.

Mr. GREEN of Florida. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. GREEN of Florida. It probably will be of interest to know that a number of organizations for the preservation of timber lands of the South—in my State in particular—are advocating this additional appropriation; it is not confined to any one or two States but it is indorsed by all the timber people.

Mr. LEAVITT. I wish to place in the RECORD the names of the States that are now cooperating and interested: Maine, Vermont, New Hampshire, Rhode Island, Connecticut, Delaware, Maryland, Ohio, Indiana, Illinois, Virginia, West Virginia, North Carolina, South Carolina, Kentucky, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Oklahoma, Arkansas, Missouri, Michigan, Wisconsin, Minnesota, South Dakota, Montana, Idaho, Washington, Oregon, California, and New Mexico. All of the States except those where there are no great forests. As I said, steps are under way or completed to bring in Delaware, Florida, South Carolina, Arkansas, Illinois, and Indiana.

Mr. GREEN of Florida. Florida is in it now.

Mr. LEAVITT. It is intended to come in in the fiscal year of 1928. Now, the situation is this, that there is only one way the Federal Government can proceed in meeting these obligations, and that is to put adequate funds into this appropriation. It must cooperate with the States. It should not reduce the amount under this cooperative form of fire protection.

There is no other way that it can proceed, and as added areas come in, and added applications are taken on, under our authorization and established policy, we are obliged to go up to two and a half million dollars a year and beyond, if it becomes necessary. All that is being asked in the present amendment for this cooperative plan is $1,200,000, and I call particular attention to the fact that the States and private owners are now meeting their share to the extent of 48½ per cent of the total to which it is intended this may ultimately go, while the Government, which originated the policy, which established a national pledge, is meeting its share only to 37 per cent at the present time. What the committee has proposed now is, instead of giving funds to go on and keep up with the States, that we shall go even below what the Budget is willing to give, and cut off $100,000 rather than give what was intended by the Budget. And the Budget had already cut the Forest Service recommendation by $300,000. And it is the Forest Service only, because they are charged by law with the administration of these cooperative agreements, not because the timber is in the national forests. The Budget already reduced their estimate $300,000, and now the committee cuts off another hundred thousand dollars.

Mr. PEAVEY. Mr. Chairman, will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. PEAVEY. Is it not a fact that the National Government in nearly every State in the Union has repeatedly affirmed and reaffirmed the position in favor of reforestation, and is it not a further fact that this law and the work done under this act along the matter of fire prevention is the most effective reforestation that can be done?

Mr. LEAVITT. The whole forestry program depends primarily upon fire protection. Planting and forest management and every other kind of procedure falls flat without adequate fire protection.

Mr. SINNOTT. And the gentleman's amendment is the Budget recommendation?

Mr. LEAVITT. That is all.

The CHAIRMAN. The time of the gentleman from Montana has expired?

Mr. SCHAFER. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for one minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SCHAFER. If this amendment be agreed to, we will still not have the total amount that the department asked for originally when making its request upon the Budget?

Mr. LEAVITT. We will still be $300,000 below the request.

Mr. SCHAFER. Does the gentleman not think that we ought to offer an amendment to include that $300,000?

Mr. LEAVITT. I think that would be sound policy, yes; but I am not making the offer of the amendment in that form because I can see no reason why anybody interested in any State having any timber in it should refuse to vote for the amendment to restore the figures approved by the Budget.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Montana.

The amendment was agreed to.

The Clerk read as follows:

For insects affecting deciduous fruits, grapes, and nuts, and including research on the Japanese and Asiatic beetles, $319,500.

Mr. HILL of Washington. Mr. Chairman, I move to strike out the last word in order to ask the chairman of the committee a few questions regarding the appropriations on the subject involving the spray residue problem, rather to confirm, I think, what I get from the reading of the appropriation bill and the hearings. Of course, I appreciate the fact that the committee has recognized this problem and that appropriations for it have heretofore been made, and in this bill provision is made to take care of it. But I understand that these appropriations are split up under three bureaus—the Bureau of Plant Industry, the Bureau of Chemistry and Soils, and the Bureau of Entomology. My understanding from this bill is that under the Bureau of Plant Industry there is provided here $14,340, that under the Bureau of Chemistry and Soils there is the sum of $10,000, and under the Bureau of Entomology there is the sum of $10,000, making a total for the study of the spray residue problem in all of its phases under these three bureaus of $34,340. Is my information correct on that?

Mr. SUMMERS of Washington. Mr. Chairman, I think the figures that the gentleman has given are correct. We put in a special amount of about $4,400 to speed up that work, and some other things in connection with the laboratory at Wenatchee.

Mr. HILL of Washington. Does that pathological laboratory come under the Bureau of Chemistry and Soils or under the other bureau?

Mr. SUMMERS of Washington. They have two specialists there, and they come under two bureau heads.

Mr. HILL of Washington. I understand that one is a pathologist?

Mr. SUMMERS of Washington. Yes.

Mr. HILL of Washington. And the other is a physiologist. That is, one has to do with the fruit diseases and the other has to do with the physiological condition of the fruits under certain conditions, the conditions of maturity and the condition of the fruit in handling and storage and transportation, and so forth.

Mr. SUMMERS of Washington. For the information of the gentleman I will say that both were increased because of the great importance and pressing need for the working out of some of the problems that have been costing the fruit men heavily, and there is an increase to take care of studies in precooling, storage, and shipment of fruit. An increase of $19,400 was added for the Wenatchee and Yakima offices. Of course, the freight rate is tied up in the solution of that problem.

Mr. HILL of Washington. Before the gentleman gets away from the other subject, for the current year, under the deficiency appropriation bill passed at this session of Congress, was there not appropriated under these different heads about $30,000 which is now being used in the solution of the problems connected with the industry there relative to spray residue and also to the question of precooling and the handling in transportation and storage?

Mr. SUMMERS of Washington. I have not the figures carried in the deficiency appropriation bill, but that work is being carried on at this time; and we are adding to it so as to speed up the solution of the problems.

Mr. HILL of Washington. Am I correct in the understanding that for the investigation of the handling of fruit in storage and in transportation there is in this bill provided $15,000?

Mr. SUMMERS of Washington. That is correct.

The CHAIRMAN. The time of the gentleman from Washington has expired, and the Clerk will read.

The Clerk read as follows:

For insects affecting forests and including research on the gypsy and brown-tail moths, $185,000.

Mr. ENGLEBRIGHT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ENGLEBRIGHT: Page 49, line 7, strike out "$185,000" and insert "$210,000."

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from California. The gentleman from California is recognized for five minutes.

Mr. ENGLEBRIGHT. Mr. Chairman and gentlemen of the House, the purpose of the amendment that I have just offered is to give an increase of $25,000 over the amount as reported in the bill now before the House.

It has been conservatively estimated by competent authority that at least $30,000 should be made available this year to the Bureau of Entomology over and above the regular appropriation for insects affecting forests. This additional amount is necessary to meet a most critical and urgent need of further and more complete investigation of the pine or the western tree killing bark beetle, which are causing enormous pine timber losses annually. It will provide funds for control and research work, for the purpose of checking and stopping the present startling destruction of pine timber by this insect.

The protection of our forests and timberlands from insects is of scarcely less importance than their protection from fire. The bark beetle is not as spectacular in its destruction of our forests, perhaps, as is fire; but, nevertheless, these insects are destroying annually thousands of acres of the Nation's choicest pine timber forests. In some of the most hazardous fire areas of our national forests the bark beetle is causing as great an annual loss to the timber as fire.

In the extensive and valuable national pine forests and private timberlands of the Western States and the Pacific coast a most serious situation now exists due to the yearly increasing amounts of mature timber killed by the pine or western bark beetle.

Pine or bark beetles are a highly specialized group of insects and are represented by numerous species, none of which exceeds the ordinary house fly in size.

The bark beetle attacks the living trees in swarms of about 2,500 and burrow through the bark into the sap tissue, in which each female excavates winding galleries for the purpose of depositing eggs. In a short period of time these galleries girdle the tree and destroy the sap tissue, resulting in the death of the tree. The eggs hatch within four or five days into small whitish larvæ, which mine at right angles from the primary gallery through the outer layers of the inner bark until they have completed their growth, which requires from about 20 to 30 days. They then bore into the outer corky bark, where they excavate little cells in which to transform themselves, first to the pupa and later to the adult. When the broods of the first generation have thus developed—in about 60 or 70 days—they bore out through the bark and fly to other trees to repeat the process and continue their depredations. They may select trees close at hand or may fly quite a long distance before making a selection. The broods of the beetles hatched late in the summer pass the winter in the outer bark of the trees killed by them the previous summer. The adults of the overwintering broods emerge in May, June, and July, varying with seasons, latitude, and altitude.

There are many striking examples of the destruction caused in the past in the timber areas of the United States by the bark beetle. In 1890–1892 a destructive invasion of the southern-pine beetle extended from the western border of West Virginia, through Maryland and Virginia to the District of Columbia, northward into southern Pennsylvania, and southward into North Carolina. In this area, aggregating 75,000 square miles, a very large percentage of the mature and small trees of the various species of pine and spruce was killed by this beetle.

In many places in West Virginia and Virginia nearly all the pine trees of all sizes on thousands of acres were killed. Since 1902 the bark beetle has been more or less active in the Southern States from Virginia to Texas, and in some localities they have killed a large percentage of the stand. This species is a constant menace to the pine forests of the Southern States. During the periods between 1818 and 1900 there were several outbreaks of the bark beetle in the spruce forests of New York and southern Canada. The bark beetle caused the death of a very large percentage of the mature spruce over an area of thousands of square miles. In the aggregate many billions of feet of the best timber were destroyed. The large areas of this dead timber furnished fuel for devastating forest fires, with the result that in most areas there was a total loss.

The bark beetle has from time to time during the past 50 years caused widespread devastation in the Rocky Mountain region to forests of spruce, in some areas killing from 75 to 90 per cent of the timber of merchantable size.

Another striking example of the destructive powers of the bark beetle is found in the Black Hills National Forest of South Dakota, where in past years a large percentage of the merchantable timber of the entire forest was killed. It is estimated that more than a billion feet of timber was destroyed in this forest as the direct result of the work of the beetle.

In Montana the lodge pole pine has been killed in vast areas by the bark beetle, to the extent that it will require a century to replace it by normal growth. Twenty years ago in one locality in northeastern Oregon in three years' time it is estimated that 90 to 95 per cent of the timber in a dense stand of lodge pole pine covering an area of 100,000 acres was killed by the bark beetle.

The foregoing facts with reference to the destruction of pine and spruce timber by the bark beetle have been taken from the records of the Bureau of Entomology.

Large areas of the most valuable pine-timber forests of the Pacific coast and Western States are now threatened with destruction by the bark beetle. It is in this mature reserve stand of pine timber which for the next few decades will provide the most available supply of high-grade lumber that the losses caused by the bark beetles are now most evident. The stumpage value of pine timber killed in the Western States and the Pacific coast by the bark beetle is now estimated to exceed $15,000,000 annually. This amount, gentlemen of the House, represents only the stumpage value, or the value of the trees standing on the ground. The lumber-value loss annually at only $10 per thousand would exceed $150,000,000. In southern Oregon and northern California, where the bark-beetle menace is positively acute, the Bureau of Entomology advises me that a conservative estimate of the losses to this region for the past year in yellow-pine timber alone killed by the bark beetle will be at least 700,000,000 board feet. This timber has a stumpage value of from $5 to $8 per thousand. Representing a

stumpage loss of from $3,500,000 to $5,600,000, at only $10 per thousand, the lumber-value loss for the past year was from $35,000,000 to $56,000,000. The annual losses for the past few years resulting from bark beetles in California and adjacent timber belt in southern Oregon can best be illustrated by the following tabulations of specific areas where the Bureau of Entomology has conducted accurate surveys. These figures represent yellow pine only and do not take into consideration periodic losses in sugar pine, Jeffrey pine, and fir:

WESTERN PINE BEETLE LOSS

On Happy Camp, lava bed area of Modoc National Forest, Calif., and intermingled private holdings, on approximately 377,000 acres

	Per cent of stand killed	Volume, board feet
1921	0.92	45,990,000
1922	.75	37,381,000
1923	.40	19,760,000
1924	.71	35,590,000
1925	1.09	68,350,000
1926	2.04	115,200,000
1927	3.26	183,900,000
Total	9.17	506,171,000

The present infestation shows a decided increase over that of last year, and in some places has caused a loss of 14 per cent of the stand for the year. This area first came under observation in 1922 and has been examined each year since. These surveys show that starting with 1921 the infestation declined to an endemic stage in 1923, and then, following the dry winters of 1923 and 1924 started to increase, and for each succeeding year practically doubled in volume over that of the previous year. As a result, the losses suffered in 1926 and 1927 were tremendous. The losses in 1927 on six sample plots were sixteen times as great as that for 1923.

MODOC NATIONAL FOREST

The check station (T. 44, R. 53, sec. 36) which has been considered regularly since 1921 has shown a percentage of stand killed as follows:

	Per cent
1921	0.89
1922	1.89
1923	.51
1924	1.75
1925	3.82
1926	5.57
1927 (estimated)	5.57
Total	20.00

Thus 20 per cent of the stand on this section has been killed by beetles during the past seven years. On sections farther north in this unit a much higher percentage of stand has been lost, amounting in some cases to more than 50 per cent.

WESTERN PINE BEETLE LOSS

On Klamath Indian Reservation, Oreg., 315,000 acres Indian Service land and 75,000 acres private land

	Volume, board feet	Per cent of stand killed
1923	21,574,000	0.48
1924	56,070,000	1.24
1925	83,475,000	1.85
1926	119,950,000	2.66
1927	94,520,000	2.12
Total	375,589,000	8.35

During the five-year period just past the accumulated loss over the entire area has been 8.35 per cent of the stand. The losses on the Black Hills unit alone have totaled 14.75 per cent of the stand. On some areas of this unit nearly 50 per cent of the stand has been killed.

WESTERN PINE BEETLE LOSS

In the Klamath Lake regions, including timberlands in southern Oregon and northern California, over an area of 1,200,000 acres

	Volume killed, board feet	Per cent of stand killed
1918	255,500,000	2.00
1919	191,500,000	1.50
1920	123,410,000	.97
1921	119,705,000	[1].94
1922	104,975,000	[1].82
1923	74,426,000	[1].58
1924	129,355,000	[1].01
1925	252,880,000	1.98
1926	278,680,000	2.18
Total in 9 years	1,530,431,000	12.0

[1] Control started. [2] Control stopped.

These losses are occurring in the heart of the yellow-pine district of the Pacific coast. A conservative value of this timber is $5 to $8 per thousand stumpage.

Mr. M. B. Pratt, State forester of California, advises me that probably more valuable timber is now being lost annually in the national forests and private timberlands of the States of Washington, Oregon, and California from bark beetle than by fire. The California Forest Protective Association, in a recent communication to me, stated that last year in Modoc County, Calif., the stumpage value loss in beetle-killed timber exceeded $2,000,000 and that there was over 20,000 acres of bettle-killed trees in the Yosemite National Park.

The private timberland owners and lumber companies of southern Oregon and northern California are making heroic efforts to combat the menace, which not alone has already caused them great financial loss, but in some localities threatens ruin. They can make but little headway in the combat, however, when their holdings are surrounded by thousands of acres of Government infested timber. The manager of the Long Bell Lumber Co., a company operating in northern California, with headquarters at Weed, in communication to me states:

If this little beetle was something that we could get out and have a free-for-all fight with, the game would be easy, but such is not true, hence we really have a big battle on our hands. Wish to advise you that we are cutting this year what is known as timber on Cedar Mountain. Our original estimate of this timber was 70,000,000 board feet. In a recent cruise made as to live timber thereon, we figure that we will be very lucky if we cut 50,000,000 board feet. Intermingled with this timber are certain Government 40-acre tracts that are very badly infested, the Government loss being in line with our loss.

We wish to advise you that our company covering a period of two years has spent approximately $45,000 in cutting down and burning pine trees that had been newly infested with pine beetles, in the hope of controlling further infestation in our timber lands. We found that our work in this connection was helpful, yet it did not perfect the situation. New ways must be found in fighting this pest. Our work was under the direction of the Bureau of Entomology and it met with their approval as to the best known methods at the time.

It will be noted from the foregoing letter that the loss in timber represents a loss of about 30 per cent of the total stand.

There is an important feature in connection with the bark-beetle situation that should not be lost sight of, and that is its direct relation to the increase of the forest-fire hazard. The dying and dead beetle-infested trees in groups form ideal spots for the origin and spreading of crown fires.

Control methods have been devised by the Bureau of Entomology consisting of searching out and cutting the infested trees and then destroying the insect broods by burning or exposure to weather.

When applied at the right seasons, these methods have proved to materially reduce losses. At present these control methods are the only practical means that have been found for the protection of our most valuable timber stands against bark-beetle losses. The theory that killing the broods in a large percentage of the trees will reduce the infestation to just such an extent sounds reasonable. It does not take into consideration, however, the fact that under favorable conditions these insects have extraordinary powers of multiplication and that under these same conditions possibly fewer beetles are required to overcome the resistance of the tree. In some localities fall control work gives better results than spring work. It seems to appear evident that the beetles' ability to increase is conditioned by physiological changes in the trees brought about by deficiency in rainfall or opening of the stand, which allows greater desiccation. In other words, it is dependent on the exact condition of the host. It seems reasonable that the future progress in the application of preventive and control measures is largely dependent on the determination of the relation of the killed trees to the annual increment and on a determination of the conditions responsible for an increase in the beetle population. There is a most urgent need for research work which will provide a better understanding of the natural factors that govern the increase of bark beetle. Such studies should provide the foundation for improvement of control methods and the management of forest areas, with the idea of preventing conditions that favor bark-beetle increase.

The present appropriation bill provides $185,000 for insects affecting forests, including research on gypsy and brown-tail moths. This item is on page 49, lines 6 and 7. The $185,000 is to be expended and allocated as follows:

Gypsy and brown-tail moth research $95,620

This subproject includes investigations leading toward means of artificial control on the gypsy and brown-tail moths in the New England States. It includes the development of more effective and economical sprays and spraying machinery, the

introduction of beneficial parasites and predators which aid in the control of these insects, and studies of the parasites in foreign countries to provide for the importation, colonization, and liberation of these beneficial insects. Heretofore this project has been included under another division of the Bureau of Entomology and for administration reasons has been transferred. It should not in any way be confused with previous forest-insect investigations and is not an increase in appropriations for this work. This same amount of money has been spent for several years under a project known as gypsy-moth control.

Forest-insect investigations $89,380

The balance of the 1929 appropriation—$89,380—is that part of this total appropriation which is used for strictly forest-insect work. It is subdivided into projects as follows:

Insects affecting forest trees $28,090

This money is spent on investigations of insects affecting the growth and management of timber crops in the eastern United States. It includes cooperation with the Forest Service experiment stations in the Lake States, New England States, southern Appalachians, and Gulf coast regions. It also covers general supervision expenditures of the Washington office.

Insects affecting forest products $5,570

This is a general project covering all insects affecting crude and finished forest products. It includes the investigations on such injurious insects as powder-post beetles and termites. The money is practically all spent in eastern United States.

Shade tree and hardy shrub insects $3,890

This consists of the dissemination of advice on the control of insects injurious to shade and ornamental trees.

Cooperative forest insect control $41,930

This includes investigations of the western species of tree-killing bark beetles leading to more effective and more economical methods of control. It also provides for cooperative service to other Federal land-managing bureaus in the control of forest insect epidemics. In recent years this latter form of service has expanded so rapidly that it has been necessary to greatly curtail the research work which has previously been done on these insects. At the present time somewhat over half of this $41,930 will be spent in rendering service to other Federal bureaus.

INCREASE UNDER PROJECT—COOPERATIVE FOREST INSECT CONTROL

The 1929 appropriation bill item of increase of $4,000 is for cooperation with the National Park Service in the control of insect outbreaks. This does not represent an actual increase, since in previous years the National Park Service has transferred a similar amount of money to the Bureau of Entomology to aid in this work. Their appropriation has been reduced by this amount.

The bill also provides $5,810 for cooperative forest insect control, which will be utilized in enlarging this work in the Western States.

The committee report on the bill before the House indicates that the $185,000 for forest insect control includes an increase of $9,810 for this work over last year's appropriation. The $9,810 is made up of the $4,000 item for cooperation of the National Park Service and $5,810 for enlarging the cooperative insect control in the Western States. As has been explained, the $4,000 amount has been transferred from the national park funds, with a similar reduction to the national park appropriations, so that the actual increase for bark-beetle control work is only $5,810. This amount is not sufficient to meet and investigate the present and alarming menace to the western pine forests.

We are expending approximately $15,000,000 annually, including the item for road building, for the protection, control, and development of our national forests; yet we seem to hesitate to make a small appropriation for the purpose of primary importance, that of protecting the life of the trees. As I have already explained to you, the losses in the western pine forests are $150,000,000 annually in lumber value from bark-beetle depredations, and vast areas are now threatened with more complete destruction. I want this House to be advised of this fact, so that adequate appropriations may be made available now and in the future for the purpose of protecting our magnificent pine forests from the rank and insidious cancer from which they are now suffering.

The House should vote the proposed additional $25,000, so as to give the Bureau of Entomology the funds necessary for the research work required on this vital subject. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, there is an increase in the item allowed by the committee of $10,000—$4,000 for work in the national parks and $6,000 for work on the bark beetle in the Rocky Mountains. They have been working under these various paragraphs for many years. We have made the necessary extensions here to extend the work into the new field, and in view of the fact that the findings of the department have been well established by research work in the years gone by, I hope the amendment will be defeated.

Mr. LEAVITT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Montana moves to strike out the last word.

Mr. LEAVITT. Mr. Chairman, I wish to read into the RECORD a telegram which I have received, reading as follows:

TACOMA, WASH., *February 22, 1928.*

Hon. SCOTT LEAVITT,
Member of Congress, Washington, D. C.:

Western Forestry and Conservation Association, representing Federal, State, and private timber ownership in States of Montana, Idaho, Washington, Oregon, and California, to-day in annual meeting, after thoroughly reviewing forest-insect situation, realize that yearly timber losses aggregating millions of dollars have occurred and that such losses are increasing rapidly. Situation demands that more effective insect-control methods be developed. This is a scientific problem and the Bureau of Entomology is in position to solve it, providing adequate funds are appropriated for enlargement of personnel and more intensive study of control methods in western timber. We strongly urge your further valued support of item $30,000 in agricultural bill for forest-insect research.

WESTERN FORESTRY AND CONSERVATION ASSOCIATION.

That came from a meeting of the association at Tacoma, Wash., on the 21st of February.

Now, I wish to say, Mr. Chairman, very little in addition to what the gentleman from California [Mr. ENGLEBRIGHT] has said in regard to the damage by the pine beetle. What he has said is absolutely true. The bark beetle is not as spectacular in its attack on the forest as are the forest fires, but day by day and year by year these bark beetles take their way through the forests until they destroy absolutely thousands upon thousands of acres.

Eradication is costing at the present time, by methods which have been in vogue, up to $4 a thousand feet. Among some of the methods used are the falling of the timber and the limbing and burning. Experiments are under way to take off the limbs and not take off the bark, and other modifications of the plans that have been in effect.

Within the last year or so a very interesting experiment has been under way in the lodge-pole-pine area in Montana. The lodge-pole pine is a small tree. Experiments have been made with the use of an arsenic solution to put into the trees where these insects are harbored, and those experiments have been attended with good results. But it is necessary that there should be adequate funds to determine the value of this method. The belief of the scientists is that if these experiments can be carried out the pine beetle can be checked in his depredations, at a cost of about 25 cents a thousand feet. But there is no provision for meeting the situation in the Southern States and many of the other States where the pine beetle has begun his depredations, and other places where it has been under way for a long time are not provided for.

Some conception of the importance of the work may be gained from just one instance which I wish to give to you. On a 2,000,000-acre area in southern Oregon and northern California, a section of the country I am personally somewhat acquainted with, the control work was under way from 1921 to 1924. It was determined that something over 170,000,000 board feet of timber was killed there annually in the nine-year period of 1918 to 1926.

Mr. SINNOTT. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. SINNOTT. What is the market value of that 170,000,000 board feet of timber?

Mr. LEAVITT. The loss is more than $61,000,000, or an annual loss of about $7,000,000 in that one area, due to the depredations of the pine beetle.

What is being asked in this bill is an adequate fund, the kind of a fund that is asked for by scientists, and not the small and niggardly amount that is given by the Budget and by the committee. Enough money is being asked so that these experiments can be carried forward in the different parts of the country, this situation met and this terrible devastation stopped.

Mr. McMILLAN. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. McMILLAN. Do I understand the gentleman to say that there is no provision in this bill to provide a remedy for the pine beetle in the South?

Mr. LEAVITT. I am taking the statement of the chairman of the committee, in which he just gave the places where

it was intended to use this money, and I heard nothing about work in the South.

Mr. McMILLAN. I might say to the gentleman that this applies equally as well in the South.

Mr. LEAVITT. It certainly does, and the situation there is becoming more severe.

The CHAIRMAN. The time of the gentleman from Montana has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I am in sympathy with these gentlemen from the West, but if every time we received a telegram we should come in and ask for $25,000 the whole Budget system would be busted. That is all. As a matter of fact, we are doing the very line of work the gentleman is suggesting. They are working out a remedy and we are giving them an extra man for further research work. We have been very generous with the various gentlemen who have wanted additional amounts for specific projects. As I say, this research is already going on in the department, and it is my judgment that we have made ample provision for all of the additional research needed. If every time we have a few acres of corn eaten up by the corn borer we should come in here and make another demand for additional money, we would be raiding the Treasury all the time. The fact is that ample funds have been given for this research work, and there is no doubt about that. We are trying to find a scientific remedy to see whether this depredation of the pine beetle can be stopped. When the Government has done that it has done its duty.

Mr. Chairman, I ask for a vote on the amendment, and I hope the amendment will be voted down.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from California.

The amendment was rejected.

Mr. YON. Mr. Chairman, I move to strike out the last word. Mr. Chairman and gentlemen of the committee, I have a little project to offer. The gentleman from North Carolina [Mr. ABERNETHY] is somewhat interested in the same project and it seems the committee has taken care of his little appropriation.

Of course, as you know, as a new Member of the House I am anxious to do something for development of my State. My people are interested in the development of a great section of my State, in the production of a native blueberry. It is very luscious and delightful fruit; it ships well and will mean a great deal to the horticultural life of my section.

I do not rise for the purpose of offering anything that will seem to run over the committee, or anything of that sort, but I just want to get consideration of an amendment to take care of the blueberry in my State.

Of course, you ate some of my fruit at the beginning of the session, that known as the Satsuma orange. We have another fruit we are developing very largely, and that is the native blueberry. It is a fruit we want to propagate, develop the stock, and make it more useful to the people of the country, and let you know how really good it is. People have frequently written to me for literature regarding this fruit, but I have nothing with reference to it. The Department of Agriculture has made no extensive study of it for lack of funds, and there is no information we can give proposed growers of this fruit.

What I want is to add a little appropriation to that made to carry on the work in North Carolina, New Jersey, and Maine, and make it operative in my State. I ask permission, by unanimous consent, to offer an amendment.

Mr. DICKINSON of Iowa. Mr. Chairman, I am sorry, but I am compelled to object.

Mr. YON. I thank the gentleman anyway. [Applause.]

The Clerk read as follows:

For insects affecting cotton and including research on the pink bollworm of cotton, $280,000, of which $10,000 shall be immediately available.

Mr. HASTINGS. Mr. Chairman, I want to invite the attention of the gentleman from Iowa to the $10,000 item in line 12 of page 49. The report of the committee shows this is for boll-weevil demonstration work and is to be used in Oklahoma.

Mr. DICKINSON of Iowa. Yes.

Mr. HASTINGS. I simply want a definite understanding, and I want to ask if the representative of the Department of Agriculture said that the $10,000 would be sufficient for this purpose?

Mr. DICKINSON of Iowa. Yes. We got in touch with the Department of Agriculture by reason of the serious situation that exists in the State of Oklahoma, and they said they could put on the necessary demonstrations down there to demonstrate the remedy for the boll-weevil situation for $10,000. We put in the $10,000, and in our report it is directed to be used in Oklahoma, and the department so understands it.

Mr. HASTINGS. I thank the gentleman.

The Clerk read as follows:

For bee culture, $49,380, together with not to exceed $3,000 of the unexpended balance of the appropriation for this purpose for the fiscal year 1927.

Mr. COLE of Iowa. Mr. Chairman, I move to strike out the last word.

I want to ask the chairman of the subcommittee whether in connection with this item for bee culture, on page 49 of the bill, the additional sum of $20,000 asked for by the United States Bee Laboratory was given any consideration in the subcommittee?

Mr. DICKINSON of Iowa. Oh, yes; we had hearings on it, and this is for establishing a bee station in Louisiana.

Mr. COLE of Iowa. No; this is another item. This is for conducting studies in the food value of honey in Washington, D. C., and through agents in the field.

Mr. DICKINSON of Iowa. We felt the committee could not make the expansion that was asked all along the line in the bee industry. We have several items in the bill for study and also for bee propagation and the establishment of a bee station. The result was we put more money in the bill for bee culture and the study of bee interests and the study of honey as a food than has ever been in the bill before by a considerable amount. The result was we had to eliminate some items.

Mr. COLE of Iowa. This item was not recommended by the Budget?

Mr. DICKINSON of Iowa. No; it was not recommended by the Budget.

Mr. COLE of Iowa. I had intended to offer an amendment on the floor and see if I could not get this item included in the bill, but I am afraid we have not enough "bee" men here.

Mr. DICKINSON of Iowa. In view of the increases that have been made here for this purpose, I hope the gentleman will not offer the amendment.

Mr. COLE of Iowa. If this amendment should be inserted in the Senate, the gentleman's committee, I am sure, will have no particular objection to it.

Mr. DICKINSON of Iowa. We will give it very careful consideration.

Mr. COLE of Iowa. I think, then, our best procedure, I will say to the gentleman from Nebraska [Mr. SIMMONS], who is vitally interested with me in this matter, is to proceed to get this inserted in the Senate and get it through the House in that way. And may I add that I am advocating this appropriation for honey because I believe in the policy of supplying ourselves with more sugar out of our own resources, and honey is a supersugar.

The consumption of sugar in the United States has reached 110 pounds per capita. The total consumption may soon reach 16,000,000,000 pounds, an inconceivable aggregate. With perhaps not more than 6 per cent of the world's population we are consumers of 30 per cent of the world's sugar output.

Instead of developing our own resources we have been content to import nearly two-thirds of our sugars. Consuming, as I have said, 30 per cent of the world's sugar, we produce only 4 per cent of it. If to this continental production we add that of the insular possessions, we still have only 11.5 per cent of the world's production.

Our sugar consumption is so vast that there is more than ample room in the American markets for all the honey we can possibly produce, for all the maple sugar and for all the cane and beet sugar, and if we add to these sugar supplies so much as we can make from corn and, maybe, artichokes for use in certain industries, we shall still have left an ample market for much of the surplus sugar of Cuba.

To promote the development of our own industries I would not hesitate to place an additional tariff on imported sugar. I hope that the maple-sugar interests will get the additional tariff protection for which an application is now pending before the Tariff Commission.

I hope also that the small appropriation that the honey interests are asking for will be granted in connection with this appropriation bill.

If it is objected that the tariff on sugar is a tax, I would reply to that by saying that if it is a tax—which we do not concede—it is the most just and equitable of all our taxes. We need revenues to run the Government. Those that we obtain through a tariff on sugar are equitably distributed. Every man and woman who consumes sugar contributes his or her mite, and the cost of collecting these mites is very small, for it is done through the customhouses.

And rest assured that sugar prices would not go down if the tariff were reduced on sugar. Any material reduction in that tariff would close every beet-sugar factory in the country and

hamper all other sugar activities, including honey. And when the sugar importers have established what would be a virtual monopoly, what would they do with prices? Reduce them or increase them? What did they do a few years ago, when they thought that they were in control? Did we not have 20-cent sugar on a fictitious shortage?

The Clerk read as follows:

For investigating the food habits of North American birds and other animals in relation to agriculture, horticulture, and forestry; for investigations, experiments, and demonstrations in connection with rearing fur-bearing animals; for experiments, demonstrations, and cooperation in destroying mountain lions, wolves, coyotes, bobcats, prairie dogs, gophers, ground squirrels, jack rabbits, and other animals injurious to agriculture, horticulture, forestry, animal husbandry, and wild game; and for the protection of stock and other domestic animals through the suppression of rabies in predatory wild animals, $595,500, together with not to exceed $12,000 of the unexpended balance of the appropriation for this purpose for the fiscal year 1927.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word.

Mr. Chairman and gentlemen, here is a bill that appropriates $133,000,000 to encourage, assist, and promote the welfare of agriculture of the United States. My constituents at home are anxiously awaiting the good work of the department so that they may once more indulge in good American food of juicy roast beef and luscious tender beefsteak.

But can you imagine how gratified the people of New York City and the other cities will be when to-night they go home and read this release of the Department of Agriculture for publication Saturday afternoon, March 3, 1928, which will tell the people of New York City, "Do not worry—no more high cost of living—we are going to furnish your tables now with good, wholesome meat. We are experimenting in the development of the jack rabbit." We ask for juicy steaks and you give us jack rabbits.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. LAGUARDIA. In just a moment.

This is under an appropriation of $15,000. The movement was inaugurated in great pomp and form in the State of California at Fontana, where they celebrated with a large banquet and ball. They had the real exhibits there of jack rabbits in various forms of development. [Laughter.]

Great work! If a city Member even moves to strike out the last word in this bill, it is resented.

I have an amendment right now that I am going to offer at the proper place where the consumer is going to ask for a look-in on all this cooperation and marketing that we are appropriating for. I will tell you agriculturists—and I have said this before—you have simply got to cooperate with us, because some day the people who are paying this $133,000,000 are going to stand up and put up a real kick.

Mr. SCHAFER. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. Do not the constituents of the gentleman ever eat jack rabbits? [Laughter.]

Mr. LAGUARDIA. Give us steak.

Mr. SCHAFER. I notice a great many of your French citizens do.

Mr. LAGUARDIA. We are asking for steak.

Mr. STRONG of Kansas. Will the gentleman yield?

Mr. LAGUARDIA. I will come to the gentleman in a moment.

Mr. STRONG of Kansas. The gentleman is after the "jack," not the rabbit.

Mr. LAGUARDIA. That is what you farmers are trying to get.

Mr. STRONG of Kansas. Yes.

Mr. LAGUARDIA. But God help the poor farmers if you do not put up a better showing than you have been putting up. You have been fussing over an agricultural relief bill and you do not know what it is all about. You brought in here a bill that you could not agree on amongst yourselves and you do not know now what you want.

Mr. STRONG of Kansas. Talk to the Committee on Agriculture; do not talk to me. We want a little of the "jack," and that is what we have been after for a long time.

Mr. LAGUARDIA. If you had any sense you would get it, because we are paying the prices. [Applause.]

Mr. STRONG of Kansas. If we had your sense, we would get the "jack."

Mr. LAGUARDIA. We are paying the prices, but the poor farmer is not getting them. This bill carries $133,000,000, and I will tell you right now that consumers expect to get some consideration.

I will keep my amendment until the proper time to offer it, and in the meantime I congratulate the committee on their successful "jack-rabbit" experiment.

The Clerk read as follows:

Total, Bureau of Public Roads, $440,880, of which amount not to exceed $200,000 may be expended for personal services in the District of Columbia.

Mr. PEAVEY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment offered by Mr. PEAVEY: Following line 12, on page 55 of H. R. 11577, insert the following:

"The Secretary of Agriculture is authorized to enter into contracts or to secure options to purchase explosives or materials for explosives for distribution for agricultural, land-clearing, and road-building purposes at not more than cost, plus a minimum administration charge. The Secretary of Agriculture is authorized to take over from any governmental department or establishment explosives or components for explosives, and to prepare and distribute such explosives for the above purposes in the same manner as heretofore. Any governmental department or establishment is authorized to transfer explosives or components for explosives to the Secretary of Agriculture when same are available as surplus. The Secretary of Agriculture is authorized to use not to exceed $25,000 of the administrative fund provided by the Federal aid road act of July, 1916, as amended, for supervising the preparation, distribution, and use of explosives as herein contemplated, and said fund shall be reimbursed by a plus charge over the contract cost to be paid by the user. In the same manner, any administrative expenses incurred by agricultural colleges or other agencies acting as agents of the Secretary of Agriculture in the distribution of explosives to individuals within the States shall be reimbursed by adding to the contract price an amount determined by the Secretary of Agriculture to be a fair cost for this service."

Mr. DICKINSON of Iowa. To that, Mr. Chairman, I reserve a point of order.

Mr. PEAVEY. Mr. Chairman, I would like to say to the members of the committee at this time that this amendment does not contemplate any expenditure of money. It does contemplate a small revolving fund of $25,000. It is offered as an amendment, and the letters which will appear in the RECORD at the end of this speech will show that there was no opportunity to present it to the committee when the committee was holding its hearing.

I want to say that this is asking the House to reinsert in the agricultural appropriation bill this year almost the identical service that the Government has been carrying on for the past eight years. It is contemplated to carry on the service in practically the same manner as carried on heretofore.

I will explain the difference between the two propositions. In 1920 under an act of Congress the Bureau of Public Roads in the Department of Agriculture had distributed to the agricultural sections surplus war explosives for blasting stumps. The cost of the explosives was returned to the Government by the users. These explosives were recartridged and made usable for the purpose by contract between the Government and the du Pont Co.

I have been informed that there are gentleman who have reserved a point of order against my amendment, but I feel that the gentlemen will concede that this proposal to discontinue this needed and worthy Government service of distributing explosives to the settlers in the cut-over areas has been done by the direction and design of the War Department.

These explosives are no longer available owing to the fact that in the second session of the Sixty-ninth Congress the War Department asked permission hereafter to trade in all deteriorated and surplus explosives to be credited on new explosives, and therefore there is now no available explosives for the War Department to distribute through the Agricultural Department.

Mr. Chairman, the action of the War Department in seeking to stop this distribution of explosives to the settlers of States like Wisconsin, Minnesota, and Michigan is, in my own opinion, the most high-handed and inconsiderate misuse of authority conferred by Congress that any bureau of the Government has ever perpetrated.

These farmers of the cut-over timberland areas are poor, but they are good citizens, and as such they contribute much to the prosperity and development of this country. They pay taxes, they contribute in payment of direct Federal revenue, but they contribute far more by the payment of indirect taxes. They pay freely and honestly their full share in whatever amount it be that goes to support the Government and from which several hundred million dollars is annually appropriated to maintain the War Department.

The distrust and resentment bred by such injustice on the part of the War Department, which is dependent upon these people at least partially, will be readily recognized by everyone interested in the internal welfare of our country. When bureaucrats in charge of governmental departments at Washington, to gratify personal whims or their own convenience and desires, contrive to draft their own appropriation bills so as to deprive a million or two of poor settlers of a much needed and inexpensive Government service it would seem about time that Congress did something to curb this misuse of arbitrary power.

Until such a time this amendment will provide a small revolving fund to carry on the supervision of the work of distribution through the Agricultural Department to the several States.

This same distribution will be made in this manner: The Government will contract with the du Ponts or some other large explosive company to furnish suitable explosives, and these new explosives will be furnished to the users at cost in the same manner that the explosives were distributed heretofore.

Mr. Chairman, I want to say further that if there be reference to the point of order against my amendment on the ground that it puts the Government in business that, had I my own way in the matter, I would eliminate this question entirely by having the Government appropriate sufficient money from the Public Treasury to distribute these explosives to the settlers "free." The Government is now giving millions annually to different irrigation reclamation projects all over the West and to large drainage projects in the South. Why should not the Government aid and encourage the reclamation of the cut-over timber or stump lands in northern Wisconsin, Minnesota, and Michigan by furnishing the explosives actually necessary to blow the stumps on each 80 or 160 acres for farm use?

Now, in the limited time I am given I want to explain the vital importance from the standpoint of the people affected. This will benefit the States of Wisconsin, Michigan, Minnesota, Washington, Missouri, and some other States. They are the principal users of explosives for that purpose. Let me call attention to the people that have been affected and that are affected.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CARSS. Mr. Chairman, I ask that the gentleman have three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PEAVEY. Mr. Chairman, I might say to the gentlemen of the committee that these people are for the most part poor people. They emigrated from cities to the country to build themselves homes. They live under the most straightened circumstances. It is well-nigh impossible for these settlers to accumulate a sufficient amount of money with which to pay for explosives to clear more land on which to support their livestock and their families.

These settlers are the last of the Nation's pioneers; they live in the wilderness. They suffer all the privations and hardships of the frontier. They have to build their own roads and schools. Wolves prey on their stock, and the wild deer eat their gardens. Surely the Government could well afford to match the courage and hardihood of these backwoods settlers, their wives, and children by supplying the explosives necessary to blast the stumps to reclaim a home. No one will deny that the Government, as a matter of sound policy, should give more to help and aid these settlers in securing explosives than it does to users of stamped envelopes in lots of 500 to 100,000, which it is now furnishing at cost through the Government Post Office Department. It furnishes this service "free" to those who could easily survive without aid. Then why not help those who need it to build homes and develop the cut-over areas of the United States.

If this service, which has been carried on for eight years, is stopped, it means that thousands of these people now trying to carve out homes from these cut-over lands will be forced to quit and the country will be the loser thereby.

To reclaim even a 20 or 40 acre farm home from among the stumps and brush is a disheartening task, requiring 5 to 20 long, hard years of labor. Thousands of courageous home builders have undertaken it and failed, not because they were not industrious, frugal, and persevering but because it was a human impossibility to feed and clothe a wife and children, pay an occasional doctor bill, and save any actual cash with which to purchase explosives to clear more land. Many a brave father, with the natural love of the American man for a home, has bravely started out, with the result that here and there all over the cut-over sections of Wisconsin, Minnesota, and Michigan the traveler sees to-day the mute evidence of blasted hopes of what might have easily become a good farm home had the Government furnished to the man the explosives necessary to remove the stumps left as a result of exploitation of the timberlands of the great Northwest States under Government contract.

Five to fifteen dollars per acre expended for explosives by the Government in reclaiming these rich agricultural lands would not be a gift nor would it be a charity, but, on the contrary, would be the best investment in the reclamation of agricultural land ever made by the United States. Every acre of these lands so cleared and reclaimed will produce in new wealth each year two or three times what the explosives necessary to clear it would cost. Once reclaimed, it is reclaimed forever, without one cent necessary for maintenance or support.

There is another reason why this amendment should be adopted, Mr. Chairman. Furnishing cheap explosives to the farmers in the cut-over timber sections is a just and indirect method of voting "farm relief" to the Wheat and Corn Belts.

We raise cows, sheep, chickens, potatoes, and fruit. We feed clover and alfalfa hay, but we buy much of our ground feed, cracked corn, bran, and shorts, and all our flour from the wheat and corn States. So, Mr. Chairman, when you lend aid and assistance to the northern settlers in the cut-over timber areas you not only help him directly, but indirectly you give relief to the Corn and Wheat Belt farmers, enabling our people to buy their surplus grain. On best figures obtainable the people of my congressional district last year purchased more than $1,000,000 worth of corn and wheat products.

Therefore, I hope that the members of this committee will see fit to insert this provision in the bill so that this service may be continued as it has been in the past.

Mr. BROWNE. Mr. Chairman, will the gentleman yield?

Mr. PEAVEY. Yes.

Mr. BROWNE. In what year was this appropriation dropped?

Mr. PEAVEY. This appropriation has not yet been dropped. It is now being carried forward in 1928, but it is not carried in this bill.

Mr. BROWNE. It was provided for in the last bill?

Mr. PEAVEY. Yes; and in the years previous to that.

Mr. Chairman, under the permission granted me to extend my remarks, I submit the following letters:

FEBRUARY 21, 1928.

Secretary WILLIAM M. JARDINE,

Department of Agriculture, Washington, D. C.

MY DEAR MR. SECRETARY: Through the public press and other notices the people of my district and the entire Northwest have been notified that the distribution of surplus war explosives (sodotol, pyrotol, etc.) would be discontinued.

To the depressing and distressing conditions now confronting the farmers of the Northwest, and particularly the small, partially developed, cut-over farm owners of north Wisconsin, Minnesota, and Michigan, this action on the part of the Government is a most severe blow. In fact, I do not hesitate to say to you, Mr. Secretary, as a matter of personal knowledge, that it will mean the abandonment of many new homes in the cut-over sections of America. For the past five or six years these new settlers have found it most difficult to make a living and keep their farms, but, more than any one thing, the action of the Government in distributing the cheap explosives with which to clear the land, to feed the stock, and support their families encouraged them to "hang on." Faced with the necessity of buying high-priced explosives at retail prices will not only cause untold misery and discouragement to these settlers, but will cause thousands of them to give up the struggle.

I have been in communication with Maj. Gen. C. C. Williams, Chief of Ordnance, who informs me that under Act 318, Sixty-ninth Congress, secured by the War Department, this distribution of explosives has been discontinued at the request and upon the advice of the War Department.

I am writing this letter, Mr. Secretary, to ask your opinion and also if you would be willing to include in your appropriation request from Congress a sum sufficient to purchase deteriorated explosives at a reduced price from the War Department, together with such sum as would be necessary to cover the cost of distribution in your department?

If you do not care to indorse a complete undertaking, as I have suggested above, would you sanction appropriation by Congress of about $100,000, a sum sufficient to cover the cost of distribution in your department, including the purchase at wholesale of the cheapest explosives obtainable by the Government and the distribution of this explosive at cost to the settlers in the same manner that you have distributed pyrotol and sodotol in the past?

Permit me, Mr. Secretary, to again assert that such a course on the part of the Government would act as actual and positive relief to these settlers, who now have insufficient cleared land with which to support their livestock and thereby their families. I appeal to you in their name that this Government service of distributing surplus war explosives suitable for land clearing be not stopped by the Government

without some substitute or similar service to take its place, for such a course on the part of the Government will mean that many of these poor, cut-over land settlers will be "starved out."

I will appreciate your answer and any suggestions you may care to offer relative to the solution of this problem.

Yours very truly, ——— ———.

(This letter remained unanswered at date of printing.)

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PUBLIC ROADS,
Washington, D. C., October 5, 1927.

Hon. H. H. PEAVEY,
Washburn, Wis.

MY DEAR MR. PEAVEY: Receipt is acknowledged of your letter of October 1 inquiring with regard to the prospects for future distribution of surplus war explosives to farmers.

From present indications the distribution of these explosives will cease some time next spring, owing to the fact that the stock of smokeless powder which forms the basis of pyrotol will by that time become exhausted. Our agreement with Wisconsin this year contemplates the distribution of 1,200,000 pounds in that State. Of this, we already have received orders for 965,200 pounds. It is expected that the entire amount will have been shipped not later than March 31, and the cooperative agreement with the College of Agriculture, University of Wisconsin, expires on that date.

So far as now known, there will be no further distribution of explosives for agricultural use after pyrotol is exhausted.

Very truly yours,

S. H. MCCRORY,
Acting Chief of Bureau.

DECEMBER 12, 1927.

Hon. FRANK JAMES,
Chairman Committee on Military Affairs,
House Office Building, Washington, D. C.

DEAR SIR: For some years past the Departments of the Interior and Agriculture have been distributing, through the different State agricultural departments, sodotol, pyrotol, and other surplus Government war explosives suitable for blasting stumps in land clearing.

Through notices inserted in the public press of Wisconsin and other States information is given that this service is to be discontinued next March, 1928, for the reason that the supply will be exhausted by that time.

Under the present distressing conditions prevailing among the settlers in the cut-over timberland sections of Wisconsin, Michigan, and Minnesota, it will be utterly impossible for 99 per cent of these small farmers to buy high-priced dynamite for stump blowing. This, in fact, means that there will be no more land cleared to speak of in those areas and thousands of poor people with insufficient cleared acreage to support their families and their stock will be forced to leave the land to move to some city to seek a livelihood.

It occurred to me that yourself or your honorable committee would be in a position to know or find out if the United States Government in some of its ammunition dumps did not have powder unfit for military purposes which might be transferred or converted to the Bureau of Agriculture for this purpose.

I earnestly solicit this information, as well as any recommendations or suggestions that you might care to offer, to the end that this valuable and almost necessary Government service to the people living in the cut-over land areas may be continued.

I beg to remain,

Very respectfully yours,

——— ———.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., December 13, 1927.

Hon. HUBERT PEAVEY,
Room 49, House Office Building, Washington, D. C.

MY DEAR HUBERT: I am in receipt of your letter of December 12, and will see what can be done in this matter and write you again.

With best personal regards, I am,

Very truly yours,

W. FRANK JAMES.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., December 16, 1927.

Hon. HUBERT PEAVEY,
Room 490, House Office Building, Washington, D. C.

MY DEAR HUBERT: As per my letter of December 13, I have looked into the matter contained in your letter of December 12, and beg to inclose a letter from Maj. Gen. C. C. Williams, Chief of Ordnance.

With best personal regards, I am,

Very truly yours,

W. FRANK JAMES.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ORDNANCE,
Washington, December 14, 1927.

Hon. W. FRANK JAMES,
Chairman Military Affairs Committee,
United States House of Representatives, Washington, D. C.

MY DEAR MR. JAMES: In response to the accompanying letter of Mr. PEAVEY, I would call your attention to the first paragraph of Chapter IV of the act making appropriations for the support of the Army for the fiscal year ending June 30, 1920, approved July 11, 1919. Under the authority of this law millions of dollars' worth of smokeless powder, T. N. T., and other explosives were transferred to the Agricultural Department, and it is understood that much was used in the manufacture of agricultural explosives.

Since, however, the enactment of the law, Public Act 318, Sixty-ninth Congress, this practice has been discontinued and such ammunition and components as became deteriorated are now being exchanged for new components under the authority of this act. This exchange of deteriorated ammunition for new ammunition is vitally neessary as a measure of economy in maintaining the war reserve of ammunition and components.

It is regretted, therefore, that we are unable to comply with request contained in Mr. PEAVEY'S letter.

Very sincerely yours,

C. C. WILLIAMS,
Major General, Chief of Ordnance.

Mr. CARSS. Mr. Chairman, I want to add a word to what has been said by the gentleman from Wisconsin [Mr. PEAVEY]. The northern part of Minnesota, extending along the Canadian border, contains many thousand acres of these cut-over lands. Our people have gone out on those lands, as the gentleman says. They are poor people. They go out there with virtually nothing but their bare hands, and they are trying to carve out little homes for themselves in the wilderness. They find that the best agency for the clearing of land is high explosives. They have tried other methods, but there is nothing so cheap or so effective as these high explosives. In the past we have taken a lot of surplus war materials, such as picric acid and T. N. T., and worked it over and produced a material equal to about 40 per cent dynamite. These people have been using that. Instead of taking this material out and throwing it into the ocean, as was at one time proposed, we have been able to clear thousands of acres of land with it. They have just gotten nicely started on this work, and I hope the committee will see fit to approve the amendment of the gentleman from Wisconsin. It may be subject to the point of order, but I would like to see the amendment prevail.

Mr. DICKINSON of Iowa. Mr. Chairman, in the former bills there was an arrangement whereby there was an exchange between the War Department of surplus deteriorated war explosives and the Department of Agriculture. Legislation was passed that did away with that, and now the War Department is trading in their deteriorated explosives for new explosives. Therefore there is no longer a supply available. The amendment offered by the gentleman from Wisconsin will create a revolving fund and put the Government in business in a way that I think is very ill advised. I therefore make the point of order.

The CHAIRMAN. Does the gentleman from Wisconsin desire to be heard on the point of order?

Mr. SCHAFER. It will not put the Government in business as much as the so-called McNary-Haugen bill will, will it?

Mr. DICKINSON of Iowa. I do not care to discuss that.

Mr. PEAVEY. Does the gentleman say that there is no longer any available supply of surplus war explosives in any department of the Government?

Mr. DICKINSON of Iowa. I did not say that, but under the law there is a way by which they trade in old explosives for new explosives. Therefore, they are not available as in prior years.

Mr. PEAVEY. That pertains only to the War Department.

Mr. DICKINSON of Iowa. There is no other department that has surplus war explosives.

Mr. PEAVEY. Does not the Navy Department?

Mr. MADDEN. Oh, no; I do not think the Navy Department has.

The CHAIRMAN. Can the gentleman from Wisconsin cite the Chair to any permanent law in answer to the point of order?

Mr. PEAVEY. Mr. Chairman, I can not at this time cite any existing law, but will call the Chair's attention to the exact precedent of the Bureau of Public Printing, wherein they purchase by contract printed envelopes and sell them through Government post offices. The authority for this service is contained in the Post Office Department's appropriation bill and is much more objectionable from the standpoint of the Government's entry into business than the service of distributing

explosives. I say frankly that I do not consider myself competent to argue a question of parliamentary rules with the gentleman in charge of the subcommittee.

Mr. MADDEN. The gentleman will admit that it is a change of law, will he not?

Mr. PEAVEY. I think not.

The CHAIRMAN. As the Chair understands the matter, if this interchange has been previously made it has been because of a provision in some appropriation bill and was applicable only to the year when the exchange was made. It is not permanent law. Unless the gentleman from Wisconsin can cite some permanent law authorizing such an exchange, the Chair will be constrained to sustain the point of order. The Chair will be glad to hear from the gentleman from Wisconsin.

Mr. PEAVEY. I do not see myself any great difference from the standpoint of legislation in this respect that in each case the Government is contracting probably with the same company for the same service.

Mr. MADDEN. Oh, not at all.

Mr. DICKINSON of Iowa. Let me suggest that formerly there was Government property which was in the hands of the Government which was declared deteriorated for the purpose for which the Government used it. The War Department transferred that property to another department of the Government, which can be done under the provisions of the former appropriation bill, and that was distributed through this agency of Government property; but now your Government property is gone; you do not have this surplus material. This provision would permit you to go out and make a contract whereby the Government practically buys it and creates a revolving fund and resells it to the individual, which ought not to be done.

Mr. PEAVEY. Under the past laws affecting this Government surplus, if the gentleman will inquire, I believe he willl find that the contract was made by the Government at about 6 or 7 cents a pound, for which the Government furnished about 15 or 20 per cent of the components that went into that explosive, and the du Pont Co. furnished all the rest.

The CHAIRMAN. The Chair desires to call the gentleman's attention to the fact that his amendment would authorize the Secretary of Agriculture to enter into contracts and secure advice and purchase explosives. Surely that is legislation, provided there is no citation of permanent law, and the Chair, having not received such citation, will sustain the point of order. The Clerk will read.

The Clerk read as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing, handling, utilization, grading, transportation, and distributing of farm and nonmanufactured food products and the purchasing of farm supplies, including the demonstration and promotion of the use of uniform standards of classification of American farm products throughout the world, including scientific and technical research into American-grown cotton and its by-products and their present and potential uses, including new and additional commercial and scientific uses for cotton and its by-products, and for collecting and disseminating information on the adjustment of production to probable demand for the different farm and animal products, independently and in cooperation with other branches of the department, State agencies, purchasing and consuming organizations, and persons engaged in the marketing, handling, utilization, grading, transportation, and distributing of farm and food products, and for investigation of the economic costs of retail marketing of meat and meat products, $715,000: *Provided*, That practical forms of the grades recommended or promulgated by the Secretary for wool and mohair may be sold under such rules and regulations as he may prescribe, and the receipts therefrom deposited in the Treasury to the credit of miscellaneous receipts.

Mr. COLTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Utah moves to strike out the last word. The gentleman is recognized for five minutes.

Mr. COLTON. I do this, Mr. Chairman, for the purpose of asking the chairman of the subcommittee a question. There has been a great deal of complaint among the growers of lambs, particularly, against the practice of the department in forecasting and predicting prices. As I understand the language of this bill now, the department would not be authorized under the language of the bill to make such predictions and forecasts.

Mr. DICKINSON of Iowa. The language as it is in the bill would permit it, as I understand it, to collect and disseminate information; it would permit them probably to make general forecasts; but it would not permit them to specifically say that the price would be up or down, but simply give information indicating the price trend.

Mr. COLTON. I am glad to hear the gentleman say that. The department is doing a wonderful amount of good in disseminating information as to the probable crop conditions——

Mr. DICKINSON of Iowa. Forecast and outlook work——

Mr. COLTON. Yes; regarding the production of lambs and wool. But in the past it has frequently gone further than that, and predicted the lowering or the raising of prices. Sometimes they have been right, and sometimes they have been wrong; but in most cases their prediction has had a bad effect. Those who buy these products, particularly lambs, go out among the growers and use these statements to bear down the prices. I understand from the chairman of the subcommittee that this practice will not be followed in the future.

Mr. DICKINSON of Iowa. Yes.

Mr. BLACK of Texas. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. BLACK of Texas. I think the gentleman is correct when he says the department is doing very valuable work in making statements concerning production, distribution, and demand, and things of that kind, but when it goes into the field of prophecy and undertakes to say what the trend of price will be, the result in the long run will be that it will destroy the confidence of the producers. The ability of the department to aid the producers will be thereby seriously interfered with.

Mr. COLTON. I think the gentleman is right. The thing against which we are complaining is that they go out and predict prices, and that is a thing which the people do not want. I am glad that the department is not authorized to do that under this language.

Mr. MADDEN. Mr. Chairman, I am not going to take up much of the time of the committee. I want to say that the Bureau of Agricultural Economics, when it collects and disseminates information as to crops, does a good work. It may say what it thinks proper about the wisdom of increasing or diminishing the acreage of crops in certain lines. It gives information, then, from which the marketing associations or anybody else might properly be able to reach a conclusion as to what the probable price of the various commodities might be.

But just let us suppose for a minute that we put the Government of the United States into the field of telling what the price of given commodities is to be. Suppose that what it says about it turns out to be wrong. Do you not see what an opportunity there is for the people to whom the information is given to feel that the Government has invaded a field which does not belong to it?

What is the agency through which the Government is to disseminate this information as to probable prices? The Chief of the Bureau of Agricultural Economics. Who is he? He is a subordinate who obtained his place through the civil service. He may have scientific knowledge of the subject in connection with which his employment is given by the Government, but when he gives out the information that is proposed or suggested in what my friend from Utah [Mr. COLTON] has talked about, he is understood to be the Government of the United States. The people of the United States do not realize that he is merely a subordinate; that he speaks as the Government, however, without having any governmental authority whatever, and he binds the Government to the accuracy or inaccuracy of the statements he makes, and nobody but the Chief of the Bureau of Agricultural Economics knows that it is only the Bureau of Agricultural Economics that has spoken. Everybody who reads the story accepts the statement of the Chief of the Bureau of Agricultural Economics as the statement of the Government of the United States, and will assume at once that the great Government of the United States has put the stamp of its approval on the prediction of a prospective price of any commodity in agriculture. It is absurd. It is a thing that would be inexcusable to grant any such authority anywhere in the Government. Not even the President of the United States ought to be granted any such authority as that. And surely we should be too wise and too considerate of the public interests to place in the hands of any man the power to bind the Government in making the mistake of either putting the predicted price too high or too low.

And who knows who the Chief of the Bureau of Agricultural Economics in the Department of Agriculture is, or will be tomorrow? Who knows what incentive might be employed to influence him in making predictions one way or another? Who knows how far we can go to trust him? Whence does he come? Where does he acquire his knowledge or experience? Who can tell that what he says or what he is about to say is worth any more than the opinion of any other man? And yet in the face of that situation he might overwhelm every man engaged in

agriculture in the United States with a statement in the name of the Government of the United States that this is going to happen or that is not.

Mr. SANDLIN. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SANDLIN. I will ask the gentleman from Illinois whether it is not a fact that had the original language stayed in this bill and had not been stricken out by the committee that that agency of the department would have had the authority to do the very thing against which the gentleman is now protesting.

Mr. MADDEN. That is true.

The CHAIRMAN. The time of the gentleman from Illinois has expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

Amendment offered by Mr. LAGUARDIA: On page 56, line 13, after the word "world," insert "including a daily price list of farm products paid to farmers or producers, such price list to be widely diffused and published for the information of consumers in all cities having a population of over 500,000 inhabitants."

Mr. DICKINSON of Iowa. Mr. Chairman, I make a point of order against this amendment.

The CHAIRMAN. Will the gentleman state his point of order?

Mr. DICKINSON of Iowa. The point of order is that it is legislation extending the services of the bureau in a way that is not provided in the authorization for the giving out of information. It is asking the bureau to do an impossible thing for the reason that there is no way by which the price paid to the farmer for farm products at the location of the farm may be determined by the department.

Mr. LAGUARDIA. Mr. Chairman, if this amendment is out of order, then the whole paragraph is out of order. If it is impossible for the bureau to obtain this information, then all the information that this bureau is giving out is likewise impossible.

Mr. DICKINSON of Iowa. That is the conclusion of the gentleman from New York.

Mr. LAGUARDIA. No; it is the gentleman's conclusion, not mine. He made it and I do not accept it. The function of the Bureau of Home Economics is the giving out of information for which this very paragraph provides, namely:

for acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing, utilization, grading, transportation, and distributing of farm and nonmanufactured food products.

It also includes scientific and technical research, and among other things it includes cooperation with other branches of the department, State agencies, purchasing, and consuming organizations. The very purpose, Mr. Chairman, of this bureau is to give this kind of information, and my amendment calls not for an estimate but for prices heretofore paid, an accomplished fact. It is limiting the information and it is not as broad as the general purpose of this paragraph.

The CHAIRMAN. The amendment offered by the gentleman from New York provides:

including a daily price list of farm products paid to farmers or producers, such price list to be widely diffused and published for the information of consumers in all cities having a population of over 500,000 inhabitants.

The Chair would like to ask the gentleman from Iowa, before ruling, whether he considers his point of order in any way dependent upon the language of the amendment relative to the provision providing that a price list be furnished?

Mr. DICKINSON of Iowa. That was the exact part of the amendment against which I proposed the point of order.

The CHAIRMAN. Against the furnishing of the price list?

Mr. DICKINSON of Iowa. Yes. I could extend the point of order by saying it is a discriminatory provision for the reason that it limits this distribution to certain localities of certain population.

The CHAIRMAN. The Chair does not consider that the latter part of the gentleman's point of order is well taken, but is somewhat uncertain as to whether or not the language of the law would permit the method which the gentleman from New York desires to establish, namely, the distribution of a daily price list.

Mr. LAGUARDIA. It is just information.

The CHAIRMAN. But it specifies the manner of the distribution of the information.

Mr. LAGUARDIA. The whole paragraph does that.

The CHAIRMAN. So far as the remainder of the paragraph is concerned, of course, any opportunity to make a point of order against it has expired. It is too late, because the matter has been discussed. It was not made when the paragraph was read, so that is not involved.

Mr. LAGUARDIA. But an amendment germane to this paragraph is involved.

The CHAIRMAN. Certainly. The language of the organic act with reference to the establishment of the Department of Agriculture reads as follows:

The general design and duties of which shall be to acquire and diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word.

In view of that very broad language, the Chair is disposed to overrule the point of order. The question is on agreeing to the amendment offered by the gentleman from New York.

Mr. LAGUARDIA. Mr. Chairman, I desire to be heard on the amendment.

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. LAGUARDIA. Mr. Chairman, New York City, with its 6,000,000 people and paying 70 per cent of the taxes, apologizes for taking five minutes on this bill.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. LAGUARDIA. I can not yield now.

Mr. CHINDBLOM. Does the gentleman from New York mean to say that with 6,000,000 people in New York it pays 70 per cent of the taxes?

Mr. LAGUARDIA. New York State does.

Mr. BEGG. If the gentleman will permit, New York State does not pay anywhere near 70 per cent.

Mr. MADDEN. It is about 25 per cent.

Mr. LAGUARDIA. Yes; against the whole country.

Mr. MADDEN. Is not that what we are dealing with—the whole country?

Mr. LAGUARDIA. Mr. Chairman, I do not want this taken out of my time.

The CHAIRMAN. If the gentleman yielded it will be taken out of his time.

Mr. LAGUARDIA. I do not yield, Mr. Chairman.

Mr. MADDEN. May I ask if the gentleman will yield to me?

Mr. LAGUARDIA. I can not yield now, Mr. Chairman.

All we are asking is this: You representatives of the farmers have been complaining that you do not know the spread between the price the consumers pay and the price you are getting. Now, unless you are "dog robbing" for the middlemen, unless you are trying to double-cross the farmer, you ought to go with us on this amendment. [Laughter and applause.] Unless you are for the stock-ticker fellow that we are fighting in my city, there is no reason why the information as to prices paid to farmers and producers for their product—not guesses like you had on cotton, but past performances as to what has been done—should not be made known to the people of the cities by this Bureau of Home Economics.

The reason I mention cities of 500,000 inhabitants is this: The smaller cities are in the midst of farming districts and are in a position to obtain the information, and they know about it. But take a city like New York, Boston, Philadelphia, or Chicago; we do not know. The tenement-house dwellers of my district do not know, and there is this combination of the stock gambler, of the middleman, of the manipulator, and of the commission merchant, with whom we do not want to have anything in common, and what we are seeking to establish is this contact between producers and consumers.

Mr. BEGG. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. BEGG. I would like to ask the gentleman a question in respect of his statement. Is the gentleman seeking to get the price of dressed meat; that is, what the retailer paid for that dressed meat, or does the gentleman want the price of the live animal?

Mr. LAGUARDIA. I want it made known how much the farmer who is digging his potatoes is getting for them.

Mr. SIMMONS. He is not getting very much.

Mr. LAGUARDIA. The gentleman from Nebraska [Mr. SIMMONS] is keeping house here in Washington and the gentleman knows the prices he is paying for potatoes here.

Mr. BEGG. Is it not a fact that every daily in every city in the land, big and little, to-day carries the prices of all commodities and of all kinds of livestock?

Mr. LAGUARDIA. Yes.

Mr. BEGG. Then what is the gentleman going to accomplish by his amendment?

Mr. LAGUARDIA. But is it not the fact that the farmers are not getting those prices?

Mr. BEGG. That does not enter into it. I want to know what kind of information the amendment of the gentleman is going to furnish.

Mr. LAGUARDIA. I want the actual information. I do not want the gambler's prices or the stock-ticker prices. The farmer does not get those prices and he never has got them.

Mr. BEGG. Yes; he does, in the main.

Mr. LAGUARDIA. We are appropriating here $715,000 and this bureau has its agents out in the field. Let them find out how much the farmers are getting for their products and let them broadcast that information.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SUMMERS of Washington. I am very much interested in the gentleman's amendment and I can give the gentleman a very simple formula, which is this: Every time the consumer pays $3 for an article, if he will say that the producer gets $1 of that he will have it worked out about right.

Mr. LAGUARDIA. This amendment will bring out that very forcibly.

Mr. CARSS. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. CARSS. The best figures we can give the consumer in the city is that he is paying $1 for 26 cents' worth of farm products; in other words, the farmer is getting 26 cents for one dollar's worth of products.

Mr. LAGUARDIA. Why not bring out those facts?

Mr. CARSS. I am in favor of bringing them out and finding out what the farmer actually receives.

Mr. LAGUARDIA. Yes.

The CHAIRMAN. The time of the gentleman from New York has expired.

The question is on the amendment offered by the gentleman from New York [Mr. LAGUARDIA].

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were—ayes 10, noes 39.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, under the ruling made by the Speaker the other day, I ask unanimous consent to revise my figures on the amount of taxes paid.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRONG of Kansas. Mr. Chairman, I move to strike out the last word.

Just a few minutes ago the gentleman from New York [Mr. LAGUARDIA] said that those who were fighting for farm legislation and had been fighting for it for a long time "did not have sense enough" to prepare it or to get it through Congress, and that he was going to introduce an amendment shortly that would enable the people of the great city of New York to get these products at somewhere near what the farmer is paid. So I have been waiting until the amendment was proposed to see how far the gentleman got with his effort.

I wonder if it ever occurred to the gentleman that perhaps these high-powered brains they have in the city might endeavor to get the price the farmer receives instead of charging the farmer with not having any sense because he does not get the price that the city man pays. The farmer does not control the markets. The farmer does not control the commission men or the transportation facilities. They are mostly owned by our city brethren.

It seems to me if it is a matter of brains, the city men ought to be able to get the things that they consume somewhere near the price the farmer is paid for them. We produce and sell the food that the gentleman from New York eats; for instance, a perfectly good beefsteak for 15 cents a pound. Is it our fault or are we to be charged with lack of brains because the gentleman pays 75 cents a pound for it? It does seem to me that the gentlemen of the cities ought to help us solve this problem, and yet when we come in with a bill for agricultural relief and the roll is called, what do we find? We find the Representatives from agricultural districts all voting for the legislation, while the gentlemen from the city districts generally vote against it.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. STRONG of Kansas. I will be very glad to.

Mr. HOWARD of Oklahoma. May I not suggest that the gentlemen from the cities, with all their brains, might help us some if they would assist in reducing freight rates on what the farmer produces?

Mr. STRONG of Kansas. I will suggest to my friend from New York, who has been of help to us in agricultural legislation, that if it is a matter of brains, that these gentlemen who control the avenues through which we must sell our product should help us to give the farmers a better price for their products.

Mr. LAGUARDIA. Mr. Chairman——

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close at the end of five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa? The Chair hears none.

Mr. STRONG of Kansas. Reserving the right to object, I do not think it is fair to let the gentleman from New York with all the brains have all the time, but I withdraw my objection. [Laughter.]

Mr. LAGUARDIA. Mr. Chairman, I hope the gentleman from Kansas will not charge the gentleman from New York with the responsibility for something that nature has attended to. [Laughter.]

Mr. STRONG of Kansas. I am glad the gentleman admits it.

Mr. LAGUARDIA. Mr. Chairman, I want to make it very clear that my amendment sought to do the very thing that the gentleman from Kansas so well expressed. All right; assume that all the stock manipulators and gamblers and commission merchants are in the cities. You had an opportunity not five minutes ago to line up against them by voting for my amendment but you did not do it. Let the record show right now that the majority of Members on the floor at the time my amendment was offered are from agricultural districts, and yet they stood upon a division and voted to prevent the people in the cities, the consumers, finding out how much their constituents are getting for the products we buy.

I have nothing to apologize for in offering the amendment I did. But the gentleman from Kansas will read and reread the statement he made. He will have to avail himself of the ruling by the Speaker and fix up his remarks or he will have to do some explaining if he does not.

Mr. STRONG of Kansas. I expect to let my remarks stand.

Mr. LAGUARDIA. Well, the gentleman better sleep over it.

Mr. STRONG of Kansas. All right. I sleep pretty good; farmers always sleep well.

Mr. LAGUARDIA. The gentleman from Kansas lined up with the other Representatives of the farming districts to prevent the consumers from getting the information as to what the farmers are getting for their products. If the gentleman can sleep soundly after that, again I say "God help the farmer."

Mr. SCHAFER. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. I have no doubt that the gentleman's amendment would have carried if we had been able to force a roll call. I do not see how any farmer Representative could vote against the amendment.

Mr. LAGUARDIA. I agree with the gentleman. Unfortunately we can not have a roll call in Committee of the Whole when an amendment is voted down. I tried once to amend the rules in that respect, but failed.

Mr. SCHAFER. I want to give the gentleman this thought, that the fact that his amendment was not adopted is not evidence that Members of the House are opposed to it.

Mr. LAGUARDIA. I voted for the agricultural bill, and in all likelihood I will do it again. What I am trying to do is to give the consumers the opportunity of cooperating with the sincere representatives of the farmers in bringing about a closer unity between the consumers and the producers so that they can conduct a campaign of education and put the political farmer out of business as well as the speculating and gambling stock-ticker exploiters. [Applause.]

The Clerk read as follows:

To enable the Secretary of Agriculture to carry into effect the act entitled "An act to fix standards for Climax baskets for grapes and other fruits and vegetables, and to fix standards for baskets and other containers for small fruits, berries, and vegetables, and for other purposes," approved August 31, 1916, and the act entitled "An act to prevent the destruction or dumping, without good and sufficient cause therefor, of farm produce received in interstate commerce by commission merchants and others and to require them truly and correctly to account for all farm produce received by them," approved March 3, 1927, including the purchase of such perishable farm products as may be necessary for detection of violations of the latter act: *Provided*, That all receipts from the sale of such products shall be credited to this appropriation, and shall be reexpendable therefrom, and including the employment of such persons and means as the Secretary of Agriculture may deem necessary in the city of Washington and elsewhere, $30,000.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word, and I ask unanimous consent to speak out of order.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to speak out of order. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, the Gibson committee has developed the most remarkable situation here in Washington which you can imagine. The enforcement of the law is primarily in the hands of the President of the United States. But it is not enforced. So far as enforcement of prohibition is concerned in the District of Columbia, it is left in the hands of the district attorney's office. We had before us the assistant district attorney, who is in charge of the remarkable situation that I presented to you yesterday, where the owner of a specially built liquor-transporting truck testified before the district attorney, and before our committee, that he was running a truck with a secret compartment between various towns in Pennsylvania and the city of Washington, bringing in as much as one hundred and twenty 5-gallon cans of intoxicating liquor at one trip; that he had the truck specially made with a secret compartment for that purpose; that he had brought in load after load since last summer. And he gave the names and addresses of the three bootleggers who employed him to do it. Your assistant district attorney admitted this morning that he had offered immunity to these three bootleggers who are having this liquor brought in, and that it was under the direction of District Attorney Peyton Gordon that he offered them immunity if they would talk, his purpose being to get the one policeman who hijacked their liquor, when, as a matter of fact, the district attorney knows that the three bootleggers themselves know of the hijacking only from hearsay, while the district attorney and his assistant have the sworn statements of other witnesses who were present at the hijacking and who have definitely identified the main hijacking policeman.

He was willing, and he said that the district attorney, Hon. Peyton Gordon, whose name is now up before another body for confirmation as a judge on the bench, offered immunity to these bootleggers if they would "squeal" on this policeman, and they refused. And that is the only reason now that they have not immunity. If they had accepted his offer they would be immune from all punishment. There has been brought to our attention by some substantial leading citizen of this District that out here on the northeast corner of East Capitol Street and Fifth Street, at what is known as Simms's Delicatessen, there is liquor sold there regularly, and that your superintendent of police has been there at night many times to drink with Simms, the proprietor. That was testified to before us under oath this morning by a substantial citizen of Washington. And that the man Simms in his drunken revelry from time to time has boasted to our witness that not a policeman will arrest him, because he drinks with the superintendent of police. We have had brought to our attention by substantial citizens of this District that at 1004 Twentieth Street NW. there is an open saloon, running day and night, that anybody but a policeman can get whisky there whenever he wants it; that at 2500 G Street NW. there is another one open, where you can get whisky whenever you want it; that at Twenty-seventh and K Streets NW. there is another one running in open violation of the law; and that right across the street from a police station at 2035 K Street NW. there is another one, where officers in the police station can look across and see what is going on, and that that open saloon has been going on there for months and months.

Who is responsible for it? Ah, you can not tell me that the responsible officers of this Government are asleep to this situation. I call on the President of the United States to tell these commissioners here that if they do not put a stop to it, he is going to remove them, and to call on the superintendent of the police and tell him that if he does not hold every one of the 1,348 policemen responsible for what goes on on their beats he is going to remove everyone of them.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. DICKINSON of Iowa. Mr. Chairman, we are very anxious to finish this bill this afternoon.

Mr. BLANTON. But I have let the gentleman proceed all day long without taking a moment of time. This is most important.

Mr. DICKINSON of Iowa. But will it not keep until Monday?

Mr. BLANTON. It involves enforcement of the law. I only want five minutes more.

Mr. DICKINSON of Iowa. Make it two minutes, and I shall not object.

Mr. BLANTON. No; five minutes. This is all the time that I have asked.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLANTON. I am calling on your President and mine to do what the Constitution says he should do, and to do what I saw him and heard him hold up his hand to high heaven, and say he would do, and that is, to enforce the law of this land.

Talk about your enforcement officers that your superintendent of police has put in charge of prohibition enforcement! The majority of them drink regularly, and are frequently drunk. I call attention to the evidence that very substantial citizens of the District have brought before us in this respect. One of your policemen in the ninth precinct, Officer Stepp, until he was put in charge of this prohibition enforcement, was hard up all of the time, borrowing money, a quarter at a time, from his colleagues. Now he has a fine $2,000 automobile, and recently we have been informed he made a trip up north and bought $3,000 worth of silver fox hides and brought them back to Washington. Prohibition enforcement here in the District for a police officer is quite a remunerative job. And we had one of your bondsmen here in the District, a man who bonds criminals, come before our committee and testify to-day that after this hijacking proceeding, when the three bootleggers came to him and told him about being hijacked out of $3,100 worth of intoxicating liquors by a policeman, he told them they ought to squawk and put the policeman in jail, and they were going to squawk, but a friend of that policeman got him around there with these bootleggers between 10 and 11 o'clock at night, in this bondsman's office in the basement of a building down here, and the hijacking policeman agreed to turn their liquor back, and they have not squawked on him, and he did turn the liquor back.

Is this going on with impunity here within a stone's throw of the Nation's Capitol? I call on the President, as the chief law enforcer, to see to it, first, that there is somebody qualified and determined put in this district attorney's office to enforce the law. Do you know who this present assistant district attorney is? He admitted that he did not get his license to practice until October, 1923, and he was made a clerk in January, 1924. He said he had never tried a case in his life, and then, after being clerk a while, Peyton Gordon made him chief enforcer of the law in his district attorney's office at $3,000 per year—a poor, green, young lawyer that has no ability and no experience around the courthouse at all.

Mr. LaGUARDIA. What office did he hold?

Mr. BLANTON. He is an assistant district attorney, and probably when the other body confirms his chief as a judge he may be made district attorney. I do not know. I want to tell you something. If I were in charge of enforcement of the law of this District, I could enforce it and stop these violations in a week. I would tell every one of those 1,348 policemen, "I am going to hold you responsible for what goes on on your beat, and if you let a single thing go on there that is against the law, I am going to have you put off the force." That is the way that I would talk to them.

The President can enforce the law if he wants to. He does not want to do it. No; I will take that back; he does want to do it, but as long as he has got a "wet"—as long as he has a man of the great financial standing and influence of Andrew W. Mellon—at the head of law enforcement on prohibition, he will never get it, because he is not strong enough. That is all I have to say. I thank you, Mr. Chairman. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

COMPLETION OF WOOL WORK

To enable the Bureau of Agricultural Economics to complete the work of the domestic wool section of the War Industries Board and to enforce Government regulations for handling the wool clip of 1918 as established by the wool division of said board, pursuant to the Executive order dated December 31, 1918, transferring such work to the said bureau, $8,000, and to continue, as far as practicable, the distribution among the growers of the wool clip of 1918 of all sums heretofore or hereafter collected or recovered with or without suit by the Government from all persons, firms, or corporations which handled any part of the wool clip of 1918.

Mr. BYRNS. Mr. Chairman, I move to strike out the paragraph beginning on line 14, page 62, and ending with line 2 on page 63.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Amendment offered by Mr. BYRNS: Beginning on page 62, line 14, and ending with line 2 on page 63, strike out the entire paragraph.

Mr. BYRNS. Mr. Chairman, in view of the action of the committee, and particularly of the subcommittee, to the attention of some of whom this particular appropriation has been called, I suppose I would be unduly optimistic if I should expect this motion to prevail. But I at least want to call the attention of the House to the situation that exists with reference to this appropriation.

This is an illustration, to my mind, of what you all know to be a fact, that once you make an appropriation and put employees on the roll, it is very difficult to get them off.

Back in 1918 the Government came to the conclusion that there might possibly be a shortage in wool for the use of the Government, and the War Industries Board established certain regulations in regard to wool. In those regulations was a provision fixing the profits for wool dealers, country dealers, and also central dealers. The wool dealers who had made a profit in excess of the amount named in this regulation were required to pay the excess back to the Government for distribution when possible among the woolgrowers. Some $700,000—probably $750,000—has been collected. About $450,000 of that has been distributed, and the officials of the Government state that the other $300,000 is in the Treasury and will probably remain there, subject to the disposition of Congress. I take it that in the very nature of things the small or individual woolgrower has never received and never will receive a refund, for he can not be located. It is estimated that there is about $700,000 to be collected.

The money that has been collected has been paid in voluntarily, but there are some 32 dealers—large dealers, I take it—who have refused to pay, insisting that these regulations were invalid, and that the War Industries Board had no right to make such regulations. Suits have been brought, as I understand, against all of those dealers.

I am not here protesting against those suits, but what I am here protesting against is the delay in the final determination of those suits. Congress has appropriated $144,000 up to date for this wool distribution, and the amount in this bill would carry the appropriation to beyond $150,000. Those suits, most of them if not all of them, have been pending four or five years. There is no reason in the world why a conclusion should not have been reached, the cases carried to the Supreme Court, and a final determination had as to whether or not the War Industries Board had the right to impose this penalty or make this regulation, because if the Supreme Court should decide that these regulations were valid, of course, all those suits would go against the defendants, and they will be compelled to pay back the money in excess of the profits allowed.

Now, what has happened? Down in my own city one or two dealers have been sued. Their attorney tells me that at every term of court for several years back the Government attorney has asked the court to continue the case on the ground that some suit in some other jurisdiction will shortly be carried to the Supreme Court and the matter determined finally, and, of course, the determination in the Supreme Court one way or the other would settle that case.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. BYRNS. Yes.

Mr. MORGAN. Is it not a fact that the district court in Baltimore ruled that the Government was without authority to make the collections of the amount due?

Mr. BYRNS. That is true.

Mr. MORGAN. And is it not a fact also that that question was taken up with the Solicitor of the Department of Agriculture ancillary to the Supreme Court, and the Supreme Court in October decided that it would not be adjudicated?

Mr. BYRNS. That was the case of the United States against McFarland, to which the gentleman from Ohio refers. That case was decided against the Government by the district court. The Government then appealed the case to the circuit court of appeals, and the circuit court of appeals affirmed the judgment of the lower court, holding that those regulations were invalid. Thereupon the Government attorney sued out a writ of certiorari and brought the case to the Supreme Court.

If my information is correct, while he set out in his petition for certiorari objections to the action of the circuit court of appeals in holding these regulations invalid, in the brief he filed he did not stress them, and I am informed that the Government attorney made an oral statement to the court, in which he said that inasmuch as the Government had not in its written brief relied upon these regulations, he understood, under the rules of the court, that it had, in fact, waived any objection to the opinion of the circuit court of appeals in holding them invalid.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BYRNS. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. BYRNS. Thereupon the Supreme Court, having nothing before it but a question of fact, dismissed the petition for certiorari and, of course, the case went back to its former status and these particular defendants have been relieved.

Now, the trouble about it is this: There was an opportunity for the wool section of the Agricultural Department to have secured a ruling with reference to these regulations, and if the Supreme Court had affirmed the circuit court of appeals then, of course, these 32 cases would have been thrown out of court. On the other hand, if the Supreme Court had sustained these regulations these 32 defendants would have been required to have paid in the money claimed by the Government. It is charged by those interested in these matters, charged by the defendants in these cases and their attorneys, that the very reason why the Government attorneys did not insist upon the Supreme Court settling the question of law then and there was because if it had been done these regulations would have been declared invalid and it would not have been necessary to carry this appropriation from year to year. And the fact that the Government attorneys by their own act failed to get a decision from the Supreme Court on the question of law involved bears out the contention.

Mr. MORGAN. Will the gentleman yield?

Mr. BYRNS. Yes.

Mr. MORGAN. In view of the decision by the court, does not this matter now rest with the Attorney General's department to prosecute the cases?

Mr. BYRNS. Exactly. I am glad the gentleman asked that. I am not seeking to have these cases dismissed. If these defendants owe this money I want it paid. These cases are being handled by the United States district attorneys and not by an accountant and auditor in the Agricultural Department, and the Department of Justice can take them on to the Supreme Court and have them finally adjudicated.

Mr. MORGAN. Will the gentleman yield further?

Mr. BYRNS. Yes.

Mr. MORGAN. Is it not also a fact that all of the accounts in connection with this transaction, or the 1918 cases and prior transactions, have been audited?

Mr. BYRNS. That is my understanding, I will say to the gentleman, and, therefore, it seems to me here is an opportunity to save at least $8,000 in this bill and put one or two or three men, as the case may be, off the Government roll. I hope this amendment will prevail.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BYRNS. Yes.

Mr. CHINDBLOM. If the gentleman's motion prevails, are there any funds available to the Agricultural Department for handling this matter? Can they do anything?

Mr. BYRNS. These funds, according to these hearings, are used to pay an accountant and auditor. That is what Mr. Tenney said in his statement to the committee. Of course, if that statement is correct, there would not be any money for the auditor and accountant. As the gentleman from Ohio says, these claims have all been audited and the only question now is a legal question, and this can be and is being handled through the Department of Justice. There is no excuse for continuing these particular employees on the pay roll.

Mr. MORGAN. And it rests wholly upon a legal question, does it not?

Mr. BYRNS. It does. Why, if it had been really desired to bring these cases to a conclusion, an agreed state of facts could have been submitted to the court and the legal question determined long ago. That policy has not been pursued because a final determination would have made this appropriation no longer necessary and would have taken some gentlemen off the pay roll of the Government. There is no excuse for this delay. Let me quote from a letter which I received from Mr. Louis Leftwich, a highly reputable and very prominent attorney of Nashville, Tenn. He says, among other things:

Since I spoke to you last summer I have been informed that another wool case was tried in the United States District Court for the Northern District of New York. This case was styled "United States of America v. S. E. Avery." I am inclosing you a copy of the opinion of the

district judge, who held these regulations invalid and granted the defendant's motion for a directed verdict.

You will also recall that I told you about the case of United States *v.* W. A. McFarland and J. Norris McFarland, trading as Henry Marcus & Son. This case was decided against the Government by the district court, and on appeal to the Circuit Court of Appeals for the Fourth Circuit was affirmed by that court. The case is reported in fifteenth Federal (2d), 823. The circuit court of appeals had the question squarely before it of the validity of the regulations and held them invalid. The Government took the case to the Supreme Court on a petition for writ of certiorari and claimed that the circuit court of appeals erred in holding that:

(1) The War Industries Board was without authority to make the regulations limiting profits.

(2) The regulations had not been ratified by Congress.

(3) The respondents had not agreed to pay over the excess profits to the Government.

(4) The Government was seeking to recover a penalty.

(5) In failing to hold that the respondents were estopped to deny the validity of the regulations.

In the brief filed in behalf of the Government in the Supreme Court it did not argue the first and second of these alleged errors, and in the oral argument counsel for the Government stated that he understood that under the rules of the Supreme Court he was deemed to have waived these alleged errors. This being so, the Government had only its contract theory to argue and fell back on what was really a question of fact, and this had been decided against the Government in the lower court. In other words, the Government, it seems to me, in order not to have an opinion from the Supreme Court on the merits of the case, waived these questions; and there being no question of law before the Supreme Court, it entered an order revoking the certiorari granted by it.

It is very apparent to me that this stand on the part of the Government was taken in order that it might not be precluded from trying numerous cases scattered all over the country because, I think, beyond a question, that the Supreme Court would have sustained the circuit court of appeals if it had been in position to decide the case on its merits. Of course, the longer these people who are in charge of the work attempting to collect these profits can keep these cases in the courts, the more salary they will draw; and if Congress will appropriate money to carry this work on at every session, I suppose that an effort will be made to keep these cases in court indefinitely. As I have stated before, in every case that has been tried the district courts have held these regulations invalid and dismissed the Government's suit.

The Avery case, to which I have called your attention, was just recently tried in the United States Circuit Court of New York, and Judge Cooper, in a very elaborate opinion, a copy of which you will find inclosed, held the regulations invalid.

There is no reason in the world for this little bureau being maintained at a cost to the Government. The Government has already spent about $120,000 in these appropriations, and certainly after the lapse of seven or eight years there can be no valid argument presented to the Appropriations Committee to continue this bureau and this work. To do so would be to continue to harrass these wool dealers who have been hauled into court and can not get a trial.

In the cases I represent in Nashville we have been requested by counsel representing the Government to continue the case each time the docket is called, the ground for continuance being that a case is on its way to the Supreme Court, and that a final decision there will, of course, settle the question. The Government had a chance to get a final decision in the Marcus case, above mentioned, to take the position that I have above outlined. The Government did get a decision by the circuit court of appeals, which, of course, if not binding, is slightly persuasive.

Let me quote from another letter from a Chicago concern, which finds itself in a position where it can not secure a final determination of its case, and is being subjected to large expense by reason of the failure of the Government to bring some one of these cases to a final determination:

What we wish to bring to your attention is that we have for six years been harassed and annoyed by the Bureau of Markets in connection with a claim that had no basis in fact and under regulations which the United States circuit court of appeals holds has no basis in law. We quote from the synopsis of the decision of the United States circuit court of appeals in United States *v.* McFarland (15 Fed. Rep. (2d) p. 827), as follows:

"Regulations of War Industries Board organized by Council of National Defense created under act, August 29, 1916, section 2, forbidding more than 4 per cent profit by wool dealers held unauthorized under Constitution or statutes.

"Agricultural appropriation bill for 1920 and subsequent appropriation acts authorizing appropriation for Bureau of Markets to collect and distribute excess profits made by wool dealers held not ratification of regulations of War Industries Board limiting profits.

"One can not by agreement subject himself to payment of penalty for something he may hereafter do.

"Congress may not ratify imposition of penalty after the act to be penalized has been committed."

The Bureau of Markets applied to the United States Supreme Court for writ of certiorari to determine, first, whether the regulations were lawful, and, second, whether the appropriations constituted a ratification. The writ was granted, and on the argument the Government abandoned these two propositions, and thereupon the United States Supreme Court revoked the writ of certiorari and dismissed the case.

We do not feel that the Congress of the United States should continue to appropriate money for the prosecution of claims against business houses under regulations which have been decided to be invalid, especially in view of the fact that the regulations, although invalid, were, as the United States circuit court of appeals has said, substantially followed and achieved all that was hoped for them. We have, like the others engaged in the wool business, been harassed and put to unending expense through the activities of the Bureau of Markets for a period of over seven years; Congress has appropriated for and given the greatest latitude to the Bureau of Markets in the matter, and yet the net result is a decision that the regulations which it attempts to enforce are invalid. We do not feel that this industry should be subjected to further persecution.

What I am insisting on is that these cases should be brought to a final determination and not delayed merely to pay salaries in the Agricultural Department, for which Congress up to this time has appropriated over $150,000, not taking into consideration the costs to the Department of Justice, which is really prosecuting the cases in the various courts. There can be no excuse for this long delay.

Mr. DICKINSON of Iowa. Mr. Chairman, the gentleman from Tennessee has made quite a complete statement of the history of this litigation; but the minute you deny this appropriation you might as well dismiss these cases. The 32 cases that are now in court are the ones involving the big fellows, who employed good enough lawyers that they think they are going to get out of this, and if they can get these cases out of the hands of the Department of Agriculture it is their hope that they will be able to dismiss the litigation so that they can go in and get a verdict for their men and for their clients, and then there will not be any more litigation.

As a matter of fact, the Government and the department went along fine, and they had Federal court after Federal court holding that the wool contracts were valid. All at once they landed in the circuit court over here at Baltimore, and that Federal judge held that the wool contract was invalid and that therefore the Government was not entitled to recover.

We have already recovered by agreement some $700,000, and we have also recovered in a number of suits before Federal judges a number of verdicts where the amounts were paid in full.

The purpose of this item in the bill is to continue the same machinery and to take this before another Federal judge. As I say, the Government has gone through several of these cases and has recovered judgments in Federal courts, a number of judges having held that these wool contracts were valid. When they landed in the Federal court in Baltimore that judge held that the contract was invalid. Then they appealed to the circuit court, and the circuit court said, in review, that the contract was invalid, and on certiorari the case was carried to the Supreme Court. But the Government found that the record in that case was not the one on which they wanted to complete their argument before the Supreme Court. Therefore they want this appropriation to make a test case on their part, if you please, and to carry one of these contracts to the Supreme Court, and they will select the suit on which the appeal is to be made.

Mr. BYRNS. Will the gentleman yield?

Mr. DICKINSON of Iowa. Let me suggest this before I yield to the gentleman: Not a single, solitary, verdict has been appealed from on the part of the defendants where the judges have held in favor of the Government, but it was when this Federal court in Baltimore held it was invalid in that particular suit that they took it up on certiorari, and the Government, as the gentleman has said, did not press the suit in the matter of the findings on the merits and on the validity of the contract.

If we have spent $130,000 and have collected over $700,000, and if there is $400,000 yet involved and what we want is to test the validity of this contract in the Supreme Court in a case that we want to prepare, then I am wondering if we had not better include this little item in the bill in order to complete the program.

Mr. BYRNS. Will the gentleman yield?

Mr. DICKINSON of Iowa. I yield to the gentleman.

Mr. BYRNS. Of course, the same legal question is involved in all of these cases. I am not protesting against the suits. What I am protesting against is this delay upon the part of the Government in bringing some of these cases to trial and in

keeping these cases in court against the wishes of the defendants and their attorneys. I know that three years ago I raised this same question on the floor of the House. It was then said that it would be settled during the next year, and yet every year we come along with a new appropriation, and this year the gentleman has increased the appropriation by $5,000 over what it was last year.

Mr. DICKINSON of Iowa. Let me say in reply to the gentleman that every lawyer in this House knows that where you have the same question involved in similar suits, there is only one thing to do, and that is to wait until you get to the end of your journey on your contest suit. The Supreme Court did not pass on the merits of this contract, and if you gentlemen refuse this appropriation you are going to disorganize the program of collection so that the big fellows, the men who ought to pay the Government and have not paid it, are going to escape the litigation and get their suits dismissed.

Mr. HASTINGS. How much is involved in these suits?

Mr. DICKINSON of Iowa. Four hundred thousand dollars.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The amendment was rejected.

The Clerk read as follows:

Total, Bureau of Agricultural Economics, $5,548,280, of which amount not to exceed $2,024,700 may be expended for personal services in the District of Columbia.

Mr. LOZIER. Mr. Chairman, I move to strike out the last word.

I shall speak briefly, because I realize the hour is late and it is important to conclude the reading and vote on this bill this evening.

The gentleman from New York [Mr. LAGUARDIA] called attention to the fact that this agricultural appropriation bill carries $132,000,000. Of this amount the sum of $71,000,000 is to be expended on highways, and while the "good roads" activities of the Federal Government are carried on through the Department of Agriculture, the expenditure of public funds for highways should not be charged against the Department of Agriculture alone, because all vocations and lines of business get the benefit of the outlay for good roads. After deducting the $71,000,000 item carried in the pending bill for the construction of highways, we find that the bill provides an appropriation of approximately $61,000,000 for the activities which relate exclusively to agriculture, which I am sure, all will agree, is a very modest expenditure by the Government in the interest of this great basic industry. I am quite sure the gentleman did not mean to criticize the amount of the appropriation carried by this bill, nor would he desire to circumscribe the activities of the Department of Agriculture. I do not believe any Member of this House would vote to reduce these appropriations or to cripple in any way the useful activities carried on by this branch of our Government.

These appropriations are to support activities which have grown up since the establishment of the Department of Agriculture under the first administration of Mr. Cleveland. These activities represent the growth of this great department under the supervision of the nine Secretaries of Agriculture—Norman J. Coleman, of Missouri; Jeremiah M. Rusk, of Wisconsin; J. Sterling Morton, of Nebraska; James Wilson, of Iowa; David F. Houston, of Missouri; E. T. Meredith, of Iowa; Henry C. Wallace, of Iowa; Howard M. Gore, of West Virginia; and William M. Jardine, of Kansas.

Iowa produced 3 of these Secretaries of Agriculture; Missouri, 2; Nebraska, 1; Wisconsin, 1; Kansas, 1; and West Virginia, 1.

Later, if I can find the time, I will extend and revise my remarks, and call attention to the achievements of these men and the great growth of this governmental agency, but at the present time I can not refrain from paying a tribute to Henry C. Wallace, whom I consider one of the greatest, if not the greatest, Secretaries of Agriculture. He was not of my political faith, but for 20 years I followed him with ever-increasing interest and confidence. I regularly read Wallace's Farmer, the great agricultural paper of which he was the able editor. I read his speeches and writings, and I want to testify that the American farmer never had a firmer, truer, more loyal, more devoted, more intelligent, or more aggressive friend than Henry C. Wallace. He had a brain that clearly comprehended the legislative and economic handicaps under which the American farmer staggers. He had a heart that beat in sympathy with the heart throbs of the millions of men and women who, in their humble environment and under exceedingly discouraging conditions, produce the food that satisfies the hunger of mankind. And he had at all times the courage to speak his convictions. As Secretary of Agriculture, he never deviated a hair's breadth from what he conceived to be his duty to the American farmers, although he was surrounded by timeservers and those who spoke the language of special privilege. In his death American agriculture lost its ablest advocate and most influential and aggressive champion. I rejoice that his fight for agriculture is being carried on by his family and business associates. If agriculture had a few more crusaders like Henry C. Wallace and a few more newspapers like Wallace's Farmer, it might escape the disaster that now confronts it. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

The Clerk read as follows:

For the control and prevention of spread of the pink bollworm, including the establishment of such cotton-free areas as may be necessary to stamp out any infestation, the erection and repair of necessary inspection stations, and for necessary surveys and control operations in Mexico in cooperation with the Mexican Government or local Mexican authorities, $687,800, of which $200,000 shall be immediately available: *Provided*, That the cost of each such station shall not exceed $500, and that the total amount expended for such stations in one year shall not exceed $2,500: *Provided further*, That not to exceed $200,000 may be available for reimbursement to cotton-growing States for expenses incurred by them in connection with losses due to enforced nonproduction of cotton in certain zones in the manner and upon the terms and conditions set forth in Senate Joint Resolution 72, approved August 9, 1921: *Provided further*, That no part of the money herein appropriated shall be used to pay the cost or value of crops or other property injured or destroyed.

Mr. BUCHANAN. Mr. Chairman, under the agreement by which the House passed joint resolution this appropriation was to be reduced $200,000. So I move that the figures "$687,800" be stricken out and "$487,800" be inserted; and on page 66, after the comma, strike out the words "of which $200,000 shall be imediately available."

The Clerk read as follows:

Page 66, line 16, strike out the figures "$687,800" and insert in lieu thereof "$487,800"; and after the comma strike out the language and figures "of which $200,000 shall be immediately available."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The amendment was agreed to.

The Clerk completed the reading of the bill.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that the Clerk be authorized to correct the totals.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the Clerk be authorized to correct the totals. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that on page 74, line 15, the word "not" be inserted in front of the word "more," so that it will read "not more than."

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise and report the bill with sundry amendments to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, and had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

Mr. DICKINSON of Iowa. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. DICKINSON of Iowa, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ORDER OF BUSINESS

Mr. BANKHEAD. Mr. Speaker, before we adjourn I would like to ask the majority leader if there has been any change in the announced program of calling up for consideration on Tuesday next the constitutional amendment?

Mr. TILSON. I had just risen to make a statement that will answer the gentleman's inquiry. On next Tuesday what is called the Norris resolution, providing for an amendment to the Constitution, will be taken up for consideration.

Mr. BLACK of Texas. Is it planned to go on with the Consent Calendar on Monday?

Mr. TILSON. The Consent Calendar is quite large, and I am sure will require the entire day Monday.

Mr. HASTINGS. What time is to be given to general debate on the constitutional amendment?

Mr. TILSON. The rule provides for the length of time for general debate.

Mr. SNELL. The rule provides for five hours' general debate.

FARM RELIEF

Mr. HOWARD of Nebraska. Mr. Speaker, I ask unanimous consent to address the House for one minute, and in connection with that I ask unanimous consent that I may have the privilege of revising and extending my remarks by incorporating therein some quotations and an address delivered by a citizen of Nebraska.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to address the House for one minute and to incorporate in his remarks certain quotations and an address. Is there objection?

Mr. CHINDBLOM. Is the gentleman too modest to name the citizen?

Mr. HOWARD of Nebraska. Oh, no; I am proud to name him. He is Mr. Mark W. Woods, a distinguished member of the political party of the gentleman from Illinois.

Mr. CHINDBLOM. That will be splendid.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOWARD of Nebraska. Mr. Speaker, in the one minute allotted to me, of, course, I may not be able to touch the hem of the garment of the most serious problem now confronting the country and confronting the membership of this House; but in the leave granted to me I shall try to make known to my fellows somewhat the emergency confronting us, and will, with the permission which has been granted, convey to them what I regard as the most remarkable address upon the subject of agriculture delivered during the present year, with the exception, perhaps, of what I intend to make on my own account. [Laughter.]

Mr. Speaker. I feel that words of mine might mar the worth of the radio address by Mr. Woods, and I submit it entire, unblemished by my own interpolations, as follows:

WHAT THE VETO OF M'NARY-HAUGEN BILL COST AMERICAN AGRICULTURE

By Mark W. Woods, Lincoln, Nebr.

There is an old saying, and a true one, that what is everybody's business is nobody's business. In order to rivet your attention to this issue I am going to make a few very bold declarations so that you will realize how important this subject is to you. I am going to show you that the veto of the McNary-Haugen bill cost the people of Nebraska more than $100,000,000 in 1927. I am going to show you that the value of farm lands and farm buildings in Nebraska alone has depreciated an average of $200,000,000 a year in the last seven years. I am going to show you that had this legislation, which passed both Houses of our Congress, been signed by the President and put in operation, not less than $100,000,000 a year of the value that has been taken from the people of the State of Nebraska by depreciation would be restored each year.

I appreciate the opportunity extended to me to discuss what is considered by the best thinkers in the United States to be the most important legislation that has come before our Congress in many years. Not important only to the class of people that it directly affects but important to all the people of this great Republic that has for its foundation rock the principles of equality for all, and if there are to be special privileges they shall not be granted to one group and denied to another.

The present high standard of living in the United States has been brought about and can only be maintained by the principles of protection. That these protective principles given through special legislation should be granted to industry, capital, and labor and denied to 30,000,000 of our people who are producing our food products and our raw material is contrary to our national policy—is unbelievable.

A majority of the people of the United States have spoken through their Congressmen and Senators by passing the McNary-Haugen bill. They did not speak as a party, as they considered this broad economic question greater than party. I will undertake to show you what the veto of the McNary-Haugen bill cost the people of Nebraska and cost various of our neighboring States as much or more. That we may start with the proper understanding, I want to say that there is not a man or woman within the sound of my voice, no matter what business they are in, no matter to what profession they belong, who are not in exactly the same position as the man who is holding the plow. Nebraska is purely an agricultural State; has no other resources, and every dollar of the money that you get or that I get or that anybody else gets who lives in Nebraska must originally come out of the ground. So, my friends, I want you not to fool yourselves by thinking this is a problem for the farmers. It is your problem and my problem, and we must make it our business.

All history shows that whenever the agrarian population of a nation is by legislation or other force of circumstances placed in a condition where it can not make money, the farm becomes unattractive and the people turn their faces toward the cities. In the last seven years the census report shows that 14,000,000 of them have left the farm—an average of 2,000,000 people a year. The inevitable happened. These people, not being skilled workmen, could not compete with skilled labor in the towns and cities and could not obtain suitable nor steady employment, nor command adequate wages. The result was that many of them have drifted back into the country with reduced or exhausted capital, discouraged, disheartened, to take up life again on the farms as tenants. The standard of rural life was lowered by this transition. And the continual augmenting of this group menaces our high state of civilization.

It has been clearly recognized by many of the great economists in our country that unless some way can be found to give the 30,000,000 people who are raising our food products and raw material, by some national cooperative movement, a bargaining power by which they can have something to say about the price they receive for what they have to sell, then that great group inevitably must be submerged.

Let me tell you a little experience that I personally had in 1923. In the great deflation that followed after the war, as you know, land values went down until in 1923 we felt they had reached the low point and our company bought 5,000 acres of land in Iowa in the heart of the greatest Corn Belt in the world, fairly well improved farms at prices ranging from $75 to $85 an acre. At that time we did not understand any more than many of the people of Nebraska do to-day, any other reason for this greatly depressed price on farm land other than it was the natural aftermath of the World War. We believed that investments in good farm lands in Nebraska and Iowa at these low prices were sound and would inevitably be big money-makers in the years to come.

Shortly after making this deal I journeyed down to the city of New York, and at luncheon one day I told a number of eastern bankers that we thought Nebraska and Iowa farm lands had reached the bottom and that it was a great time to buy. One of the gray-haired presidents said, "Mr. Woods, I am afraid you will have to carry those farms a long time." I asked him what made him think so, and he said he could not see any immediate future for a better price on farm products, and that their economists had figured out that it would be seven years yet before we could expect any appreciable advance. I told him that if he had some long-haired political economist who could give me his reasons why these lands would not be a good investment at that time I certainly would like to meet him.

I found out something I did not know—that these great banking institutions employ a corps of the very best economists that money can hire, and at the head of this particular group was a man they were paying $25,000 a year—a man of international reputation. I spent the afternoon with him. He took me into a large room, one end of which was covered with a blackboard charted with many different colored lines. The first line I noticed starting in 1920 and running to 1930 was marked "cattle." Now, I thought I knew something about the cattle business. I was raised in it and had been in it all my life. We had just completed the purchase of some 300 registered Hereford cows at $50 a head that four years before had sold for an average of $300 per head. This was in 1923. And I noticed that the cattle line kept going on down to 1925, then straightened out and commenced to rise in 1926, with a very marked rise in 1927. I said, "My friend, tell me how you figure the future price on cattle." He said, "They will continue to go down, because people will be forced to pay the money they owe on chattel mortgages and otherwise and their cattle will be forced on the market and absorbed at distressed prices in order to satisfy, if possible, their creditors. We figure this will culminate in 1925 or 1926"—two years in advance of when I was talking with him. He said, "That is what we call the swing of the starvation pendulum. The population will increase and the cattle population decrease, and at this period cattle will commence to increase very materially in value on account of the great shortage that will have been created." The next line I noticed was a yellow line marked "land," starting in 1920 and continuing downward until 1928 and then gradually straightening out.

I said, "Your explanation on cattle may be reasonable but please explain to me how you figure the price of land." He then spent two hours in telling me what I have to tell you in 10 minutes in order to not overrun my time. He said, "Mr. Woods, there are more than 6,000,000 individual farms in the United States. That means that 30,000,000 people actually reside on these farms. In addition to that, there are the villages, the towns, and smaller cities, all rural in their character, and all directly dependent on the farms in their immediate

vicinity. They are located from the Allegheny to the Rocky Mountains and from the Gulf of Mexico to the Great Lakes. They are divided, not only in the East and West but in the North and South. The people who own or operate them are of different nationalities, have different religions, and we can see no way in which they can be so coordinated that they can, by any means or method, get any bargaining power; therefore they are destined to suffer until the starvation pendulum swings for them and drives enough of the people off the land so that the consumption of this country reaches a point where there will be a scarcity of food products, then the price will rise, in all probability, just as much too high as it has gone too low. And remember that an acre of farm land is only worth what it will pay a reasonable rate of interest on in return, together with upkeep and taxes." "Also please remember," he said, "That all the other great groups that comprise our people are organized, and that during the war period they were induced by Government cooperation to more strongly organize and cooperate. They were given protection behind walls built by legislation so that they could entrench themselves and make the other group pay, to a large extent, the cost of this great World War."

Labor, thoroughly organized in all its branches, obtained legislation that gave them the right of collective bargaining, that gave them the immigration law, and during this great postwar deflation while our agriculture has sunk so low yet labor has maintained its peak wartime price.

As an illustration, we are operating coal mines in southern Illinois. The State gave the coal miners in Illinois protective legislation, so that we can not work a man in the coal mines who does not belong to the coal miners' union in Illinois. The coal miners of Germany are working six 8-hour days in the mines for $6.80 for the six days' work. We are paying the cheapest boy, who never goes below the ground, $7.50 for 8 hours' work under the Jacksonville agreement, and we are paying $1.08 a ton for mining coal, which enables a miner to earn from $16 to $20 for 8 hours' labor underground. If the law of supply and demand had not been interfered with, if the protective legislation for organized labor called the immigration law had not been passed, we could go to Germany and import miners that would be glad of the opportunity to work for $10 or $15 a week.

Industry realized that if it is going to keep its mills open it must have legislative protection, and it got it in the way of a higher tariff, so that the union wage earner and the great industrial mills of the East and the owners of these great mills do not have to sell their products in competition with the pauper labor of war-torn Europe, as the farmers do; but entrenched behind the tariff wall, and because 90 per cent of all they produce is sold to the people of this country, enables them to get an American price, which not only enables them to pay their union wage earners the highest price they ever received in the history of this world, but also enables the owners to make handsome profits.

Capital came along and got the same protection by creating the Federal reserve, and the price of money is fixed every day by the Federal Reserve Board. The railroads, realizing that they would have to pay these protective prices for steel and equipment, and that they could not break the labor organization but would have to continue to pay them their high wages, appealed to Washington for legislation that would enable them to live, and they got it in the way of a transportation act and the Esch-Cummins bill, which allows the railroads to earn a return of 5½ per cent interest net, after paying depreciation and operating expenses, on the valuation fixed by the Interstate Commerce.

Now, my friends, this economist in New York showed me that all the great classes of society that make up the population of the United States had combined to take care of themselves, had gotten legislation through Congress to take care of each one of them individually, and he said: "You will have to find some way for the agriculturalists of this country to make a combination so that they can be lifted up into this protective column, or else they will have to pay the cost of this war," and, my friends, the agriculturalist is to-day paying the cost of the war. Do not misunderstand me. Organized agriculture are not seeking or attempting in any way to tear down any of these protective measures. They do not want the laborer in the mine, on the railroad, or in the factory to be forced to compete with the cheap labor of the rest of the world. They do not want the high standard of living of the people of the United States lowered one iota. Their representatives in Congress have voted for every one of these protective measures. They are now simply demanding that they be given legislation so that the millions of laborers on the American farms do not have to compete with the peon, peasant, and pauper labor of the rest of the world.

Now, let us see what has happened. The assessed valuation of agricultural land and agricultural equipment—mind you, I am talking about the assessed valuation, assessed for taxes—has gone down since 1920, $20,000,000,000. The assessed valuation right here in Nebraska has gone down since 1920, $1,500,000,000, and remember $20,000,000,000 is two billion more than our entire national debt, and at the same time the debts on our farms have increased from four billion to twelve billion dollars. The National Industrial Conference Board figures what portion of the national income the different groups in society get each year. They tell you that the 30,000,000 people who are actually on the farms producing food products and raw material got between 7 and 8 per cent of our national income last year and that the 52,000,000 who are on the farms or in rural America absolutely dependent upon agriculture got an equally small proportion of our national income.

Organized agriculture, realizing what a tremendous handicap they were under, asked Congress in the first McNary-Haugen bill to pass legislation that would give agriculture a chance to organize so that they could have a bargaining power when they exchanged their food products for the products of organized labor, organized industry, and organized capital. They realized that it meant a cooperative sanctioned by the Government so that in each commodity all those benefited would have to share in the cost of disposing of the surplus or the orderly marketing thereof. All other kinds of cooperation have failed because those who refused to join and pay any of the costs of the operation got the full benefit.

Under the McNary-Haugen bill, had the President signed it, the wheat growers of the United States would have received net $240,000,000 more for their wheat this year. The wheat growers of Nebraska would have received $24,000,000 more money and had it in their pockets to-day. Let me show you how it would have operated. Under the provisions of the McNary-Haugen bill 60 per cent of the actual producers of wheat would have had to appeal through their several organizations to the Federal Farm Board (which would have been appointed) and ask the board to declare an operative period on wheat in order to make the tariff effective. The tariff on wheat is 42 cents a bushel. It has not been effective once during this year, simply because we raised 800,000,000 bushels of wheat, and 200,000,000 bushels of it had to be exported. Consequently, the farmers of the United States (because they had no way to absorb or handle that surplus) had to take Liverpool prices for their entire 800,000,000 bushels. This meant that the laboring man on the farm, as well as the farm owner, had to sell the products of his acres and his labor in competition with the cheap labor in the Argentine, where wheat is raised on cheap land, in competition with the cheap land and labor in Canada, Australia, and Russia, and because he had no great cooperative such as would be organized under the McNary-Haugen plan he could not make the tariff of 42 cents a bushel effective. Our Congress placed this tariff on wheat because they say it cost the American farmer 42 cents a bushel more to raise wheat than it does the Canadian or the Australian farmer.

We produced this year in the United States 800,000,000 bushels of wheat. Our home consumption would take 600,000,000 bushels of it. Two hundred millions bushels therefore has to be exported abroad and sold at a world price. Consequently, if we made the tariff effective we would have to buy in the home market the whole 800,000,000 bushels of wheat at the world's price, plus the tariff of 42 cents. Consequently, when we sold the 200,000,000 bushels abroad we would have to lose 42 cents a bushel on it, which would be $84,000,000. In order that the industry benefited—that is the wheat raisers—should pay this loss themselves, it would be necessary to put an equalization fee of 12 cents a bushel on the 800,000,000 bushels as it moved in commerce. That means that when the farmer took 1,000 bushels of wheat to market the Federal farm board would, through these agents, through the regular wheat-buying channel over the country, authorize them to buy this wheat at Liverpool prices, which is the world's price, plus 42 cents which is the tariff, and to pay the farmers that price, less 12 cents a bushel, which would be the equalization fee. This, you see, would give the farmer net 30 cents a bushel more for his wheat than he did get, and this equalization fee of 12 cents would be collected by the miller or the elevator man and remitted to the Federal farm board to be replaced in the revolving fund, and 12 cents a bushel on 800,000,000 bushels would bring in $96,000,000. So you see it would be paying the loss of the $84,000,000 and leave $12,000,000 for expenses.

The farmers of Nebraska raised 80,000,000 bushels of wheat. Had the President signed this bill they would have received 30 cents a bushel more than they did get for it, and that means that they would now have $24,000,000 in their pockets that they haven't got. The wheat raisers of the United States who raised 800,000,000 bushels of wheat would have had 30 cents more a bushel in their pockets, and that would mean $240,000,000.

And let me say to you that this much-misquoted equalization fee is the safeguard against undue expansion and overproduction. The Federal farm board would keep the producers informed as to the quantities placed in storage. If, in spite of this information, there was overproduction, a larger amount would have to be placed in storage and the costs would proportionately increase, so that the equalization fee would have to be increased, possibly to 20 cents or more per bushel, until the wheat in storage found its way finally to the market. The plan holds within itself automatically the safeguard against excess production. It is the governor that would control not only the marketing in an orderly manner, but the limitations of the quantity produced. The opponents of the equalization fee recognize that once it got under way it would tie together the largest group of people ever drawn into one organization, and for fear that this group would dominate legisla-

tion and governmental policies they prefer to hold this advantage in their own hands.

To defeat the equalization-fee plan the President and his supporters are agreeable that the Government appropriate vastly more than the McNary-Haguen bill supporters ask for to set the machinery going. The opponents of the measure insist on an appropriation in the form of a subsidy, a contribution, or sop—a dole. This involves a great menace, because it would open the United States Treasury to the insistent demand of every kind of organized society for subsidies of a similar nature and always in increasing volume. The supporters of the McNary-Haugen measure insist that the agricultural industry shall stand on its own foundation, and that the cost of the operation shall be paid by the people directly benefited; that is, the producers themselves.

The revolving fund advanced by the Government would have been used to pay the loss on wheat until the equalization fee came in. As the equalization fee came in it would all go to the revolving fund and would leave it intact. Consequently, you see that this would not be a subsidy. The wheat raiser would pay his own bill. The tariff would have been made effective. The Department of Agriculture tells you that $1 a bushel difference on the price of wheat makes a difference of half a cent on a loaf of bread. The 42 cents advance then would mean one-fourth cent per loaf of bread.

In the same way the Federal farm board would handle cotton. We have no tariff on cotton. It is purely a question of orderly marketing. When Sir Josiah Stamp, the noted English economist, spoke in Washington a year ago before a committee of agriculturists, economists, and cotton men, he made this statement: "The asinine way in which America handles her cotton is lamentable. You produce 60 per cent of the cotton of the world and still you let Liverpool make your price. Your Agricultural Department will show you, as does ours, that there never has been a five-year period in our history when the world had a surplus bale of cotton. In other words, the world has never produced a surplus bale of cotton, neither has it produced a surplus bushel of wheat over a period of years. Now, why don't you market this cotton the same as we market our rubber, and the same as Brazil markets her coffee? This can be done by an organization of the cotton growers with an equalization fee assessed against each bale of cotton that moves in commerce to pay the cost of the storing and orderly marketing, and by that means see that your producer gets a living price for his cotton and that you stop making gamblers out of our spinners, and the world will be better off."

My friends, if the McNary-Haugen bill had not been vetoed you would have had a farm board continually in session in Washington looking after your interests, seeing what legislation could be passed for your benefit, and opposing legislation that would operate against your interests. Industry, labor, and capital have not overlooked the importance of this matter.

Industrial alcohol is to-day manufactured almost exclusively from a by-product manufactured from Cuban sugar called blackstrap, which comes into this country with practically no tariff. The Cuban sugar plantations are largely owned by the great New York financial interests and it is to their selfish interests that no tariff is placed on blackstrap. Dean Curtiss, of Iowa, in a speech at Ames, Iowa, a few days ago made the statement that if a proper tariff was placed on blackstrap it would mean 150,000,000 bushels a year of a lower grade of our corn that moves in trade would be absorbed, and the Chicago Board of Trade says that the absorbing of this amount of corn will raise the price 15 cents overnight.

Your Federal farm board would also see that the President raised the tariff on corn 7½ cents a bushel, which he has a perfect right to do under the present tariff law. You will remember that organized agriculture has been pleading with the President for more than a year to give us this tariff increase on corn, but it only took the United States Steel Corporation a few weeks to get an increase of 50 cents a ton on pig iron which was being shipped in over our tariff wall. You understand that it makes a big difference whose ox is being gored.

We are to-day importing more than 3,000,000 bushels of Argentine corn per month. Fifteen cents a bushel on this year's corn crop in Nebraska would mean $45,000,000 to our farmers and more than $60,000,000 to the farmers of Iowa.

How about hogs and cattle? Do you know, my friends, that we are the dumping ground for all the world for the hides, with very low tariff? Do you know that if you are wearing a pair of Russian leather shoes, the leather comes from Russia? And do you know that for the past seven years it has hardly paid any of us to skin a critter that died on our farms and ranches? Do you know that a very large per cent of the oils and fats in this country are imported with a very low tariff? And do you know that 25 per cent of them, such as coconut oil, are produced by people in the Tropics who wear nothing but a breechcloth? And do you know that these oils take the place of 2,000,000 cows in the United States, and 40,000 cows in Nebraska alone? And that is the kind of competition that a man on a Nebraska farm who raises hogs and milk cows has to compete with.

Do you know that a cent a pound on United States pork is $100,000,000, and do you know that the price of hogs in the United States has been reduced 3 cents a pound, or $3 a hundred, in the last four months? Do you know that means $300,000,000 to the farmers of America? Do you know that if the President had signed the McNary-Haugen bill we farmers and we business men in this State would have received for our 1927 crop, conservatively speaking, $100,000,000 more than we will get for it?

There is some excuse for a man living in the industrial East, where food products have to be purchased, opposing this legislation if he is selfish, if he is not a student of history, if he thinks this country has reached the zenith in civilization, if he is content to see our Government make the mistake of oppressing the farm population. He is not our kind of an American citizen.

I heard an eastern banker make a speech the other day. He said, "My friends, you must remember that since the days of Pharaoh agriculturists have been in the peasant and peon class, but remember that they are the best fed and clothed people in the world; that they have three square meals a day of potatoes, meat, and brown gravy, but that electric lights, bathtubs, high-powered cars, and higher education were never meant for them."

I have told you the story of agriculture. If we can be placed on an equality with industry, labor, and capital, then you are living in a country that will become even richer than the industrial East is to-day, because you produce food—an article that all people have to have—food and raw material for the manufacture of nearly everything. If you are content to take what you can get in this great scheme of life and let your children and you struggle on trying to do business on an 80-cent dollar, then forget the McNary-Haugen bill. But if you insist that you belong to a group of people that are the very foundation rock of our Government, that have always been first to come to the defense of our country and maintain her honor at home or abroad, then, my friends, you must say to the world that you will not be submerged and that special privileges that have been granted to others must be granted to you.

You can not win this fight by thinking about it. You will have to make yourself a part of it; you have to talk it to your neighbors, to your friends, your wife, your mother, and your father and help these men who are trying to help you—men like Senator NORRIS, Senator HOWELL, Governor Lowden, Vice President DAWES—men like the Governor of Nebraska, who has been one of the staunchest and hardest workers and is going up and down the country like a John the Baptist, not asking, but demanding that agriculture be given equal rights; men like every Member in Congress from Nebraska, regardless of politics. This is not a political question; it has never been made a football of partisan politics. My friends, we have to get behind these men and say in no uncertain words so that it can be heard all over the country, that we have joined hands with our sister States reaching from the Gulf of Mexico to the Great Lakes and from the Allegheny to the Rocky Mountains, in demanding equal rights and privileges for all.

LEAVE OF ABSENCE

By unanimous consent, leave was granted to Mr. SABATH, for an indefinite period, on account of illness.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. J. Res. 41. Joint resolution directing the Comptroller General of the United States to reopen, readjust, and resettle the account between the State of Nevada and the United States; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 84. An act to approve Act 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the district of Waimea, on the island and in the county of Kauai, Territory of Hawaii";

H. R. 204. An act to authorize an additional appropriation for Fort McHenry, Md.;

H. R. 230. An act to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees;

H. R. 233. An act to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J.;

H. R. 234. An act to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1 cent a mile for subsistence of candidates in going to and returning from camp;

H. R. 235. An act to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields;

H. R. 238. An act to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or

other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army;

H. R. 449. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a toll bridge across the Atchafalaya River at or near Morgan City, La.;

H. R. 519. An act for the relief of Joseph F. Ritcherdson;

H. R. 2524. An act for the relief of Mary M. Jones;

H. R. 4536. An act for the relief of Fred R. Nugent;

H. R. 5635. An act to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 5686. An act granting a right of way to the county of Imperial, State of California, over certain public lands for highway purposes;

H. R. 5727. An act to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, La.;

H. R. 5783. An act to grant extensions of time of oil and gas permits;

H. R. 5803. An act authorizing the Interstate Bridge Co., of Lansing, Iowa, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Lansing, Iowa;

H. R. 6194. An act for the relief of Frank Stinchcomb;

H. R. 6476. An act authorizing the Wabasha Bridge Committee, Wabasha, Minn., to construct, maintain, and operate a bridge across the Mississippi River at or near Wabasha, Minn.;

H. R. 6973. An act authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 6989. An act to amend the Hawaiian Homes Commission act, 1920, approved July 9, 1921, as amended by act of February 3, 1923;

H. R. 7030. An act to amend section 5 of the act of March 2, 1895;

H. R. 7195. An act to provide for the purchase of horses and mules for the Military Establishment;

H. R. 7199. An act granting the consent of Congress to the Oregon-Washington Bridge Co. to maintain a bridge already constructed across Columbia River near the city of Hood River, Oreg.;

H. R. 7213. An act to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound or per mile, and for other purposes;

H. R. 7371. An act to legalize a bridge across the Snake River near Heyburn, Idaho;

H. R. 7375. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Guntersville on the Guntersville-Huntsville road in Marshall County. Ala.;

H. R. 7909. An act to authorize the maintenance and renewal of a timber-frame trestle in place of a fixed span at the Wisconsin end of the steel bridge of the Duluth & Superior Bridge Co. over the St. Louis River between the States of Wisconsin and Minnesota;

H. R. 7914. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Whitesburg Ferry, on the Huntsville-Lacey's Spring road between Madison and Morgan Counties, Ala.;

H. R. 7915. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Scottsboro, on the Scottsboro-Fort Payne road in Jackson County, Ala.;

H. R. 7925. An act granting the consent of Congress for the maintenance and operation of a bridge across the Monongahela River between the borough of Glassport and the city of Clairton in the Commonwealth of Pennsylvania;

H. R. 8530. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River near Cedar Bluff, in Cherokee County, Ala.;

H. R. 8531. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road between Talladega and Shelby Counties, Ala.;

H. R. 8726. An act authorizing Oscar Baertch, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis.;

H. R. 8740. An act granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 8743. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, Minn.;

H. R. 8818. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La.;

H. R. 8837. An act authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Cassville, Wis.;

H. R. 8896. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia road in Escambia County, Ala.;

H. R. 9036. An act to increase the salary of the Librarian of Congress;

4838. By Mr. CURRY: Petition of citizens of the third California district, against House bill 78; to the Committee on the District of Columbia.

4839. Also, petition of citizens of the third California district, favoring increase in Civil War veterans' pensions and Civil War widows' pensions; to the Committee on Invalid Pensions.

4840. By Mr. DAVENPORT: Petition of Herbert G. Ellis and other citizens of New York State, protesting against the enactment into law of House bill 78; to the Committee on the District of Columbia.

4841. By Mr. DRANE: Petition of citizens of Limestone, Fla., urging passage of a Civil War pension bill providing relief for needy and suffering veterans and widows; to the Committee on Invalid Pensions.

4842. Also, petition of citizens of Tarpon Springs, Fla., urging passage of a Civil War pension bill providing relief for needy and suffering veterans and widows; to the Committee on Invalid Pensions.

4843. By Mr. EVANS of Montana: Petition of A. W. Yandon and other residents of De Borgia, Mont., protesting against the passage of House bill 78; to the Committee on the District of Columbia.

4844. Also, petition of Olaf Eastlund and other residents of Kalispell, Mont., protesting against the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4845. By Mr. FURLOW: Petition of several citizens of Freeborn County, Minn., against Sunday observance bill; to the Committee on the District of Columbia.

4846. By Mr. GALLIVAN: Petition of Massachusetts Forestry Association, Harris A. Reynolds, secretary, 4 Joy Street, Boston, Mass., recommending passage of the McNary-Woodruff bill, which carries an authorization of $40,000,000 for the acquisition of lands for national forests; to the Committee on the Public Lands.

4847. By Mr. GUYER: Petitions of citizens of Allen, Linn, and Wyandotte Counties, Kans., asking increased pensions for survivors and widows of the Civil War; to the Committee on Invalid Pensions.

4848. By Mr. HADLEY: Petition of residents of Everett, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4849. Also, petition of residents of King County, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4850. Also, petition of residents of Whatcom and Skagit Counties, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4851. By Mr. HARDY: Petition presented by M. L. Rice, president Colorado Conference, signed by 1,120 citizens of the counties of Alamosa, Baca, El Paso, and Rio Grande, Colo., protesting against the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4852. By Mr. HERSEY: Petition of Olof Sodergren and 20 others, of Stockholm, Me., protesting against the passage of the Lankford Sunday bill; to the Committee on the District of Columbia.

4853. By Mr. HILL of Washington: Petition of Reuben H. Porter and 12 other persons, of Spokane, Wash., urging immediate legislation increasing the pensions of Civil War veterans and of the widows of such veterans; to the Committee on Invalid Pensions.

4854. Also, petition of A. A. Behrens and 15 others, of Spokane, Wash., urging immediate legislation increasing the pensions of Civil War veterans and of the widows of such veterans; to the Committee on Invalid Pensions.

4855. Also, petition of H. M. Berkey and 11 others, of Spokane, Wash., urging Civil War pension legislation carrying the rates proposed by the National Tribune; to the Committee on Invalid Pensions.

4856. Also, petition of Nellie Feather and 28 others, of Pend Oreille County, Wash., urging Civil War pension legislation carrying the rates proposed by the National Tribune; to the Committee on Invalid Pensions.

4857. Also, petition of E. C. Richardson and 84 others, of Spokane, Wash., urging immediate legislation to increase the pensions of Civil War veterans and the widows of such veterans; to the Committee on Invalid Pensions.

4858. Also, petition of E. S. Clark and 81 other persons, of Sumas, Bellingham, and other places in the State of Washington, requesting support of House bill 6518, known as the Welch bill, and House bill 492, to abolish the Classification Board; to the Committee on the Civil Service.

4859. Also, petition of Arthur Ginger and 56 other persons, of Noaksack, Everson, Lynden, and other places in the State of Washington, requesting support for House bill 6518, known as the Welch bill, and House bill 492, known as the Lehlbach bill, to abolish the Classification Board; to the Committee on the Civil Service.

4860. Also, petition of H. R. Yeakel and 30 other persons, of Everett, Wash., requesting support of House bill 6518, known as the Welch bill, and House bill 492, known as the Lehlbach bill, for the abolition of the Classification Board; to the Committee on the Civil Service.

4861. Also, petition of J. D. Mullane and 48 other persons, of Seattle, Wash., requesting support of House bill 6518, known as the Welch bill, and House bill 492, known as the Lehlbach bill, to abolish the Classification Board; to the Committee on the Civil Service.

4862. Also, petition of Mrs. E. M. May, Mrs. Olive McKee, and 23 others, of Spokane, Wash., protesting against passage of any compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4863. By Mr. HOOPER: Petition of R. E. Baxter and 17 other residents of Hillsdale County, Mich., protesting against the enactment of compulsory Sunday observance legislation for the District of Columbia; to the Committee on the District of Columbia.

4864. Also, petition of L. F. Westfall and 10 other residents of Hillsdale County, Mich., protesting against the enactment of compulsory Sunday observance legislation for the District of Columbia; to the Committee on the District of Columbia.

4865. By Mr. HUDSON: Petition of citizens of Pontiac and Flint, Mich., protesting against the enactment of legislation known as the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4866. By Mrs. KAHN: Petition of the San Francisco Board of Supervisors, San Francisco, Calif., urging that permission be granted in the immediate future for the construction of a bridge across San Francisco Bay; to the Committee on Interstate and Foreign Commerce.

4867. By Mr. KVALE: Petition of members of the Sorosis Club, Portland, Oreg., indorsing the Curtis-Reed education bill; to the Committee on Education.

4868. Also, petition of members of the Farmers' Livestock Shipping Association, Clara City, Minn., opposing House bill 9288; to the Committee on Agriculture.

4869. By Mr. LINTHICUM: Petition of Otho W. Jones, Earl Clifford, James E. Green, Thomas Tinsley, Edward L. Wagner, Thomas G. Spencer, Thomas W. Wilson, Richard A. Fantom, Mrs. Carrie M. Gray, John H. Eckert, and others, of Baltimore, indorsing House bill 10644; to the Committee on Ways and Means.

4870. Also, petition of United States Naval Academy Graduates' Association of Baltimore, Md., urging support of Congress on present plans for strengthening the Navy; to the Committee on Naval Affairs.

4871. Also, resolution of Baltimore City Medical Society, indorsing favorable action on legislation for retirement of emergency Army officers permanently disabled in line of duty during the World War; to the Committee on Rules.

4872. Also, petition of Messrs. H. Gamse & Bros., of Baltimore, registering opposition to the Jadwin plan providing that the State of Louisiana bear 20 per cent of the cost toward flood control; to the Committee on Flood Control.

4873. By Mr. MURPHY: Petition of Albert Capper, secretary of Local Union No. 10, National Brotherhood of Operative Potters, telling of the resolution passed by that body favoring the passage of House bill 7729, Capper-Hawes bill; to the Committee on Labor.

4874. By Mr. O'CONNELL: Petition of McGraw-Hill Publishing Co., New York City, N. Y., appealing to Congress to enact legislation before March 15, 1928, prolonging the life of the Radio Commission, unhampered by unnecessary restrictions; to the Committee on the Merchant Marine and Fisheries.

4875. Also, petition of the Chamber of Commerce of the State of New York, favoring in principle legislation in the Congress to facilitate the prosecution of criminal receivers of stolen property, commonly called the "fence"; to the Committee on the Judiciary.

4876. Also, petition of the Chamber of Commerce of the State of New York, condemning the enactment into law of the Shipstead-LaGuardia bills (S. 1482, H. R. 7759), or similar legislation which will impair the power of the Federal courts to issue injunctions in labor disputes or in other controversies; to the Committee on the Judiciary.

4877. By Mr. ROBINSON of Iowa: Petition against the further postponement of the national origins provision of the restrictive immigration act of 1924, signed by May Justman and about 50 members of the Ruth and Naomi Circle, of Dubuque, Iowa; to the Committee on Immigration and Naturalization.

4878. By Mr. SELVIG: Petition of R. B. Taralseth and 24 farmers and residents of Marshall County, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

4879. Also, petition of G. E. Comstock and 37 farmers and residents of Clay County, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

4880. Also, petition of T. H. Acker and 10 farmers and residents of Euclid, Polk County, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

4881. By Mr. SINCLAIR: Petition of 10 residents of Corinth, N. Dak., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia

4882. Also, petition of 12 residents of Lark, N. Dak., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4883. Also, petition of William Larson, of Dunn Center, N. Dak., protesting against the enactment of compulsory Sunday observance bill (H. R. 78), or any similar measure; to the Committee on the District of Columbia.

4884. Also, petition of 63 residents of Wilton, N. Dak., for improvement in radio conditions; to the Committee on the Merchant Marine and Fisheries.

4885. Also, petition of 77 residents of Alexander, Arengard, Rawson, and Watford City, N. Dak., protesting against the enactment of compulsory Sunday observance legislation, and especially against the Lankford bill; to the Committee on the District of Columbia.

4886. Also, petition of 48 residents of Kenmare and Donnybrook, N. Dak., protesting against the enactment of compulsory Sunday observance legislation, and especially against House bill 78; to the Committee on the District of Columbia.

4887. Also, petition of the board of directors of the North Dakota Wheat Growers' Association, representing 23,000 farmers in North Dakota and Montana, urging improvement of radio conditions, particularly for independent stations engaged in broadcasting agricultural programs; to the Committee on the Merchant Marine and Fisheries.

4888. Also, petition of 31 residents of Hazen, Beulah, McGregor, Columbus, Noonan, Larson, and Wildrose, N. Dak., protesting against the enactment of compulsory Sunday observance legislation, and especially against House bill 78; to the Committee on the District of Columbia.

4889. By Mr. STRONG of Kansas: Petition of 23 citizens of Republic County, Kans., protesting against the passage of the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4890. By Mr. SWING: Petition of citizens of Elsinore, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4891. Also, petition of citizens of Arlington, Calif., and other communities, protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4892. Also, petition of citizens of Arlington, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4893. By Mr. WELCH of California: Petition submitted by United States Employees' Association of California, containing 51 signatures, residents of Stockton, Calif., favoring the passage of House bill 6518, to reclassify and increase the salaries of Federal employees; to the Committee on the Civil Service.

SENATE

MONDAY, *March 5, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

O God of love, we yield Thee thanks for whatsoever Thou hast given us richly to enjoy, for health and vigor, for the love and care of home, for the joys of friendship, and for every good gift of happiness and strength. And since it is of Thy mercy that this another day is added to our lives, we rededicate unto Thee our spirits, souls, and bodies, humbly beseeching Thee to give us strength for the day's toil, courage in difficulty, guidance in perplexity. Save us from distrust and suspicion, from prejudice and want of sympathy with any of Thy children, from all unholy strife, and from whatsoever in us hinders Thy work on earth, that in fullness of joy we and all the people of this land may walk before Thee with a perfect heart. Through Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of the proceedings of Friday last, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed a bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 84. An act to approve Act 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the district of Waimea, on the island and in the county of Kauai, Territory of Hawaii";

H. R. 204. An act to authorize an additional appropriation for Fort McHenry, Md.;

H. R. 230. An act to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees;

H. R. 233. An act to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J.;

H. R. 234. An act to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1 cent a mile for subsistence of candidates in going to and returning from camp;

H. R. 235. An act to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields;

H. R. 238. An act to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army;

H. R. 449. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a toll bridge across the Atchafalaya River at or near Morgan City, La.;

H. R. 519. An act for the relief of Joseph F. Ritcherdson;

H. R. 2524. An act for the relief of Mary M. Jones;

H. R. 4536. An act for the relief of Fred R. Nugent;

H. R. 5635. An act to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 5686. An act granting a right of way to the county of Imperial, State of California, over certain public lands for highway purposes;

H. R. 5727. An act to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, La.;

H. R. 5783. An act to grant extensions of time of oil and gas permits;

H. R. 5803. An act authorizing the Interstate Bridge Co., of Lansing, Iowa, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Lansing, Iowa;

H. R. 6194. An act for the relief of Frank Stinchcomb;

H. R. 6476. An act authorizing the Wabasha Bridge Committee, Wabasha, Minn., to construct, maintain, and operate a bridge across the Mississippi River at or near Wabasha, Minn.;

H. R. 6973. An act authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 6989. An act to amend the Hawaiian Homes Commission act, 1920, approved July 9, 1921, as amended by act of February 3, 1923;

H. R. 7030. An act to amend section 5 of the act of March 2, 1895;

H. R. 7195. An act to provide for the purchase of horses and mules for the Military Establishment;

H. R. 7199. An act granting the consent of Congress to the Oregon-Washington Bridge Co. to maintain a bridge already constructed across Columbia River near the city of Hood River, Oreg.;

H. R. 7213. An act to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound or per mile, and for other purposes;

H. R. 7371. An act to legalize a bridge across the Snake River near Heyburn, Idaho;

H. R. 7375. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Guntersville on the Guntersville-Huntsville road in Marshall County, Ala.;

H. R. 7909. An act to authorize the maintenance and renewal of a timber-frame trestle in place of a fixed span at the Wisconsin end of the steel bridge of the Duluth & Superior Bridge Co. over the St. Louis River between the States of Wisconsin and Minnesota;

H. R. 7914. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Whitesburg Ferry, on the Huntsville-Laceys Spring road between Madison and Morgan Counties, Ala.;

H. R. 7915. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Scottsboro, on the Scottsboro-Fort Payne road in Jackson County, Ala.;

H. R. 7925. An act granting the consent of Congress for the maintenance and operation of a bridge across the Monongahela River between the borough of Glassport and the city of Clairton, in the Commonwealth of Pennsylvania;

H. R. 8530. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River near Cedar Bluff, in Cherokee County, Ala.;

H. R. 8531. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road, between Talladega and Shelby Counties, Ala.;

H. R. 8726. An act authorizing Oscar Baertch, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis.;

H. R. 8740. An act granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River, in Cook County, State of Illinois;

H. R. 8743. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, Minn.;

H. R. 8818. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La.;

H. R. 8837. An act authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain and operate a bridge across the Mississippi River at or near Cassville, Wis.;

H. R. 8896. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia road, in Escambia County, Ala.;

H. R. 9036. An act to increase the salary of the Librarian of Congress;

H. R. 9064. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River at or near Pell City, on the Pell City-Anniston road, between Calhoun and St. Clair Counties, Ala.;

H. R. 9139. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Cumberland River on the Lafayette-Celina road in Clay County, Tenn.;

H. R. 9196. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Decatur-Kingston road in Roane County, Tenn.;

H. R. 9842. An act to provide for the survey, appraisal, and sale of the undisposed lots in the town site of St. Marks, Fla.;

H. R. 9849. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Quincy, Ill.; and

H. R. 10715. An act to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edwards	McKellar	Shortridge
Barkley	Ferris	McMaster	Simmons
Bayard	Fess	McNary	Smith
Black	Fletcher	Mayfield	Smoot
Blaine	Frazier	Metcalf	Steck
Blease	George	Neely	Steiwer
Borah	Glass	Norbeck	Stephens
Bratton	Gould	Norris	Swanson
Brookhart	Greene	Nye	Thomas
Broussard	Hale	Oddie	Tydings
Bruce	Harris	Overman	Tyson
Capper	Harrison	Phipps	Wagner
Caraway	Hawes	Pine	Walsh, Mass.
Copeland	Hayden	Pittman	Walsh, Mont.
Couzens	Heflin	Ransdell	Warren
Curtis	Johnson	Reed, Pa.	Waterman
Cutting	Jones	Robinson, Ark.	Watson
Dale	Kendrick	Robinson, Ind.	Willis
Deneen	Keyes	Sackett	
Dill	King	Sheppard	
Edge	La Follette	Shipstead	

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present.

HOUSE BILL REFERRED

The bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

PROPOSED INVESTIGATION OF PUBLIC UTILITIES

Mr. BLAINE. Mr. President, I desire to read for the RECORD and for the benefit of the Senate certain excerpts from a letter of William Green, president of the American Federation of Labor, and to make the reference intelligible I desire to inform the Senate that the matter to which the excerpts relate is the resolution introduced by the Senator from Montana [Mr. WALSH] providing for an investigation by the Senate of the power utilities of the country. On February 15 last the senior Senator from Indiana [Mr. WATSON], chairman of the Committee on Interstate Commerce, asked and obtained unanimous consent to have inserted in the RECORD a telegram. I will read the telegram:

MIAMI, FLA., *January 29, 1928.*

Hon. JAMES E. WATSON,
United States Senate, Washington, D. C.:

The executive council of the American Federation of Labor favors an investigation of power companies, but it believes such investigation should be made by competent experts free from partisan political significance.

WILLIAM GREEN,
President American Federation of Labor.

In a letter dated February 29 to myself Mr. Green, as president of the American Federation of Labor, said:

There is nothing in the telegram sent Chairman WATSON—

The telegram which I have just read—

that would justify the conclusion that the executive council of the American Federation of Labor believed that the Federal Trade Commission or any other special governmental body should be chosen to make the investigation provided for. No reference was made to the Federal Trade Commission by the executive council in its consideration of this matter. I am sure it was the opinion of the members of the council, when it considered the subject of an investigation of power interests, that said investigation would be made under the direction of a Senate committee by competent experts qualified to delve into the ramifications of the power interests and to make public the facts for public use and public consideration. It is difficult to understand how any other construction could be placed upon the attitude of the executive council. No construction other than the one I have herein set forth is justifiable. * * * No Member of the United States Senate had any authority to misinterpret the telegram sent by direction of the executive council, to put any other construction upon it than I have herein explained, or to question the sincerity or motives of the members of the executive council of the American Federation of Labor.

Mr. WATSON. Mr. President, while the Walsh resolution was being considered by the committee I received hundreds of letters and telegrams from all parts of the country in regard to the resolution, some one way and some another. Some of them I had inserted in the RECORD and others I did not. The telegram from Mr. Green came to me as I sat here, addressed to me as chairman of the Interstate Commerce Committee. I had it inserted in the RECORD. I placed no interpretation whatever upon it, and I did not ask anybody else to construe it one way or the other. It speaks for itself, and whatever it says, of course, is subject to Mr. Green's interpretation, but I put no interpretation upon its language.

SUPPLEMENTAL ESTIMATE OF APPROPRIATION—EIGHTH INTERNATIONAL DAIRY CONGRESS (S. DOC. NO. 68)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation, amounting to $10,000, for the fiscal year 1929, to be immediately available, to cover the expenses of the United States in participating in the Eighth International Dairy Congress, to be held in Great Britain during June and July, 1928, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a resolution of the Senate of Porto Rico, which was referred to the Committee on Territories and Insular Possessions and ordered to be printed in the RECORD, as follows:

SENADO DE PUERTO RICO,
San Juan, P. R.

I, José Muñoz Rivera, secretary of the Senate of Porto Rico, do hereby certify that the following resolution was approved by the Senate of Porto Rico on February 14, 1928:

Resolution to reaffirm Concurrent Resolution 6, entitled "Concurrent resolution to request the Congress of the United States to amend, reenact, and add certain sections to the organic act of Porto Rico," approved August 18, 1925, and for other purposes

The Senate of Porto Rico, affirming once more its sentiments and aspirations in favor of full and complete self-government for Porto Rico,

Resolves:

1. That Concurrent Resolution 6, entitled "Concurrent resolution to request the Congress of the United States to amend, reenact, and add certain sections to the organic act of Porto Rico," approved August 18, 1925, and it hereby is reproduced and confirmed anew; and consequently that the senate lend its most decided support to the approval of the several bills introduced in the House of Representatives of the United States by the Resident Commissioner of Porto Rico in Washington asking for reforms in the organic act so that Porto Rico may choose its own governor by popular election and obtain complete self-government.

2. That the Senate of Porto Rico make its own and ratify the cable which was sent by the president of the Senate and by the speaker of the House of Representatives of Porto Rico to the President of the United States relative to the speech made by him before the Pan American Congress now in session in Habana, Cuba.

3. That a protest be made by cable against the bills introduced by Senator BINGHAM which seek to restrict the powers of the Legislature of Porto Rico in the matter of budgets and appropriations and to except certain privileged taxpayers from the effect of the decision of the Supreme Court of the United States on the interpretation of the Butler bill amending the organic act of Porto Rico, which are matters of local interest and should remain within the exclusive jurisdiction of the legislature.

4. And, further, that a copy of this resolution, after being translated into English, be sent to the President of the United States, to the Resident Commissioner for Porto Rico in Washington, to the President of the Senate and the Speaker of the House of Representatives of the United States, to the chairman of the Committee on Insular Affairs of the House, and to the chairman of the Committee on Territories and Insular Possessions of the Senate.

In witness whereof I have hereunto set my hand and caused to be affixed the seal of the Senate of Porto Rico, at the city of San Juan, on this the 20th day of February, A. D. 1928.

[SEAL.] JOSÉ MUÑOZ RIVERA,
Secretary Senate of Porto Rico.

The VICE PRESIDENT also laid before the Senate cablegrams, which were referred to the Committee on Territories and Insular Possessions and ordered to be printed in the RECORD, as follows:

SAN JUAN, P. R., *March 5, 1928.*

Hon. PRESIDENT, MEMBERS, SENATE,
Washington, D. C.:

Liga Social Sufragista, Porto Rico, begs approval amendment section 35, Porto Rico organic act, introduced by Senator BINGHAM.

RICARDA RAMOS, *President.*

SAN JUAN, P. R., *March 5, 1928.*

PRESIDENT, MEMBERS, SENATE,
Washington, D. C.:

We beg you amend organic act Porto Rico granting woman suffrage Porto Rico, beginning 1928.

MILAGROS B. MEWTON,
President Pan American Association Women, Porto Rico.

Mr. SIMMONS presented a memorial of sundry citizens of North Carolina, remonstrating against alleged religious intolerance on the part of the Rumanian Government, which was referred to the Committee on Foreign Relations.

Mr. COPELAND presented a petition of sundry citizens of Ulster County, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

He also presented a resolution adopted at a meeting of the Property Owners' Protective Association, of Kenmore, N. Y., favoring retention of the 1890 census as the basis of immigration quotas, without the national-origins provision contained in existing law or other restriction of a discriminatory nature, which was referred to the Committee on Immigration.

Mr. WARREN presented a resolution of the Lions Club of Kemmerer, Wyo., favoring the making of more adequate appropriations for forest-reserve work, which was referred to the Committee on Appropriations.

He also presented a telegram in the nature of a petition from the president of the Wyoming Society, Sons of the American Revolution, favoring restrictive immigration laws and the ex-

tension of quota restrictions to Mexican citizens, which was referred to the Committee on Immigration.

He also presented a resolution of the Lions Club of Kemmerer, Wyo., favoring provision for a forest experiment station for the intermountain region, which was referred to the Committee on Agriculture and Forestry.

He also presented resolutions adopted by the Chamber of Commerce of Cheyenne and the Lions Club of Kemmerer, in the State of Wyoming, favoring the making of increased appropriations for construction of designated highways on Federal reservations, which were referred to the Committee on Post Offices and Post Roads.

Mr. WILLIS presented petitions of sundry citizens of Bethel and Eaton, in the State of Ohio, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. CAPPER presented a petition of sundry citizens of Weir City, Kans., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. WATERMAN presented a petition of sundry citizens of Denver, Colo., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. FESS presented petitions of sundry citizens of the State of Ohio, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. BRUCE presented a petition of sundry citizens of Baltimore, Md., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

DRAINAGE CENSUS

Mr. FLETCHER. Mr. President, I present a communication from the secretary of the board of commissioners of Everglades drainage district, Tallahassee, Fla., together with a resolution adopted at a meeting of the board held February 28, 1928, relative to a drainage census, which I ask may be printed in the RECORD and referred to the appropriate committee.

There being no objection, the communication and accompanying resolution were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

STATE OF FLORIDA,
BOARD OF COMMISSIONERS OF EVERGLADES DRAINAGE DISTRICT,
Tallahassee, Fla., March 1, 1928.

Hon. DUNCAN U. FLETCHER,
United States Senator, Washington, D. C.

MY DEAR SENATOR: At a meeting of the board of commissioners of Everglades drainage district, held February 28, 1928, a resolution was adopted relative to drainage census, and I was directed to forward inclosed copy to you for your consideration.

Yours very truly,

J. STUART LEWIS, *Secretary.*

Memorandum of resolution in re United States drainage census

Whereas there has been contained in former laws of Congress relating to making of decennial censuses a provision as follows:

"SEC. 8. Inquiries shall be made as to the quantity of land reclaimed by irrigation and drainage and the crops produced; also as to the location and character of irrigation and drainage enterprises, and the capital invested in such enterprises"; and

Whereas H. R. 393, making provision for the fifteenth and subsequent decennial censuses for the United States, does not contain the clause carried in former acts making appropriation for and instructing the taking of a drainage census in connection with the general census; and

Whereas board of commissioners of Everglades drainage district are of the opinion that by reason of the present and ever-increasing importance of drainage in Florida, the great amount of money involved in present enterprises, the many millions of acres now under drainage protection and increasing in area year by year, the protection of such lands from the effects of water for sanitary and agricultural purposes as conducive to the public health, convenience, and welfare, and for public utility and benefit, all with the purpose of making the said lands better suited for settlement, cultivation, and improvement, justifies the inclusion of drainage and reclamation in the provision for a census of the United States: Now therefore be it

Resolved, That the Senators and Representatives from Florida in the Congress of the United States be, and they are hereby, urged to secure a clause in the bill (H. R. 393) making provision for a census to include drainage and irrigation similar to that contained in the act providing for the Fourteenth Census of the United States.

HOMICIDES BY FEDERAL OFFICERS

Mr. TYSON. Mr. President, I am in receipt of a letter from the Nashville Bar and Library Association in which it is stated that at a recent meeting of the board of directors of that association there was a discussion "as to the fact that there seems to be an increasing number of murders by Federal officers and possemen without any substantial number of convictions, and the directors felt that they should formally adopt a resolution protesting against the defense of all such officers by the Federal Government irrespective of their apparent guilt or innocence, in the hope that some steps might be taken by the Secretary of the Treasury or Congress to rectify the present existing situation."

The letter is accompanied by a resolution adopted by the association referred to. I ask that the letter and the accompanying resolution may be printed in the RECORD and referred to the Committee on the Judiciary.

There being no objection, the letter and resolution were referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

NASHVILLE BAR AND LIBRARY ASSOCIATION,
Nashville, Tenn., February 11, 1928.

Hon. L. D. TYSON,
United States Senator, Washington, D. C.

DEAR SIR: At a recent meeting of the board of directors of the Nashville Bar and Library Association, composed of Messrs. Alfred T. Adams, Elmer D. Davies, W. M. Fuqua, John Bell Keeble, Louis Leftwich, W. E. Norvell, jr., and W. J. Wade, there was a heated discussion as to the fact that there seems to be an increasing number of murders by Federal officers and possemen without any substantial number of convictions, and the directors felt that they should formally adopt a resolution protesting against the defense of all such officers by the Federal Government, irrespective of their apparent guilt or innocence, in the hope that some steps might be taken by the Secretary of the Treasury or Congress to rectify the present existing situation.

I might further add that it appeared to be the general consensus of opinion of the board of directors that the jurisdiction of the Federal courts in trying cases against Federal officers or cases against others involving crimes against Federal officers should be limited rather than extended, as is now being sought by Attorney General Sargeant in his request to Congress to pass a bill making it a Federal offense to kill a Federal officer in order that justice may be better attained, as it apparently can be in the State courts.

In accordance with the directions contained in said resolution, I am herewith inclosing a certified copy of same.

Yours very truly,

NASHVILLE BAR AND LIBRARY ASSOCIATION,
ELMER D. DAVIES, *Secretary.*

Be it resolved by the directors of the Nashville Bar and Library Association, That they condemn and deprecate unlawful homicide either by private citizens or officers and they greatly deprecate the fact that while a substantial number of State officers have been convicted in State courts for unlawful homicide, practically all Government officers and possemen who have been accused of murder and indicted in the State courts, whether their victims were justifiably killed or not, have had their cases removed to the Federal courts throughout the country and it seemingly has been difficult to secure convictions; be it further

Resolved, That they consider it an unhealthy condition that district attorneys of the United States should lend their assistance in defending all of such cases, irrespective of merit, so removed to the Federal court, in that juries naturally feel that the prosecuting officer of the Government would not be defending unless an investigation had disclosed an apparent lack of guilt on the part of the officer; they realize that under section 771 of the Revised Statutes and other statutes it has been held to be the duty of district attorneys to defend such officers unless otherwise instructed by the Secretary of the Treasury; that, in their opinion, the Secretary of the Treasury should have each and every case carefully investigated and should instruct the district attorneys not to defend any such case where it is readily apparent that the killing was unjustified and that the officer was either guilty of murder in intentionally shooting one simply endeavoring to escape from arrest for the commission of a misdemeanor or was guity of manslaughter in using firearms in a reckless manner calculated to take human life. Or, if the Secretary of the Treasury will not so act, then that the Congress of the United States should repeal the said removal statute, Thirty-sixth Statute at Large, page 1097; be it further

Resolved, That in the opinion of the directors of the Nashville Bar and Library Association, the people of the United States can only be protected from the repetition of such unlawful acts by such action on the part of the Secretary of the Treasury or Congress and that the Secretary of the Treasury and each Member of Congress from this State

be furnished with a copy of this resolution certified under the hand of the secretary of this association.

I, Elmer D. Davies, secretary of the Nashville Bar and Library Association, hereby certify that the above is a true and correct copy of a resolution adopted by the board of directors of the Nashville Bar and Library Association at its regular meeting on Thursday, February 9, 1928, and as shown by the minutes of said meeting.

ELMER D. DAVIES.

COVE CREEK DAM

Mr. TYSON. Mr. President, I also have a letter from Mr. O. K. Leach, secretary of the Coal Creek Civitans, inclosing a certified copy of a house joint resolution, No. 50, passed by the last Legislature of Tennessee recommending that the name of the proposed Cove Creek Dam site be changed to Coal Creek Dam site. I ask that the letter and accompanying resolution be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the letter and accompanying resolution were referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

FIRST NATIONAL BANK,
Coal Creek, Tenn., March 3, 1928.

Hon. LAWRENCE D. TYSON,
United States Senator, Washington, D. C.

DEAR SENATOR: Inclosed you will find a certified copy of a joint resolution passed by the last Legislature of Tennessee recommending that the name of the proposed Cove Creek Dam be changed to Coal Creek Dam.

We will deeply appreciate the favor if you will use your best efforts to have this name changed in accordance with this resolution.

Yours very truly,

O. K. LEACH,
Secretary Coal Creek Civitans.

STATE OF TENNESSEE,
DEPARTMENT OF STATE.

To all to whom these presents shall come, greeting:

I, Ernest N. Haston, secretary of state of the State of Tennessee, do hereby certify that the annexed is a true copy of House Joint Resolution 50, acts of 1927, the original of which is now on file and a matter of record in this office.

In testimony whereof I have hereunto subscribed my official signature and by order of the governor affixed the great seal of the State of Tennessee at the department in the city of Nashville this 1st day of March, A. D. 1928.

[SEAL.]

ERNEST N. HASTON,
Secretary of State.

House Joint Resolution 50

Whereas the United States surveyors and certain power companies have surveyed a site for a dam to be located on Clinch River near the city of Coal Creek, Anderson County, Tenn., and which location for a dam site is commonly called the Cove Creek Dam site; and

Whereas this dam is located within 4 miles of the city of Coal Creek, which is the nearest city or town to the proposed dam, and the city of Coal Creek is located on the Southern and Louisville & Nashville Railroads and the Dixie Highway; and

Whereas there is so much similarity between the names of Cove Creek and Coal Creek, and there have already been much confusion over these names, whether the dam site is Cove or Coal Creek, and the proposed dam site being located between where the streams of Cove Creek and Coal Creek empty into Clinch River, and the dam site being on Clinch River and not on either of these creeks; and the name of Coal Creek and the location of this city being well known over the State of Tennessee and surrounding States, and the location of the dam would be more easily ascertained if named for the city of Coal Creek: Therefore be it

Resolved by the House of Representatives of the General Assembly of the State of Tennessee (the Senate concurring), That we favor and desire, and we recommend to the Government surveyors and Federal authorities, that the name of the Cove Creek Dam site be changed to the Coal Creek Dam site.

Adopted April 26, 1927.

SELDEN MAIDEN,
Speaker of the House of Representatives.
HENRY H. HORTON,
Speaker of the Senate.

Approved April 27, 1927.

AUSTIN PEAY, *Governor.*

TRAINING OF RESERVE OFFICERS

Mr. COPELAND. Mr. President, I have here a letter in the nature of a petition from Lieut. Col. Weston Jenkins, president of the New York State Reserve Officers' Association of the United States. It is a very interesting comment upon the discussion which took place here relative to the relationship between the correspondence training during the year and the period of active duty. It is so illuminating that I should like to have this letter printed in the RECORD in connection with my remarks and referred to the Military Committee.

There being no objection, the letter was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

NEW YORK STATE ASSOCIATION,
RESERVE OFFICERS' ASSOCIATION OF THE UNITED STATES,
March 3, 1928.

Senator ROYAL S. COPELAND,
United States Senate, Washington, D. C.

DEAR SENATOR COPELAND: Permit me, on behalf of the Reserve Officers' Association of New York State, to express our appreciation to you for your stand in regard to the Thomas amendment. It is also a pleasure to note that you informed the Senate that your colleague, if he were present, would also have voted for that amendment.

It was my privilege to be ordered to active duty at Plattsburg last year in command of the Three hundred and ninetieth Infantry, which, as you know, is a reserve regiment. The Regular Army turned over the citizens' military training camp entirely to the Three hundred and ninetieth Infantry, and with this reserve regiment we inducted, processed, equipped, and initiated the training of 1,600 boys. The work was done to the satisfaction of Colonel Hughes, the commanding officer of Plattsburg Barracks, and paralleled in two weeks exactly the work that would have to be done in a time of emergency over the first two months. We all came home feeling that we had never spent a more profitable two weeks, both from the standpoint of military experience and personal satisfaction in accomplishment, and I certainly believe that no equivalent amount of money is better spent for the national defense than the modest sums which are used for active-duty training of reserve units.

I wish also to state that on my own behalf and on the part of the Reserve Officers' Association of New York State you may rest assured that all reserve officers attending camp this year will justify your faith in the project by the intensive work they will put upon it.

From perusal of the CONGRESSIONAL RECORD I think that both in the House and in the Senate there is a little misconception as to the relationship between correspondence training during the year and the period of active duty. In my judgment it is a mistake to say that the active-duty training is wasted unless an officer has applied himself to correspondence courses, etc., during the year. Of course, the ideal in this respect is an officer that will take up the correspondence courses and pursue them earnestly during the winter, attends conferences and other methods of military instruction provided by the Regular Army, and then goes to camp for 14 or 15 days and takes the active duty training. This is the ideal. However, the art of war is an exceedingly practical matter. Its most important phase, particularly in the lower ranks, is the handling of men, the habit of command, the ability to make decisions quickly, and this can only be acquired by practical work with troops. There are many officers and, during my experience in the World War, many excellent officers, who have not a studiously inclined mind. Theoretical study is a very difficult thing for them, but take such an officer and put him in the field with troops and he is in his element. Therefore, I would say that, while highly desirable to have officers take both the theoretical and practical instruction, I do not think that active-duty training is in any way wasted when it is given to an officer who is in earnest about it but not studiously inclined.

Pardon the length of this letter, but I feel that this whole question of the reserve project is so important that every phase of it should be carefully explained.

Respectfully yours,

WESTON JENKINS,
Lieutenant Colonel, Infantry Reserve,
President New York State Association, R. O. A.

CHAIN NEWSPAPERS—DINNER TO O. G. VILLARD

Mr. BLEASE. Mr. President, I ask leave to have two short articles, which I send to the desk, read by the Secretary.

The VICE PRESIDENT. Without objection, the Secretary will read, as requested.

The Chief Clerk read as follows:

[From the Evening Star, Washington, D. C., Friday, March 2, 1928]

VILLARD ATTACKS CHAIN NEWSPAPERS—NATION EDITOR CONDEMNS OUTSIDE CONTROL OF DAILIES AT TESTIMONIAL

The "chain" newspaper, which has been extending its hold rapidly throughout the United States during the past 10 years, represents a dangerous trend in American journalism, Oswald Garrison Villard, editor of the Nation, said last night at a dinner given in his honor at the Washington on the tenth anniversary of his editorship of that paper.

The point has been reached, Mr. Villard said, where some of the largest American cities no longer have a locally owned newspaper alive

to local interests but only papers owned and, to a large extent, edited in other cities, whose owners regard them solely as money-making organs.

PAPERS EASY TO ACQUIRE

There are two ways, he said, by which outside interests obtain control of the newspapers of a city. The first is to purchase outright. The second is to purchase by forming a stock company financed by selling preferred stock to local people, while the outside interests retain control by keeping all the common stock.

"A wealthy man," he said, "easily could purchase all the daily and weekly papers in States such as Idaho or Wyoming and thus completely control public opinion in those States. I am not sure but that a man like Henry Ford, if he wished to do so, could even purchase all the newspapers in Michigan, with the possible exception of the Detroit News, and thus dictate public opinion in one of the most important States in the Union."

STRIKE PROBE RELATED

He said he knew of one instance where certain power interests had purchased all the papers in a large California city and 15 other papers in that section of the State with the object of controlling public opinion.

Senator NYE, of North Dakota, was toastmaster at the dinner. Zona Gale and Carl Van Doren also spoke. Senator WHEELER, of Montana, told of his participation of the recent senatorial investigation of the Pennsylvania strike situation. He found the strikers, he said, living in conditions of extreme poverty and the strikebreakers imported by the companies held virtually as slaves.

[From the Washington Daily News, Friday, March 2, 1928]

GRIP ATTACKS SPEAKERS' TABLE AT DINNER TO THE NATION'S EDITOR

That was an odd but interesting gathering at the Nation dinner in the Hall of Nations last night, and my goodness, I thought they would never get through their dessert. We went in for the speeches after the dinner, which about 45 others did, too, and waited without until the last drop of demi-tasse was consumed.

The first people I saw were Doctor and Mrs. White, of St. Elizabeths; Peter Borras, of the Madrillion; and Frank R. Jelleff.

So that's the radical Oswald Garrison Villard, editor of the Nation, and what a peaceful gentle soul he is, you say.

GERM SHIPPED HERE

Well, I'm glad the grip germ did not get him, for it seemed to have attacked the speakers' table with a vengeance.

Senator NORRIS, who was to have presided, lost his voice and couldn't come, and Heywood Broun succumbed to the grip, I understand.

Senator NYE, the young and charming Senator from North Dakota, presided instead. He tried a little too hard to speak well, but now and then forgot himself and suggested a very human and delightful personality.

Carl Van Doren, who has a heavy head of hair and horn-rimmed glasses like General Lejeune but is nothing like him, said Heywood Broun meant to come but he knew he wasn't coming, and I'm glad he did, for then we wouldn't have heard Mr. Van Doren's charming talk.

SENATOR WHEELER FORGOT HIMSELF

Senator WHEELER made some delightful pokes at the Republican Party, but unfortunately thought he had to speak longer and got lost in a rather bitter attack on some Republican leaders.

I was interested in every single word Oswald Villard had to say, and so was everybody else, including Mrs. Harriman, who sat between him and Senator WALSH of Montana. Young BOB LA FOLLETTE, just below them, looked bored, but that may be his natural expression, and Zona Gale read her speech—and most too hesitatingly.

There were in the gathering Mr. and Mrs. Frederic William Wile, of course, and Mr. Finnerty and Maurice Long, and Janet Richards.

Abby Scott Baker and Interstate Commerce Commissioner and Mrs. Lewis was there, and I saw Drew Pearson and young Robert Pell, jr.

I liked the Nation already, but I'm going to read more regularly. I forgot to remind you that the dinner was in honor of Mr. Villard's tenth anniversary with the magazine, and it was at the Washington Hotel.—M. B.

THE AGRICULTURAL SITUATION

Mr. BLEASE. Mr. President, I present certain newspaper articles relative to the agricultural situation, which I ask may be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Dorchester County Record, March 1, 1928]

CARLOAD SHIPMENTS OF SWEET POTATOES—FOUR MOVING FROM ST. GEORGE THIS WEEK AT 50 CENTS A BUSHEL

County Agent T. M. Cathcart has been busy this week shipping sweet potatoes. He expects to ship three cars of banked sweet potatoes and a car of cured potatoes, and also a carload of mixed pea and soy bean hay.

He secured a price of 50 cents a bushel for banked sweet potatoes, with the hampers thrown in free of charge. This price of 50 cents net for banked sweet potatoes is bringing out quite a quantity for shipment.

He made arrangements to secure 5,000 hampers for shipment of all No. 1 potatoes, and asks all farmers who have potatoes for sale to get in touch with him.

[From the Dorchester County Record, March 1, 1928]

Here is an item of news from Chesterfield, S. C., to which Dorchester County Record invites the attention of its farmer readers:

"Two solid carloads of poultry amounting to 20,000 pounds and representing nearly $15,000 were bought in this section of the county within three days. The last car was loaded here this afternoon and shipped to Philadelphia. These are the first two cars to be shipped this year. However, there will be more cars to take up the spring supply of fryers. These two cars boost Chesterfield County's total up to 20 cars within the last two years."

Chesterfield farmers are raising poultry in quantity for carload shipments. Those carloads are never gotten up from the few hens the average farmer lets his wife have around the place.

The significant fact is that those carload shipments of poultry are bringing into Chesterfield County as much cash money as the boll weevil infested cotton of this county is bringing into it. And poultry can be raised and shipped every month in the year. There is always a market for it.

[From the Dorchester County Record, March 1, 1928]

FARM OUTLOOK—THE PROSPECT FOR 1928—EVERY FARMER SHOULD CAREFULLY STUDY THIS ARTICLE

(Prepared by Clemson College experts)

This report is made with the object of informing the farm interests of the State of certain conclusions drawn from a study of facts and conditions that influence South Carolina agriculture. The report was prepared in the various agricultural divisions of the college. In its preparation use was made of the facts given in the national Agricultural Outlook for 1928 and of other facts applying more specifically to South Carolina. It is expected that an Outlook statement may be made each year hereafter and that its scope may be broadened, so that it will serve as a source of information, and to some extent as a guide, for planning farm operations.

GENERAL FARM SITUATION IN SOUTH CAROLINA

The past year was "a boll-weevil year" for the entire coastal plains area and cotton growers are somewhat discouraged, while the Piedmont farmers are feeling better over a better crop and larger income than they have had for several years. In the tobacco-growing territory the effect of this will probably tend to cause an increase in tobacco acreage at the expense of cotton, notwithstanding the prospect for lower prices on flue-cured types of tobacco if there is any considerable increase of acreage over the entire flue-cured area. While cigarette consumption is increasing, it is reported that stocks of flue-cured tobacco are increasing more rapidly.

However, in a choice of cash crops, the veteran tobacco growers may figure that their chances with tobacco are as good as with cotton, considering that cotton is subject to price fluctuation as well as boll-weevil damage. The tobacco growers who pay attention to quality, yield per acre, and prevention of disease will continue to hold the leadership in production through periods of low prices and if anybody is forced out of production it will be those who follow slipshod methods whether in this State or some other.

"More than one crop" is fast becoming the rule in the coastal plains. Farmers are specializing in some one crop other than cotton, and this is being done by communities or regions. Asparagus, tobacco, hogs, poultry, and various truck crops are being perfected as a source of income by farmers in one or more counties of this section of the State.

In the Piedmont additional sources of income are being developed somewhat more slowly and in a more generalized way. Fruit crops, truck for local markets, dairying on a small scale, poultry raising, and the growing of more feed crops seem to offer the most likely opportunities for additional income.

FARM LABOR AND EQUIPMENT

The labor supply in South Carolina in 1928 will be largely determined by local conditions. That is to say, in sections immediately adjoining industrial centers or near extensive public-construction work, there will probably be local shortage of labor. The State has sufficient agricultural labor to care for the probable acreage of cultivated crops.

In those communities where the probable labor supply is insufficient to care for the normal cultivated acreage, it will pay farmers to prepare for the cultivation of their crops by securing labor-saving machinery, so that the available labor may care for a normal acreage. Where land is plentiful and labor scarce, the growing of crops that have a smaller labor requirement per acre should be considered. Of course, the growing of such crops would have to fit into a balanced system of farming.

COTTON

The present indication is that the 1928 cotton crop will be sold on a market that is feeling the influence of a smaller carry over than was the case with the 1927 crop, and about the same probable consumption as during the preceding year.

The South Carolina production is but a small factor in determining the market price, which is fixed on a basis of world supply and demand. There are at least two factors other than acreage which will determine production in this State the present year. These are amount of fertilizer used and boll weevil damage. The fertilizer applied to cotton largely determines the acre yield, other factors remaining constant.

Due to the fact that the farmers of the State as a whole received greater returns for the 1927 cotton crop than was anticipated at planting, the fall outlook was for greater consumption of fertilizer in 1928. When fertilizer prices are relatively high as compared with cotton prices, farmers tend to reduce their purchases of fertilizer; while if the opposite relationship exists, buying of fertilizer is heavier. The farmer estimates the profitableness of different applications at different prices of fertilizer and of cotton. Since the cotton market has declined 6 to 8 cents from the prices of last fall, the present prospect for the total amount of fertilizer to be used is not as great as was the late fall prospect.

The following extract on the boll weevil situation is quoted from the National Outlook: "The yield per acre will depend to a material extent upon the abundance of boll weevils. Weevils undoubtedly entered hibernation in the fall of 1927 in larger numbers and with greater vitality than for several years."

The individual grower should acquaint himself with the quality of cotton he produces, so that he will be in a position to demand the premium that the quality of his cotton warrants and seek a market where this is paid.

The corn-production problem of the South Carolina farmer is entirely different from that of the Corn-Belt farmer. In this State the production of corn is amost entirely for home consumption, very little being sold out of the State.

The present acreage of corn in South Carolina is more than sufficient to meet all State needs were the yield per acre increased to the point of economic production. The individual farmer's problem is, therefore, to get more acre yield at low acre yield at low cost per bushel.

SMALL GRAIN

The production of the small grains in South Carolina is mostly for home consumption, so that the individual farmer is not as much concerned in market prices as determined by the world market as is the midwest farmer. Our problem is one of economic production or increased acre yield.

A sufficient quantity of small grain should be produced to meet all needs for home use. Within reason the higher the acre yield the less it will cost to produce the quantity needed. Individual farmers should consider substituting oats for corn where it has been found possible to produce oats at a lower cost per unit of feed than corn.

GRAPES

Grapes should be planted only for local or near-by market. There is very small acreage grown in this State compared to peaches and in many communities no grapes are grown. It is not advisable to ship the varieties we grow in this State to northern markets. The acreage of California grapes is too much larger for profitable prices and our grapes can not compare with the California type as a dessert grape.

STRAWBERRIES

The outlook is fair in the six second early States, Southern California, Tennessee, Arkansas, South Carolina, North Carolina, and Virginia. The indicated acreage of 54,200 in 1928, while larger than in 1925, 1926, or 1927, does not seem excessive, unless an unusual season causes abnormal competition from Louisiana. The lower price in some States in 1927 may partly be explained by the unusually large yield per acre.

WATERMELONS

There seems to be no reason for reducing the acreage in South Carolina. If the growers will improve the quality of their product and ship only melons averaging 24 pounds or larger, they should have no reason to expect other than satisfactory prices with the present acreage.

SWEET POTATOES

The growers in South Carolina need to produce more No. 1 potatoes, which should reduce their cost of production. They should also use proper storage methods. Unless they do, satisfactory prices can not be expected with the present acreage.

There are many places in the State, however, where many vegetable crops can be grown for a local market at a profit. The grower will have to decide for himself whether or not crops are being raised in sufficient quantities in his locality. A survey of local conditions should be made in order to determine just how much of a demand can be expected and how many acres of these crops may be planted.

For those who live on heavily traveled roads there is good opportunity to sell vegetables at roadside market houses. This method of disposing of vegetables and fruits is largely used in the North and East. For those who produce quality vegetables, display them in an attractive manner, and charge a fair price it should prove remunerative. In many localities there are good openings for the production and sale of certain crops, but such conditions can only be found by an intelligent investigation.

Roadside markets provide an excellent outlet for fruits, and even more so than for vegetables, and where conditions are suitable for this method of marketing it would seem advisable to plant fruits of all different kinds adapted to that particular section. For best results with roadside markets one should have a succession of crops that would enable one to keep the roadside house supplied throughout the summer months with fruits and vegetables. The longer such markets are kept open during the year the better they become advertised, and this will help to obtain trade. Roadside market houses should be attractive and need not be expensive.

HOGS

In 1925–26 the high prices of hogs stimulated hog production to such an extent that we now have what is generally considered an overproduction. The swine industry is passing through the low period of its cycle. In 1927 there were from 6 to 8 per cent more pigs raised in the United States than in 1926. With corn prices 20 per cent higher and hog prices 30 per cent lower than last year, the corn-hog ratio is not as favorable for feeding hogs. Indications are that in 1927 there will be no decrease in corn acreage, but there will be a decrease in the number of hogs produced. This will make the corn-hog ratio more favorable for hog feeding.

It is encouraging to note that even during these low prices of pork the demonstration-fed hogs in this State have returned well above $1 per bushel for corn, and almost without exception the demonstrators have made money on their hog-feeding operations. It is predicted that in the next two years history will repeat itself and there will be considerably more money made on hogs than has been made this year. The hog cycle extends over a period of from three to five years. Since the cycle has now swung to its low level, the next two or three years should be exceptionally favorable for economical pork production. We may expect higher prices and greater profits for the years 1928–29 than we have had for the year 1927.

SHEEP AND WOOL

Breeding ewes are exceptionally hard to buy, high-grade ewes ranging in price from $14 to $16 per head. This is due to the fact that sheep producers in all of the sheep-producing States are trying to enlarge their flocks, hence the demand for ewe stock. Since 1922 the number of ewes in the United States has increased at the rate of 1,000,000 head per year. On January 1, 1928, the lamb crop estimates showed an increase of 6.5 over January 1, 1927.

With the increase in the supply of spring lambs from California and other spring lamb producing areas it is quite probable that the spring advance in price this year will be somewhat less marked than usual. In South Carolina the farmers have an opportunity to produce a better grade of lambs than they have been producing, consequently they are in position to make as much, if not more, on their spring lambs than they have been making. In view of the fact that California must ship her spring lambs practically across the United States for the best markets, South Carolina has a decided advantage from the standpoint of geographical location or nearness to market.

At this particular time it does not seem wise to go into the sheep business on a big scale, but it is a splendid time to gradually grow into the business and be in line for the higher prices which will come later.

The wool situation seems to be somewhat different from the lamb situation inasmuch as the outlook for wool prices indicates an advance; supplies abroad are light and foreign markets continue strong. There is also very little surplus wool in the United States and the textile centers seem to have renewed their confidence in the manufacture of woolen goods.

MULES

For the past few years mule production has on the average been unprofitable, consequently large numbers of farmers in mule-producing sections have discontinued the keeping of breeding animals. It is therefore probable that in the near future there will be fewer work animals than are needed. It would be a wise policy for the farmers of the South to replace the old animals by younger animals which would be serviceable over a longer period of years. By making this substitution when mules are relatively low in price there will be a considerable saving. Good roads and the adaptation of motor power to a great variety of farm work has been the chief cause for the oversupply of mules and the low prices of same.

BEEF CATTLE

In 1928 the market supply of cattle will probably be smaller than in 1927. The reason for this is that the number of cattle and calves on farms the country over January 1, 1928, was the smallest number since 1912. With the exception of 1921, the total slaughter of cattle and calves each year since 1917 has exceeded the number of calves born. The number of cattle on feed in the Corn Belt January 1, 1928, was 6

per cent below January 1, 1927. Stockers and feeders for the coming year will probably sell slightly in advance of the 1927 market. It appears that the beef-cattle industry is now at its lowest point in numbers of cattle. The beef-cattle cycle usually extends over a period of from 14 to 16 years and, judging from the past, it is expected that beef cattle will bring good prices for the next several years, and the cattle market for the next 12 months will probably remain steady, with fewer fluctuations than it usually has. This outlook for beef-cattle producers and cattle feeders is encouraging. The most difficult part of the cattle-feeding operations in South Carolina for the next years will be to buy the feeders at a reasonable price. Experienced cattlemen report that, as a general rule, there is more money in feeding cattle when they are relatively high in price than when they are relatively low.

DAIRYING

The dairy industry as a whole is on as strong a basis as a year ago. Expansion will be rather limited, due to insufficient cows. The high price of beef cattle seems to make it advisable to save heifer calves that are sired by good bulls in order to replace inferior cows now being milked while they can be sold for beef at good prices.

Since South Carolina is importing approximately $10,000,000 worth of dairy products a year, it seems that considerable expansion in this field for the State is advisable, if feed crops sufficient to care for the dairy cows are grown at home. Summer and winter legumes, including alfalfa in the Piedmont, seem to offer a good basis for some expansion in dairy production. There are creameries enough to assure markets for all the butterfat produced. There is a larger demand for milk to be manufactured into cheese, condensed milk, and butter. This demand is created by the increased consumption of fresh-fluid milk and sweet cream in the large centers of population which have reduced the opportunity for turning out these manufactured products in the old dairy sections of the country, due to the increased price that is paid on the open market for these fresh products.

An opportunity is especially offered farmers to increase their own supplies of milk and its products in order to more nearly meet their table demands.

The State now has 160,00 milk cows, and since we have 172,000 farms it is evident that many thousands of these farms do not have a family milk cow. The average family in the United States to-day spends 24¾ of every dollar used for the purchase of food supplies for dairy products. If this proportion of the grocery bill can be furnished farm families by producing their daily supplies at home it would materially reduce cash outlay for groceries needed on the farm.

EGG AND POULTRY

Conditions appear favorable for poultry producers in South Carolina during the coming year. With no noticeable increase in hens and pullets on farms throughout the country egg prices should remain strong, especially during the first part of the year. Indications are favorable for an increase in egg storage, which should tend to hold up prices during the season of heaviest production.

Stocks of dressed poultry are 18 per cent below those of last year. This condition should be reflected in higher prices for both broilers and cull hens.

Since South Carolina is a poultry and egg importing State, based on yearly production and consumption, there is ample opportunity for an expansion of the poultry business on a profitable basis, provided efficient production practices are followed. These include keeping standard-bred birds of high production, proper houses, suitable rations made up largely of home-grown feeds, rational culling, and attention to management and disease and parasite control.

REPORTS OF COMMITTEES

Mr. HALE, from the Committee on Naval Affairs, to which was referred the bill (S. 1955) for the relief of Lieut. Charles Thomas Wooten, United States Navy, reported it with an amendment and submitted a report (No. 467) thereon.

He also, from the same committee, to which was referred the bill (S. 2410) to amend section 1440 of the Revised Statutes of the United States, reported it without amendment and submitted a report (No. 468) thereon.

Mr. FESS, from the Committee on the Library, to which was referred the bill (S. 1369) to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington, reported it without amendment and submitted a report (No. 469) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (S. 2859) for the relief of Francis J. Young, reported it without amendment and submitted a report (No. 470) thereon.

Mr. DENEEN, from the Committee on Claims, to which was referred the bill (H. R. 6579) for the relief of James W. Kingon, reported it without amendment and submitted a report (No. 471) thereon.

Mr. BAYARD, from the Committee on Claims, to which was referred the bill (S. 2788) for the relief of Charlie McDonald, reported it without amendment and submitted a report (No. 472) thereon.

Mr. GEORGE, from the Committee on Military Affairs, to which was referred the bill (H. R. 4702) for the relief of Benjamin S. McHenry, alias Henry Benjamin, reported it with amendments and submitted a report (No. 473) thereon.

Mr. WATERMAN, from the Committee on Claims, to which was referred the bill (S. 2126) to provide for compensation for Ona Harrington for injuries received in an airplane accident, reported it without amendment and submitted a report (No. 474) thereon.

Mr. NYE, from the Committee on Claims, to which was referred the bill (H. R. 2809) for the relief of the heirs of Jacob Thomas, reported it without amendment and submitted a report (No. 475) thereon.

Mr. WATERMAN, from the Committee on Claims, to which were referred the following bills, reported adversely thereon:

A bill (S. 50) for the relief of the Security National Bank, of Lawton, Okla. (Rept. No. 476);

A bill (S. 1642) for the relief of William Volkert (Rept. No. 477); and

A bill (S. 2419) for the relief of R. Depue (Rept. No. 478).

RIGHTS OF WAY OVER VICKSBURG NATIONAL PARK

Mr. FLETCHER. From the Committee on Military Affairs, I report back favorably without amendment the bill (H. R. 11197) to authorize the Secretary of War to grant rights of way to the Vicksburg Bridge & Terminal Co. upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss., and I submit a report (No. 465) thereon. I call the attention of the junior Senator from Mississippi [Mr. STEPHENS] to the bill.

Mr. STEPHENS. Mr. President, I ask unanimous consent for the present consideration of the bill just reported by the Senator from Florida.

Mr. SMOOT. I should like to know what the bill provides.

The VICE PRESIDENT. The bill will be read.

The Chief Clerk read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and empowered to grant to the Vicksburg Bridge & Terminal Co., a corporation organized and existing under the laws of the State of Delaware, its successors and assigns, rights of way, in such location and under such conditions and regulations as are deemed advisable by the Secretary of War, for the construction, maintenance, and operation of railroad, telegraph, telephone, street car, water, gas, oil, and electric light and power lines, and a highway for vehicular traffic upon, over, and across the Vicksburg National Military Park in the county of Warren, State of Mississippi: *Provided*, That such construction, maintenance, and operation shall not interfere with the use of said military park for the purpose for which established: *And provided further*, That any and all work that may be required by the Secretary of War to be performed by the Vicksburg Bridge & Terminal Co., its successors and assigns, shall be without expense to the United States.

SEC. 2. That any other person, firm, corporation, copartnership, or association organized or existing under the laws of any State or Territory of the United States, or the trustees, lessees, or receivers thereof, having a franchise for the operation of railroad, telegraph, telephone, street car, water, gas, oil, and electric light and power line or lines may, upon obtaining a license from the Secretary of War, use the facilities mentioned, or any of them, upon payment to the Vicksburg Bridge & Terminal Co. of just compensation for such use; and if the parties concerned can not agree upon the amount of such compensation, the sum or sums to be paid for the said use shall be fixed by the Secretary of War.

SEC. 3. That no part of such rights of way as may be granted by the Secretary of War under the provisions of this act for the purposes aforesaid shall be used for any other purpose or purposes, and if any part thereof shall be so used, or shall cease to be used for the purposes for which granted, such part shall revert to the United States.

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. SMOOT. I will ask the Senator if the bill is in regular form and has it been drawn up by the department?

Mr. STEPHENS. Yes, sir; and it meets the approval of the department.

Mr. SMOOT. Then, I have no objection to the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MENOMINEE RIVER BRIDGE, WISCONSIN AND MICHIGAN

Mr. DALE. From the Committee on Commerce I report back favorably without amendment the joint resolution (H. J. Res. 176) granting consent of Congress to an agreement or compact between the State of Wisconsin and the State of Michigan for the construction, maintenance, and operation of a highway bridge across the Menominee River, and I submit a report (No. 466) thereon.

I call the attention of the Senator from Wisconsin [Mr. BLAINE] to the joint resolution.

Mr. BLAINE. Mr. President, I ask unanimous consent for the immediate consideration of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the consent of Congress of the United States be, and it is hereby, given to the States of Wisconsin and Michigan to enter into the agreement or compact executed by the State highway commissioner of the State of Wisconsin and the Highway Commission of the State of Michigan pursuant to authority of chapter 87 of the Wisconsin statutes, and the authority of Act 354 of the public acts of 1925, and Special Act 98 of the public acts of 1927 of the State of Michigan: *Provided*, That nothing therein contained shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of said agreement, which agreement is in words and figures as follows:

AGREEMENT

MENOMINEE-MARINETTE BRIDGE AT BRIDGE STREET RELOCATION WISCONSIN HIGHWAY COMMISSION WITH MICHIGAN STATE HIGHWAY COMMISSIONER

This agreement, executed this 14th day of January, 1927, by and between Frank F. Rogers, State highway commissioner of the State of Michigan, with offices at Lansing, Mich., party of the first part; and the Wisconsin Highway Commission, with offices at Madison, Wis., party of the second part:

Witnesseth that:

"Whereas the existing interstate bridge, crossing the Menominee River at Bridge Street and joining the municipalities of Marinette, Wis., and Menominee, Mich., is in an unsafe condition and requires early reconstruction; and

"Whereas a proper plan for reconstruction involves a relocation and includes a grade separation and expensive approach fills and properly extends as a project from the center of Dunlap Square in the city of Marinette to the center line of Ogden Avenue in the city of Menominee; and

"Whereas the State boundary line, as determined by the United States Supreme Court in a late decision, lies entirely north of the proposed actual structure spanning the Menominee River, and thereby complicates the respective responsibilities of the two parties hereto both as regards construction and maintenance obligations.

"Now, therefore, it is hereby agreed:

"1. That this project shall, subject to changes to be hereafter mutually agreed upon as signified by joint approval of all subsequent plans and estimates, be built in accord with the preliminary plans prepared by the first party and marked "Exhibit A" and approved by the second party and hereto attached and considered as an integral part of this agreement, and that the detailed plans and specifications for the project shall be prepared by the first party subject to the approval of the second party.

"2. That each party shall either directly or through the respective cities, townships, and counties within which the work is situated, furnish and bear the full cost of all right of way and abutting and property damages arising from or necessary to the execution of the plans as they may be finally, mutually, and jointly approved by the said parties, as applying to property situated on the side of the existing interstate boundary line subject to the jurisdiction of the respective parties hereto or the respective cities, townships, and counties within the respective States.

"3. That aside from the stipulations stated in item 2 above, the entire cost of fully executing the project shall be borne equally by the respective parties hereto and that to this end any contribution or assessment, to be hereafter paid by the Chicago & North Western Railway Co. and/or by the Chicago, Milwaukee & St. Paul Railway Co. and/or by any other public-utility company affected by the project, shall be credited equally to the shares of the parties hereto and, further, that any contribution or assessment, which may be arranged by either party to be paid by a county, township, or municipality within the respective States, shall be guaranteed by the respective parties hereto, and that all payments and transactions in the handling of the construction of this project shall be directly between the parties hereto, each of whom agrees to act as its own collecting agent in dealing with the other contributing parties in their respective States.

"4. All contracts shall be let jointly by the first and second parties hereto, who shall jointly constitute the first party to all such contracts, and no contracts shall be let until after formal approval of awards by each party. The work of construction shall be administered under the joint supervision of the first and second parties as first party of all of the aforesaid contracts to be let under the terms of this agreement, but the second party hereto agrees that its inspection and supervision shall be administered through the representatives of the first party and not through direct dealings with the contractors, and that any matters of dispute in regard to the administration of the contracts shall be adjusted jointly by the bridge engineers of the respective parties hereto. Each party may retain such engineering assistance in supervising the work as it may deem necessary, and the cost of such engineering, including office work and administration as may become necessary, shall be considered a legitimate charge to the project. Estimates to the contractor shall be paid direct by each party hereto, each in the amount of 50 per cent of the total estimated amounts due under the provisions of the specifications of the first party and as approved by the second party, all estimates being prepared by the first party at two-week intervals or thereabouts, approved by the first party and submitted to the second party for approval, the second party making payment direct to the contractor on approval of estimates, and the first party likewise making payment to the contractor on receipt of copies of the estimates after being approved by the second party. Authorizations for extra work will be handled in the same manner as the original contracts. The engineering costs on this project will be considered as including expenditures made by each party prior to the date of the execution of this agreement as well as all such costs subsequent thereto.

"5. The work to be covered by this agreement is further indicated in an approximate preliminary estimate of cost known as Exhibit B, based on Exhibit A, attached herewith and considered as an integral part of this agreement. This estimate is for preliminary budget purposes, it being agreed that the shares of the respective parties shall be based upon the actual cost of the work.

"6. For the purpose of future maintenance it is hereby agreed that the first and second parties shall, upon completion of this project, each maintain that portion of the project (or bear the expense of doing so) which lies north and south, respectively, of the center of the third span measured from the north end of the river structure.

"7. That the first and second parties shall, through their respective United States Senators and Congressmen from the districts within which the project is situated, take the necessary steps to secure the approval of the United States Congress at the 1928 session, authorizing the construction of said project, and also the necessary approval of the United States War Department.

"In witness whereof the parties hereto have on the day first above written caused this agreement to be executed by their proper authorities.

"FOR THE STATE OF MICHIGAN,
"By FRANK F. ROGERS,
"*State Highway Commissioner.*
"FOR THE STATE OF WISCONSIN,
"By WISCONSIN HIGHWAY COMMISSION,
"(Signed) C. R. WEYMOUTH, *Secretary.*

"[SEAL.]

"Approved as to form.

"LINCOLN E. BRANDT,
"*Legal Adviser.*

"Approved December 1, 1927.

"(Signed) C. A. MELICK,
"*Bridge Engineer, Michigan State Highway Department.*"

SEC. 2. That the right to alter, amend, or repeal this resolution is hereby expressly reserved.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 3484) for the conservation of rainfall in the United States; to the Committee on Agriculture and Forestry.

A bill (S. 3485) to amend section 4426 of the Revised Statutes of the United States, as amended by the act of Congress approved May 16, 1906; to the Committee on Commerce.

By Mr. FLETCHER:

A bill (S. 3486) granting an increase of pension to Emma M. Backus; to the Committee on Pensions.

A bill (S. 3487) to amend section 3207 of the Revised Statutes, as amended by section 1030 of the act approved June 2, 1924; to the Committee on Finance.

By Mr. WILLIS:

A bill (S. 3488) granting a pension to Herbert A. Maloney (with accompanying papers); and

A bill (S. 3489) granting an increase of pension to Jennie Lyle (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH of Massachusetts:

A bill (S. 3490) granting a pension to Catherine Sullivan; to the Committee on Pensions.

A bill (S. 3491) for the relief of Fannie C. Marden; to the Committee on Claims.

By Mr. COPELAND:

A bill (S. 3492) granting an increase of pension to Lina Kimball; to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 3493) granting a pension to Daisy Lee Demaree; to the Committee on Pensions.

By Mr. CUTTING:

A bill (S. 3494) granting a pension to Edward Sherlock; to the Committee on Pensions.

By Mr. SHIPSTEAD:

A bill (S. 3495) granting an increase of pension to Carrie Bissell (with accompanying papers); to the Committee on Pensions.

By Mr. HALE:

A bill (S. 3496) for the relief of Annie A. Divney; to the Committee on Commerce.

By Mr. REED of Pennsylvania:

A bill (S. 3497) to authorize an appropriation to complete the purchase of real estate in Hawaii;

A bill (S. 3498) to authorize an appropriation to complete construction at Fort Wadsworth, N. Y.; and

(By request.) A bill (S. 3499) to provide for the appointment from civil life of John Hafner to the grade of warrant officer, United States Army, and immediate retirement from the service; to the Committee on Military Affairs.

A bill (S. 3500) for the relief of the city of Philadelphia; to the Committee on Claims.

By Mr. FRAZIER:

A bill (S. 3501) to provide for the construction of a boarding school for Indian children at Belcourt, in the Turtle Mountain Indian Reservation, State of North Dakota;

(By request.) A bill (S. 3502) to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service; and

(By request.) A bill (S. 3503) to authorize the Secretary of the Interior to purchase certain lots in the city of Needles, San Bernardino County, Calif., for Indian use, and authorizing an appropriation of funds therefor; to the Committee on Indian Affairs.

By Mr. KEYES (for Mr. MOSES):

A bill (S. 3504) granting an increase of pension to Hattie C. White (with accompanying papers); to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 3505) authorizing the Great Falls Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Potomac River at or near the Great Falls (with an accompanying paper); to the Committee on Commerce.

By Mr. BORAH:

A bill (S. 3506) for the relief of the owners of the British steamship *Larchgrove;* and

A bill (S. 3507) for the relief of the Eagle Transport Co. (Ltd.) and the West of England Steamship Owners' Protection & Indemnity Association (Ltd.); to the Committee on Foreign Relations.

By Mr. PINE:

A bill (S. 3508) to increase the number of members of the Federal Reserve Board, to make the board more representative, to provide for the proper control and equitable distribution of the credit supply, to establish closer contact between the Congress and its agent, the Federal Reserve Board, and for other purposes; to the Committee on Banking and Currency.

By Mr. RANSDELL:

A bill (S. 3509) authorizing the Secretary of Commerce to sell at private sale a portion of the Point aux Herbe Lighthouse Reservation; to the Committee on Commerce.

By Mr. GOODING:

A bill (S. 3510) authorizing the Secretary of the Interior to contract with the North Side Canal Co. with respect to the construction of certain works on the Minidoka reclamation project; to the Committee on Irrigation and Reclamation.

By Mr. CARAWAY:

A bill (S. 3511) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the White River at Cotter, Ark.; to the Committee on Commerce.

By Mr. REED of Pennsylvania:

A joint resolution (S. J. Res. 107) authorizing and requesting the Postmaster General to design and issue a special postage stamp in honor of the one hundred and fiftieth anniversary of the encampment of Washington's army at Valley Forge, Pa.; to the Committee on Post Offices and Post Roads.

By Mr. EDGE:

A joint resolution (S. J. Res. 108) tendering the thanks of the American people and the Congress of the United States to the Hon. Charles Evans Hughes, chairman of the delegation of the United States of America to the Sixth International Conference of American States; to the Committee on Foreign Relations.

FLOOD CONTROL

Mr. McKELLAR submitted two amendments intended to be proposed by him to the bill (S. 3434) for the control of floods on the Mississippi River from the Head of Passes to Cairo, and for other purposes, which were ordered to lie on the table and to be printed.

STANDARDS FOR HAMPERS, ROUND STAVE BASKETS, ETC.

Mr. BRUCE submitted an amendment intended to be proposed by him to the bill (S. 2148) to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes, which was ordered to lie on the table and to be printed.

AMENDMENTS TO MUSCLE SHOALS RESOLUTION

Mr. NORRIS, Mr. McKELLAR, and Mr .METCALF each submitted an amendment intended to be proposed by them, respectively, to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, which were severally ordered to lie on the table and to be printed.

Mr. TYSON. I submit an amendment that I wish to offer to Senate Joint Resolution 46 relative to Muscle Shoals. I ask that the amendment be considered as read, that it lie on the table, and be published in the RECORD.

There being no objection, the amendment was ordered to lie on the table, to be printed, and to be printed in the RECORD, as follows:

On page 5, after line 10, insert the following new sections:

"SEC. 9. In order to assure the farmers of the country of the Government's earnest endeavor to aid in the production of cheap fertilizers on a large scale and with the least practicable delay, and to encourage private manufacturers to use new methods in the endeavor to produce cheap fertilizers on a large scale—

"(a) As soon as the Secretary of Agriculture shall be reasonably satisfied from the experimentation and investigations herein provided for that a method has been found for the fixation of nitrogen which can be successfully used at Muscle Shoals, Ala., in the large scale manufacture of cheap fertilizers for the use of the farmers of the country, there shall be turned over to him nitrate plant No. 2 and all other Government property, real and personal, and all materials and equipment connected therewith and necessary in the operation of said nitrate plant No. 2, and not required in the operation of Dam No. 2 and steam plant No. 2, and not otherwise disposed of hereunder, to be used for the purposes hereinafter provided.

"The Secretary of Agriculture shall forthwith proceed to lease said nitrate plant No. 2 and such other property and equipment at Muscle Shoals as may be required and necessary of the property which has been turned over to him, for a term not exceeding 25 years, beginning not later than January 1, 1931, if practicable, upon such terms and conditions as will promote the large-scale production and distribution, by such method as he has found most successful, of cheap fertilizer for the use of farmers.

"Such lease may, in the discretion of the Secretary of Agriculture, in order to cheapen the cost of fertilizers, be without rental charge to the lessee, except reasonable charges to cover depreciation, maintenance, and repair of the plant as determined by the Secretary of Agriculture.

"The terms and conditions of the lease shall include (1) a stipulation and guaranty with suitable surety bond that the lessee will, as rapidly as possible, increase the production of such plant so that not less than 5,000 tons of fixed nitrogen will be produced and used in the manufacture of fertilizer during the first year of the lease; and, if same can be sold, in each year thereafter an amount exceeding by at least 5,000 tons the amount produced during the preceding year, until 40,000 tons per annum are produced and so used; (2) a stipulation and guaranty that the lessee will install the necessary plant and equipment to carry out the foregoing provisions with respect to production; and (3) a stipulation and guaranty that fertilizers will be manufactured and sold by the lessee at the lowest possible prices consistent with a fair and reasonable return for the lessee, such prices to be equitably adjusted in the lease.

"If no satisfactory lease can be made, subject to condition (2) above, the Secretary of Agriculture may agree to equip the plant for the lessee, as and when needed, from appropriations made out of the special fund.

"(b) If the Secretary of Agriculture is unable to lease nitrate plant No. 2 upon satisfactory terms and conditions, as above provided, he shall proceed as soon as practicable to operate or contract for the operation under his direction of such plant for the manufacture of fertilizers for farmers by the method found by him to be most successful, and dispose of fertilizers so manufactured at cost, which shall include all expenses in connection with the manufacture, except that no allowance shall be made on account of rental for plant No. 2. Within appropriations therefor, the Secretary of Agriculture shall increase the production of such plant so that not less than 5,000 tons of fixed nitrogen will be produced and used in the manufacture of fertilizers during the first year of operation, and, if same can be sold, in each year thereafter an amount exceeding by at least 5,000 tons the amount produced during the preceding year until 40,000 tons per annum are produced and so used.

"(c) For the purposes herein provided, whether nitrate plant No. 2 is operated by a lessee or by the Secretary of Agriculture, the Secretary of Agriculture is authorized to make alterations, modifications, or improvements in existing facilities or equipment of nitrate plant No. 2, to dispose of any part of such facilities, and to construct and operate new equipment and facilities; except that any equipment or facilities now at nitrate plant No. 2, which the Secretary of War considers necessary to retain for the manufacture of explosives for the national defense shall not be disposed of, but shall be retained and kept at all times in a serviceable condition for use.

"(d) Moneys received by the Secretary of Agriculture from sale of fertilizers or from any sale or lease of plant or facilities under this section shall be paid into the special fund provided for in section 5 and such fund shall be available for maintenance, operation, and upkeep of the plant and equipment of nitrate plant No. 2 in addition to the purposes specified in such section.

"(e) In making any lease or any contract for power the Secretary of War shall reserve the right to recapture the amount of power which the Secretary of Agriculture shall estimate may be needed by him under the conditions of this resolution and the same shall be supplied to the Secretary of Agriculture when and as needed, and at prices specified in section 8.

"SEC. 10. The Secretary of War is authorized and directed to maintain nitrate plant No. 2 in reasonably good order and condition until disposed of as provided for in this resolution or as otherwise directed by the Congress.

"SEC. 11. In any lease or contract for power or for the operation of any of the plants herein mentioned reasonable provision shall be made for recapturing and taking over by the United States the properties herein mentioned and cancellation of any contract herein provided for, when, in the opinion of the President of the United States, the national safety or welfare requires.

"The appropriations necessary for carrying out the purposes of this resolution are hereby authorized.

"On page 5, line 11, strike out '9' and insert in lieu thereof '12.'

"On page 5, line 15, strike out '10' and insert in lieu thereof '13.'"

Mr. SMITH. I offer an amendment in the nature of a substitute for the joint resolution (S. J. Res. 46) regarding Muscle Shoals, introduced by the Senator from Nebraska [Mr. NORRIS], and ask to have it printed, printed in the RECORD, and lie on the table.

There being no objection, the amendment was ordered to lie on the table, to be printed, and printed in the RECORD, as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

DECLARATION OF POLICY

SECTION 1. It is hereby declared to be the policy of the Government of the United States to maintain and improve the plants and facilities specified in section 3 of this resolution and to operate them to the fullest extent in order to further provide for the national defense by insuring an adequate supply of nitrates for use in time of war and to promote agriculture through the development of cheaper commercial fertilizers, it being the intent of this resolution that in time of peace such plants and facilities shall be operated solely for the benefit of agriculture.

MUSCLE SHOALS COMMISSION

SEC. 2. (a) There is hereby established a commission to be known as the Muscle Shoals commission (hereinafter in this resolution referred to as the "commission") to be composed of the Secretary of War and the Secretary of Agriculture.

(b) The commission shall continue in existence for a period of 10 years unless sooner terminated by act of Congress.

TRANSFER OF PLANTS AND FACILITIES

SEC. 3. The United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith, all tools, machinery, equipment, accessories, and materials thereunto belonging, and all laboratories and plants used as auxiliaries thereto; the fixed nitrogen research laboratory; the Waco limestone quarry in Alabama; and Dam No. 2, located in the Tennessee River at Muscle Shoals, its power house, and all of its hydroelectric operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, are hereby transferred to the commission for use by it in executing the functions vested in it by this resolution.

FUNCTIONS OF COMMISSION

SEC. 4. In carrying out the provisions of this resolution all functions vested in the President by the first two paragraphs of section 124 of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916 (including such of those functions as are now being exercised by the Secretary of War and the Secretary of Agriculture, respectively), shall, subject, to the approval of the President, be exercised by the commission.

DEVELOPMENT OF POWER

SEC. 5. (a) The commission is authorized and directed to utilize to the fullest extent the plants and facilities made available to it under section 3, and to construct, maintain, and operate such additional plants and facilities as it considers necessary, for the development of power by steam or water for the purposes specified in section 6. Any excess power developed may be disposed of, under such terms and conditions as the commission may prescribe, to any State or political subdivision thereof, or to any individual, partnership, association, or corporation.

(b) The commission shall give preference, in the disposition of such excess power, to the power requirements of States, political subdivisions of States, and public-service companies.

(c) In order to dispose of such power in the manner which the commossion considers most advantageous to the United States and to the public interest, the commission may enter into leases for terms of years, may make contracts, may construct and/or operate either singly or with any State or political subdivision thereof, or any individual, partnership, association, or corporation, transmission lines or other power projects, and do all other acts which it considers necessary to effectuate the purposes of this resolution.

PRODUCTION OF FERTILIZER

SEC. 6. (a) In order to further develop the art of nitrogen fixation, experiments shall be undertaken to produce mixed fertilizers on a commercial scale, so that the actual cost of such fertilizers may be determined. Fertilizers produced as a result of such experiments shall be offered to farmers, farm organizations, and to dealers at such prices as will cover the cost of production; or in the event that the cost of production of such fertilizers is excessive, they shall be offered at prices which the commission finds fair in order to meet commercial competition. In order that definite results may be obtained in such experiments, the facilities and equipment for each such experiment shall be utilized until it is satisfactorily shown that it is or is not commercially feasible to produce fertilizers by the method or process used in such experiment. The result of each such experiment and a statement of cost and sale prices of the fertilizers so produced shall be reported to Congress in the annual report provided for in section 10.

(b) Whenever the commission determines that it is commercially feasible to produce any such fertilizer, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this resolution.

(c) The commission is authorized to make alterations, modifications, or improvements in existing plants and facilities, to dispose of any part of such facilities, and to construct and operate new plants and facilities, in order to properly effectuate the provisions of this section.

MUSCLE SHOALS FUND

SEC. 7. There is hereby established in the Treasury a fund to be known as the "Muscle Shoals fund," and all amounts received by the commission in executing the functions vested in it by this resolution, together with all amounts appropriated or made available by section 8, shall be covered into such fund, and are reserved, set aside, and appropriated to be available for use by the commission in accordance with the provisions of this resolution. If at any time the commission determines that there is accumulated in such fund an amount in excess of that necessary to carry out the provisions of this resolution, such amount shall be covered into the Treasury as miscellaneous receipts.

APPROPRIATIONS

SEC. 8. (a) All unexpended balances of the amount appropriated under section 124 of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and all unexpended balances of appropriations made for Muscle Shoals under any act making appropriations for the military and nonmilitary activities of the War Department are hereby transferred to the Muscle Shoals fund and made available for expenditure as are other amounts in such fund.

(b) There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $5,000,000, to be available until expended for the purposes of this resolution.

PERSONNEL

SEC. 9. (a) The commission may (1) appoint and fix the salaries of such advisers and experts and, in accordance with the civil service laws appoint, and, in accordance with the classification act of 1923, fix the compensation of, such other officers and employees, and (2) make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding) as may be necessary for the execution of the functions vested in the commission and as may be provided for by the Congress from time to time.

(b) The commission shall, to the extent deemed advisable by it, exercise its functions by and through the Department of War and the Department of Agriculture, and the engineering, technical, clerical, and other personnel of such departments. The Secretary of War and the Secretary of Agriculture shall detail for service with the commission such of the personnel of their respective departments as the commission deems necessary in carrying out the provisions of this resolution.

ANNUAL REPORT AND REGULATIONS

SEC. 10. (a) The commission shall submit to Congress at the beginning of each regular session a detailed report of its operations for the preceding fiscal year.

(b) The commission is authorized to make such regulations as may be necessary to effectuate the functions vested in it by this resolution.

PROVISION FOR NATIONAL DEFENSE

SEC. 11. The commission shall utilize the plants and facilities under its jurisdiction and shall dispose of the power developed under authority of section 5 in such manner and subject to the limitation that in the event of a national emergency such plants and facilities and such power shall be immediately available for use by the United States for the national defense.

SHORT TITLE

SEC. 12. This resolution may be cited as the "Muscle Shoals resolution of 1928."

Amend the title so as to read: "Joint resolution to create a commission for Muscle Shoals, and for other purposes."

CHANGE OF REFERENCE

Mr. JONES. Mr. President, some time ago I introduced the bill (S. 735) authorizing the conversion of the United States Veterans' Hospital No. 94, at American Lake, Wash., from a neuropsychopathic hospital into a general medical and surgical hospital, and authorizing an appropriation therefor. The bill was referred to the Committee on Public Buildings and Grounds. I understand, however, that the Finance Committee has dealt with measures of this kind in the past and apparently has jurisdiction over them. So I ask that the Committee on Public Buildings and Grounds may be discharged from the further consideration of the bill indicated by me and that the bill may be referred to the Committee on Finance.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, it is so ordered.

RECODIFICATION OF MARITIME LAW FOR WAR TIMES

On motion of Mr. BORAH, the resolution (S. Res. 157) favoring a restatement and recodification of the rules of maritime law in time of war was taken from the table and referred to the Committee on Foreign Relations.

INVESTIGATION OF BREAD PRICES

Mr. WALSH of Montana. Mr. President, there was transmitted by the Federal Trade Commission under date of January 11, 1928, a final report made pursuant to a resolution of the Senate, No. 163, agreed to February 16, 1924, directing an inquiry into the monopolization of the production of bread. I ask that it be referred to the Committee on Printing.

The VICE PRESIDENT. Without objection, it is so ordered.

ANNUAL REPORTS OF DISTRICT PUBLIC UTILITY COMPANIES

Mr. CAPPER. Mr. President, the law requires the public utility corporations of the District of Columbia to file with this body an annual report. All eight of the public utilities have filed with the Presiding Officer their annual reports for the year ending December 31, 1927. I ask unanimous consent that, in accordance with the usual practice, these reports may be printed as a Senate document.

There being no objection, the order was agreed to, and it was reduced to writing, as follows:

Ordered, That the annual reports of the following-named public utility companies in the District of Columbia for the year ending December 31, 1927, heretofore transmitted to the Senate, be printed as a Senate document: Capital Traction Co.; Chesapeake & Potomac Telephone Co.; Georgetown Barge, Dock, Elevator & Railway Co.; Potomac Electric Power Co.; Washington Gas Light Co.; Georgetown Gas Light Co.; Washington Railway & Electric Co.; and Washington Interurban Railroad Co.

STATISTICS RELATIVE TO UNEMPLOYMENT

The VICE PRESIDENT. Resolutions coming over from a preceding day are in order, and the Chair lays before the Senate a resolution, which will be read.

The Chief Clerk read the resolution (S. Res. 147) submitted by Mr. WAGNER February 15, 1928, as follows:

Whereas it is essential to the intelligent conduct of private and public business enterprises, to the proper timing for the inauguration of public works by the Federal Government, and the encouragement of similar undertakings by the States, to the formulation of sound economic policy, and it is prerequisite to the provision of relief against the hardship of unemployment and to the ultimate solution of the unemployment that accurate and all-inclusive statistics of employment and unemployment be had at frequent intervals; and

Whereas it is apparent that the United States is now suffering from a decided growth of unemployment, and no nation-wide statistics of unemployment in the United States are anywhere available:

Resolved, That the Secretary of Labor is hereby directed (1) to investigate and compute the extent of unemployment in the United States and make report thereon to the Senate, and together therewith to report the methods and devices whereby the investigation and computation shall have been made; (2) to investigate the method whereby frequent periodic report of the number of unemployed in the United States and permanent statistics thereof may hereafter be had and made available, and make report thereon to the Senate.

Mr. WAGNER. Very little need be said, Mr. President, for this resolution, because it speaks for itself in tones none of us can disregard. The need for the information which it requests from authoritative governmental sources is both obvious and urgent; it is reflected in the growing bread lines, in the larger number of men and women seeking work, in a constantly decreasing return for the worker, in a lowered standard of living for a large portion of our people, and in an economic loss that amounts to millions of dollars. For the present lack of such vital information I do not intend to criticize anyone, although the need has been evident for years.

It has been charged that some political scheme lurks behind this simple, humane resolution. Mr. President, if there were political advantage to be gained by an individual or a party through espousing the cause of the unemployed there would now be no need for this resolution. The problem of involuntary idleness would have been tackled long ago. This resolution speaks for millions who have no other means of self-expression. They have no great publicity organ proclaiming their plight from housetops or headlines. They can afford no expensive lobby in Washington. They can make no large campaign contributions to political parties. They ask no charity for all that; they ask what, I believe, the Government is obligated to give them—stimulation and encouragement so that they may earn their daily bread. This is not alone a humanitarian proposal; the solution of the problem of unemployment, if there is one, affects government and society as well as the individuals involved. It touches the very economic welfare of the Nation, and they are blind who attempt to look the other way when such a shadow casts its dark influence across the social and industrial order.

The situation we face now is not merely a temporary phenomenon. I believe it differs radically from the sort of unemployment which followed the armistice and the period of deflation. We are facing a change in industrial organization, and one which, in some respects, is as revolutionary as that which occurred in the beginning of the last century. Because it has come more slowly we are not so conscious of it; but it presages, in my opinion, a system that will bring new problems in its train. From farm and country there flows a steady stream of boys and girls to the city, seeking the advantages to be gained from urban life and searching for industrial or commercial employment. They no sooner reach the cities than they find small concerns becoming merged into larger and more economically operated units; they find one machine, the result of a recent invention, perhaps, accomplishing the task of a hundred workers. They are caught between the lack of opportunity on the farms at home and the Darwinian process of the survival of the fittest in the cities. Many are compelled to join the aimless floaters of society. Unless they can be given more permanent and profitable anchorage they may in time become a threat to civilized society. The evils we read about to-day on every front page at our breakfast table often spring from this very situation. If these floating fragments of our

population are to find mooring somewhere, we must provide them with some basis for security; and, with the exception of such fundamental things as religion and education, I know of no more stabilizing influence than the assurance of a steady job at a living if not what has come to be known as a "cultural wage."

The cityward drift of population, the increasing size of the industrial unit, and the corporate enterprises are making an ever-increasing proportion of our population depend upon wages as the sole means of gaining a livelihood. Wages, of course, depend upon employment; and the American workers know no greater fear than the fear of the loss of employment. If we are going to provide any basis of security for American life, we must at once begin to chart the phenomena of employment and unemployment and, in so far as it is possible, to subject them to our control. Exact information regarding the various phases of this problem is the essential need of American economic life. There can be no cure without recognition of the existence of the disease and a scientific diagnosis. Surely the genius which has created our highly complicated industrial system—one of the wonders of the world—can discover the remedy, or at least bring to bear some mitigating influence.

I note a tendency on the part of some public officials and economists to characterize as alarmists those who venture to focus attention on this unpleasant, unsolved problem; but it is one that must be faced. In a negative way President Coolidge recognized its importance in his last message to Congress, for he assigned the most important place in that message to this very question. In his very first paragraph he said:

> Wages are at a very high range. Employment is plentiful.

I wish the President would inform the Congress where he obtained that optimistic information. Where did he learn that "wages are at a high range"? Who told him that "employment is plentiful"? At a recent press conference, the press informs us, he discussed prosperity in glowing terms, but he said not a word about unemployment. Surely he has not consulted with statistical or industrial experts in his Department of Labor, for he would not have secured this information there. The data with which they would have supplied him, had he asked for it or cared for it, would have been quite different.

Let us consider how "plentiful" employment really is. As far back as last June the Commissioner of Labor Statistics would have informed the President that employment and wages were at a lower level than in 1926. Had the President studied the figures for November—the month during which he was preparing his message—he would have found that 15 of every 100 men engaged in manufacturing in 1923 had been dropped from the pay rolls by November, 1927, and that situation prevailed throughout the whole United States.

And where did he get his information concerning "the high range of wages"? I find no footnotes in the message giving his authorities. Had he consulted his own experts, including the Bureau of Labor Statistics, they would have informed him that total wages paid had declined as steadily as the volume of employment.

He could have found all kinds of evidence justifying a conclusion quite contrary to that he gave to the Congress in reporting on the state of the Union. Labor Department reports, statistics of employment offices, the human documents of welfare and charitable organizations, railroad records, industrial and commercial data, stories of business failures and farm foreclosures—all these would have spelled out for him in sharp, poignant letters that this country was then and is now in the grip of an unemployment problem so acute that it can not be neglected. Not even a believer in the most laissez-faire sort of government can disregard facts which not only picture a panorama of human hardship but reflect a situation that menaces orderly society and government.

Much evidence of unemployment has been collected and set down for all who care to consult it. I shall but summarize it briefly:

(1) Reports of the Bureau of Labor Statistics show a decline of more than 15 per cent in the number employed in manufacturing establishments. This, of course, does not completely show the extent of unemployment, for many still on the pay roll are employed only part time and are therefore partially unemployed.

(2) A decline of 13 per cent in the forces employed by Class I railroads of the country and a drop in freight-car loadings, with the lessened business activity which that portends.

(3) A sharp increase in the ratio of applicants for work to the number of positions listed by employment agencies.

(4) Account must further be taken of two additional factors, namely, that there has been at least a 5 per cent increase of population between 1923 and 1928, thereby increasing considerably the number seeking employment, and a net flow of population from farm to city of 3,100,000. Of this number, approximately 1,000,000 are in the wage-earning class.

The latest report of the Bureau of Labor Statistics, which is that for January, 1928, reveals that the barometer of factory employment continues to fall. Only a week ago the American Federation of Labor reported that one of every six of its members was out of work. Inasmuch as this applies largely to skilled labor, it seems obvious that the unskilled laborer is in an even more unfortunate position.

I can not say who furnished the President this misinformation about high wages and plentiful employment at a time when all the signs and all the evidence indicated that wages were dropping, and the ranks of the discontented were daily being recruited by new armies of the unemployed; but I do know that it was a grave responsibility to lull the Congress and the Nation into the belief that conditions were satisfactory. Its effect was to lead to congressional and national inaction, so that the crisis was permitted to become more acute. Three months, during which preliminary surveys might have been made, have slipped by; but to this day the administration has not yet decided whether to admit or deny the facts—whether to admit or deny the existence of an unemployment situation rivaling that of 1920. The administration, it would appear, is so blinded from gazing at the side of the shield which reflects prosperity that it can not bear to look upon the darker side. Conflicting reports come from the various departments charged with keeping us informed on this grave subject.

From Mr. Hoover's Department of Commerce, that watchtower of the administration that sees all, hears all, and knows all, the trumpets blare forth that all is well. Mr. Hoover's bright young men have scanned the horizon from California to Ohio, from the flooded areas to Vermont, all across the Nation, to discover not a single idle man. But if you adjust your receiver so as to tune in on the Department of Labor, you hear the admission:

"Yes; we have unemployment; why not admit it?"

Meanwhile, there come from private sources the usual mass of estimates, guesses, and surmises. Four million people, I am informed, is a conservative estimate of the number of those out of work. Four million people able and willing to work with no work for them to do.

If it is true that 4,000,000 men are out of work, it means that one of every ten of our wage earners is in idleness. We can only surmise how many are dependent upon that 4,000,000. Some say it represents a total population, men, women, and children, of 12,000,000 people, or more than the combined population of the first eight States taken in alphabetical order. If some great flood or calamity had removed such an army from productive enterprises, it would have stirred the Government and the Nation to relief measures commensurate with the problem. But because the unemployed have been with us so often in recent years, because the phenomenon is not heralded and accompanied by thunder and lightning and storm, we barely pause to pay it our respects. The Mississippi floods play no greater havoc with society than repeated epidemics of unemployment. Our social and industrial system, which is after all a delicate, tremulous thing, may yet stand or fall upon our solution of this basic, far-reaching, all-inclusive problem. With bread lines and idleness come diminution in purchasing power, a gradual slackening of business and industry and greater unemployment. Behind this economic curtain stalk misery, want, hunger, and discontent in all our cities.

Thus the vicious circle rotates as it always has during régimes of "normalcy" and so-called "economy." Twin sister to normalcy, it seems, is unemployment among a large portion of our people. The enormous loss of wealth from the present situation is almost beyond computation. Four million workers out of work who might be making an average of $5 a day represents $20,000,000 worth of earning and buying power. While our apostles of economy at Washington are doing away with drinking cups, paper clips, and pencils, and boasting of it in yearly reports, the flood gates of waste are open wide to permit the disappearance of $20,000,000 worth of human power. Millions are going without work and without sufficient food in our cities, while the farmers complain of surplus crops and consequent low prices.

Unfortunately, this administration and that which preceded it seem not to have profited from experience. More than seven years ago this country was suffering from the postwar condition of unemployment. The President called a conference to devise measures of emergency relief and methods of permanent correction. Now, is not the time to discuss whether that conference was successful in its endeavors. But we can review its discussions and accomplishments as a warning that we should not repeat the experience.

I read in the press that that conference is to be revived, or at least that one of its committees is to be resuscitated. It is not my purpose to disparage the efforts of any group of our people that take it upon themselves to attempt a solution of unemployment. But I believe that the time has now come when action must be taken, when responsibility must be placed upon the shoulders of those who are by law charged with its assumption.

Read in the light of seven years' experience one simple but fundamental idea stands out as the topmost recommendation of the conference of 1921: The need of more and better information.

Every committee, every subcommittee, and the conference itself invariably returned to this as its central theme and reiterated the common disappointment over the total lack of statistical data. Little could be accomplished because there was no basis upon which to begin. The conclusion reached was that no progress in the solution of this question could be made until accurate and nation-wide statistics of employment and unemployment conditions were available. In the report of the conference, which I have here, I find ten consecutive pages devoted to a discussion of the need of adequate information on the general subject. I ask leave at this point to print in the RECORD as part of my remarks a few excerpts from that report.

The PRESIDING OFFICER (Mr. FESS in the chair). Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

REPORT OF THE PRESIDENT'S CONFERENCE ON UNEMPLOYMENT, 1921

GENERAL RECOMMENDATIONS OF THE CONFERENCE FOR AN EMERGENCY PROGRAM

(Page 19)

(1) * * * The conference finds that there are variously estimated from three and one-half to five and one-half millions unemployed, and there is a much greater number dependent upon them.

REPORT OF THE COMMITTEE ON UNEMPLOYMENT STATISTICS

(Page 39)

* * * The first step in meeting the emergency of unemployment intelligently is to know its extent and character, yet this conference finds itself without the data even for an accurate estimate of the number out of work; nor is this the first occasion when public conferences have been embarrassed by a lack of such necessary facts.

OUTLINE OF PERMANENT EMPLOYMENT SYSTEM

(Page 77)

* * * For the purpose of bringing about coordination the Federal Government should (a) collect, compile, and make available statistical information.

EXCERPT FROM REPORT ON LONG-RANGE PLANNING OF PUBLIC WORKS

(Page 100)

(1) Fortify the United States Employment Service to enable it to obtain regular unemployment index figures, so that knowledge may be had when public work should be stimulated or retarded, based upon reliable and complete employment statistics.

REPORT ON PERMANENT MEASURES BY THE COMMITTEE ON MANUFACTURES, OCTOBER 12, 1921

STATISTICAL INFORMATION ON UNEMPLOYMENT

(Page 142)

There should be established immediately within the Department of Labor a bureau for the purpose of gathering and disseminating monthly, or as much oftener as circumstances may require, statistical information upon the state of employment, these statistics to be gathered by zones by telephone, telegraph, and wireless and distributed as weather reports are now distributed, the bureau serving as an industrial barometer for the entire Nation.

UNEMPLOYMENT AND BUSINESS CYCLES—THE LONG VIEW

DATA NEEDED TO DIRECT AND CONTROL

(Page 160)

In order to guide such a policy, it is fundamental that an accurate statistical service be organized for determining the volume of production of stocks and consumption of commodities and the volume of construction in progress through the Nation and an accurate return of the actual and not theoretical unemployment.

In the introduction to the report on "BUSINESS CYCLES AND UNEMPLOYMENT"—1923:

"The general conclusion of the committee is that as the slumps are in the main due to the wastes, extravagance, speculation, inflation, overexpansion, and inefficiency in production, developed during the booms, the strategic point of attack, therefore, is the reduction of these evils, mainly through the provision for such current economic information as will show the signs of danger and its more general understanding and use by producers, distributors, and banks, inducing more constructive and safer policies."

In the body of the recommendations made by the committee, which are signed by Owen D. Young as chairman, Clarence M. Woolley, Joseph H. Defrees, Matthew Woll, Mary Van Kleeck, and Edward Eyre Hunt, it is stated:

"Of the various data needed, statistics of employment are highly important and are being collected with increasing efficiency by the Federal Bureau of Labor Statistics. Conditions in business are invariably reflected in the volume of employment. Employment statistics that reflect the economic welfare of wage earners are information of the greatest social importance."

And again in connection with its suggestions for the solution of unemployment the committee reports:

"Certain inherent difficulties immediately become apparent. One of them, as the committee has already pointed out, is the lack of essential data to determine the amount of unemployment, not to mention the unemployment specifically due to the business cycle."

The closing paragraph of the committee's report is as follows:

"In conclusion the committee would reiterate its conviction that unless business men, banks, and others who are responsible for policies and practices in industry begin without delay to study and to act in order to meet the problem of unemployment and business cycles, solutions which may prove to be fundamentally unsound will be attempted without the benefit of practical experience. No problem before the business world to-day offers a more inspiring challenge to sound industrial leadership."

Mr. WAGNER. Mr. President, this conference, though summoned to discuss and ascertain the scope of unemployment, was compelled, for want of definite data, to report that the number of out of work was from three and a half to five and a half millions. I shall read but a single sentence from the report:

The first step in meeting the emergency of unemployment intelligently is to know its extent and character, yet this conference finds itself without the data even for an accurate estimate of the number out of work; nor is this the first occasion when public conferences have been embarrassed by lack of such necessary facts.

I do not think I am mistaken in noting a tone of caustic impatience in the criticism made by the men called to Washington to solve a problem which those in authority at the time had not even measured. It surely can be interpreted as a warning that steps should be taken and machinery established so that no similar body would be placed in the same predicament at some future date. Yet if another conference is called, it will labor under the same handicap which marked the other. For seven years that single and unanimous resolution setting forth the need of exact information has lain in some departmental pigeonhole gathering the dust of prosperity. For seven years this administration had that warning confronting it, but nothing has been done. Should another conference meet here, will it not be compelled to bemoan the unemployment crisis and then point out, in the words of its predecessor, that "the first step in meeting the emergency of unemployment intelligently is to know its extent and character"?

The purpose of my resolution is to carry out the 7-year-old suggestion—that is all. There have been seven years too many of delay. Let us do what we can to remedy the great mistake that has been made. Let us not continue stupidly to permit the plague of unemployment to find us unprepared to cope with it.

Speech making will not solve unemployment. If we are going to rely on the oratorical generalities that have characterized our sallies against unemployment in the past, we shall again fail as miserably as we have in the past. The Nation demands action by the responsible officials of the Government, and the first step that it wants them to take is to inform us how many are out of work, who are they, where are they, what work are they fitted to do, what jobs are available for them. These are questions which must be answered if we are to reduce unemployment to a minimum and give greater stability and security to American life.

We want them to erect a system that will enable us to foretell when we might expect lassitude or inactivity in private enterprise so that Government, Federal, State, and municipal, public utilities, and large private enterprise that can afford to plan in advance may step in and add impetus to the slackening wheels of industry and commerce. We want them to provide us with the information so that we can foretell when there will be undue demand upon our working forces so that the Government may step out and not add its competitive bid to the demands of private enterprise. We want information that will enable us to know the extent of displacement of workers

by reason of the advance of the technique in production and the further mechanization of industry.

The gathering of this information must be the first step. Where that will lead to no one can foretell. But that it is only a step and not the whole journey is plain. We may as well determine right here and now that we are going to wage relentless war until we abolish involuntary idleness as surely as we abolished involuntary servitude.

We need unemployment statistics for several additional reasons. In this country we have a great system of private and public machinery of relief which wants to be kept advised of the current unemployment situation and needs to have statistical material built up so that it can foretell in advance how to budget its resources, when to intensify collection, when to be less generous in its distribution, when it can afford to be liberal with the applicants for aid.

Unemployment statistics are essential to the intelligent conduct of business because unemployment curtails demand and consumption of commodities. The farmer and the business man are, therefore, entitled to know how the employment situation will affect the demand for their products and thus more intelligently to guide their production.

There have been remarks to the effect that we already have the information I am asking for. If we have any figures or data which throw light on the great question of unemployment, I would like to see them. I would like to ask those who claim to know if they can tell me how many men are out of work. Who are they? What types of workers are they? Where are they located—what sections of the country and what industries? What work can they do? Are they skilled or unskilled laborers? What are the prospects for finding them work? What attempt has been made to discover whether unemployed workers and work can be brought together? There are no answers to these questions.

Here is merely one example of the lack of definite information. On the same day there came from two governmental departments two diverse reports regarding unemployment. Dr. Julius Klein, director of the Bureau of Foreign and Domestic Commerce of the Department of Commerce, publicly advised the Nation that there was no unemployment. He said:

> What has happened to the many thousands who have admittedly been displaced in our factories by machinery? The answer is simple. They have gone into nonmanufacturing pursuits.

Secretary of Labor Davis said on the selfsame day:

> We have unemployment in this country. Everyone knows it; why not admit it?

In the next sentence Secretary Davis seems to prove the point I am trying to call to the attention of the Senate:

> As to the total number of people now unemployed, a number of estimates are going the rounds. My own guess is that these are somewhat exaggerated.

If there are definite figures and information, why these conflicting reports? Why must the Secretary of Labor, who ought to be at least the custodian of such reports, hazard a "guess" as to the number unemployed?

Even within the offices of one department there is confusion and controversy over this question. On February 17 the newspapers gave to the country the cheering news that the future of the unemployed was about to brighten. The information came from the United States Employment Service. The New York Times carried this headline: "Work increases in big industries." The Washington Star reported "A brighter outlook for future held by Federal employment agency." Yet, on the same day, the Bureau of Labor Statistics issued official reports indicating a further depression in manufacturing industries during the month of January.

In December the President said "employment was plentiful." In January two departments disagree on their conclusions and opinions. And in February a single department issues contradictory reports. There is no escape from the conclusion that accurate and precise information concerning employment and unemployment is not yet available.

I realize the difficulties incident to securing unemplyoment statistics. That is the reason I have confined my resolution to a fairly limited scope. It primarily requests the department to study the possible ways of obtaining data. It may, and I hope it will, lead to the consideration of questions of policy and improvements that will be debated on this floor. The hour is late for a country like the United States to be doing no more than brushing the surface of this problem, but surely we should make up for past delinquency.

"The old order changeth, giving way to the new." We are living in new days, new eras in fact. We are on the threshold of a new industrial age, one which can be made a blessing to mankind despite temporary hardships. To-day's unemployment is the penalty we are paying for industrial advances made during and since the war. But it is incumbent on us to keep pace with this new development. So-called cyclical unemployment or idleness caused by ordinary depressions contain their own cure as business swings upward again. But to-day's unemployment problem is not of that simple understandable kind. For that reason we can not sit back and await the upward turn of the cycle.

Nations are not made great by their machinery but by their men. We have bestowed much attention on the improvement of our machinery. Our greater task is now to focus it on the perfection of our manhood.

Mr. President, I ask to have printed as a part of my remarks communications and extracts from documents bearing on this subject.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

[From Employment in Selected Manufacturing Industries, December, 1927, United States Department of Labor, Bureau of Labor Statistics]

General indexes of employment and pay-roll totals in manufacturing industries, January, 1923, to December, 1927

[Monthly average, 1923=100]

Month	Employment				
	1923	1924	1925	1926	1927
January	98.0	95.4	90.0	92.3	89.4
February	99.6	96.6	91.6	93.3	91.0

The need is plain. Our yard is overstocked. We must sell more to keep men at work. Prices are given on inclosed card.

WOOD YARD OF THE CHARITY ORGANIZATION SOCIETY,
516 West Twenty-eighth Street, New York, N. Y.

FEBRUARY 21, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I have not had the pleasure of writing you since your election to office, but your resolution proposing an investigation of the unemployment in the United States by the Labor Department impels me to bring to your attention some facts which I have been studying for some time past. I have also written to the governor

regarding this subject, as I have previously on other questions of public welfare.

I am a member of the "Action" Membership Corporation (Inc.), an organization formed to develop ways and means to "prevent the need of charity for those willing and able to work." This refers particularly to the inclination on the part of modern employers to eliminate the middle-aged and older men and women—drawing a line in many instances at the age of 30 to 35—which is really not middle age. Such procedure seems absolutely unethical and against the best laws of efficiency and production, and certainly something should be done to curtail this growing tendency, either through legislation or otherwise.

As an example of what I contend—that there is a concerted movement working against the older men and women, enforcing hardship upon them and no doubt a representative proportion of the unemployed at this very time, which will ultimately compel them, not because they would desire it but because no other way may be open, to seek public aid—I inclose an advertisement of a commercial employment agency which appeared only last Sunday, and which definitely states that the "present-day openings are for girls 20 to 26 years." I think such advertising should be discouraged by the press and in other channels of publicity in view, first, of the distressing unemployment situation, and, second, because such agencies function under a State license for public use. I feel, too, that the condition of unemployment does not go deeply enough into the question of the large number of women out of work and that the State and Federal Government should develop emergency measures to assist them as well as men.

I believe I have given you some of the pertinent facts gathered by myself, and that you will, Senator WAGNER, after Secretary Davis presents his survey, use your good offices in bringing about some solution of this serious problem.

With best wishes for your continued success, I am,

Cordially yours,

HENRIETTE S. MICHAEL,
52½ West One hundred and sixty-ninth Street, New York, N. Y.

STATE OF NEW YORK, EXECUTIVE CHAMBER,
Albany, February 4, 1928.

Hon. JAMES A. HAMILTON,
Industrial Commissioner, 124 East Twenty-eighth Street,
New York City.

DEAR COMMISSIONER: There have been brought to my attention reports of a serious condition of unemployment affecting the city and the State of New York at the present time. I understand that some of this is caused by the drifting into New York of men from other parts of the country where unemployment is also making itself felt. Whatever the cause, there is, I believe, considerable suffering as a result.

I should like to be fully informed on these conditions at the earliest possible moment. I would ask, therefore, that you have the division of employment of your department provide me at the earliest possible moment with a report of the present situation as reflected in the employment bureaus under your department and any other sources of information which you may have.

I would ask also that you make a rapid survey of conditions in New York City, utilizing the sources of information there available.

My purpose in asking for this is to determine whether the State of New York, with its large public-works program, can do anything toward the relief of this situation.

Very truly yours,

ALFRED E. SMITH.

PART I

STATE OF NEW YORK, DEPARTMENT OF LABOR, ALBANY,
New York Office, No. 124 East Twenty-eighth Street,
New York, February 14, 1928.

Hon. ALFRED E. SMITH,
Executive Chamber, the Capitol,
Albany, N. Y.

MY DEAR GOVERNOR: In response to your request for a report upon employment conditions in New York State and New York City, the following is submitted:

As you suggested, this report falls into two parts, the first containing a report of the situation as reflected by the continuous and current reports received regularly by the State department of labor, and the information based upon your request for "a rapid survey of conditions in New York City, utilizing the sources of information there available." In addition to this quick survey of New York City, I have also caused inquiries to be made, through departmental agencies, as to conditions elsewhere in the State and these results are separately summarized.

In the beginning, it may be pointed out that the evidence at hand indicates an extensive amount of unemployment, and that serious distress has been caused. No man can safely predict the future, but it is certainly true that if the present condition is not relieved distress will increase. If industrial conditions grow worse, growing unemployment, with its attendants of want and illness, will become an inevitable result. One has to go back to 1921 to find an employment situation rivaling the present.

EMPLOYMENT IN NEW YORK STATE

No actual census of unemployment has ever been taken in New York State or any other State. In the absence of such a census it is not possible to state exactly how many employable persons are actually out of work at the present time. It is possible, however, to throw light on the matter by consideration of the known facts as to employment. These known facts fall under three headings, namely, factory employment, demand for and supply of labor at the public employment offices operated by this department, and returns as to the number and estimated cost plans for building work.

FACTORY EMPLOYMENT

From reports received regularly by the department of labor there has been evidence of declining employment in New York State. Monthly returns from a carefully chosen list of manufacturers, with approximately 500,000 employees, representative of a wide variety of industries and of localities, and including 35 to 40 per cent of all factory workers in the State, indicate that the year 1927 has been one of decreasing factory employment. Since the spring of 1926, the general level of factory employment has declined, and in December, 1927, the index of such employment was below that of December, 1921. In January, 1928, there was a further decrease of 2 per cent, bringing the index below that of January, 1921.

Over the nearly 15-year period in which these returns have been secured, it has been demonstrated that they constitute a sensitive and reliable index of factory employment. One evidence of their value is the wide publicity given them, not alone in daily papers but in trade and technical journals and in financial and commercial publications as well. Any serious decline in factory employment in New York State, where more than a million and a quarter workers are so engaged, necessarily affects employment in other lines of industry.

EMPLOYMENT IN BUILDING WORK

While the department of labor does not secure returns from building employers comparable to those received from manufacturers, it does receive returns which indicate markedly less building work in 1927 than in the preceding year. The returns received each month from the building departments of 23 cities of New York State as to building permits issued indicate a decrease in the estimated cost of such building work of 13 per cent in 1927, as compared with 1926.

EMPLOYMENT SITUATION IN NEW YORK CITY

To secure further and more detailed light on employment conditions in New York City, I called a conference in my office on February 10. At this conference there were present a committee of 12 persons, appointed by the Welfare Council of New York City; the president of the State Federation of Labor; the president of the Central Trades and Labor Council of New York City; the commissioner of the department of licenses of New York City; the superintendent of the municipal lodging house; and certain representatives of this department. Much fresh and detailed information was presented as to conditions in New York City, all of which was to the effect that unemployment in New York City is serious; that it has grown worse in recent months, and that no outlook for the better is discernible.

Those composing this committee and the specific organizations represented by them were as follows:

James A. Hamilton, industrial commissioner, State department of labor.

Committee appointed by Welfare Council of New York City:

John Philip Bramer, Catholic Charities.

Bailey B. Burritt, general director Association for Improving the Condition of the Poor.

Elizabeth Dutcher, Brooklyn Bureau of Charities.

Homer Folks, secretary State Charities Aid Association and chairman Welfare Council's Executive Council.

Capt. Burger Lindh, Salvation Army, and representing Lower East Side Community Council.

John T. Little, counsel of Seamen's Branch of the Legal Aid Society and chairman Welfare Council's section on seamen.

Solomon Lowenstein, executive director Federation for the Support of Jewish Philanthropic Societies and member Welfare Council's executive committee.

Louise C. Odencrantz, executive secretary Employment Center for the Handicapped and chairman Welfare Council's section on employment and vocational guidance.

Lawson Purdy, general director Charity Organization Society.

Frances Taussig, executive director Jewish Social Service Association and chairman Welfare Council's section on family service.

Jerome H. Bentley, activities secretary Young Men's Christian Association.

William Hodson, executive director Welfare Council.

John Halkett, president Building Trades Council of New York City.

John Ryan, president Central Trades and Labor Council.

John Sullivan, president New York State Federation of Labor.

William F. Quigley, commissioner department of licenses.

Jos. McShane, chief inspector department of licenses.

Edward E. McMahon, superintendent Municipal Lodging House.

Frederic G. Elton, bureau of rehabilitation, State department of education.

Frank Smith, Knights of Columbus.

New York State department of labor:

Eugene B. Patton, director bureau of statistics and information.

Nelle Swartz, director bureau of women in industry.

James Brady, director bureau of industrial relations.

Richard A. Flinn, chief division of employment.

Attached to this report is the memorandum prepared by the research bureau of the Welfare Council. This organization represents more than 1,000 private, voluntary, relief organizations in New York City. I can not better summarize their findings as to conditions in New York City than to quote here a part of the report of their research bureau. Thanks are due the Welfare Council for their interest and valuable assistance.

Present employment situation in New York City as reported by employment and welfare agencies:

(1) State employment service.
(2) Voluntary employment agencies.
(3) Family service agencies.
(4) Seamen.
(5) Homeless men.

The New York State employment service, voluntary employment agencies, and welfare agencies were asked to compare employment conditions as of December, 1926, and December, 1927. Their reports have been summarized as follows:

1. STATE EMPLOYMENT SERVICE

The employment service of the New York State Department of Labor gave a detailed report for its offices in Manhattan, Brooklyn, Bronx, and the office for negroes in Harlem for the five-week period from November 29 to December 31, 1926, and the corresponding period in 1927. For adults these offices recorded registrations in December, 1926, of 7,205 and in December, 1927, of 5,529, a decrease of 1,674, or 23.2 per cent. The juvenile registrations, however, showed an increase from 2,411 in December, 1926, to 2,779 in December, 1927—368, or 15.3 per cent. The total of adult and juvenile registrations—9,614 in December, 1926, and 8,508, in December, 1927—represented a decrease of 1,306, or 13.6 per cent.

Placements showed a larger falling off than registrations, the figures for adults being 5,097 in December, 1926, as compared with 2,846 in December, 1927. Juvenile placements likewise were smaller—1,714 to 1,459 in the two months. The total for placements was 6,811 in December, 1926, and 4,305 in December, 1927, a falling off of 2,506, or 36.6 per cent.

The decline in registrants may be explained by the fact that in times of serious unemployment men flock into the office, and when they hear jobs are not available, turn away without registering. When there is a fair condition of the market with some jobs available a larger proportion of the men who call make formal registration. The largest percentage of registrants is obtained when many jobs are open, since the workmen become eager to move on to better positions. In addition, space in one of the offices is limited and when it becomes congested many turn away immediately, thus reducing still further the number registering.

2. VOLUNTARY EMPLOYMENT AGENCIES

Returns were received from 33 voluntary employment agencies in New York City, 28 dealing with adults and 5 with children, showing the number of applicants in December, 1926, and December, 1927, and the placements for these months. Returns from 30 were available for a comparison of employment at the end of 1926 and 1927.

The total number of applicants for the 30 agencies could not be ascertained from the returns because of different methods of record keeping. Several agencies stated that applications had fallen off as usual in periods of unemployment, for the workers had thought it useless to register. Twenty-two of the 30 agencies reported an increased number of applicants for December, 1927, as compared with December, 1926, and 8 reported a decrease. Nine of these 22 agencies had a decrease in the number of placements. Of the remaining 13, which recorded increases both in applications and placements, 10 showed a less proportional increase for placements than for applications and 3 a greater proportional increase.

Of the 8 reporting a decrease in the number of applicants, 5 showed likewise a decrease in the number of placements, in 4 instances a greater proportional decrease than for applications.

For the whole group of voluntary agencies reporting there were 4,909 placements in December, 1926, and 5,547 in December, 1927. A number of the agencies reported that increased placements indicated that the larger number of applicants permitted better selection, and consequently that a larger proportion of the vacancies notified were filled.

Comment was made in several instances that conditions were much more serious in January than in December; employers' orders were said to be decidedly inactive.

3. FAMILY-SERVICE AGENCIES

The family-service organizations were asked to report the total number of their active "major care" cases, the number in which unemployment due to lack of work was a factor, the total number of cases receiving relief, and the total expenditure for relief. Fifteen returned reports. Of these, 13 had 21,380 active cases in December, 1926, as compared with 23,330 a year later—an increase of 9.1 per cent. Six agencies were able to give information as to the number of instances in which unemployment due to lack of work was considered a factor. They reported 1,155 instances in December, 1926, and 1,821 in December, 1927—an increase of 57.7 per cent. The increases reported by the individual agencies ranged from 36.9 per cent to 131.3 per cent. Thirteen agencies expended $157,933.25 for relief in December, 1926, and in December, 1927, $162,793.11. One agency had made a study of its own cases, because it was feeling "every evidence of the increase in unemployment." This showed for the year 1926 an increase of 11.7 per cent over 1927 in the number of families in which there was a problem of employment.

4. SEAMEN

The 10 seamen's agencies, with one exception, reported increased calls for service. Nine reported expenditures of $1,431.82 for relief in December, 1926, as compared with $2,317.41 in December, 1927, and five gave loans totaling $909.83 in December, 1926, as compared with $1,149.36 during last December. Some of the agencies that did not supply figures volunteered the information that many more seamen were applying than a year ago, twice as many according to one official.

5. HOMELESS MEN

Of four agencies dealing with homeless men, three showed an increase in the number of persons served—from 2,499 in December, 1926, to 2,922 in December, 1927. The fourth agency had a far greater number of applicants in December of 1927, but because of the scarcity of jobs the men stayed a longer time in the institution, thus reducing the total number of those accommodated.

The municipal lodging house in December, 1927, had 17,220 admissions as compared with 10,167 in December, 1926. The calendar year 1927 showed a larger number of admissions in every month than the corresponding month in either of the two preceding years.

* * * * * * *

A tabulation of the number of nonresident individuals (resident in New York less than one year) admitted to the municipal lodging house in New York City has been prepared by the research bureau of the welfare council and submitted to me to-day. For the calendar year 1927 there were 13,121 nonresidents admitted as against 7,198 in 1926, or an increase of 80 per cent.

The New York City department of licenses reported from representative private employment agencies under their supervision as follows:

Commercial agencies (supplying office workers): Ten per cent increase in the number of registered workers and 10 per cent decrease in the number of positions available.

Hotel agencies: Forty per cent decrease in number of jobs and 50 per cent increase in number of workers applying for jobs.

Domestic-servant agencies: Fewer calls for workers.

General agencies: More seekers for work than jobs available. Greater number of applicants than usual from outside of New York State.

The State Charities Aid Association has reported to me to-day a report that of 33 up-State counties reporting to them this week, 18 of them state that conditions are worse than usual at this time of year, with varying degrees of seriousness. It is most pronounced in industrial centers, due to smaller volume of employment in factories, and is most keenly felt by the unskilled, the drifters, the very young, and those with physical handicaps.

It should be pointed out that the conditions above described are not confined to New York City nor to New York State. Reports from other States, and from the United States as a whole, show a similar situation. The United States Bureau of Labor Statistics, with a nation-wide system of factory employment returns similar to that of New York State, likewise reports declining employment in 1927. The same is true of individual States.

A copy of the minutes of the conference held in my office on February 10 is herewith attached.

PART II

In addition to the statistical figures given in Part I, I have had collected by the agents of the department throughout the State the following information. It has been gathered hurriedly, but will be useful in so far as it gives a picture of conditions as they exist. The information was secured in every instance from reliable sources in each community:

BUFFALO

(Population, 538,016)

Unemployed in this city at the present time approximates 35,000 to 40,000 workers. Conditions in the chemical industry, metal and machine group, foundries, steel mills, and the building trades are way below normal for this time of year, while automotive operations and flour milling are in fairly good shape.

The pay-roll records, which comprise approximately one-third of the total number of factory workers in Buffalo, show a decline of 8 per cent in the number of employees since February, 1927, and a decline of 15 per cent since February, 1925.

Forty per cent of the leading building-trade workers are idle; approximately 8,000 unemployed. Retail conditions are not encouraging, although do not indicate a bad condition. It is, however, unsatisfactory, reflecting the result of unemployment.

Relief agencies' figures show that for the first time since 1921 the city mission has organized a bread line, feeding approximately 200 daily. The Erie County Lodging House for the first time since 1921 has opened an emergency annex. The Charity Organization Society, representing private social agencies, reports the heaviest drain on resources since 1921; 30 per cent of the applicants give unemployment as their reason for seeking aid.

The industrial-aid bureau reports the greatest unemployment since 1921.

The free State employment bureau reports 1,200 men applying for work on the three days of February 6, 7, and 8.

ROCHESTER

(Population, 316,786)

The chamber of commerce estimates 10,000 out of work in this city.

In the men's clothing industry, with Rochester the fourth largest market in the country, according to the union approximately 50 per cent of their members are out of work. The bricklayers', masons', and carpenters' unions report 50 per cent of their members out of work (11 per cent more than last year). Of the 22,000 organized trade unionists affiliated with the American Federation of Labor there has been a net decrease in employment of 5 per cent since January, 1927.

The retail stores report that with a pay roll of 7,000 at peak of employment at present time there is a decrease of 3 per cent.

For the independent building contractors, 68 per cent of those normally employed are employed at the present time.

One of the large instrument factories is endeavoring to meet its unemployment problem by part-time work. Another reports 150 applicants for work every day and no jobs.

The city manager states that he realizes that there is an acute unemployment problem and that he is endeavoring to stimulate public work to take care of a part of it.

The Social Welfare League expended for January, 1928, $13,000, as compared to $7,123 in January, 1927, and $4,519 in January, 1926. The next largest disbursement was in February, 1922, which was $8,769.

Out of 65 men applying for work to the State Employment Bureau, at least 50 per cent had been residents of Rochester for more than 16 years. Only 3 had been residents for less than a year, and the whole 65 have been out of work from two to four months.

The chief of police reports that not since 1922 has there been so many applicants for relief as within the last three months.

SYRACUSE

(Population, 182,003)

The various employers' associations estimate the unemployed as between 5,000 and 7,000, with practically one-third of them in the building trades.

The charitable organizations report that the number is greater than this; however, a number of the men applying to these organizations are men with families who are only working part time and are asking the charitable organizations to supplement their wages. Some firms distribute their work among all the workers rather than lay any off.

Seventeen employers were canvassed, representing the largest employers in Syracuse and employing mostly skilled help; they report fairly normal conditions. The unemployment exists among the building trades, casual laborers, and clerical help.

The tendency is also to take or keep on men under 50 years of age and lay off those over 50, so the over-age man is a Syracuse problem.

In the immediate territory of Syracuse, outside of Onondaga County, comes the report that conditions are worse than in Syracuse.

ALBION

(Population, 5,206)

This city has only three small manufacturing plants. One plant works full time; the two others are on half time. The chief of police reports that their police department is filled night after night with men applying for work. They are not human derelicts but factory workers out of employment who have gone to the rural communities in search of work.

BATAVIA

(Population, 15,628)

Six plants report a reduction in the number employed; one has reduced their working force 10 per cent, another 40 per cent, another has been closed for 12 weeks. The three remaining have cut their force by approximately 30 per cent.

EAST ROCHESTER

(Population, 5,883)

Employment is 50 per cent below normal in this village.

FAIRPORT

(Population, 4,441)

Of three plants canvassed one has reduced its force from 375 to 200, another is closed, and the third is normal.

GENEVA

(Population, 15,908)

It is estimated that 70 per cent of the unskilled and 10 per cent of the skilled workers are out of work.

MEDINA

(Population, 6,192)

Of four plants canvassed one is practically closed, two others are working 4 and 4½ days a week, and the fourth is normal.

UTICA

(Population, 101,604)

The secretary of the Industrial Employment Association, an association of employers, estimates 4,500 workers unemployed in this city as against 2,500 at this time last year and 6,500 in 1921. The unemployment exists primarily among the unskilled, except for the building trades.

Fifteen establishments were canvassed, all reporting normal conditions excepting one weaving mill, employing 1,551 workers on full time in 1921, now employs 1,501 on a three and one-half day week and in two weeks will be compelled to shut down completely; and two foundries report employment 30 per cent below normal for this time of year, while in the metal trades, outside of foundries, employment is about normal for this time of year.

In the clothing industry work in the factories is normal; work sent to the home for finishing, etc., has practically been discontinued.

The Associated Charities report 175 men applied for work in December, 1927; 199 in January, 1928; these figures do not include homeless men. That while heretofore the Associated Charities were asked only to supplement men's wages, now they are asked to assume responsibility for family.

ELMIRA

(Population, 48,359)

The free State employment bureau reports that 137 men and women applied for work on four days in February, 1928; for the same four days in February, 1927, 56 men and women applied. The great majority of the unemployed in Elmira are among the unskilled, excepting for railroad men. The trade-unions report 300 of their members out of work.

BINGHAMTON

(Population, 71,915)

The chamber of commerce estimates almost 3,000 men and 500 women out of work.

The department of charities reports that during January, 1928, they gave aid to over 200 families, which is larger than the usual number.

DUNKIRK

(Population, 19,912)

Of three of the largest employing firms canvassed, one company reports 2,000 out of employment; two others are operating with 75 per cent of their normal working force.

ALBANY DISTRICT

From a selected list of firms in Glens Falls, Middletown, Fort Edward, Johnstown, and Amsterdam, conditions are reported about normal for this time of year.

Hudson Falls reports one sulphite mill closed, and one business man reported that in his 32 years' experience he had not known so many men to be out of employment. Of two firms canvassed, Gloversville reports one firm running on part time and one firm employing from 10 to 15 per cent less than a year ago.

Plattsburg reports normal conditions, as does Malone. Of two large firms in Schenectady canvassed, one reports worse conditions than existed in 1921, and another firm which in October, 1927, employed 19,600 now employs 1,200 fewer, some of whom are on part time.

ALBANY

(Population, 117,820)

The State employment bureau reports a decrease in employment of 4 per cent since January, 1927.

Printing and paper products report an improvement in conditions in last few months. Textiles report some part-time work. Shirts and collars, tobacco, the chemical industry, and cement are normal. The metal and machinery industry reports a decrease in employment of about 15 per cent, while the railroad-equipment shops report a short-work week and a lay off of almost a week each month for each employee.

In the electrical-equipment industry, while practically all workers have been retained on the pay roll, a great many are experiencing short-time employment.

In the building trades about one-third are out of work.

NEWBURGH AND KINGSTON

(Population, 30,419 and 28,099)

Report that the employment of women in their vicinities is normal, but that their problem is the lack of work for heads of families.

POUGHKEEPSIE

(Population, 35,670)

Of two firms canvassed, one reports a pay roll of 900, the lowest figure since 1921. Another firm employing 637 workers is adopting a four-day week instead of laying anyone off.

Usually at this time of the year the plants are running to such capacity that they absorb any surplus labor, but not this year. It is estimated that between 200 and 300 are unemployed.

NEW YORK CITY

(Population, 5,873,356)

A serious unemployment condition exists for the colored population. The Urban League reports that while in January, 1927, they had 365 applicants for every 100 jobs, in January, 1928, there were 1,075 applicants for every 100 jobs.

The Bronx Y. M. C. A. reports in January, 1927, 568 applicants for every 100 jobs; in January, 1928, there were 776 applicants for every 100 jobs.

The Vocational Service for Juniors reports that in January, 1927, for minors between 14 and 18 years there were more than enough jobs to go around; in January, 1928, there were no jobs for at least one-third of the children.

The American Legion of Bronx County reports on an average of 100 veterans a week seeking employment; 90 per cent of these are married men with families.

Two large commercial employment agencies placing office and clerical help report 100 per cent increase in the number of applicants for jobs; that these represent no more high-type people than are usually looking for positions but many more so-called second-rate workers.

The Sixth Avenue agencies for hotel and restaurant workers report a stream of applicants in and out all day long, with no available jobs. A great many of them are from outside New York City. Men will take jobs at any wages.

The commissioner of licenses reports that in the commercial employment bureaus in this city the demand for workers is 10 per cent less than last winter, whereas the number seeking work is 10 per cent greater.

Of the skilled workers, the Employing Printers' Association reports more applicants for work in January, 1928, than any month during the last six years.

The Amalgamated Clothing Workers, with a membership of 45,000, report 15,000 out of work, with the year 1927 a "very bad year."

The president of the State Federation of Labor reports an acute employment situation among their members, excepting the United Hat Workers, who are better off than they ever were.

Respectfully submitted.

JAMES A. HAMILTON.

FACTS FOR WORKERS

(A monthly review, published by the Labor Bureau (Inc.), New York, February, 1928)

UNEMPLOYED 4,000,000?

In view of the widespread complaints of unemployment, the Labor Bureau (Inc.) has attempted to estimate the number of those who have lost their jobs and been unable to find others since 1923. Unfortunately, no official figures are available on this subject, since in the United States there is no national system of employment exchanges where those looking for work register. In this respect we are behind most other industrial countries.

We do, however, have some indication of the number employed in various industries. The census gives us these total figures every few years; there is a national index of employment in factories; we have current information about the railways; we can estimate what has happened to coal mining and building employment on the basis of the changes in output. We also know something about the drift of population off the farms, and on this basis can estimate the number going to the city to look for work. Using this material, we have compiled the following table:

Estimated decrease in employment, 1923–1927

	Number employed		Approximate change (increase +) or decrease (−))
	1923	1927 (estimated)	
Manufacturing industries	8,778,156	7,768,668	−1,000,000
Railways (Class I)	1,880,000	1,774,000	−100,000
Coal mines	862,536	787,150	−100,000
Farm workers moved to town			−1,000,000
Building workers	1,415,975	1,701,248	+300,000
Total	13,936,667	12,031,066	−1,900,000

It should be noted that while the number of those employed in building was larger in 1927 than in 1923, it had shrunk from the totals of 1925 and 1926.

These figures account for considerably over one-third of the gainfully occupied population, and indicate a net shrinkage in these occupations of 1,900,000, or over 13 per cent, in the past five years.

In order to know how many are actually jobless, however, we should have to know what has happened to the other occupations, such as forestry, fisheries, metal mining, professional pursuits, amusements, domestic service, and especially merchandising and selling—the distributive trades. We should also have to take account of the growth of population in this period (about 5 per cent).

Assuming that the number of persons of employable age has increased by a minimum of 3,000,000 in these years, due to population growth, we then have to guess whether 4,900,000 altogether can have found employment in the occupations not covered by the table.

The occupations in which growth might have been most expected in these years, with their possible increases, are:

	Possible increase
Professions	200,000
Amusements (movies, etc.)	100,000
Public utilities	200,000
Automobile sales and service	750,000
Other distribution	500,000
Miscellaneous	100,000
Total	1,850,000

These, of course, are mere guesses, but they are extremely liberal estimates, more likely to be too large than too small. It must be remembered that we are speaking of the changes only since 1923, when almost every occupation was active.

The net result is an estimate of 3,000,000 added to the unemployment roll in the past five years, or about 8 per cent of the total gainfully occupied. This is in addition to those unemployed in 1923; we must remember that even in the most prosperous years there is a reservoir of those out of work. Let us say that in that year this reservoir was as low as 1,000,000. We then have 4,000,000 out of work at present, or nearly 10 per cent of the total.

If anything like this is the truth, the Nation is facing an extremely serious situation, which can not be concealed by any amount of stock-market prosperity or business profits. The relief and remedy of unemployment ought to become one of the leading issues of the day.

THE BOWERY MISSION AND YOUNG MEN'S HOME,

New York, February 23, 1928.

Hon. ROBERT F. WAGNER,

United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: Your telegram came to hand last night and I hasten to respond.

Probably the information we have to give you have already received through other sources, but what we can give you we give gladly. In presenting the following I desire to say that our experience in this matter is confined entirely to the Bowery and to unskilled workers, such as dishwashers, cleaners, assistant janitors, porter work, sandwich men, etc.

Last year ending September 1, 1927, we fed 96,393 men, or 264 a day. We are now feeding a trifle over 1,200 men a day and have been for the last 70 days, and even prior to that this extra feeding has been gradually mounting from way into last year. This increase is due not only to unemployment in the city, but we find we have to take care of men from New England and from the coal mines in Pennsylvania. Perhaps the majority of this increase of nine hundred-odd men a day is due to the numbers of men coming in the city from outside; and we have extra demands this year for lodging as well as for clothing.

It is easy to explain why men are coming from Pennsylvania mines, owing to the strike there, and New England, as you no doubt are aware, has been unsettled for two or three years past, and this has been accentuated by the recent floods in that portion of our country. Our information from New England leads us to believe that the depression there is due to several things, mainly the change in women's underclothing from cotton to silk, and from the removal of some of the cotton manufacturers to the South, and the shoe manufacturers to the West.

More remotely, in running back to 1926, we find that the purchasing power and the contributions to the support of this mission coming from the Middle West, the Mississippi Valley, and west of the river, has been due to the oversupply of wheat and the shortage of corn owing to the floods of August and September, 1926. Then, too, from the southland the oversupply of cotton and the floods in the Mississippi River. All these things, as you know, tend to depress the whole country, since people in these sections are unable to buy as in normal years, and through the ramification of business everyone feels more or less directly the lack of prosperity among these peoples.

Coming back to the present, this has been a very open winter. It has been a blessing in some ways, but has tended to add to the unemployment situation. For instance, a fall of snow of 3 or 4 inches means $30,000 or $40,000 to men of the Bowery working for the street clean-

ing department, and the men who sell rubber overshoes, winter underwear, overcoats, etc., find their business running down. Again, another situation which does not directly touch the Bowery, but yet we must feel its effects, is that the people in the metropolitan section—that is, New York City and the suburban towns—are changing from homes to apartment hotels, and as a result less servants are required, such as footmen, butlers, cooks, etc.

This covers the situation so far as it affects us here, and I have tried to give it in as brief a compass as possible; I hope it will be helpful.

I do not know whether you are interested in the prohibition question, but we find drinking reduced here very materially and the destitution existing is not by any means due to the evil of drink as in former years.

If there is anything that occurs to you of which you would like to ask I should be very glad to reply to any inquiries that you make if I can. With best wishes, believe me,

Yours very truly,

A. C. BAKER, *Secretary.*

Mr. WALSH of Massachusetts. Mr. President, I desire to make a few observations upon the resolution now under consideration. First of all, I want to say that I am in favor of the adoption of the resolution. At the outset I call attention to an important omission, and will propose an amendment which I believe the Senator from New York will accept.

The real difficulty with an analysis of the unemployment problem is not in obtaining figures which show how many men or women are unemployed to-day who were employed a year or five years ago. The serious problem is that of part-time employment; information is wanting as to the extent of this. Therefore I am going to ask that an amendment be added to the resolution requiring also a report upon part-time employment, which the Senator from New York will undoubtedly accept.

In the State of Massachusetts, and I assume elsewhere, if one were to inquire from employers how many are unemployed, he would be given the number of people employed a year ago or five years ago, and those who are employed to-day. That information does not begin to disclose the real employment picture in this country. For several weeks, and in some industries for the past two years, large numbers of employees have been working but two, three, and four days per week. Therefore, to understand the extent of the unemployment problem, we should have information about part-time employment, the extent of it, and the general effect of it. That it is very extensive anybody who reflects upon the figures now available can appreciate, because the Department of Labor itself, in information which it has recently given out, based on the number of industries reporting to that bureau, showed that 67 per cent of all the industries in the country were working on part time. About two-thirds of all the industries in the country are to-day, according to information gathered by the Department of Labor, working part time. Without taking the time to develop further that point, I ask permission to insert in the RECORD at this point in my remarks a statement prepared by me from recent reports of the Bureau of Labor Statistics in the Department of Labor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The statement and statistics are as follows:

Of 54 industries surveyed by the Bureau of Labor Statistics, embracing 12 groups of different industries, the employment for January, 1928, is 84.2 per cent compared with the employment for 1923, which is used as a 100 per cent basis. The report published by the Bureau of Labor Statistics of the Department of Labor, entitled "Employment in selected manufacturing industries," from which the above information was obtained, further shows that in these industries that employment was 1.1 per cent lower in January, 1928, than December, 1927, and 2 per cent lower than November, 1927, and 5.8 per cent lower than January, 1927, and, of course, 15.8 per cent lower than 1923. The same document shows that reports from 9,203 establishments in January, 1928, indicate 21 per cent operating on a part-time schedule; that is, one in every five industries in the country working on part time.

It further indicates that only 31 per cent of this limited number of establishments has a normal, full force of employees, and that 67 per cent, more than two-thirds of all these industries, were operating with reduced forces. The report indicates that this same condition existed in December.

The same bulletin shows that the pay rolls from the 12 groups of industries reporting to the Bureau of Labor Statistics was 5.6 per cent lower in January, 1928, than in January, 1927. It also shows the payroll totals for January, 1928, was 14.2 per cent lower than in 1923.

The Labor Bureau (Inc.) publishes in New York a monthly review called "Facts for Workers," and in its February number estimates the number of unemployed in the latter part of 1927 to be 4,000,000.

Mr. WALSH of Massachusetts. Mr. President, progress is being made, and I congratulate the country that it is at last possible, without being branded as unpatriotic, to discuss the question of whether prosperity exists in the country or not. Up to February 16 last I challenge any citizen to show an utterance by a leader in the present administration which indicated that there was in the country any other condition than that of unparalleled prosperity. But on February 16 one of the Cabinet at last allowed that this subject is one that may be discussed publicly. In the very opening sentence of his recent speech this Cabinet officer said, "We have unemployment in the country. Everyone knows it. Why not admit it?" Until those words were uttered, on February 16 of this year, no person connected with the present administration has publicly expressed in any speech dealing with economic conditions sentiments other than those of a claim of unparalleled prosperity. It is unnecessary to quote the words or the sentiments that have been repeatedly expressed in boastful terms by administration leaders here in Washington. But now, by implication, at least, a Cabinet officer protests the long silence.

Now, at last we can, without being considered unpatriotic, openly talk about unemployment, but we must not say that we do not still enjoy prosperity. Much of the press and most of the propagandists still declare that unemployment is a mere incident, that prosperity does exist, and that large dividends are being made, and prosperity is flowing through the country in large volume. Indeed, they even attempt to tell us that unemployment is due to the sudden and tremendous progress that has been made in the invention of machinery which operates so rapidly and so efficiently that, in consequence, hundreds of thousands of men and women are thrown out of employment. They would have us believe that a decrease of 5 per cent in one year and a decrease of 16 per cent in the last few years in the number of employees in the selected industries reported to the Department of Labor were due to newly invented machinery that has so speeded up the production of our industries that thousands of employees are no longer needed or required. That it has been a contributing cause we realize, but it is not a convincing explanation of the great reduction in production, in employment, and pay rolls.

Mr. President, I repeat, it is a matter of congratulation that at least we can now discuss unemployment, though I repeat we must be very careful not to question the existence of prosperity.

Mr. President, the unemployment condition in this country is not of recent weeks or recent months. It has existed and has been steadily increasing for from two to four years.

Mr. President, in February, 1927, I called the attention of the Senate to the unemployment conditions and the business depression that large groups of merchants and independent manufacturers were experiencing. A large number of statistics, quotations, and news articles were presented tending to show that which is admitted to-day to exist was then developing and could be foreseen. I requested at that time that an inquiry be made by a committee of the Senate during the recess of the Senate after March 4 into "the real economic conditions of the Nation." I ask that that resolution be printed with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution is as follows:

Senate Resolution 378, Sixty-ninth Congress, second session

IN THE SENATE OF THE UNITED STATES,

February 28, 1927.

Mr. WALSH of Massachusetts submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

"Whereas it is constantly alleged that the country is enjoying a period of unparalleled prosperity, and the large sums collected in taxes upon incomes and the increase in bank deposits are asserted to form a main evidence of this prosperity; and

"Whereas, on the other hand, it is repeatedly asserted that the agricultural industry on the whole is in a depressed and struggling condition, especially in the corn-producing and wheat-producing States of the West and in those States where cotton is produced, causing bank foreclosures, mortgage foreclosures, and in some cases bank failures; and

"Whereas in other parts of the country it is alleged that abnormal unemployment in industrial centers is existing, with the result of a great curtailment in the purchasing power of the American people, of itself sufficient to cause a dangerous lowering of normal industrial conditions: Therefore be it

"*Resolved,* That a committee of 15 be appointed to sit during the recess of Congress to make a constructive inquiry into the economic state of the Nation, in order that the country may be in a condition

to demand, and the Congress which next reconvenes to enact, such legislation as may be helpful to these basic industries. That a thorough investigation be made by the committee—

"First. As to the exact status of the general agricultural conditions in this country.

"Second. To what extent does unemployment exist, and to what extent has there been curtailment of production, in various industries, throughout the country, the causes of these conditions, and the remedies needed to restore prosperity to these industries.

"Third. To what extent do existing tariff laws, either by excessive duties or the want of sufficient tariff protection and the tax on corporation incomes, affect these industries and their employees.

"Fourth. To what extent is the prevalent consolidation and reconsolidation of industries and the issuing of watered stock increasing the cost of living and bringing about economic conditions that are unsound and insecure.

"Fifth. Whether and to what extent the growth of business consolidation in the mercantile life of the country is increasing or decreasing the cost of living, and whether this movement is leading toward a sound or unsound economic status for the future.

"Sixth. What measures will be helpful both in continuing the prosperity that may be found to exist in certain industries and in making that prosperity general by restoring good business conditions to the industries that have curtailed production and caused unemployment.

"The committee to have full authority to issue subpœnas, compel the production of documents necessary to such inquiry, and to organize an administrative force sufficient to carry on the aforesaid work.

"The expenses of said investigation shall be paid from the contingent fund of the Senate on vouchers of the committee or subcommittee, signed by the chairman and approved by the Committee to Audit and Control the Contingent Expenses of the Senate, but shall not include any allowance for traveling or other incidental expenses of members of the committee."

Mr. WALSH of Massachusetts. Mr. President, I wish to refer to some of the observations that I made when I submitted that resolution and asked that a committee be appointed to sit during the recess to study the unemployment and other economic problems, but on which resolution no action was taken. In fact, there was a chorus of protest from all sides against my suggestion that there was some question about the existence of real prosperity in the country.

I then pointed out the fact that a condition of unemployment was rapidly developing; that it was the duty of the Senate to spend some of the vacation period in studying the problem and to report to the Senate what should be done of a constructive nature; for after all the obtaining of figures is only a first step. What we must finally do is to find the underlying causes of unemployment and then seek if it is possible to provide a remedy.

Mr. President, in the resolutions presented by me I requested, first, that the Senate find the exact status of the general agricultural conditions in this country.

Second. To what extent does unemployment exist, and to what extent has there been curtailment of production, in the various industries throughout the country, the causes of these conditions, and the remedies needed to restore prosperity to these industries.

Third. To what extent do existing tariff laws, either by excessive duties or the want of sufficient tariff protection and the tax on corporation incomes, affect these industries and their employees.

Fourth. To what extent is the prevalent consolidation and reconsolidation of industries and the issuing of watered stock increasing the cost of living and bringing about economic conditions that are unsound and insecure.

Fifth. Whether and to what extent the growth of business consolidation in the mercantile life of the country is increasing or decreasing the cost of living, and whether this movement is leading toward a sound or unsound economic status for the future.

Sixth. What measures will be helpful both in continuing the prosperity that may be found to exist in certain industries and in making that prosperity general by restoring good business conditions to the industries that have curtailed production and caused unemployment.

I further requested at that time that an inquiry be made into the agencies furnishing information as to the extent of employment; whether the information so furnished was accurate and whether or not it was unprejudiced.

In my speech in the last session, Mr. President, I pointed out the fact that there was a certain kind of prosperity in this country, that big business was prosperous, but that the retail merchants and the independent manufacturers were passing through a period of business depression that threatened, if it was not stopped, the complete annihilation of the small business man and the small manufacturer. I ask, Mr. President, that some of the quotations from my remarks on that occasion may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[From the CONGRESSIONAL RECORD of Tuesday, March 1, 1927]

SPEECH OF HON. DAVID I. WALSH, OF MASSACHUSETTS

Mr. WALSH of Massachusetts. Mr. President, there is one long-standing custom of the British Parliament that I have often thought we would do well to adopt, and for the adoption of which the need never seemed to me greater than it seems to-day.

From time to time the House of Commons, as every Senator is no doubt aware, sets apart a day for the consideration of "The state of the Nation." * * *

We are confronted in the closing hours of this short session with a situation that sorely needs such an unpartisan or bipartisan investigation as this custom of the British House of Commons provides. We are dispersing to our homes, and shall reassemble in December, the victims of confused and conflicting reports as to what the effect of the policies of the present administration upon the condition and prospects of the Nation really has been, and with no safe means of deciding whether all is going as well as we have a right to expect, or what if any legislative action should be taken to curb, stimulate, or direct administrative activities during the time that must elapse before the verdict of the voters themselves can be obtained.

On the one hand administration spokesmen and the administration press are broadcasting the assertion that our Nation is enjoying, and has every prospect of continuing to enjoy, a prosperity that has never been approached before in the history of this or any other people. Republican propagandists the country over are repeating an estimate said to be based on the income-tax returns, that the combined incomes of the people of the United States in the year just ended reached the amazing total of $95,000,000,000, or an average of about $2,000 for every head of a family and unmarried adult of either sex. And the growth of bank deposits, the quick absorption of vast issues of corporation stocks and bonds, and the immense sums that are seeking investment in foreign industries, are cited as unquestionable proofs of the reality, and auguries of the permanence, of this new age of gold. But when we turn from the fountains of partisan propaganda to more responsible and unbiased sources, to those whose knowledge of actual conditions comes from personal contact and individual experiences, we hear an undertone of dissent and complaint so widespread, and affecting so many of our fundamental industries, and so large a proportion of those who depend on them for the necessaries and comforts of life, that one is led to suspect that it may be the rapidly growing and dangerous concentration, rather than the healthful diffusion, of the national wealth that is evidenced by the widely advertised financial achievements of the year just elapsed.

Is not the prosperity which is so widely heralded the prosperity of monopoly? Is it not a prosperity that is discouraging individual initiative, driving the producer, the independent manufacturer, the small business man to the wall, and confining the accumulation of wealth to the monopolies of industry and finance? And is not this monopoly, which is the distinctive product of our age, aiming to extend and perpetuate itself through a skillfully devised plan to seek and maintain control over both the legislative and the administrative departments of our Government?

* * * * * * *

These startling situations in the West and South are represented as local and passing setbacks due to surplus production, under climatic conditions which can not be foreseen or controlled, but which may be offset by a comparatively small and inexpensive amount of governmental interference. But the farm census reports tell a different story. They show that in every State in the Union there has been in the last few years a steady shrinkage in farm population, notwithstanding the fact that in our farm population there are 400,000 more births than deaths, year by year.

They show also that in every State there has been a marked shrinkage in the value of farm implements and machinery, and in all except one or two a shrinkage in the value of the farms themselves, while in all without exception the amount of farm mortgages and the ratio of the mortgage total to the total of farm values has risen, in the latter case from an average ratio of about 25 per cent to around 45 per cent, and in one State to 78 per cent, of the still shrinking farm values. Are not these statistics indications of something more than a passing and sporadic interruption of a general prosperity? Depression of farm values and real estate generally, which is the condition throughout the country, has never before been an indication of the existence of real or lasting prosperity.

And what of the hundreds of thousands who are abandoning the farms to seek a living elsewhere? Are they finding a place in our manufacturing industries?

If so, these should show a corresponding increase in the number of their employees, beyond the increase corresponding to the country's annual growth in population. But is this really the case? We have in Massachusetts a department of labor and industries which, in my opinion, is unexcelled in painstaking thoroughness by any similar body in the United States; and this department, in a bulletin issued February 21 of the present year, shows the decrease of employment in certain industries, by a comparison between the average number of wage earners employed during the five years between 1919 and 1923 and those employed in January of 1927, to be as follows:

In all industries taken together there were 15.6 per cent fewer persons employed than the average five years before.

In the boot and shoe industry there were 38.8 per cent fewer employees; in the cotton and textile goods industry there were 25.3 per cent fewer employees; in the textile machinery and parts industry there were 37.8 per cent fewer employees; in the woolen and worsted goods industry there was a reduction of 13 per cent. That the depression is continuing is indicated by the fact that statistics for all industries combined show that the number employed January, 1927, was 5 per cent smaller than in January, 1926. That the shrinkage in employment which has been noted in the 39 leading industries for several months still continues is shown by the fact that from December 15 to January 15 the aggregate weekly earnings shrank also to the extent of $139,047; while the average weekly earnings per person employed dropped from $24.37 to $23.96—both figures, by the way, quite noticeably under the before-mentioned "average yearly income of $2,000." And lest the citizens of Massachusetts should be unduly depressed by this showing, the bulletin goes on to state that for the United States as a whole, for the corresponding period, the percentage of decrease in numbers employed and in aggregate weekly earnings were both twice as great as in Massachusetts.

The pay-roll statistics from the July number of the United States Labor Review show that employment in the manufacturing industries fell off 18.7 per cent from 1920 to 1925. This report reveals also that the pay roll of the industries show a shrinkage of 32.3 per cent from 1920 to 1925. The comparison of the 1920 pay-roll index for the month of May, with the 1926 pay roll from the same month, shows a six-year shrinkage of more than 40 per cent.

I shall not dwell upon the well-known decadence of the cotton-textile industry in New England, where within the past few years nearly 40 factories have gone out of business altogether and several more have been absorbed by more successful competitors. So far as the cotton mills are concerned this situation may have passed beyond the reach of remedial legislation, since it is alleged to be due in the main to economic conditions for which no political organization and no party administration can justly be blamed. But it is a condition causing such great unemployment and loss of invested capital that the Government ought to determine the facts and find a remedy if one is to be found.

With the woolen mills the case is somewhat different. If the opinion of the Carded Woolen Manufacturers' Association is to be accepted, their main handicap lies in the 31-cent tariff on clothing wools, a tax which varies, they assert, from 40 to 100 per cent on their raw material, or from one to two and one-half times the total labor cost of converting the wool into cloth in the mills. To expect permanent prosperity under such a tariff burden is, of course, absurd.

I hold in my hand a list of the woolen mills which were forced out of business since the Fordney-McCumber tariff law of September, 1922. They are 39 in number. Eleven of them were located in New York State, 7 in Connecticut, 10 in Rhode Island, 9 in Massachusetts, and 1 each in Pennsylvania and Vermont.

But the main point that I wish to emphasize here is that the present and continuing shrinkage in employment and in weekly earnings is not confined to the textile industries, nor is it peculiar to New England alone. To a greater or lesser degree it pertains to all, or nearly all, our leading industries, and extends to nearly every State. The Federal Reserve Bulletin for January states that the output of the shoe industry in 1926 was 7½ per cent less than in 1923, and that in the same period the wage earnings in the Massachusetts shoe industry fell from $83,000,000 to $65,000,000, or nearly 24 per cent.

The automobile business has been referred to as an evidence of prosperity. As a matter of fact, it is one of the key industries that is shrinking. Statistics show the production of automobiles and trucks throughout the country in January, 1927, to be 249,506, which, compared with their production in January, 1926, of 388,220, is a reduction of 68,714, or 21.5 per cent. The reduction in the month of December, 1926, compared with December, 1925, was 45.6 per cent. But possibly this is not a fair comparison, as December is the month of readjustment of business in the automobile trade.

Statistics further show employment in the automobile industry in December, 1926, was 19.8 per cent under the 1925 level. The number employed in Detroit for the week ending February 2, 1927, was 48,019 less than that employed for the corresponding week in 1926.

In the financial papers generally are to be found, here and there, sanguine utterances (not editorial, however) like these: "With money plentiful and labor employed at the best wages ever enjoyed, and business picking up in the agricultural districts, everything seems to point to a good business year," and "In view of the huge accumulations of wealth that have piled up in the face of liberal public expenditures, the new year offers the promise of solid progress."

But when they descend to details the "promise of progress" quickly fades, and the outlook becomes even less reassuring than that of the Reserve Bulletin. Nation's Business for December, 1926, justifies the caution that "1927, at least for the first half, may see some shading off" by asking what else is to be expected after a year that witnessed "the record number of bank failures, the second largest number of business failures, and the fourth largest total of failure loss," and when "in the last five years 100,000 concerns have suspended, owing their creditors over $3,000,000,000." And the December number of Guaranty Survey of New York notes, as other financial summaries do also, "curtailment in the key industries of building and automobiles, diminishing export trade balances, the outflow of capital, and increasing competition at home and abroad."

What conclusions are we to draw from this conflict between glittering generalities and sombre pictures of details? The usual barometers of Wall Street are all "set fair." Money is plentiful, savings deposits increasing, bank reserves ample, no feverish speculation in evidence, a complete absence of the conditions that indicate the approach of financial stringency or panics on 'change. But how are we to harmonize this halcyon outlook with the depressing situation that prevails in so many branches of industry and pervades all sections of the Republic? Who has any definite knowledge of the present extent of unemployment, or can even guess what has become of the hundreds of thousands of men and women who have forsaken agriculture, and who, instead of finding vacant places waiting for them in our leading manufacturing industries, have been joined by other thousands who have lost their jobs by the curtailment of these very industries; a curtailment, it appears, that even yet is not at an end?

For most of us, Mr. President, the long recess that we hope is so soon to begin will mean in the main a release from the pressure of legislative duties, and in this off year a relief also from the burdens of a political campaign. It will not, however, release us from the duty of caring to the extent of our opportunities for the welfare of the constituents who have honored us with their confidence and who continue our salaries whether Congress is in session or not.

Mr. President, I want to put the Senate on record to find out if its conception of the responsibility of its Members to the country justifies them in retiring from the National Capitol on the 4th day of March and absenting themselves for nine long months—with continuing salaries and four paid clerks—from any inquiry, study, or preparation of a plan of action, in view of the steady and constant decline in so many industries which furnish the sustenance of life to our working people, the deplorable state of the farmers of the West, the depression of the cotton industry in the South, the laying off of wage earners throughout the country, and the large number of bank suspensions and business failures throughout the United States. Are we to be content that all is well with our people and that economic conditions are sound because financial statements show the dominance of high finance in such striking contrast to actual conditions as they affect the individual wage earner, the agriculturist, and the cotton planter? The Congress can not avoid its responsibility by charging the President with failure to call an extra session and pointing to the fact that it has no power of its own initiative under the Constitution to call such a session. I know that extra sessions of Congress are burdensome, causing much personal inconvenience to Senators and Representatives, but I do not hesitate to declare that in my opinion the great legislative business of this country, with its many complex problems, can not be studied, debated, and settled in the same period of time that sufficed more than 100 years ago for the performance of the work of Congress, to wit, less than 70 days. The American people are not without the power to fix responsibility in such a case as this. The party in control of the Government must answer for its omissions as well as for its commissions.

* * * * * * *

Under these conditions, is not this the very least the Congress is bound to do, in justice to so many constituents to whom this fresh disappointment has come to intensify the pangs of hope so long deferred—can we in common humanity refuse to take every means in our power to provide the next Congress with all accessible evidence necessary to enable the discovery of a genuine remedy, the drafting of a measure that will be both constitutional and workable, the adoption of the best policy that human faculties can devise for the rescue of our basic industry from a depression which all our other industries can not fail to share?

* * * * * * *

Resolution

Whereas it is constantly alleged that the country is enjoying a period of unparalleled prosperity and the large sums collected in taxes upon incomes and the increase in bank deposits are asserted to form a main evidence of this prosperity; and

Whereas, on the other hand, it is repeatedly asserted that the agricultural industry on the whole is in a depressed and struggling condition, especially in the corn-producing and wheat-producing States of the West

and in those States where cotton is produced, causing bank foreclosures, mortgage foreclosures, and in some cases bank failures; and

Whereas in other parts of the country it is alleged that abnormal unemployment in industrial centers is existing, with the result of a great curtailment in the purchasing power of the American people, of itself sufficient to cause a dangerous lowering of normal industrial conditions: Be it

Resolved, That a committee of 15 be appointed to sit during the recess of Congress to make a constructive inquiry into the economic state of the Nation, in order that the country may be in a condition to demand, and the Congress which next reconvenes to enact, such legislation as may be helpful to these basic industries. That a thorough investigation be made by the committee:

First. As to the exact status of the general agricultural conditions in this country.

Second. To what extent does unemployment exist, and to what extent has there been curtailment of production in various industries throughout the country; the causes of these conditions, and the remedies needed to restore prosperity to these industries.

Third. To what extent do existing tariff laws, either by excessive duties or the want of sufficient tariff protection, and the tax on corporation incomes affect these industries and their employees.

Fourth. To what extent is the prevalent consolidation and reconsolidation of industries and the issuing of watered stock increasing the cost of living and bringing about economic conditions that are unsound and insecure.

Fifth. Whether and to what extent the growth of business consolidation in the mercantile life of the country is increasing or decreasing the cost of living, and whether this movement is leading toward a sound or unsound economic status for the future.

Sixth. What measures will be helpful both in continuing the prosperity that may be found to exist in certain industries and in making that prosperity general by restoring good business conditions to the industries that have curtailed production and caused unemployment.

The committee to have full authority to issues subpœnas, compel the production of documents necessary to such inquiry, and to organize an administrative force sufficient to carry on the aforesaid work.

The expenses of said investigation shall be paid from the contingent fund of the Senate on vouchers of the committee or subcommittee, signed by the chairman and approved by the Committee to Audit and Control the Contingent Expenses of the Senate, but shall not include any allowance for traveling or other incidental expenses of members of the committee.

Mr. WALSH of Massachusetts. Mr. President, no action was taken upon the resolution that was the basis of my speech of March last.

I do not entertain the hope that any constructive or helpful action will now be taken, in view of what appears to be the present policy of the Congress, namely, to delegate investigations of public affairs or of matters that relate to the economic welfare of the people of the United States to bureaus rather than to committees of Congress.

Surely, if the death of 40 defenders of the country through a submarine accident at sea is not of sufficient importance for a senatorial investigation, or an inquiry into whether the public rights are sufficiently guarded in the right of the public to enjoy without exploitation that which the Almighty for all time discharges in a never-ending flow from the bowels of the earth—water power—is not sufficiently important a subject for the Senate to investigate—I have little hope of an investigation by the Senate into a consideration of what steps may be taken to relieve the poverty, suffering, and want among the millions of unemployed at the present time in the United States.

Mr. President, to return to another aspect of this question, let me submit this observation: The United States Government itself is one of the worst offenders, and is itself chargeable with setting an example of unemployment. I have received to-day two telegrams in reply to my requests for information upon unemployment conditions in the Government. One is from the commandant of the navy yard at Boston. He informs me that on March 1, 1928, there were 2,089 employees as compared with the maximum number of employees on June 7, 1927, of 3,098. Therefore at this Government plant the percentage of unemployment is 33⅓ per cent, more than nearly double what the average of unemployment is throughout the country.

A telegram in reply to my inquiry from the Watertown Arsenal is as follows: Number of full-time employees, working March 1, 1928, 196. The maximum number of employees employed during the last two years, 275. Thus, in this Government plant, unemployment is 30 per cent under normal conditions.

Time has not permitted an inquiry into the conditions at other Government plants, but I have reason to believe that the same conditions prevail in the navy yards at Brooklyn, Norfolk, and elsewhere.

I respectfully suggest that if the Government has any real interest in this problem, any sincere interest in obtaining or assisting in bringing about relief, that it undertake at once the necessary measures for the promotion of those public improvements which it must do in the near future, and which can be better done during the present period of business depression than later.

Mr. William Green, president of the American Federation of Labor, recently called attention to the importance of the Government undertaking new work, and pointed out certain activities that could be undertaken forthwith. I ask that an editorial commenting on that statement be annexed to my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article referred to is as follows:

[From the Washington Daily News, Thursday, March 1]

TO END UNEMPLOYMENT

William Green, president of the American Federation of Labor, in a speech at Detroit, recommended, as an immediate remedy for the unemployment situation, the passage of legislation providing for the expenditure of Government funds in public improvements.

"If Congress would pass the flood control bill, the Army housing, naval construction, and general housing legislation, and make the appropriations for this work available at once, our present problem of unemployment would be quickly solved," said Green.

Federal expenditures, he added, could be supplemented by States and municipalities which are planning public improvements.

Green's position is sound. New York State has taken the lead in arranging for the immediate beginning of a large construction program. Several resolutions pending in Congress seek to commit the Federal Government to the same policy.

Labor Secretary Davis remarked in a recent speech that we have an unemployment problem and that there is no use blinking at the fact. He said, as have others who have studied the situation, that this condition exists despite the fact that the country as a whole is generally prosperous.

Time will be required to adjust the situation brought about by the displacement of men by machines and other economic factors which have created the existing unusual situation. The final solution may be shorter hours for labor, or some other process.

Meantime men now idle must be put to work if the country is to maintain its purchasing power and if the ranks of those now out of work are not to be increased.

Mr. WALSH of Massachusetts. Mr. President, I join in the support of the resolution of the Senator from New York and compliment him for calling public attention at this time to this very serious problem. I desire to remind the Senate and the administration that it is a long-delayed and neglected problem. Anyone who will take the trouble to review the documents and information which I had printed in the RECORD in February, 1927, will learn that a condition of unemployment has been going on from two to four years and becoming progressively worse.

Mr. President, I agree with the importance of obtaining the information which this resolution calls for, but I respectfully submit that our responsibility does not end with merely obtaining statistics and general information as to the real unemployment conditions in the country to-day. Some effort of a constructive nature should be undertaken to find out what are the underlying causes of the present unemployment conditions. I was about to say present depressed business conditions, but that appears to be an offensive phrase and should not be used for fear lest one might be charged with brazen effrontery for attempting to question the loudly heralded claim of general prosperity. These prosperity boasters, however, have now conceded us the right to talk and discuss unemployment.

Now, Mr. President, I desire to make a formal motion to amend the resolution. I understand the Senator from New York is willing to accept the amendments. I move first, on page 1, line 3, after the word "unemployment," to insert "and part-time employment," so as to read:

Resolved, That the Secretary of Labor is hereby directed (1) to investigate and compute the extent of unemployment and part-time employment in the United States—

And so forth.

I further move, on page 2, after the word "unemployed," in the fourth line, to insert the words "and part-time employed."

I ask that those amendments may be adopted.

Mr. WAGNER. Mr. President, I have no objection to the amendments of the Senator from Massachusetts.

The PRESIDING OFFICER. The amendments will be stated.

The CHIEF CLERK. On page 1, line 3, after the word "unemployment," it is proposed to insert the words "and part-time employment."

The PRESIDING OFFICER. Without objection, the amendment is agreed to. The Secretary will state the next amendment proposed by the Senator from Massachusetts.

The CHIEF CLERK. On page 2, line 4, after the word "unemployed," it is proposed to insert the words "and part-time employed."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. WAGNER. Mr. President, by a printed error or through an inadvertence there was left out of the preamble of the resolution the word "problem." I therefore move to amend the preamble by adding after the word "unemployment" in the eighth line the word "problem."

The PRESIDING OFFICER. The amendment to the preamble will be stated.

The CHIEF CLERK. In line 8 of the preamble, after the word "unemployment," it is proposed to insert the word "problem," so as to read:

Whereas it is essential to the intelligent conduct of private and public business enterprises, to the proper timing for the inauguration of public works by the Federal Government and the encouragement of similar undertaking by the States, to the formulation of sound economic policy, and it is prerequisite to the provision of relief against the hardship of unemployment and to the ultimate solution of the unemployment problem that accurate and all inclusive statistics of employment and unemployment be had at frequent intervals; and.

The amendment to the preamble was agreed to.

Mr. COPELAND. Mr. President, my colleague [Mr. WAGNER] has called attention to a matter which in my judgment is the most important one we could possibly consider in this Chamber. The matter of unemployment is very pressing.

As evidence of it, I hold in my hand a bulletin called the "A. I. C. P." This is the Association for Improving the Condition of the Poor in New York City. I want the Senate to know who the officers of this association are. They will be familiar to the gentlemen across the aisle.

The president of this organization is Cornelius N. Bliss, sometime treasurer of the National Republican Committee. The vice presidents are Percy R. Pyne, R. Fulton Cutting, Dwight W. Morrow, Albert G. Millbank, and others. Those are familiar names.

I find that the entire issue of the bulletin of this month is given up to the subject of unemployment. I beg you to listen to this one paragraph from this bulletin:

Business was bad in 1921, worse in 1914, and so was the unemployment situation; yet to-day's unemployment exceeds in volume that of 1921, and approaches uncomfortably near the high point of 1914. In New York State there were fewer people employed in the months of November, December, and January than for the corresponding period of any year as far back as 1914.

On the inside of this bulletin is depicted the path of unemployment. I find here the empty bread box——

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Idaho?

Mr. COPELAND. I do.

Mr. BORAH. From what is the Senator reading?

Mr. COPELAND. I am reading from the bulletin of the Association for Improving the Condition of the Poor, a great organization in the city of New York presided over by Mr. Cornelius N. Bliss.

Mr. BORAH. I understood the document to say that the unemployment at present was almost as bad as it was in 1914.

Mr. COPELAND. Correct; that is what it says. I thank the Senator from Idaho for giving emphasis to this statement, which I desire to repeat:

To-day's unemployment exceeds in volume that of 1921 and approaches uncomfortably near the high point of 1914.

Mr. JONES and Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from New York yield; and if so, to whom?

Mr. COPELAND. I yield first to the Senator from Washington.

Mr. JONES. Does the Senator approve that statement?

Mr. COPELAND. That there is unemployment—that fewer people are employed now than at any time since 1914?

Mr. JONES. Yes.

Mr. COPELAND. Do I believe it?

Mr. JONES. Yes.

Mr. COPELAND. I do.

Mr. JONES. The Senator approves that statement?

Mr. COPELAND. Yes.

Mr. KING. Mr. President, will the Senator suffer an interruption?

Mr. COPELAND. Of course.

Mr. KING. I think the unemployment now is very much greater than it was in 1914. I disagree with the statement if it implies that the unemployment in 1914 was as great as it is now.

Of course, the object of the interrogation of my able friend from Idaho is very obvious. There happened to be a Democratic President then, and, of course, he seeks to draw the conclusion that there was as much unemployment under a Democratic President as there is under a Republican President. I just wish to state that I dissent from the statement if it is subject to the deduction that in 1914 the unemployment was a great as it is now.

Mr. HEFLIN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Alabama?

Mr. COPELAND. I do.

Mr. HEFLIN. In 1914 the World War broke out——

Mr. SMOOT. And gave employment in the United States. It was a godsend for the Democratic administration.

Mr. HEFLIN. And our trade with all the countries of the earth was disturbed. The people over there, instead of spending their money for American goods, were looking out for buying weapons with which to defend themselves, and the world was thrown into the greatest war that it has ever known. That revolution, the World War, may have disturbed this situation, so that there were as many unemployed at that time as we find now in the midst of this Republican administration when you are crying "prosperity" from every housetop.

Mr. COPELAND. If the Senators on the other side of the aisle take any comfort from a condition of unemployment, due to the conditions of the war in 1914 as contrasted with the conditions to-day, which are due, I suppose, to a worse war—the maladministration of government under the Republicans for the last several years—they are welcome to it.

Mr. BORAH. Mr. President, I was not seeking comfort. I was seeking information.

Mr. COPELAND. I trust the Senator has the information.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from North Carolina?

Mr. COPELAND. I yield to the Senator.

Mr. SIMMONS. I suggest to the Senator from New York that it might be said that at least in 1914 we were not conducting a presidential campaign on only one slogan, "prosperity."

Mr. COPELAND. That is right.

Mr. BORAH. I resent the assertion that there is only one slogan, "prosperity." There is another slogan.

Mr. HEFLIN. What is the other one?

Mr. COPELAND. What does the Senator from Idaho mean by that? May I ask the Senator from Idaho just what he means?

Mr. BORAH. I say, there is another slogan.

Mr. HEFLIN. What is it?

Mr. BORAH. That is the constitutional amendment.

Mr. COPELAND. Does the Senator from Idaho believe that the eighteenth amendment is responsible for the unemployment of to-day?

Mr. BORAH. No; I do not think it is responsible for unemployment. I think, if there is unemployment, that the eighteenth amendment has greatly diminished it. No one has benefited by it more than labor.

Mr. COPELAND. Then, if it were not for the eighteenth amendment, I suppose we are to infer that the condition of unemployment now would be terrible beyond words.

I want to call attention, however, to this document, because to me it is a very interesting presentation of a serious problem. It is very important that this matter should be considered.

We have pictured here the path of unemployment—the empty bread box, the fireless stove, the closed savings-bank account, the pawned household goods, the homeless family.

Besides I have here a copy of the Chicago Tribune for the 28th of February, making exactly the same appeal through the United Charities of that city. It speaks about the tremendous amount of unemployment in Chicago, as to which the Illinois Free Employment Bureau shows that for every 100

jobs available 283 men were registered. And so in every city in this country we find these conditions of unemployment. What are we going to do about it?

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Iowa?

Mr. COPELAND. I yield.

Mr. BROOKHART. The Senator seems to be greatly exercised over the unemployment in the country, and I think justly so, so far as that is concerned. Since 1920, however, a million and a half farmers have lost their property or their homes during this period of "prosperity"; and a recent bulletin of the Department of Commerce shows that 177,000 corporations, 42 per cent of all the corporations in the United States, have operated at a loss since 1922, at an enormous loss of about $2,000,000,000 a year.

I do not think there is any doubt about the condition in this country; but I should like to know what the Senator is going to do to remedy this situation. I have looked among the Democratic candidates for President for some relief for this farm situation, but I can not find any. I have a book over here showing the position of the distinguished Governor of New York on that proposition. It would bankrupt all the farmers if it is correctly stated.

Let us see what we are going to do in an affirmative way. It is easy enough to criticize; but what are we going to do to remedy this situation?

Mr. COPELAND. Mr. President, disregarding his political reference, I am perfectly clear that the Senator from Iowa has at the back of his head what is really the solution of this problem. I do not believe there can be employment in the cities unless there is prosperity upon the farms, so that the buyers of the country can buy.

You think of my city as a great financial city; you do not think of it as a manufacturing city; and yet New York City, in bulk and value, manufactures more goods than Pittsburgh, Cincinnati, Milwaukee, St. Louis, Cleveland, Detroit, Buffalo, and Boston combined. We do not use those products. They are sold upon the farm, and unless the farmer can buy we can not sell. Unquestionably a large amount of the unemployment in the cities is due to the fact that the farmers of the country are in distress, and can not buy.

Mr. BROOKHART. New York also has some $400,000,000 of Iowa's savings now down there in the gambling game on the stock exchange.

Mr. SMOOT. They can get their money any day they want it.

Mr. BROOKHART. They can get it; but the bank examiners would not let them lend it to a farmer at home, because it would be put on the slow list, and it is not subject to rediscount in the Federal reserve bank; and then the bank is under suspicion. Nearly 400 banks out in my State have been closed by that sort of thing.

Mr. COPELAND. The Senator from Iowa a moment ago made reference to the Democratic candidates for the Presidency. Now he refers to a Republican problem. Why does not he correct the situation down in Wall Street? All those people are Republicans.

Mr. SMOOT. Oh, no; they are not.

Mr. BROOKHART. When it comes to a financial proposition, even in the United States Senate, I do not think there is any difference between a Republican and a Democrat.

Mr. COPELAND. We ought not at this time to be splitting hairs about whether this is a Democratic issue or a Republican issue, or whether it is a Democratic problem or a Republican problem. It is here; we are facing the situation, and there must be found a way to solve the problem.

My colleague [Mr. WAGNER] has called for certain information, and I am sure the Senate will be glad to pass the resolution in order that we may get it; but there are things that ought to be done to solve the problem. The Senator from Iowa suggested farm relief. That is one needed reform.

We can do something in the way of these public buildings; and I want to challenge the Senators on the other side to release more of the money that we have already decided is to be our program in the way of construction. Let us have more of it made available.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Utah?

Mr. COPELAND. I do.

Mr. SMOOT. I will say that every single dollar that is allowed under the law will be released; but we can not build in the winter. We are waiting now to start the building program in the District of Columbia, as I stated to the Senator the other day. Just as soon as the spring opens we are going to begin to erect here two of the largest buildings on our program. The law limits the amount of money that can be spent each year. There is $200,000,000 appropriated for buildings outside the District of Columbia, and the law says that $20,000,000, or one-tenth of the amount, can be spent each year. It is a program for 10 years, and every dollar of that money will be released.

Mr. COPELAND. Who made the law?

Mr. SMOOT. Congress made it.

Mr. COPELAND. They can change it at any time, can they not?

Mr. SMOOT. They can.

Mr. COPELAND. Making more money available?

Mr. SMOOT. Yes; they can, but they have not done it.

Mr. BORAH. They can make more money available, and levy more taxes, more appropriations and heavier taxes, and create a vicious circle, the old John Law system, which will break any country on God's earth.

Mr. SMOOT. From what we have heard here to-day we would think there had been poverty in this country for the last 10 years and that nobody was making enough to live on, whereas the business during that time has never been equaled in the history of the world.

I am not going to get into an argument with the Senator as to whether or not we are having hard times now. I will say to the Senator that during the winter there is always unemployment, whether there is a Republican administration or a Democratic administration; but at no time during this administration have there been as many unemployed as there were during the Democratic administration.

Mr. COPELAND. Does the Senator believe that in the springtime all unemployment will disappear?

Mr. SMOOT. I know that a great part of it will; and I know that the great cities of Pittsburgh, Detroit, New York, and so on, are about to begin the construction of mammoth buildings, and they are only waiting for the springtime. I know that when the spring opens a lot of these unemployed men will be employed.

Mr. COPELAND. Does the Senator seriously believe that building construction stops in the wintertime?

Mr. SMOOT. I certainly do, to a great extent.

Mr. COPELAND. Has the Senator witnessed the skyscraper building——

Mr. SMOOT. Mr. President, when a building program is started, it is never completely finished, but the great bulk of the building program every year begins with the opening of spring. It always does and always will. Building can be done cheaper in the spring and in the summer and in the fall than in winter, and every man who builds in winter does so because of the absolute necessity of doing so at the time. The Senator must have had experience enough to know that. When a building is erected in the winter it is never as good as if it is put up in the spring or in the summer. It costs more to erect it, as everybody knows.

Mr. COPELAND. The Senator must be deaf and blind if he believes that the unemployment of the present moment is like the unemployment of last March, or a year ago last March. There is more unemployment in this country to-day than there has been, I will say for the comfort of the Senator from Idaho, since 1914.

Mr. SMOOT. I would not say so, going as far back as 1914. There is more unemployment in the United States to-day than there has been for the last few years. The mass production that is going on, the perfection of machinery in order that products may be made cheaper and faster, and without hand labor, but by machinery, those things have all had their effect, and necessarily so. I hope to see the time come, and come soon, when all of that will be taken care of, as every great step in the manufacture of goods in the world has been taken care of. It takes time to catch up whenever there is an advanced step in the manufacturing of goods by improved machinery.

Mr. COPELAND. How does it happen that just now we happen to get all the cumulative, gathered-up effects of this new machinery, and so on?

Mr. SMOOT. Mr. President, it happens because this is a presidential year. That is why there is all this talk, and it would not be indulged in if it were not a presidential year.

Mr. COPELAND. Does that mean that the Republicans have taken their men off the pay rolls?

Mr. SMOOT. The Senator from Massachusetts has been talking about the cotton industry and the woolen industry in Massachusetts. Can not Senators see what has brought about that condition as far as cotton is concerned? The women in the country are wearing silk to-day. We used to manufacture hundreds of millions of dozens of cotton hose for women. We manufacture scarcely any in the United States to-day. New England was the great center of that class of manufacture. As far as

dresses are concerned, the women used to wear cotton, and it used to take 10 or 12 yards of cotton cloth for a dress. To-day the dresses are silk, and it takes only about three and a half yards of silk to make a dress. You can not find a silk center in the United States that is not busy. Why is that? It is because of the change in styles. Those things have to be taken into consideration when we begin to talk about conditions existing in this country.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. COPELAND. Just one moment. The Senator from Utah a moment ago referred to the law. I should think he would have the law changed so that the women would not wear these silk dresses.

Mr. BORAH. The women vote now.

Mr. SMOOT. The law as to the erection of buildings is quite a different thing from any attempt to regulate the styles that women shall wear.

Mr. HEFLIN. Mr. President, the Senator has said this talk is going on because this is a presidential year.

Mr. SMOOT. Yes.

Mr. HEFLIN. Is it a fact that these people are unemployed? The Senator from New York wants to know. The statistics show that they were unemployed in the spring, that they were unemployed in the summer, and that they are still unemployed. The statistics of the Federation of Labor show that. It can not be that it is just a political proposition. It is a fact.

Mr. SMOOT. Mr. President, nobody in this Chamber in any way, shape, or form misunderstands the situation. We all know what it is, and we know it will continue as long as the Senate is in session this year. There is no doubt about that.

Mr. HEFLIN. Is it a fact that we have an army of unemployed in this country?

Mr. SMOOT. There is quite an army of unemployed, and always will be.

Mr. COPELAND. Is it larger than it has been?

Mr. SMOOT. Perhaps it is larger now than it was this time last year, but not as large as under Democratic administration.

Mr. SIMMONS. Mr. President, what does the Senator mean when he says it will continue as long as the Senate is in session?

Mr. SMOOT. I said as long as it is in session this year.

Mr. HEFLIN. Mr. President, the Senator suggests that after the winter is over this building program will be commenced. What is going to become of these patriotic American men and women during the Republican administration until the winter is over?

Mr. SMOOT. Certainly they will never receive relief if there is a Democratic administration, I assure you of that, either in the summer, the spring, or the winter.

Mr. HEFLIN. We are going to try that next time.

Mr. SMOOT. I doubt it very much.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from New York permit me to correct a statement of the Senator from Utah?

Mr. COPELAND. I yield.

Mr. WALSH of Massachusetts. The Senator from Utah has just stated that every silk mill in the country is thriving and prosperous. I call his attention to the fact that the silk industry is reducing also, for on pages 3 to 5 of the December bulletin of the Department of Labor, he will find on page 5 a statement that there was a decrease of 1.1 per cent in the number of silk workers in December, 1927, compared with December, 1926.

Mr. SMOOT. Yes, Mr. President; 1.1 per cent. Perhaps that is just temporary—for a month. It may be because of some change in style that would make that amount of difference.

Mr. WALSH of Massachusetts. If I were permitted, I could show that the same situation has been true as to other periods. The Senator has referred to a decrease of 10, 15, up to 40 per cent, in the cotton industries, and says that those engaged in the silk industry are all working. The figures do not confirm that statement.

Mr. SMOOT. I will say to the Senator that if he would go down in the South, where the cotton industry is active, he would find that production was 40 per cent less than it had been. I asked why the cotton industry in Massachusetts was less prosperous than it has been. But I want to say that it is natural, perfectly natural, for the cotton industry to go where the cotton is raised, and it will be so in the future more than it has been in the past.

Mr. COPELAND. Mr. President, the Senator from Utah has called attention to the law in reference to erecting these buildings. We have adopted a program, have we not? We have determined upon a certain course that we are going to follow. Why should we not go forward with that now more rapidly since we have committed ourselves to it? That is the inquiry I have to make.

Mr. TYDINGS. Mr. President, something was said just a moment ago about the conditions now as compared with those of 1914. I would like to call some facts to the attention of the Senate, and ask if any conditions like them existed in 1914.

The report of the Federal Reserve Board for 1926 was made public last June. It showed that in the United States 956 bank suspensions took place, those banks having deposits of approximately $275,000,000. That was 344 more bank failures than occurred during 1925, and the deposits of the suspended banks were $100,000,000 greater.

This is four times the number of bank failures that occurred from the year 1917 to 1920, inclusive, and is 298 more bank failures in that one year than occurred during the entire eight years of the Democratic administration.

Those who think that conditions now are better than they were in 1914 should refer to the reports of the Bureau of Agricultural Economics, Department of Agriculture, setting forth that 21 out of every 1,000 farms in the whole United States in the year ending March 15, 1926, were sold under foreclosure of mortgage, or for delinquent taxes—1 out of every 47 farms in the United States. Did that condition prevail in 1914?

Mr. BAYARD. Mr. President, will the Senator yield to me a moment?

Mr. TYDINGS. I yield.

Mr. BAYARD. I would suggest that the figures last year as to bankruptcy proceedings throughout the entire country show a little over 49,000 and odd bankruptcies, and one in every eight of those bankrupts was a farmer.

Mr. TYDINGS. Mr. President, in further connection with the statement of the Senator from Delaware——

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Kansas?

Mr. TYDINGS. Not just at this moment, because I have only five minutes left.

Mr. CURTIS. I rise to a question of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. TYDINGS. I have only two minutes, and I hope the Senator will not take the floor away from me, because these are only facts, and I want to clear up the 1914 situation.

Mr. SMOOT. It will take more than two minutes for the Senator to answer that.

Mr. TYDINGS. I yield to the Senator from Kansas.

Mr. CURTIS. I merely wanted to suggest to the friends of the pending resolution, to which there is no objection, that at 2 o'clock the unfinished business will come before the Senate. If the resolution shall not be disposed of before 2 o'clock, it will go to the calendar. The Senator who introduced the resolution was so informed when he began the debate. If Senators want to consume all the time in the morning hour talking on matters that do no pertain to the resolution, they may go ahead, but at 2 o'clock the resolution will go to the calendar instead of to a vote.

Mr. TYDINGS. Mr. President, I will take only one moment. The report of R. G. Dun for the first six months of 1926 shows 12,292 commercial failures, with liabilities of $281,000,000. That is an increase over the immediately preceding years. I have not heard and do not expect to hear anybody challenge the statement that there are more foreclosures of farm mortgages now than during the last Democratic administrations. I do not expect to hear anyone challenge the statement that there were more bankruptcies in one year of the Coolidge administration than happened during three whole years of the Democratic administration, and this while prosperity is the cry. So, when we select 1914 and compare it with 1927, we should not leave out some of the most vivid colors in looking at the canvas.

The PRESIDING OFFICER. The question is on agreeing to the resolution as amended.

The resolution was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the preamble as modified.

The preamble as modified was agreed to.

Mr. HEFLIN. Mr. President, I wanted to tell, for the benefit of the Senator from Utah, one of Bob Taylor's stories which illustrates Republican prosperity.

Old Uncle Rufus had gone out possum hunting, and he had not gone very far before he got a big, fat possum.

Mr. SMOOT. Mr. President, I have heard this before, if the Senator will excuse me.

Mr. HEFLIN. Oh, there is no use to waste any more time on the Senator from Utah; he has had all this Republican prosperity possum that he can stand.

Uncle Rufus decided he would go back and cook that possum. So he dressed the possum, put him in the oven, set him on a rosy bed of coals, and he said: "Now, while that possum is cooking I am going to lie down here and go to sleep, and I'll dream about eating him, and then I will wake up and eat him, and that is what I call enjoyin' him twice."

While Uncle Rufus was sound asleep old Sam passed along by the house and he smelt that possum cooking. He slipped in, lifted the lid off the oven, and sat down and partook of the possum until he had eaten it all; old Uncle Rufus lying there sound asleep. Old Sam took a little of the grease and smeared it on Uncle Rufus's mustache and on his fingers and he took the bones and piled them down beside his head, and walked out of the house. Then he threw a rock on top of the house, and it rolled down and woke Uncle Rufus up. He got up, took the lid off the oven, and the possum was gone. He said, "Who eat dat possum? Surely I didn't eat him." He said, "Here's grease on my mustache, here's grease on my fingers, and here is de bones piled down beside my head. Maybe I did eat dat possum while I was asleep, but if I did eat him, he weighs lighter on my constitution and has less influence with me than any possum I ever eat in all my lifetime." [Laughter.]

That is the way with this Republican prosperity; it has less influence on the masses of the people than any prosperity they ever had. [Laughter.]

Mr. WALSH of Massachusetts. Mr. President, a few moments ago I challenged an assertion of the Senator from Utah [Mr. SMOOT] in reference to his allegation of prosperity in the silk industry. Since that time I have been examining a document which I have in my hand, published by the Department of Labor, entitled "Employment in selected manufacturing industries." I find on page 22 a table which sets forth the establishments working full and part time and employing full and part working forces in December, 1927. Under the heading "Silk goods," industries engaged in the manufacture of silk goods, I find the percentage of establishments operating full normal forces was 39, and of silk manufacturing establishments reporting part normal forces was 61 per cent. Therefore in December last 61 per cent of the silk industries of the country reporting to the Department of Labor were working on part time.

MUSCLE SHOALS

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The CHIEF CLERK. A joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Mississippi [Mr. HARRISON].

Mr. NORRIS. Mr. President, when the Senate had under consideration last week the unfinished business and I had the floor, I was giving illustrations to the Senate tending to show and, I think, to demonstrate, that the supplying of electricity to the people is most economically accomplished by municipal or public ownership of the generating and distributing systems of electric current. On several occasions I have taken pains to call attention to the fact that to get the most economical distribution of generation and distribution of electricity would require a monopoly.

Scientific ingenuity has demonstrated that in the electrical world, where electricity must be distributed and must be used at the time it is generated, and on account of the peculiar and various uses to which it is put, it naturally follows that to get the most economical results we must have monopoly. In other words, in a locality supplied from water power with electricity used in the homes of a city or a municipality, it appears that there are always times in the day when there is what is known as the peak load, and there comes another time in the day when a comparatively small amount of electricity is used; but in order to supply a municipality there must be enough current to supply it at its peak use.

In the city of Washington, for instance, the peak comes in the morning when the employees of the Government are being transported by the street cars from their homes to their various offices, and it comes again in the evening when everybody is turning on the electric lights. If we had cheap enough electricity in the city of Washington so that the cooking in the homes of this beautiful city could be done in that way, there would come a peak at breakfast time, another one at midday, and another one at dinner time late in the afternoon. But the electricity that is not used when the peak is not on disappears, does no one any good, and is of no value whatever. It is just the same as though it was not generated.

Then, with water power there come seasonal peaks, times in the year when the river is very high and we are not able to get as much electricity from the water power as when it is only moderately high. Too much water backs up against the water wheels and destroys some of the generating capacity of the system. Then the dry season comes along and the river is low and the power generated from the river is very much decreased. If we could tie up a system on one watershed with the system on another watershed where high water in one place corresponds with perhaps low water in the other place, we would be able by the touching of a button to equalize the two systems.

If we could get some one whose uses of electricity were confined to the hours between midnight and daylight, we would be able to use electricity that otherwise goes to waste, and hence we could make such customers an extremely low rate, making it very cheap for them, but at the same time it would be all profit to the owner of the system.

The high-peak load in Boston will not be the same as the high-peak load in Washington, and it will not be the same at Chicago as in Cincinnati or at Cleveland. So if we could couple up the larger generating systems as between the various cities, we could equalize the flow of electricity so as to obviate that great loss. When we do that we cheapen electric current for every user, no matter what hour in the day or what season in the year it may be used. Therefore it is important, in order to get the cheapest electricity possible, in order to get the most economical use of it, that cities be coupled up, that they be united, that rivers be united, that different sections of the country be connected by wires so that what is now going to waste in one section would be made beneficial use of in another section.

The computations of experts some years ago before the Committee on Agriculture and Forestry showed that if Dam No. 2, as I remember it—and I think Dam No. 3 was also in the calculation—were hooked up with the Coosa River in the same State—they had taken measurements of both streams, so they knew accurately what they were talking about—we would be able to increase electricity generated by the two systems by 125,000 horsepower. That is only two rivers. If we could couple up those rivers and carry it on to its logical conclusion, we would be able, if we could cover a large portion of the country, to have an almost universal flow of electricity everywhere. In other words, the load factor would go from 45 per cent up to perhaps 90 per cent.

That means that we are making something out of nothing in reality. The profit that we make, although the rate we charge may be extremely low, is almost 100 per cent. When that is divided up among all the customers and they all get the benefit of it we would have a model system. Whether it is privately owned or Government owned, or partially one and partially the other, we are coming logically to that kind of a method of treating electricity in its generation and in its distribution. It is logical. It is as natural as the rising and setting of the sun.

But my contention has always been if that monopoly were turned over to private parties for private gain, the people would not get the benefit of reduced rates. In other words, when electricity becomes common in every home, as it will, and as necessary as water to drink, if we are subjected to the will and wish of a giant monopoly that reaches from the Canadian boundary to the Gulf of Mexico and from ocean to ocean, we will in reality, to a great degree, be slaves. We will be subject to the will and the wish, the whim and the caprice of a monopoly, the magnitude of which stretches the imagination to comprehend.

Therefore I have been contending that the property at Muscle Shoals, owned by the Government, built by expeditures from the Treasury of the United States, built as a war proposition, should be owned by the Government, and that in time of peace the current there generated for the happiness and the benefit of mankind should be distributed within transmission distance of Muscle Shoals and given to the people, and that each place would then stand out as a beacon light on the great horizon of the entire country. Each place would be a milestone marking the right price, the fair price for electricity, and would be used as a model by the experts and the engineers whenever an application was made either for an increase or a decrease of electric-light rates, and this kind of competition, while doing no injury to the Government, would redound to the benefit of the people, not only within transmission, but as a signal to all the people as to what was possible when electricity was properly generated and properly distributed.

When I closed my remarks the other day I had come to a point where I was about to give a further illustration of what may be accomplished if we go at this matter aright. I had

finished calling attention to quite a number of municipalities, and I had given illustrations showing the great reduction in rates that had come about by municipal ownership and municipal management. Those, however, were all individual instances. Important as they are, much good as they have accomplished, the results they have achieved do not represent the end of the good that may be accomplished. I had come to the point where I wanted to give the Senate an illustration of a giant monopoly which is owned and operated by governmental authority, a monopoly for the generation and distribution of electric current covering the entire Province of Ontario, Canada, where all the cities, all the towns, all the villages, and all the farm organizations are coupled into one grand system. I want to do that to-day.

First, let me tell the Senate briefly just what the method of procedure is in Ontario, Canada. About 20 years ago some business men in Canada, manufacturers mostly, and also representatives of municipalities, met and decided to organize certain municipalities into one great consolidated concern, a sort of partnership, as it were, designed to furnish electricity at cost to the people. After two or three years of agitation they succeeded in having passed through the provincial legislature of Ontario a law which provided for a system of generation and distribution of electricity at actual cost to the consumer. The law provided that there should first be organized a kind of wholesale corporation, to be known as the hydroelectric commission. Its business was to generate electricity and to carry it over transmission lines to the various municipalities which wanted to go into the partnership. The law provided for the buying of existing generating plants or the construction of new ones; for the issuing of bonds by the wholesale corporation, and the distribution of current to various municipalities. The law further provided that any municipality which desired to secure electricity from the commission must itself provide for its local distribution, attend to the collection of the charges and fees incident to the operation of the local system; so that each municipality was to be independent in itself, with some exceptions as to regulations, but all together should utilize the one wholesale system of generation and distribution. The municipalities did not generate their electricity; they bought it from the wholesale corporation.

The law provided that each municipality should pay in proportion to the amount of electricity which it consumed; that it should make a sufficient charge to the consumer to provide for the bonds which were issued locally; that upkeep should be provided for; that depreciation should be looked after; and that an amortization fee should be set aside every year which within 30 years should pay off the investment. Similar provisions attached to the parent corporation. So there was the system.

The originators were quite a number of years getting it started. There was a great contest, there was a bitter struggle, as there has been in this country wherever Government operation has been proposed. Up to that time nobody had thought about the farmer. The originators of this scheme were an aggregation of business men; they were not socialists; they were not Bolshevists; but they were the leading business men in the various communities, fought, of course, by other leading business men. But the corporation was formed with the idea of saving money for the domestic consumer and for the manufacturer in order that electricity might be supplied the consumer without paying any profit to middlemen or to private investors. The enterprise, however, had to pay all expenses; it had to stand on its own legs. Two or three years after the enterprise was started the various municipalities that had stayed out commenced to tumble over each other to get in, when they saw the benefit of the system; and when they did get in they increased the benefits, of course, that much more.

Then the farmer came in. He saw what the man in the town was getting. He sometimes visited the city homes and saw the housewife in the little home; in the laboring man's home, perhaps, cooking his meals by electricity; he saw that the bath water and the dishwater were heated by electricity; he saw the toaster, the electric fan, and all the other electric devices for the home being used at a fractional part of the cost that had theretofore been paid. The farmer wanted a similar advantage; he asked for some of it; and everybody conceded that he ought to have something of that kind. So a few years after the enterprise was started and in operation the provincial legislature of Ontario, Canada, passed a law that let the farmer in.

I want Senators particularly to pay attention to this branch of the discussion, because it is in regard to the subject of which I am now speaking that misrepresentation has been spread all over the United States; in fact, all over the civilized world.

I want Senators to listen to me while I tell them what the law provided for the farmer. To begin with, the law was amended and provision was made so that farmers could organize as could municipalities, could elect their officers, issue bonds, install systems, and buy electricity just as the municipalities did of the wholesale corporation, the hydroelectric commission. The law provided that the farmer could come in on the same basis as did everybody else, with one exception that I am going presently to note. The farmers had to issue their bonds in order to get the money to put in their distributing systems; they had to provide for the necessary officials and employees to present the bills and collect them every month and to make the proper returns. They had to provide in the rates charged for an amortization fund, just as in the case of the municipalities, so that the indebtedness would be paid off in 30 years. They had to provide for the payment of interest and for their share of the interest on the bonds of the wholesale company. They also had to provide for depreciation and upkeep.

It was realized that one of the things that stood in the way of farmer organizations securing this cheap electricity was the increased cost of the distributing lines as compared to the distributing systems of the municipalities. In the city or village there would be two dozen or more houses, perhaps, in one block, but out in the country for a distance of several miles, perhaps, there would be not more than four or five farmers who would take the electricity. So the cost of the construction of the distributing system was something which had to be contended with. The legislature, desirous, and very properly so I think, of giving to the rural population in the Province of Ontario the same facilities which the people of the cities and villages enjoyed, made a provision in the law that as to every rural organization so constituted under the law one-half of the cost of the transmission lines should be borne by general taxation. That is the only place in the entire system, either rural or municipal, where the taxpayers of Canada have ever paid one cent toward this great system that now gives them such universal service.

Because of that law, jealous and interested parties sent into Canada, mostly by representatives of the Electric Trust in the United States, have come back and said, "Oh, yes; they have cheap rates up there, but a part of the cost is paid from provincial taxation."

Mr. BROOKHART. Mr. President——

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. BROOKHART. Does the Senator have in mind the proportion of the whole amount that is paid by the Government?

Mr. NORRIS. One-half. I thought I said that.

Mr. BROOKHART. How much would it have increased the rate to the farmers if they had had to pay it all?

Mr. NORRIS. It would have very materially increased the cost to the farmers; even to pay half of it materially increased the cost. The farmer there does not get under existing law the same rate or as cheap a rate as does the man in the city or village, and I presume never will get it until the amortization fund which he is providing pays off the investment. When that shall have happened I do not see any reason why his rates should not be as cheap as those of anybody else.

Mr. BROOKHART. The rates to the farmer, however, are only about 2 cents a kilowatt-hour. Is not that so?

Mr. NORRIS. Sometimes that is so. The rates vary, as do the rates in municipalities.

Mr. BROOKHART. They depend on the length of the transmission lines?

Mr. NORRIS. Yes. They depend upon the expense that is necessary in the construction of the lines and in installing the service.

Mr. BROOKHART. I made a slight investigation some time ago and I found that Canadian farmers were paying about 2 cents, while on the American side our farmers, although getting their light from the same source of power, were paying about 9 cents.

Mr. NORRIS. I made many investigations concerning conditions as affecting the farmers in Ontario and some farmers on the New York side. I spent all night with a farmer just this side of Niagara Falls who was getting his electricity, as were several of his neighbors, from Niagara Falls. I visited his neighbors the evening I was there. The current which they received was privately generated and privately owned. All the farmers were not paying the same rate because one farmer wants a different kind of service from that desired by another. As a rule, all farmers want some power. It is more important that they have power than that they have light in their homes, and the kind of service obtained, whether a farmer buys 10 horsepower or 20 horsepower or whether his load factor is 15

per cent or 80 per cent, makes up the difference in the rate paid. However, the farmers on this side were paying, as I remember now, three or four times as much as the farmers were paying over in Ontario.

If I had thought this question was going to be asked me I would have had a picture of a farm which I visited and which is supplied by electricity. The wife had in her home almost every known kind of household electrical device of which one could think. She heated her dishwater by electricity; she heated the bath water by electricity; she cooked the year around by electricity; she did not have any other kind of cooking stove in her house; and the farmer milked his cows by electricity. He ran a dairy and milked 17 cows, as I remember. He filled his silo by electricity; he pumped water both for the barn and for the house by electricity. It was available all through his barn; water was supplied to his cows by electricity without taking them out of the stall. It was automatic. He told me that it saved him the price of a hired man, and that it saved his wife the price of a hired girl. I have forgotten the exact amount of money that that cost him the year before. He had his bills there and showed them to me; but it was under $80. As I remember, it was seventy-nine dollars and some cents for a whole year for that service.

Mr. President, I want Senators to remember, when anybody talks about paying out of taxation electric rates up in Canada, that there is not anything to it. The only thing in the entire system is the payment of one-half the cost of construction of rural lines; and that has no application to a municipality. That has no application to this parent wholesale concern that supplies all of them with their current. It applies only to the farmer; and it does not apply to the farmer except as to paying one-half of the original cost of the installation of these transmission lines. That is all there is to it.

I want to read you from a letter that I have here before me, that I took from the New York World of just a few days ago. It shows how continually this misrepresentation is going on.

When I had my attention called to it in the cloakroom by the Senator from Virginia, another Senator came up. He heard us talking, and he waved his hand and said, "This Canadian business is all buncombe; there is nothing to it." I said, "What is there about it?" He said, "They get low rates up there, but they pay for it out of taxation." I asked him how he knew, and he said he had read it and heard it.

The same thing happened before the Agricultural Committee when one of the professors from the State University of Tennessee was on the witness stand. He was opposing a resolution of mine; and when I called his attention to the extremely high rate he was paying in Nashville, where he lived, and the low rate, about a third or less than a third of that, paid by the people of a town of equal size in Canada, he waved his hand and said, "There is nothing to that; they pay for it out of taxation"; and he was honest about it. I do not question his honesty or sincerity; neither do I question that of the Senator who made the sweeping statement that he made out there. There is nothing to it, however. It has come from this false statement that has the amount of truth behind it that I have given you—nothing else—and the Electric Light Trust has been busy sending that kind of misinformation to all the people of the United States.

One of the circulars that this great lobby down here sent out was very carefully worded. It was worded so that you could not get them on it; but it said, "Professor So-and-so says that the reason why they have low rates in Canada is because they pay the great portion of it out of taxation." The ordinary reader who gets that will believe, of course, if he believes anything they say, that over in Canada the people are paying for their low electric-light rate by taxation, when there is nothing to it. The electric-light interests of this country would not dare make the statement themselves, because it could be denied, and they could be put on the witness stand and made to eat their words; but they probably quoted the professor correctly, and the professor probably believed what he said.

The man writing this letter in the New York World is Arthur Williams. He is vice president, commercial relations, of the New York Edison Co. His letter is dated New York, February 21, 1928; so he is an official of this company. He has an interest in it. He ought to know what he is talking about. I want to read something that he said:

Returning to the Canadian rates—

Says Mr. Williams—

one is reminded with regret that there is only one Niagara—that priceless possession in the sense of beauty as well as of public service. While differences exist concerning some of the underlying policies, one of which, generally conceded, is basing of household rates upon political rather than economic considerations, the people of that country are to be congratulated upon their marvelous electrical development, whether it be from the technical or engineering standpoint or that of great human service.

He is complimentary, you see, and yet he throws out a slur by saying that this was political. I am going to take that up a little later and show that that is all buncombe, 100 per cent buncombe.

Continuing, Mr. Williams says:

The largest city supplied by the Ontario system—Toronto—offers the fairest basis of comparison with New York's rates. Three classes of service are supplied, each at a different rate.

That is true. The Canadian system has three classes of service—domestic service, that enters into the homes; commercial service, that enters into the business houses; and power service, used entirely for power.

Reference by your correspondent—

He is referring to some other letter that I did not see—

is probably made to the cheapest, which is a kind of service New Yorkers have never been willing to use.

You would infer from that that New York is getting a better service than Toronto. I may not be able to tell the difference in services, but I have been in the two cities, and one of the best-lighted cities and one of the most profusely supplied with electric light in the civilized world, Senators, is Toronto, Canada. We have very few places in the United States that can compare with it. It has as fine an electric service as any man or woman ever enjoyed anywhere on the earth.

The price of low-tension direct current, with storage-battery reserves, which corresponds with the generally prevailing type of service in this city, is 6 cents a kilowatt-hour.

I do not know where Mr. Williams got that figure. Of course, I am not charging him with purposely misrepresenting, although a man in the business ought to know better than to make such a statement. There is not anything to it, as I shall show presently.

This compares with our New York rate of 7 cents with a small additional element of adjustment for coal. The Canadian system, however, pays no taxes; the tax differential alone paid in this city represents almost the entire difference between the two cities.

How far off he is there! I have here the figures of how much per kilowatt-hour the taxes amount to in New York, and they are only a fraction of a cent. As I remember now, they amount to about half a mill, or something of that kind.

Other differences exist which, if added, would bring the Canadian cost in excess of New York's for equivalent or similar service.

This parent company pays taxes in Canada. The municipalities, of course, in their local distributing systems, pay no taxes; that is true; but every one of them pays an amortization fee, while not a single man paying for electric light in New York pays such a fee. In Toronto, every man who has electric service pays a fee that in 30 years will pay off the entire debt incurred for the installation of their system; so that is something that is not paid in New York. The people of New York will be paying, if they continue as they are doing now, a thousand years from now, interest on the same investment. They will have paid the cost of the plant several times over. Their children will have paid it again; their grandchildren will have paid it again; and so on down through time.

Now I am going to give you the rate in Toronto; and I can give it to you for every year since they have had this system, if anybody wants it, and we will see. This man says, and I take his word for it, that they have a rate of 7 cents in New York.

In Toronto in 1926 the average cost for domestic service—that is, in the homes—for electric light during that year was 1.63 cents per kilowatt-hour.

I should like to have the New York World print that statement in a parallel column with the letter from this man who says they pay 6 cents.

The average cost to all the consumers in the city of Toronto in 1926 for domestic service, including the service charge and everything, was 1.63 cents per kilowatt-hour.

The average cost of the stores, the commercial users in Toronto, during the same year, was 2½ cents per kilowatt-hour.

The average cost to the power users in that city during 1926 was $24.51 per horsepower per year.

There you have it for power, commercial service, and domestic service—the only three classes of service that they have, and that includes everybody. Compare that with the rate

anywhere else on earth; and I have not selected Toronto because it stands out alone by itself. I have selected Toronto because Mr. Williams selected Toronto; and, bear in mind, in that small charge there is an amortization fee that will pay off the principal in 30 years' time.

Mr. President, I have here, prepared for me by Mr. Judson King, a map that illustrates the cost of electric service between 32 American cities, represented by the black line, and 21 Ontario cities, represented by the red line, showing the cost to consumers of electric current.

I have not selected these cities. It might be of interest to know that they were selected and called to the attention of the Committee on Interstate Commerce when it had before it the so-called Walsh resolution. They were presented by ex-Senator Lenroot, representing the power companies. So, taking his figures, I had this table drawn.

I selected the Canadian cities, and I have taken the largest so as to get as near a comparison as I can. Everything else being equal, a large city ought to have much cheaper electricity than a small village or a small city, and it does, as a rule. Bear in mind also that in selecting these 32 cities, a list of which is here, Senator Lenroot took Cleveland, Los Angeles, and Seattle, cities where there are municipal plants, with a very cheap rate. If he took only cities that are supplied exclusively by private corporations, instead of having 7½ cents as the average rate, he would have one much higher, and if he took all the cities and all the villages in the United States supplied with electricity from private corporations, in my judgment he would run that figure higher and above 10 cents per kilowatt-hour.

In Canada we have taken all the cities with a population of 10,000 or more, and I notice one on the list with less than 10,000. The average rate in the American cities is 7.4 cents per kilowatt-hour. The average rate in the Canadian cities is 1.6 cents per kilowatt-hour, as shown by the records at the end of the last year. If we took all the American cities supplied with electricity by private sources and all the cities and villages in Canada, we would have a greater difference than we have here. It is a demonstration, it seems to me, that a gigantic power-distributing system such as they have in Ontario is a success, and it can not be otherwise.

The population of these 32 American cities is 25,326,000. The total population of the 21 Canadian cities is only 1,163,000. The comparison, it seems to me, is made where everything is favorable to the American cities and unfavorable to the others, and yet Senators see the wonderful results obtained.

Mr. BLAINE. Mr. President, I think it would be interesting if the Senator would incorporate the names of those cities, and the data on the page attached to the map, in the RECORD, including the map.

Mr. NORRIS. I do not suppose I could get that map in the RECORD.

Mr. BLAINE. I think the Senator could, by reducing its size.

Mr. NORRIS. I would be glad to put it in, if I could, but I doubt whether under the rules I can get that map in the RECORD. Let me inquire of the Presiding Officer whether that would be possible.

The PRESIDING OFFICER. It can be done only by permission of the Joint Committee on Printing.

Mr. NORRIS. I ask unanimous consent that this map be printed in the CONGRESSIONAL RECORD, together with a list of the various cities, both in the United States and in Canada, as to which the data is secured, together with a statement of their population.

The PRESIDING OFFICER. The request will be referred to the Committee on Printing, and I think they will act favorably on it.

[The map will be found in Senate proceedings of March 9, p. 4402.]

Mr. SMITH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from South Carolina?

Mr. NORRIS. I yield.

Mr. SMITH. I do not think there has been any more illuminating statement on the question of power than the one the Senator is now making, for the benefit not only of Senators, but of the country at large. I hope that before he concludes he will discuss the other economic features to which this power was dedicated, namely, the production of fertilizer for the people who so sorely need it.

I am not going to ask the Senator to let me speak at length, because I am going to discuss the matter in my own time, but I wanted to call his attention to one fact. The Senator represents a section of the country that does not suffer so greatly as does my section on account of the lack of artificial fertilization. He stated what it cost in a certain home to have electricity to do all of the power work—less than $100. On a farm of mine, down in South Carolina, a comparatively small farm, my fertilizer bill, cash out of pocket before we ever plant a seed, is, this year, between $2,500 and $3,500. From Florida to Maine, east of the Appalachian system of mountains, the problem of farm production is the problem of fertilization. In my State alone we spend for fertilizer—we must spend—millions upon millions of dollars, the exact amount I will state in my own time.

If the Senator will allow me this observation, there is in my section a curious condition, so far as soil and climate are concerned. The soil is naturally poor. The virgin forest may be taken off and the ground broken up, and yet even the virgin soil will not produce abundantly. But with artificial fertilization and rotation year by year it increases in fertility, until we stand to-day in my State the champion producers of Indian corn to the acre. We can produce more cotton to the acre than can the alluvial soil of Mississippi or the plains of Texas. With artificial fertilization, we can produce more wheat to the acre than can any other section. So that with us it is not a question of power; it is a question of an adequate supply of artificial fertilizer at a reasonable cost.

A curious thing has occurred since the agitation, the discovery of a method by which nitrogen can be extracted from the air, and progressive steps have been taken by science along that line. Chilean nitrate, the basis of all nitrogenous fertilization in my section, has steadily declined, until this year it is as cheap as it was previous to the war, attributable, in my opinion, to the competition that is present and potential in the production of synthetic ammonia from the atmosphere. If the farmers of the Atlantic seaboard were given one-half the cost of their fertilizers, they would be independent. The cost of fertilization practically consumes all the profits of farming, and my reason in 1916 for introducing a measure like this was because the cyanamide process had been demonstrated as a feasible plan by which nitrogen could be obtained in comparison with the use of products from our coke ovens and other processes.

Chile had a monopoly, and those who got the concessions from her were, of course, exploiting them. I introduced my bill because there were in the Muscle Shoals plant the possibilities of providing for the two elements so essential to our country, one its defense and the other its support, and I thought if I could get the nose of the camel under the tent we might demonstrate that the farmers could be relieved of a burden besides which power in my section sinks into insignificance.

On my farm I am supplied now by the Carolina Light & Power Co., with a transformer for my special benefit. That company runs its lines into my place. If I could reduce my fertilizer bill to a reasonable figure, I could buy their power at even the present price and make money. I could utilize the power and pay their present price if I could by the use of Muscle Shoals secure a reduction in the cost of my fertilizer to a figure I considered reasonable. That is why I introduced a bill to turn this plant over to a farm organization, to be run under the auspices of the Government, to create a commission and turn it over to the farmers and say, "You run this for your own interest." I do not see why as we have dedicated the plant to them and taxed the people something like $200,000,000 to bring it to the stage of operation we should now consider diverting it to other purposes than that for which the Atlantic seaboard, from Maine to Florida, is paying yearly taxes of half a billion dollars for the purpose of enriching their soil to help feed the Nation.

Mr. NORRIS. Mr. President, the Senator asks me to discuss the fertilizer question. This, I think, is the fifth day that I have been discussing Muscle Shoals, and went over the fertilizer question and discussed it at a time when the Senator was not here.

Mr. SMITH. I was not present and did not hear the Senator.

Mr. NORRIS. I do not believe, in fairness to the Senate, that I ought to go over the ground again.

Mr. SMITH. No; I do not ask the Senator to.

Mr. NORRIS. I want to say to the Senator—and this will be repetition to some extent—that there is not a man living who is willing to go any further than I will go to bring about the production of cheap fertilizer for the American farmer, and I do not say that solely because of my interest in the farmer; but I am likewise interested in the consumer, and every man, woman, and child who either eats food or produces food is interested in fertilizer.

To my mind it would be folly to say, "Let us get cheaper fertilizer by throwing this power away." That would not give us cheaper fertilizer, and we would lose the power. I think I have demonstrated that the cyanamide process, to the discus-

sion of which I devoted a day or so, is obsolete as compared with other processes. Demonstration was not needed for the Senator from South Carolina, because I have been with him on the committee and I know his viewpoint, and I know that he is convinced, as I am convinced. The Senator from South Carolina is an expert on fertilizer, and he knows that it would be the height of folly and a waste of money to devote this great power now to the operation of plant No. 2 and make fertilizer. He knows as well as I do, from the study he has made with me and the study that he has made independent of everybody of the fertilizer question, that no business man anywhere on earth with enough brains to fill a teaspoon will say, "We will use 100,000 horsepower to operate plant No. 2 down there and make fertilizer," because he would not produce a pound of fertilizer that could be sold to the farmer at a lower price. If the expense of operation and the cost were charged in the price, as any business man would and ought to do, we would not be able to produce fertilizer as cheap as it is bought and sold on the market to-day.

The resolution which I have introduced, and which is pending here, provides for the use of all the money that we get from the sale of power here for the purpose of cheapening fertilizer by the proper experimentation and the proper investigation, and I am willing to go even further than that if anybody can suggest anything that is practical. I agree with the Senator that the fertilizer question is more important than any other.

Mr. SMITH. I agree heartily with the joint resolution of the Senator and am disposed to vote for it, to the exclusion even of my own resolution; but this thought is in my mind. I believe that an organization, either directly of farmers or one that is organized under the auspices of the Government and officered by them through proper farm organizations, should take charge of this entire property, and if they find, which doubtless they will find, that the manufacture of the article on the ground is not economical, then let them take the proceeds which may be derived from the sale of the power and at such places and in such units of manufacture under the synthetic process as may be proper, let them utilize it for their own benefit. The Senator in his resolution has identically the same idea that I have incorporated in my resolution, with the exception that I believe he ought to see that the commission or organization is composed of those actually engaged in agriculture, and let them employ such experts as they may need, and let them distribute the power as they think will best serve the interests of agriculture. Let them manufacture fertilizer out of the proceeds of this institution that we have dedicated to them when and where they may think best. Let them make the experiments for their own benefit, as the Senator has illustrated that the united people of a Province in Canada have demonstrated may be done for the entire people through the united effort of all the people.

Mr. NORRIS. Mr. President, when I digressed to discuss the map to which I referred, I had not finished talking about the Toronto system, and I want to recur to that so as to finish it. I had shown, in answer to the letter printed in the New York World, that while they were paying 7 cents in New York, in Toronto they were paying an average of 1.63 cents per kilowatt-hour during the entire year 1926. I also showed that in that small fee was included an amortization fee which would wipe the debt off the face of the earth in three years.

I did not say, however, what I think ought to be said, and that is that under the Canadian system the books are balanced every year. I think the fiscal year of the system ends on the 31st day of October. Every year the books are balanced. If a municipality should say to the parent company at the beginning of the year, "We will want so much electricity during the year," it is to some extent an estimate always. The charges they are going to make to their consumers are based on their estimates as to how much will be consumed. It may be that they have made an underestimate and that they have not charged enough at the end of the year to pay all the bills, or if they have placed the rate the other way for safety, they have charged too much, so that at the end of the year they will have a surplus out of that year's operations.

Every city must balance its books every year, and Toronto had to balance hers at the end of 1926. During that year she charged a rate that averaged to all her domestic consumers 1.63 cents per kilowatt-hour. What happened at the end of the year? Had she charged enough? Did she still owe the parent company something? Had she charged too much? That is all shown in the official report. As a rule in those reports it will be found 90 times out of 100 that they have a surplus of money coming to them, money on hand instead of a deficit. Once in a while they will underestimate and not charge enough, and when the year is ended and that happens, they have a deficit to make up.

In the case of Toronto, at the end of 1926 they had money left that had not been used in payment of all the necessary charges which the law required them to make—amortization, interest, depreciation, upkeep, and repairs—and that money amounted to $6,962.59. They had charged their people a little too much. They had guessed the right way. If we run through the list of cities and municipalities, over 400 in number, it will be found almost universally that that is the case, and it would be good business, too, because they have charged a little bit more than was necessary in almost every case.

Let me now give the average for all purposes. The man who maintains that they charge too much for power and let the domestic consumer get through with less, or too much to the commercial user, can now get his figures and compare them with similar charges in the United States, where private companies supply the electricity, because I am going to give the average in each class.

First, let us take the domestic consumer. In 1926 there were 83 per cent of the consumers of electricity in domestic service in Ontario, Canada, who paid 1.9 cents per kilowatt-hour or less. Just grasp those figures. See what they mean. Out of all the domestic consumers 83 per cent paid 1.9 cents per kilowatt-hour or less. Many of them paid much less. Fifteen per cent of the domestic consumers paid between 2 cents and 3.9 cents per kilowatt-hour during the entire year 1926. Now, we have accounted for 98 per cent. We have 2 per cent of the consumers yet to account for; 1.8 per cent paid between 4 cents and 6.9 cents per kilowatt-hour. We still have two-tenths of 1 per cent of the consumers left to account for. They paid 7 cents or more. Only two-tenths of 1 per cent of all the domestic consumers in the Province paid as high as 7 cents per kilowatt-hour, and 83 per cent paid less than 2 cents per kilowatt-hour.

Now, let us take the commercial users. Eighty-six per cent of the commercial users of electricity in Ontario, Canada, in 1926 paid an average of 2.9 cents per kilowatt-hour or less. In other words, 86 per cent of the consumers for commercial purposes paid less than 3 cents per kilowatt-hour; 12.4 per cent of the commercial users paid 3 cents and 4.9 cents per kilowatt-hour; 1.3 per cent paid between 5 cents and 7.9 cents per kilowatt-hour; three-tenths of 1 per cent paid over 8 cents per kilowatt-hour.

Now, let us take power. Seventy-six per cent of the users of power paid $25 per horsepower per year or less; 8.6 per cent of the users of power paid between $25 and $30 per horsepower per year; 15 per cent paid between $30 and $40 per horsepower per year. Only four-tenths of 1 per cent paid over $40 per horsepower per year.

To the man who says, as the power lobby here has so often said and spread over the country, that they will let the domestic fellow have the cheapest rates because he has a vote, but when a man wants to get it for power he must pay more than we pay here, I will state that he will find places where cheaper power can be had than the highest priced power up there, but if we average up the prices paid for power we will find that $45 to $30 per horsepower per year is a mighty cheap rate for power. Moreover, the law of Canada provides that each one of those classes must stand on its own bottom. One class can not borrow from another. One class can not be gouged at the expense of another. It stands there like a stone wall by itself, and every year all the users of domestic light, commercial light, or power have a settlement. The charges are based on actual cost, and each system is independent, as far as charges are concerned, of either of the other two.

Mr. President, I have already taken too much of the time of the Senate, but I have only touched on a great many of the important questions involved. It would be exceedingly interesting to take up the history of the hydroelectric commission's operations in Canada. I have been over it in considerable detail at different times. I have not the time to do it now, or at least it does not seem to me to be advisable to take the necessary time to go over it again.

I wish briefly in closing to refer to some of the things with which they have had to contend. The principal thing, Senators, with which that commission has had to contend has been misrepresentation on this side of the line by those sent up there to investigate; by the power combines in the United States. They have circulated part truths such as I have called to the attention of Senators during the course of my remarks this afternoon, until millions of people on account of the reiteration of those falsehoods believe them to be true. I was dumbfounded the other day to see a Member of the Senate wave his hand in satisfaction and put it all behind him by

saying, "There is nothing to that; they pay for their electric lights from taxation." Honest as he no doubt was, he had fallen a victim to the falsehoods and the misrepresentation that have been scattered over this country by the Electric Light Trust.

Mr. SIMMONS. Mr. President——

Mr. NORRIS. I yield to the Senator from North Carolina.

Mr. SIMMONS. I shall not interrupt the Senator in that line of thought. I wanted to ask him a question connected with the inquiry that he has just been pursuing with reference to the cost of the production and the sale of power in Canada and in the United States. In referring to the United States the Senator spoke generally of kilowatt-hours, but in speaking of Canada a little while ago he spoke of horsepower. I wish to ask the Senator if offhand he can tell me what would 15 cents per kilowatt-hour amount to computed in horsepower?

Mr. NORRIS. I could figure that out for the Senator.

Mr. SIMMONS. I asked the Senator from South Carolina [Mr. SMITH] the same question and he stated a figure which was so enormous that it seemed to me that he must have made a mistake.

Mr. NORRIS. It would be enormous, but it could be easily figured out. However, it would take some time to do it.

Mr. SIMMONS. I think if the Senator could work it out and put it in his speech in connection with the figures that he gave based on horsepower in Canada, it would be very much more impressive to the American reader.

Mr. NORRIS. It might be. I think the Senator' suggestion is a very good one. The figures which I have given as to the average cost of electricity for domestic and commercial uses and for power should be considered in connection with the facts as stated on page 338 of the Nineteenth Annual Report of the Hydroelectric Commission of Canada:

> It should be kept in mind that the revenues contributed by the consumers include, in addition to the cost of power, sums applicable to retirement of capital. The annual contributions during the past year to sinking fund and principal payments on debentures in respect of the capital investments of the commission and of the municipalities, together with surplus, amounted to about 20 per cent of the total revenue contributed by the consumers in the municipalities which collectively own the undertaking.

That is quite a large figure—20 per cent. I think that is a very important statement.

> Since these sums represent investments by the consumers which result in future reduction of rates, the cost of the electrical service itself to the consumers is virtually only 80 per cent of the charges per kilowatt-hour and per horsepower indicated in Statement D and in the summary figures derived therefrom.

In other words, in order to get the true picture, the figures that I have given ought to have 20 per cent taken off in order to compare them with figures that are always given by privately owned generating distributing systems.

Mr. President, some day we are going to have a system such as Canada has; some day this old world is going to reach the point where we are going to have electricity in every home the same as we have water; some day it is going to be on every farm; some day every stream that trickles down the mountain side is going to perform service for mankind; some day there will not be a home, either in the country or in the city, but will be supplied by electricity; and all the uses that we know now and those that may be invented in the future will be available to humanity. We can not escape that, Mr. President; it is as sure as is the law of gravitation.

When the world is on this road of progress and is going further onward in promoting the happiness of mankind, we are now confronted with the question as to whether we are going to pull back or whether we are going to push forward. If when that time shall come—which will be within the lifetime of those now living, although it will probably not be within mine—humanity shall find itself chained to earth by a private monopoly, the children of that day will arise and curse our memories for not saving them from the bond of slavery that must be theirs if we fail to do our duty.

In saying this, Mr. President, I charge no man with being dishonest, with doing anything that he does not conscientiously believe to be right. Human nature is much the same everywhere; it is the same whether it is on this side of the aisle or whether it is on the other side. The human heart is much the same whether it is found in a Senator or in a man who is laboring in the street. Humanity is about the same all over the world when we get right down to bedrock. The things necessary for the enjoyment of life depend upon the advance of science and the condition of the human mind at any given time.

Forty years ago this question might have passed with only a moment's consideration; nobody would have thought of it; but 20 years from now it will be a thousand times more important than it is to-day. We can now see what this unseen force is accomplishing and appreciate what wonderful things are in store for our descendants if we properly use the elements that God Almighty has given to man. We will see the time when every stream that flows downhill will promote the happiness of mankind or will be used by private monopoly as a chain to fasten humanity to the earth; and we are confronted with a little step—just a little one—involving the determination whether we are going to add to that monopoly and give it opportunity to bind our children and our children's children to practically a form of slavery.

Charge all those who have such idea as being dreamers, if you want to, but we are fast approaching the day when electricity, as I said before, is going to be as necessary as is water; and no free people will always submit to being held down by a monopoly. Remember that in order to obtain the greatest happiness from the use of this element we must have a monopoly, and it ought to be a monopoly owned by the people themselves. There is no reason why we should turn over the latent power in the rivers and streams that God has put upon the earth to private individuals in order that they may make a private gain at the sacrifice of all the people who own the streams and this blessed element of electricity.

So I think we are presented with an important question, Senators. It is whether we are going to turn Muscle Shoals over to a private monopoly that is already reaching all over the country. When it fastens its grasp upon all of us we will beg then for an opportunity to investigate to find out where their charges are wrong, even though we feel that they are but are not able to demonstrate it. This legislation, if enacted, will stand out as a guidepost, directing us to the place where we can obtain information, where we will be able to ascertain how much it costs to produce electric power and what ought to be charged to God's people when they use their own property.

So I beseech the Senate, no matter what may be the belief of individual Senators as to Government operation and Government ownership, to remember that this is not entirely a question of Government operation or Government ownership. The Government owns Muscle Shoals now, it operates it now, and the question is, Shall we turn it over to private monopoly or shall we keep it for all the people?

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Mississippi [Mr. HARRISON].

Mr. BLACK obtained the floor.

Mr. ROBINSON of Arkansas. Would the Senator from Alabama like to have a quorum present to hear him?

Mr. BLACK. I yield.

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Barkley	Fess	McMaster	Shipstead
Bayard	Frazier	McNary	Simmons
Black	George	Metcalf	Smith
Blaine	Glass	Neely	Steiwer
Blease	Gould	Norris	Stephens
Brookhart	Hale	Nye	Swanson
Broussard	Harris	Overman	Tydings
Bruce	Harrison	Phipps	Tyson
Capper	Hawes	Ransdell	Walsh, Mass.
Caraway	Heflin	Robinson, Ark.	Walsh, Mont.
Couzens	Johnson	Robinson, Ind.	Waterman
Curtis	King	Sackett	Watson
Cutting	La Follette	Schall	Willis
Edge	McKellar	Sheppard	

The VICE PRESIDENT. Fifty-five Senators having answered to their names, there is a quorum present.

Mr. BLACK. Mr. President, it is easy to realize that the subject of Muscle Shoals has been discussed so much and over such a long period of years that perhaps it will be difficult to make any statement which will be either interesting or enlightening; but in view of the fact that the Senator from Nebraska [Mr. NORRIS], in the judgment of the people whom I in part represent, is attempting to divert the power at Muscle Shoals from the purpose of manufacturing fertilizer, for which object it has been formally dedicated, I desire to present some facts with reference to his proposition.

I wish to call to mind in the first place the fact that the pending joint resolution, while it purports to be a bill for the manufacture of fertilizer, is in fact no such thing. One who reads the title might believe that if it should be enacted into law the farmers of America would receive some relief from the distress under which they have been ground down to economic slavery not to a Power Trust but to a Chile nitrate combination.

This bill provides, first, that the power shall be sold on the open market—a proposition which was never contemplated,

according to the records, by any citizen or any Senator or any Congressman who voted for the original bill. It provides, in the next place, a legally declared preference for municipalities, with no declared method of enforcing that preference; and I am convinced that if this joint resolution becomes law as it is written within less than six months the Alabama Power Co. will have a 10-year contract for practically every kilowatt of power that is generated by the water that flows over Wilson Dam.

The people of Alabama oppose that, not because of hostility to the power company, but because of the fact that this power was originally dedicated in peace time to the use of the American farmer. For 10 years this great project has been built. For 10 years the farmers of America have known that Congress was friendly to them, because Congress has daily said so. For 10 years millions and millions of words have been spoken and written about the distress of the farmer. These words have *piled mountain* high in professions of sympathetic interest for the farmers, that have not, in so far as Muscle Shoals is concerned, been translated into a reality.

The biggest plant in America for the fixation of nitrogen by the cyanamide process has been silent for 10 years, while the farmers turned their wistful gaze toward Washington and said, "Now we know that our relief is near; our fertilizer bill will be reduced"; but with words printed in the magazines by people who are really their friends, with words spoken in Congress by people who are really their friends, with their friends divided as to the method by which their relief should be effected, year after year and session after session the farmers of America have continued to be borne down by the burden of an unjust price for fertilizer. During this time propaganda has gone out all over this Nation that fertilizer can not be manufactured at Muscle Shoals at a cheaper rate than it can be bought from Chile, notwithstanding the fact that if the farmers read the record of the test run made at cyanamide plant No. 2, which plant is claimed to be obsolete, and if they will read the figures as to the price at which fixed nitrate can be manufactured at that so-called obsolete plant, they will find that the Government's own engineer conducting a test operation of this very plant has officially reported that by the continued operation of this plant nitrogen could be reduced in price to the farmer 7 cents per pound, amounting to approximately $7,000,000 reduction for the farmers' fertilizer on the total output of that plant. Notwithstanding that fact people still talk "Power! Power!" The farmers are asking for the bread of nitrate, and they get the stone of power.

Here is the whole gist of this controversy: Shall the power from Muscle Shoals be turned over to prosperous industry, or shall it be turned over to the impoverished farmer?

It is all right to draw pictures of farmers having their churns worked, their dishes washed, and their cows milked by electricity; but I want to say to you, as one who is familiar with the farmers of Alabama—it may not be true of Mississippi and other States—that it is worth very little to a farmer whose cow and horse are mortgaged for his fertilizer to offer to cure his ills by supplying power to churn his milk and wash his dishes and milk his cows.

That is the issue, veil it as you may. Will you turn that power over to industry or the farmer? I have heard practically every day since I came to this body that the farmer is poor and downtrodden and overworked and borne down by the burden of obligations. Yet the farmer, if this resolution or the amendments pass, is offered the sweet solace, when he puts his weary limbs to bed at night to pass into troubled slumber, that some scientist, some theorist, for 10 years will be probing into glass tubes and poking around in factories to try to perfect a process which I can prove to you by the statement of the engineers of the United States, whom the Senator from Nebraska says are perfectly reliable, is already in such state of perfection that if, for instance, that plant had been operated last year at capacity, and it had cost every dime to operate it that Colonel Burns said it would cost, the State of South Carolina could have saved on its purchased nitrogen more than a million dollars.

Yet, what those farmers who live away up on the hillsides where, as the Senator from Nebraska [Mr. NORRIS] said, the "brooks trickle and the branches run," what those farmers who never have thought about having hired help, what those farmers who follow their mules from early morning to late at night, will get will be power. It is my belief that when that kind of farmer sees by light coming from that power it will be when their children's children are standing there in the same place where they lived. The sad part of this picture is that the farmer in the meantime will be deprived of fertilizer at a reasonable price because the Congress of the United States could not reach an agreement on a method of operating the greatest potential asset that the farmers of America have to-day.

Gentlemen are arguing about whether it will be privately operated or governmentally operated, drawing beautiful, dazzling visions of electric lights all over the Nation, and the Senators who come from the South know that the electricity which reaches the people there will touch few farms of the people of Mississippi, Alabama, North Carolina, South Carolina, Tennessee, and Georgia. There is propaganda distributed to the effect that there is poverty of power; that it must be equally distributed, and each State must have its part of power; anything, in fact, to prevent the revolution of the wheels at Muscle Shoals that might afford relief to the farmer.

The whole fight here is between the application of this power to industry and to the farm. A man may be the best friend the farmer ever had, but if his eyes are so dazzled by the brilliance of power, by the beautiful illumination, a dream lighting up the mortgaged home of the farmer, that he can not see the practical situation that faces the farmer to-day with reference to high-priced fertilizer, then the farmer might be injured as much by his friend as by his enemy.

The industry and commerce of the United States during the year 1925 reached the highest level ever attained in our history, not even excepting the years of abnormal war activity. If Senator NORRIS' bill passes, this power goes to industry, and there is not one kilowatt out of a million that will reach any farmer down on the hills of Alabama or Georgia or Mississippi or South Carolina.

Mr. President, these are old figures; but they are worthy of being called to the attention of the Senate, because of the fact that this is a fight, conceal it as you will, between those who want this power to be used for the benefit of the farmer and those who want it used to turn over the wheels of industry. What about that? Why should industry be preferred over agriculture, since incomes from farming since 1900 have not been sufficient to pay a fair return on the current value of the capital used and a fair wage for the farmers' labor; when the total indebtedness of the American farmers is from twelve to fifteen billion dollars; when mortgages on the farmers' homes amount to more than $8,000,000,000; when the collateral and personal loans, where the farmer has his cow and his horse and his house mortgaged, are more than $3,000,000,000?

I call attention to this at the outset for the reason that I want to show that it is not fair and not just to take power that is needed to reduce the price of fertilizer for the farmer and make his life easier and, under the guise of equal distribution or equal anything else, tell the farmers of America, "We offered it to you, but it was a sham and a pretense and a mockery." It is not fair to permit agriculture to continue to languish on the ground, poor and bleeding, while industry continues to soar higher into the skies.

What do we know about fertilizer? There were imported into America in the year 1927, 838,591 tons of Chile nitrate. I call attention to the fact that in the years before the war, when this country was unprepared, just before the time when the first naval engagement was fought off the coast of Chile, there were being imported into America, in the year 1914, 606,720 tons of Chile nitrate, or 200,000 tons less than the year 1927. To-day, 10 years after the war, when we should have learned our lesson of preparadness, although we have spent billions and billions of dollars to build battleships, the only plant that America has in it that could prevent our dependence upon Chile for nitrates has had its wheels idle, while the directors of this great Government of ours have argued as to whether it should be operated by the Government or by private individuals, whether private initiative or the Government should operate the plant, and various other controversial matters.

During that same time war-torn and bleeding Germany has absolutely driven Chilean nitrate out of their country, and last year, as against 830,000 tons of Chilean nitrate shipped into this country, there were shipped into Germany only 25,000 tons of nitrates. Nitrates, it will be remembered, are essential if America is prepared to use the guns and battleships billions of dollars have built.

Now, 10 years after the war, in which America realized that it must have nitrates for explosives, we are still arguing over whether we shall experiment 10 more years in order to do what Germany has not experimented with but what Germany has actually done.

Knowing these facts, it is now proposed that we sell the farmers' power for 10 more years, and while we are doing it experiment and project around, and thereby make the world believe that America is not capable, as Germany is, of transacting its business and preparing for war in time of peace.

What do we have next? The total cost of this nitrate that was shipped into America at $47 per ton was $39,413,777. The American Cyanamid Co., using this method which is claimed to be obsolete—which some Senators say is just absolutely foolish to follow, which no one except a man who does not have enough brains to fill a spoon, they say, would use—during the year 1927, with exactly the same kind of a plant that we have at Muscle Shoals, except for certain improvements which could be made at very little expense, sold nitrates and ammo-phos, which contains nitrate, at $64.40 a ton, and the nitrate thus manufactured was sold on the open market at a price which, if it had been substituted for Chilean nitrate, instead of costing this country $39,000,000, would have cost this country $19,757,112.

Now, instead of a saving of $19,656,665 on an alleged obsolete process, this resolution requires that theorists project around and probe about in tubes to seek further reductions in price, because $19,000,000 is not enough for Americans to save. The theorists want to make it perfect.

Mr. SMITH. Mr. President, I would like to ask the Senator whether the figure at which they estimate that this can be sold is an estimate, or did the farmers actually buy the cyanamide?

Mr. BLACK. This was actually sold at Warners, N. J., to the farmers of the world.

Mr. SMITH. Has the Senator ever had any experience with the use of cyanamide direct?

Mr. BLACK. Does the Senator mean cyanamide or ammo-phos?

Mr. SMITH. No; cyanamide.

Mr. BLACK. I have not; but the people of Alabama have used this exact fertilizer, and I have telegrams and letters in my office now telling me that they can use it; that they want it; that it is an ideal fertilizer where there is red clay land; and they do not need potash.

Mr. SMITH. I think the experience of the farmers in the use of cyanamide was not very satisfactory, in view of the fact that the basis of it was lime to hold the nitrogen content. I am aware of the fact that it can be used by the fertilizer companies as a basis for their ammonia and nitrogen, which are convertible terms, but it is not practical to use it direct, as we do nitrate or soda. But I will not take up the time of the Senator in arguing that now; I will go into it in my own time and discuss it.

I do not think there is any question of doubt—and the Senator will, of course, give due weight to it—that our own laboratory here, our nitrate research laboratory, has demonstrated that the synthetic process is infinitely greater than any other in its capacity for turning out ammonia. A unit of power will produce three or four or five times as many units of ammonia as the cyanamide process will, and they claim—and I shall introduce their figures in what I have to say—that the synthetic process is the one now that is not only past its experimental stage, but is practicable; and I do not see why we may not utilize it at Muscle Shoals. The Senator and I are not apart on the idea that the whole project should be dedicated to agriculture and the power or the proceeds of the power used for the purpose of relieving the burden of the price of fertilizer.

Mr. BLACK. Mr. President, Senator SMITH and I are a long way apart if he advocates using the proceeds of this power for experimental purposes only. I admit that the synthetic process can be used; but I claim that the records show, and that business experience shows, that the cyanamide process can be used just as cheaply, and not only that it can, but that it is being done.

Mr. SMITH. I just want to call the Senator's attention to the fact that we are spending a good deal of money in our nitrate research laboratory. I do not have the figures here now, and would not risk my memory in quoting the exact figures, but I do not think there is any question in the world but that it is impossible to produce practical results for the farmer—ammonia or nitrate in the form of cyanamide—when compared to the cost of production by the synthetic process.

Mr. BLACK. I do not care to get into a long controversy over that.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. BLACK. Certainly.

Mr. HARRISON. The Senator has alluded to the fact that Germany has protected itself against Chilean nitrate, and the Senator has cited certain figures. Was it by the synthetic process that nitrates were made in Germany or by the cyanamide process?

Mr. BLACK. Both, and I have the comparative figures, which I will read later.

Mr. HARRISON. I had understood from the speech of the Senator from Nebraska [Mr. NORRIS] that there was a tremendous increase in the production in Germany by the synthetic process, while there had been practically no increase in the production by the cyanamide process.

Mr. BLACK. I did not want to get far into the subject at this time, but I want to state that I do not care whether they use the synthetic or the cyanamide process. It does not make any difference to me. Both of them are past the experimental stage. The cyanamide people claim that their process is the better. The synthetic people claim that their process is the better. One of the gentlemen from whom the Senator from Nebraska quoted a few days ago, who was with the Government, I am informed now has a position with a synthetic plant in this country. There is a fight on between the two as to which is the better, and I call attention to this without caring which one is the better.

The Cyanamid people have the patents on their process. The synthetic people came over from Germany and attempted to sell the Cyanamid Co. the synthetic process. They investigated it, with their engineers, and would not buy. I am informed that the Du Pont Co. and the Allied Chemical Co. did buy it. Their propagandists have been at work, as well as the propagandists of the power companies that want this power at Muscle Shoals for utility purposes. These propagandists have been busy, and have tried to prove to the Congress of the United States that it is foolish to attempt to operate the plant, even though a plant of exactly the same kind is being operated at a profit by a company which has grown by leaps and bounds in the last five years in competition with the nitrate producers of the world. But we will come to that a little later.

Mr. McKELLAR. Mr. President, may I ask the Senator a question?

Mr. BLACK. Certainly.

Mr. McKELLAR. Are there any products of the Cyanamid Co. now going into fertilizer?

Mr. BLACK. Yes; 75,000 tons of them.

Mr. McKELLAR. Now going into fertilizer?

Mr. BLACK. That is what will go into it this year according to my information.

Using this "obsolete" process—let us not forget that—which is too bad for the United States, the farmers of America lost last year $19,656,000.

Mr. SMITH. Mr. President, may I ask the Senator a question?

Mr. BLACK. Certainly.

Mr. SMITH. It has been stated that the cyanamide process has proven such a success and the product can be produced much cheaper than the Chilean nitrates. Their plant has been in operation at Niagara, and that was the incentive really for the bill which I introduced that became the foundation of all this proposed legislation. They have had their plant at Muscle Shoals and they have had their plant at Niagara. They have had absolute control of the patents. Why have they not been putting it on the market in such quantities as to drive the Chilean nitrate off the market?

Mr. BLACK. It is because the Senate, in the first place, would not let them have the plant at Muscle Shoals which the Senator mentions they had.

Mr. SMITH. Could not they——

Mr. BLACK. I will explain the other point now.

Mr. SMITH. Could not they have gotten other water power?

Mr. BLACK. Yes; and they have another water-power project and have been producing, but they can not do it all in a day. They started out in 1925 and produced 18,000 tons. In 1926 they produced 34,000 tons, which is a pretty good growth. In 1927, while we were still debating in this country whether or not the process was obsolete and worn out, the American Cyanamid Co. increased to 50,000 tons.

Mr. SMITH. At what points were they doing that?

Mr. BLACK. At Niagara Falls and Warners, N. J. Thus far during the present year they have already outstanding contracts and have increased their capacity, not installed capacity as was argued here but their operating capacity, and will turn out 75,000 tons of pure nitrate. I do not mean nitrate that is mixed with rock or nitrate that is mixed up with something else, but 75,000 tons of pure nitrate. They have been growing with unusual rapidity. During that time they have been in competition with Germany. Week before last they took away from Germany an order in Hawaii. They are selling to Japan. They are selling to other countries in the Old World in competition with the so-called perfected synthetic process. Bear in mind that so far as I am concerned I do not care what process is used at Muscle Shoals, but I do object to tying this power up for 10 more years and experimenting during all that time, while the farmer looks forward to the time when his children's children may get the benefit of the experiments of which Germany is getting the benefit to-day.

Mr. SMITH. Mr. President, if the Senator will allow me, there is no possible difference between the position the Senator occupies and the one I occupy. It is not a question of whether we shall use the cyanamide process or the synthetic process. It is a question of the most practical process. I have been relying upon the experts employed and financed by the Congress of the United States to give us the proper information, and their bulletins on the question clearly state that the practical process is the synthetic process. We have to depend upon their laboratory research and upon their honesty and their capacity to give us information or else we ought to abolish the whole scheme. Therefore it brings me to the thought that if we are going to dedicate Muscle Shoals for the use of the farmer it is the Senator's duty and my duty to see to it that the best possible process, the cheapest and most efficient process, shall be used at Muscle Shoals for the production of actual practical fertilizer that would be used by the farmer, and not the production of an ingredient that has to go through a mixing plant of the great fertilizer companies before it becomes available for the use of the farmer.

Mr. BLACK. I may say in reply to the Senator's question, as to whether or not we should believe what the Government experts say, that I will show the Senator in just a few moments that one of those experts who went with the Senator from Nebraska [Mr. NORRIS] to the synthetic plants—and, by the way, they did not go to the cyanamide plant—by his own figures, in the hearings before the committee of which the Senator from South Carolina [Mr. SMITH] is a member, showed that the farmers of the South and of the whole country would have obtained nitrate at about 7 cents per pound cheaper if the Muscle Shoals cyanamide plant had been operated than they were able to obtain it from Chile.

I have always heard another thing, which is pretty good doctrine to go by, and that is that "the proof of the pudding is in the eating thereof." When a company goes from 18,000 tons to 75,000 tons in a period of four or five years it is pretty good evidence that shrewd business men are not putting their money into any process which is obsolete and worn out.

Now I would like to proceed with these figures.

Mr. McKELLAR. Mr. President, I would like to ask the Senator a question before he proceeds.

Mr. BLACK. Certainly.

Mr. McKELLAR. The Senator said that "the proof of the pudding is in the eating thereof," and that is true. Is it not true that the various fertilizer companies, including the Cyanamid Co., have a fixed price for fertilizer and that they sell to the farmer at such fixed price? If we were to take up one of the concerns and turn this great plant over to it, how would that benefit the farmers if the Cyanamid Co. is already in a combination to maintain a fixed price for fertilizer which is sold to the farmer?

Mr. BLACK. I do not propose at this time to argue the Madden bill. I am perfectly willing to do that when we reach it. I propose now to show by actual figures that the statement that the cyanamide process is obsolete is disproved, in fact, and to show by actual figures what has been lost to the farmers of the South and of the United States by keeping this plant idle while the Nation dallies along debating which is the proper process.

Mr. SMITH. May I make this statement, and then I shall not interrupt the Senator further. I think the word "obsolete" was used in a comparative sense. An oxcart is not obsolete, even though we have the automobile, but no one will question that transportation by the automobile is quicker and more efficient than by oxcart. The Government claims in its bulletin that the synthetic process——

Mr. BLACK. I have read every word of it.

Mr. SMITH. The Government claims that the cyanamide process consumes such an enormous amount of power as compared with the synthetic process that as a cheap and practical method of obtaining ammonia it is not to be compared.

Mr. BLACK. I understand that. I understand further that the cyanamide process uses one man every time the synthetic process uses three men. I understand further that labor is cheaper in Germany, where the synthetic process is used, than it is in America. I understand further that the by-products which are produced from the manufacture under the cyanamide process are of immense value. I believe that both processes could be used to-day so as to benefit the farmer, and I know further that no fertilizer is manufactured from the synthetic process. I know further that under the bill of the Senator from Nebraska [Mr. NORRIS] the farmers would not be benefited by any process except as experiments might indirectly aid them.

Mr. GEORGE. Mr. President, will the Senator permit me to ask him a question?

Mr. BLACK. Certainly.

Mr. GEORGE. I want to ask the Senator, because he has probably studied the question more than I have, if there is anybody proposing to use the synthetic process?

Mr. BLACK. There is a bid which proposes to use whichever process will make the product best.

Mr. GEORGE. What bid is that?

Mr. BLACK. The Cyanamid Co.

Mr. GEORGE. And it is not confined to the cyanamide process?

Mr. BLACK. Certainly not. They want to use it because they know they can use it cheaper, but they are not tied down to it in their bid.

Mr. GEORGE. They say they will use either process?

Mr. BLACK. They say if the time ever comes when the synthetic process is cheaper, they will adopt it in a minute.

Mr. GEORGE. I understand the Senator to say he will discuss that bid at a later time?

Mr. BLACK. I shall discuss that bid after we have done what I think we should do, and that is defeat the pending resolutions and amendments which would not give the farmers an ounce of fertilizer except to a very few for experimental purposes.

Mr. HEFLIN. Mr. President, right in this connection, if my colleague will permit me——

Mr. BLACK. Certainly.

Mr. HEFLIN. Professor Howe, the chemical expert witness whom the Senator from Nebraska [Mr. NORRIS] had before the committee just recently, when he was testifying was asked this question:

Senator HEFLIN. The American Cyanamid Co. is doing a very flourishing business, is it not?

Professor HOWE. To the best of my information it is.

Senator HEFLIN. Is this American Cyanamid fertilizer a good fertilizer?

Professor HOWE. It certainly is.

Senator HEFLIN. Is it a fine plant food?

Professor HOWE. Yes; unquestionably.

Mr. BLACK. Now, if I may be allowed to proceed with some of these figures, I want to show by actual figures that even though the cyanamide process is as "obsolete as an oxcart," it would have saved the farmers of America millions of dollars to have had that plant at Muscle Shoals in operation last year.

Mr. SIMMONS. Mr. President, will the Senator let me ask him a very simple question?

Mr. BLACK. Certainly.

Mr. SIMMONS. I am asking for information only and not to get into any controversy. To what extent has cyanamide, as it is used in fertilizer, supplanted nitrate of soda from Chile?

Mr. BLACK. As I understand it, cyanamide alone is not used as a fertilizer to any extent, but in combination with other elements.

Mr. SIMMONS. I mean the combination that is used as a fertilizer. To what extent has that combination supplanted the use of nitrate of soda as furnished from Chile?

Mr. BLACK. In America?

Mr. SIMMONS. Nitrate of soda imported from abroad.

Mr. BLACK. In America it has not supplanted it to any appreciable extent by reason of the fact that there is not a single fertilizer factory in America that is itself fixing nitrogen. It has supplanted it to this extent: Many of them are buying cyanamide from the Cyanamid Co. To that extent it is supplanted. It will be a process of education, as all agree, including the Secretary of Agriculture, to bring the farmer up to the point where he can use concentrated fertilizer with the same facility that he uses mixed fertilizer.

Mr. SIMMONS. I will ask the Senator again, Is not the farmer to-day using nitrate of soda secured from Chile?

Mr. BLACK. Yes; and I have just given the figures.

Mr. SIMMONS. Instead of nitrate of soda made by the cyanamide process?

Mr. BLACK. Yes; he is.

Mr. SIMMONS. Is not the reason for that largely because the cost of the fertilizer made by the latter process is greater than that of nitrate imported from Chile?

Mr. BLACK. No; it is for this reason——

Mr. SIMMONS. Together with the fact that the nitrate imported from Chile is a little safer as a plant food?

Mr. BLACK. I do not so understand it. I understand it is for the reason that there is an immense amount of investment among the fertilizer companies of America in antiquated machinery which would be absolutely useless if they fixed nitrogen from the air. The result is that the fertilizer industry, so long as it can maintain the high prices made necessary and imperative by antiquated machinery, is not interested in fixing nitrogen from the air by a cheaper process. My idea is that if

the Government, instead of competing with the power companies, which would help the farmers very little, would cause that plant to compete with the fertilizer factories and reduce the price of fixed nitrate, as it has to do, that then the farmers would get the benefit.

Mr. SIMMONS. Mr. President, I understand that the Senator from Nebraska [Mr. NORRIS] agrees with what the Senator from Alabama has stated, that there is an immense amount of ammonia made in the form of cyanamide in this country, but that only a very small amount of it is actually used by the farmer for fertilizer.

Mr. BLACK. The Cyanamid Co. at Niagara Falls, as I said a few moments ago, sends most of its fertilizer abroad. It began doing so several years ago. That is, perhaps, partially due to the fact that Europe being much older in settlement and the farms having been under tillage over a vastly longer period of years, and the nitrates necessarily having been taken from the ground, it became imperative that the people of the Old World devise new plans and new methods to supply the nitrate which was being rapidly exhausted. Therefore they had begun to use the concentrated fertilizer before we did in America.

I am now undertaking to show that the concentrated process as used at Muscle Shoals will reduce the price generally, and after that I shall show the Senator from North Carolina [Mr. SIMMONS], I think to his satisfaction, that it will reduce the price to him on his farm and will reduce the price to every citizen of his State.

Mr. SIMMONS. I think, then, I understand the Senator's position. I think the Senator admits that at this time the farmer is getting his nitrates from Chile.

Mr. BLACK. Yes, sir; that is mainly true, and that is why I just quoted the figures I did.

Mr. SIMMONS. And the farmer is not getting them from the plants about which the Senator is talking?

Mr. BLACK. That is correct.

Mr. SIMMONS. Although those plants have been making cyanamide for a great number of years.

Mr. BLACK. Yes, sir.

Mr. SIMMONS. But the Senator says if Muscle Shoals can be dedicated to the making of cyanamide then we shall begin to make our nitrates at Muscle Shoals instead of buying them from Chile?

Mr. BLACK. Yes, sir. I am just now giving the figures.

Mr. SIMMONS. The fact is, however, that up to this time we have not been doing that, although we have been manufacturing, first, 19,000, then thirty-odd thousand, and finally 75,000 tons of cyanamide, but have been using practically none of it for the purpose of fertilizer.

I am saying this as a farmer to the Senator from Alabama. I have to buy a great deal of this material. I have bought but a very little of cyanamide.

There was a little of it once brought to my town and we bought some. There was a dealer who dealt altogether in it in a section of the State, but at the end of the year he had about 100 lawsuits brought against him on account of the damage done to crops by the use of cyanamide. We have not learned, in my State, at least, to use cyanamide as a source of nitrogen. In my section we get our nitrates almost entirely from Chile. I think that is also the fact with reference to the remainder of the country. I do not know what the future may bring; the Senator's predictions may be correct; but considering the present as well as the past—we have been making cyanamide for 10 or 15 years in this country——

Mr. SMITH. We have been making it longer than that, if the Senator will allow me to make the suggestion.

Mr. SIMMONS. We have been making it longer than that; we have been making it much longer than that; but up to this time it has not been used for the purpose of making fertilizer. It is used for the purpose of making explosives; it is used in the arts and sciences, but it is not used as a fertilizer. I wish the Senator from Alabama would explain to us more fully why, if cyanamide can be made cheaper in this country than the nitrate of soda which we get from Chile, the fertilizer producers have not been making it and selling it to the farmers?

Mr. BLACK. I expect to explain that to the Senator.

Mr. SIMMONS. I hope the Senator will do so.

Mr. BLACK. I wish, first, to establish the facts, to show something about the figures before I get down to the other proposition.

As I have stated, we imported last year Chilean nitrate valued at $39,000,000. That would have cost at cyanamide prices $19,000,000. The tax we paid to Chile for the purpose of buying that nitrate last year was $9,381,737.

Mr. BROOKHART. What were the figures the Senator stated?

Mr. BLACK. The tax amounted to $9,381,737 last year. America has been too busy discussing processes and power to operate a plant. This country bought 38 per cent of the entire nitrate output sold by Chile.

Mr. GEORGE. In point of tonnage, will the Senator please give us the figures?

Mr. BLACK. The number of tons bought was 838,591.

Mr. GEORGE. And how much cyanamide was exported? Did the Senator give those figures?

Mr. BLACK. I have not given those figures at all.

Mr. GEORGE. I thought the Senator had done so.

Mr. BLACK. But cyanamide plant No. 2, if we can stop discussing power and manufacture something for the farmer, if operated will produce 50,000 tons of pure nitrogen or 38 per cent of the total Chilean nitrate shipment to America in 1927. The world production of cyanamide in 1926, according to the figures given to me by the Commerce Department, was 2,204,500 tons. Germany, by the cyanamide process, produced more than 65,000 tons of nitrogen. That is the lowest estimate that I have found anywhere. Those 65,000 tons of pure nitrogen equal in nitrogen content 419,354 tons of Chile nitrate. So Germany manufactured last year at the lowest estimate more than half as much nitrogen as we shipped in from Chile in nitrates, and yet this process is said to be obsolete and useless.

Mr. SMITH. Has the Senator the figures to show how much ammonia—which is the real form in which the synthetic process develops the commodity rather than nitrogen, and that is the form in which the farmers use it—Germany produced under the synthetic process?

Mr. BLACK. I have the figures here, but I should have to look for them. The amount, however, is more than under the cyanamide process.

Mr. SMITH. Yes.

Mr. BLACK. It is more because Germany is short of water power. It is on exactly the same principle that it is cheaper for a cotton factory to locate in South Carolina than it would be to locate in California. Business and industry, according to expediency and business ideas, are being located at the places where they can best operate. That is true of Germany, as stated in the letter from Prof. Albert T. Franck, who criticized very severely what he alleges to be our Government's propaganda with reference to the cyanamide process and explained in full the operation of the cyanamide process in Germany.

I might state before I leave that branch of the subject that Great Britain imported only 87,965 tons of Chilean nitrates, while we imported 138,000 tons. I will state again that I do not care whether fertilizer is manufactured by the cyanamide or synthetic process. Both of them have proved to be good, and the use of either at Muscle Shoals would reduce the price of fertilizer to the farmer. The cyanamide process, however, gained a greater percentage last year in growth than did the synthetic process, according to Government figures.

In 1926 the Government reports show a sale of 7,496,294 net tons of fertilizer in America. Of this amount the cotton States used for all purposes 5,006,536 tons, or about 75 per cent of the total fertilizer.

Mr. SMITH. Will the Senator allow me to interrupt him?

Mr. BLACK. Yes.

Mr. SMITH. A few days ago in the colloquy between the Senator from North Carolina [Mr. SIMMONS] and the Senator from Nebraska [Mr. NORRIS] during the latter's speech as to the use of ammonia and the amount produced the question was asked as to the relative amount produced in Germany in 1927 by the cyanamide process and by the synthetic process. The Senator from Nebraska put the tables in the RECORD of February 24, at page 3517. The figures show a nitrogen fixation by the direct synthetic ammonia process was 440,000 tons, as against 82,000 tons by the cyanamide process.

Mr. BLACK. I do not know the exact amount, nor am I particularly interested in the differences between the two processes, both of which are doing business in the open market and making money. I am not interested in the fight of the Allied Chemical Co. of America to establish the superiority of its patented synthetic process over the cyanamide process owned by others; but I am interested in whether or not this project down in Alabama, which has been recognized as a great potential force for the farmer since the days of Andrew Jackson in 1816, when he first wrote a letter about it, will be continued as a waste plant or whether somebody somewhere will see to it that we stop squabbling over nonessential details and get down to some proposition that will result in devoting that power to the use of the farmer.

Mr. SMITH. Mr. President, would not the Senator be perfectly willing to vote for a measure designed to create right now an efficient commission that will immediately use the power at Muscle Shoals for the production of fertilizer by whatever process is the most feasible and practicable and to use all the proceeds for the benefit of agriculture, to which the project was dedicated?

Mr. BLACK. I have not read the Senator's bill.

Mr. SMITH. I am not speaking about any bill; I am talking about something that will enable the Government to acquire by leasing or by purchase or by any power that the Government may employ the patents which have proved to be practicable, put them in operation at Muscle Shoals, and let that project, which in the initial legislation was dedicated to agriculture, begin without delay, upon the passage of the bill, to employ such process or processes as will immediately make available fertilizer for agricultural purposes.

Mr. BLACK. I am not wedded to any process or to any bill or to any plan, and I have no pet scheme.

Mr. SMITH. The reason I asked the question——

Mr. BLACK. I am going to answer the Senator.

Mr. SMITH. The reason I asked that question was this: If we can get the friends of agriculture on this floor to take such an attitude, it will not require very many hours for us to get together and pass a bill that will immediately put into operation the great power at Muscle Shoals which is now ready to manufacture fertilizer.

Mr. BLACK. As I started to say, I am not wedded to any bill or to any plan; but I strongly oppose any method that continues to leave that great asset in a state in which its wheels do not turn over. I am willing to concede almost any point that will start the machinery running and will give the farmers the benefit, not of a plan that is perfect, because I do not know anything in this world that is perfect, not of a plan that we will wait 10 years to experiment on, but of a plan that guarantees that within the immediate future those wheels shall begin to turn for the benefit of agriculture. But how can that be done?

Mr. SACKETT. Mr. President——

Mr. BLACK. One moment. How can that be done when Senators look up and say, "Oh, what a wonderful amount of power! How brilliantly that would light up the farms of the Nation! How wonderful it would be to sell it to the cities to light up the city streets! We want some of it down in Georgia. We want it sent to us over the power lines, because it will cheapen our power"; and I am going to show you in a moment that no more fallacious statement was ever made since the beginning of time than that the turning over of that plant to any power company would reduce rates in any State. "We want some of it in Mississippi; we want some of it in Louisiana; we want some of it somewhere else to reduce the cost of our power." It will not reduce it a penny.

Mr. GEORGE. Mr. President, the Senator does not mean to say that the Norris joint resolution would not reduce the cost of power, does he?

Mr. BLACK. I mean to say that in my judgment it would not reduce the cost of the power that Georgia would get one dime or one penny.

Mr. GEORGE. I am not speaking about Georgia. The Senator does not mean to say that operation by the Government and distribution by the Government in competition with private enterprise would not reduce the cost of power?

Mr. BLACK. I mean to say that this measure does not provide for it——

Mr. GEORGE. The Norris joint resolution?

Mr. BLACK. And the man who votes for that measure in the belief that it provides a plan and scheme for selling to the municipalities which will actually work out is laboring under a very serious misapprehension.

Mr. GEORGE. Oh, well, I might agree with the Senator on that point; but the Senator does not mean that if the Government owns and operates Muscle Shoals, and sells the power produced in competition with the power produced by private companies, the Government will not have it in its power, at least, to reduce the cost of the current to every consumer?

Mr. BLACK. The Senator asks me a hypothetical question.

Mr. GEORGE. Oh, no; I am not asking the Senator a hypothetical question. I am asking him a plain, simple question that he can not misunderstand.

Mr. BLACK. I do misunderstand it.

Mr. GEORGE. I will repeat it, then.

Mr. BLACK. Does the Senator mean for the Government to sell that power to the individual consumer?

Mr. GEORGE. Exactly.

Mr. BLACK. Yes; it would reduce the rate.

Mr. GEORGE. That is what the Senator from Nebraska contends that he contemplates in his joint resolution. I am not discussing whether it would do it or not. I think the Senator is quite right in saying that his joint resolution might not work that way.

Mr. BLACK. But the Senator could not have been here the other day when the Senator from Nebraska expressly stated to me, when I asked him about putting in an amendment to that effect, that it did not mean that; that he would not agree for it to go to the ultimate consumer. The Senator from Nebraska expressly told me that.

Mr. GEORGE. I did not so understand him, but I might not have heard that colloquy.

Mr. BLACK. Yes, sir; I offered an amendment which would require that it be sold to him.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. HEFLIN in the chair). Does the Senator from Alabama yield to the Senator from Utah?

Mr. BLACK. Yes, sir.

Mr. KING. Suppose the Government should go into the power business, but suppose the States into which the power went regarded the Government as a private individual instead of as a sovereign, and subjected it and the power which it was attempting to distribute to the same laws and rules and regulations that were applied to private companies that generate power, and taxed it as the States tax the privately owned power companies. Then, obviously, it would not cheapen the power, because the Government would be compelled to submit to the same system of taxation and to the same rules and regulations and to the same rates fixed by the public utility commissions of the various States into which the power went. If, however, the Government impressed the plant with its sovereign power and said, "We are above the State and above State regulations and above State laws, and we propose to give away this power if we want to, or to distribute it in competition and to destroy private enterprise," then of course it could cheapen the power. But certainly no State is going to consent for the Federal Government to become a proprietor and to go into the States and give away power, or sell it cheaply, and not subject it to the same rules and regulations to which it subjects other power companies.

Mr. GEORGE. I was not debating the merits of the Norris measure; but I did not see how the Senator from Alabama could exactly leave that statement standing with the implication that the Government, by bringing its power in competition with the privately produced power, could not sell it at a price that would be reasonable and fair and just, even though it might be below the price charged by others.

Mr. BRUCE. But, Mr. President, how fair would it be to the great private manufacturers of the country?

Mr. GEORGE. I am not discussing that, Mr. President. That was not the point.

Mr. BLACK. I prefer not to get into any controversy about the merits or demerits of Government operation, because, as I conceive it, that is not the main issue involved in this joint resolution.

Mr. GEORGE. I was trying to get the Senator's position. As I understand, he is simply arguing against the Norris joint resolution.

Mr. BLACK. That is exactly right.

Mr. GEORGE. I wanted to understand the Senator; that is all.

Mr. BRUCE. Mr. President, may I interrupt the Senator just a moment?

Mr. BLACK. If it is not to get into an argument over Government operation, because I do not want to argue that question.

Mr. BRUCE. No; I do not think that admits of argument, as I look at it; but when the Senator stated that undoubtedly fertilizer would be produced by the Government at a low rate——

Mr. BLACK. I did not intend to make such a statement, Mr. President.

Mr. BRUCE. I understood the Senator to say, in answer to the Senator from Georgia, that undoubtedly Government operation would result in reduced rates for fertilizer.

Mr. GEORGE. I so understood the Senator.

Mr. BLACK. I understood the Senator from Georgia to ask about power.

Mr. GEORGE. I did ask about power. The Senator from Alabama is quite right about that.

Mr. BRUCE. Then I stand corrected; but the Senator from Alabama is not advocating Government operation?

Mr. BLACK. No, sir; I am not. I am advocating the use of this plant in some way to manufacture fertilizer.

Mr. SACKETT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. BLACK. Yes, sir; I yield again.

Mr. SACKETT. I desire to ask the Senator a question. I understood him to state just now that he was not favoring any particular measure.

Mr. BLACK. At this time, I said, I am not favoring any particular measure. I am against the measure which is up for discussion.

Mr. SACKETT. Of course, the Senator is familiar with the Willis bill that is here, the same bill that was introduced in the House.

Mr. BLACK. It has not been offered as a substitute for this joint resolution, Mr. President.

Mr. SACKETT. That is Senate bill 2786, to authorize and direct the Secretary of War to execute a lease to the Air Nitrates Corporation and the American Cyanamid Co.

Mr. BLACK. If the Senator is asking me how I stand on that bill at this time, I shall be glad to tell him. It is not in issue at present, however.

Mr. SACKETT. I understood the Senator to say that he was not advocating it.

Mr. BLACK. At present I am not discussing the advisability of the Government accepting that bid. That is not before the Senate. The only measure, according to my information, that is before the Senate is the joint resolution of the Senator from Nebraska [Mr. NORRIS] for a so-called Government operation, with certain amendments, some of which would completely strip it of every governmental operating function; and one which, in my judgment, would strengthen it for the benefits of the people, so far as power alone is concerned.

Mr. SACKETT. Of course, I understand that the Senator is advocating the American Cyanamid proposition in some form as opposed to the Norris joint resolution.

Mr. BLACK. As I said, I am not going to get into a controversy on that measure until we reach it. As between the two, I think it is a thousand times better for the farmers of America to accept the Cyanamid bid than it would be to pass the Norris joint resolution. Yes, sir.

Mr. SACKETT. That is what I wanted to know.

Mr. BLACK. However, that is not what I am discussing.

The cost of the fertilizer used in the cotton States, as I stated, was $76,000,000. The average price of this fertilizer, according to Government reports, was $32.50 per ton. The total cost of all fertilizer used is not available; I was unable to obtain it; but, assuming that the remainder of the fertilizer sold was of the same value of $32.50 per ton, although that is a very low figure, the fertilizer bill of the entire United States in 1926 was $243,629,555. In 1900, a report which is perhaps a little nearer, it was $326,399,800.

So Senators will see that this is no small business affair. Nitrogen is the chief ingredient and the most expensive ingredient of fertilizer, more expensive than phosphate, as I understand, and even more expensive than potash.

Mr. BRUCE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Maryland?

Mr. BLACK. Yes, sir.

Mr. BRUCE. I am not going to engage the Senator in any argument, but I should like to have a reply to this question: The Senator is asking us to vote down the Norris proposition?

Mr. BLACK. Yes, sir.

Mr. BRUCE. After that is done, if it is done, what does the Senator propose to offer in its place—Government operation?

Mr. BLACK. So far as I am concerned, I favor the use of this plant for fertilizer purposes by a private bidder if an acceptable bid can be obtained.

Mr. BRUCE. I am glad to hear the Senator say so.

Mr. BLACK. Understand me further: If there should be any surplus power, I would not oppose the sale of that power to municipalities. I do not think there would be any surplus power; but, if there were any surplus, I would not oppose the sale of it to municipalities.

Mr. SACKETT. Mr. President, will the Senator yield once more?

The PRESIDING OFFICER. Does the Senator from Alabama further yield to the Senator from Kentucky?

Mr. BLACK. Yes, sir.

Mr. SACKETT. The Senator has talked a good deal about the American Cyanamid Co. Is there anybody else that the Senator knows that could operate that process except the American Cyanamid Co.?

Mr. BLACK. Anybody could operate it that would pay them their royalty for their patent.

Mr. SACKETT. Yes; but, of course, that would put any other concern under a disadvantage by which it could not operate in competition with the American Cyanamid Co., would it not?

Mr. BLACK. It is my judgment that some other company could pay $1,200,000 a year for the use of the patent, manufactured by the cyanamide process, and save the farmers of America millions of dollars per year; and I think I can show it.

Now, let us get down to the figures.

Ammo-phos is the product manufactured by the Cyanamid Co. It is a combination of nitrogen and phosphate. There are many soils that do not need any potash added to them. In the county where I was reared, a county composed largely of red clay hills, there is an abundant supply of potash in the soil, according to my information. Therefore, so far as the addition of potash is connected with red clay, I understand that the amount needed is comparatively insignificant.

This ammo-phos is actually selling on the market—this is no guesswork—it is actually selling on the market in millions and millions of dollars' worth per year for $64.40 per ton.

The Muscle Shoals inquiry, in their investigation, found that it could be manufactured at Muscle Shoals for $70.23 per ton two or three years ago. Each tone of ammo-phos contains 215.8 pounds of nitrogen and 960 pounds of phosphoric acid. The nitrogen content of this product sells at 7.6 cents per pound. Remember that.

Mr. SMITH. Mr. President, what are the percentage proportions of this ammo-phos, manufactured by the cyanamide people? What is the percentage of phosphoric acid and what is the percentage of ammonia?

Mr. BLACK. I read it a moment ago. I will read it again. The percentage is that in each ton there is 215.8 pounds of nitrogen and 960 pounds of phosphoric acid.

Mr. SMITH. Then that would be about 12½ per cent of nitrogen?

Mr. BLACK. Yes; that is right.

Mr. SMITH. The Senator said the phosphoric acid was about 900 pounds?

Mr. BLACK. Nine hundred and sixty pounds.

Mr. SMITH. Then you would have a relation of about 9 to 12. That is, at $64 a ton?

Mr. BLACK. Sixty-four dollars and forty cents.

Mr. SMITH. Yes. So far as the phosphoric acid is concerned, the Senator knows that that is the cheapest form of fertilizer known to the world?

Mr. BLACK. Yes, sir; absolutely.

Mr. SMITH. Chilean nitrate carries 17 to 18 per cent of actually soluble, available ammonia.

Mr. BLACK. I have the exact figures here, Mr. President.

Mr. SMITH. The Senator will find that that is about right.

Mr. BLACK. I have the exact figures if the Senator wants them.

Mr. SMITH. All right. The Senator will find that it is 18 per cent ammonia, or 15 per cent in its equivalent of nitrogen. That is, at $64 a ton. The Senator, if he farms as some of us do, will find that the ammo-phos or the phosphate of ammonia or the sulphate of ammonia is not always completely soluble or available, while the Chilean nitrate is the quickest diffusible stimulant known to the agricultural profession or calling or avocation or starvation process. Within six or seven days you can see the effect of Chilean nitrate, whereas sulphate or phosphate of ammonia takes a long time, and there is doubt as to its ultimate effect.

Mr. BLACK. I may state for the benefit of the Senator that I did not care to go into a discussion of that, and do not care to do so now. However, I happen to have a statement by the Secretary of Agriculture of an actual experiment that shows that this fertilizer produced in some instances more satisfactorily than Chilean nitrate. I do not care to go into that any further.

Proceeding, I will repeat that the selling price of nitrogen by the Cyanamid Co. is 7.6 cents per pound. The capacity of nitrate plant No. 2 with modern methods is 50,000 tons of fixed nitrogen. This equals, in nitrogen content, about 1,667,000 tons of ordinary 3-8-3 fertilizer, which most farmers use. This plant would therefore produce about 23 per cent of all the nitrogen used in fertilizer in the United States in 1926, assuming that all of the 1926 product contained nitrogen. Of course, some of it did not.

Therefore it will be seen that if you should throw 23 per cent of fertilizer of a concentrated form on the market—and that is the smallest estimate you could possibly make—where it can reach the various States at very low freight cost, comparatively

one bag to four bags, you would bring about a reaction on the price of fertilizer all over America.

Mississippi used in 1925, according to Government reports, 258,078 tons of fertilizer containing 3 per cent nitrogen, or 7,741 tons of such nitrogen. Mississippi therefore bought at high prices only about one-seventh of the nitrogen capacity of nitrate plant No. 2. I am giving that as an evidence that when you put that much fertilizer on the market it is not going to be limited to the Muscle Shoals or Alabama district.

Based, however, on the present price of fixed nitrogen by the cyanamide process at Warners, N. J., of 7.6 cents per pound and the port price of Chile nitrate of 15.15 cents per pound, the farmers of Mississippi paid $1,168,891 more for their nitrates than if they had bought it from a factory using the cyanamide process.

The proof of the proposition is, what does it do? You can not get a better test or a better criterion than to go out in the open market and say, "What does the product bring in competitive commerce if it is manufactured under a certain process?" They can bring forth all the theories they desire, from all the scientific men who have been putting their noses into glass tubes and then saying that a process is "obsolete," but if you show me that it is actually selling, you will agree that their theories are exploded.

While the farmers were paying this extra amount for fertilizer, the Alabama Power Co. bought at 2 mills per kilowatt-hour the power which should have been used in the manufacture of fertilizer. Computing, according to the amount of power now used by the cyanamide process at Muscle Shoals—and the commerce reports show that it could be manufactured for a little less—9,598 kilowatt-hours would have produced the amount of nitrogen used by the farmers of Mississippi in 1925. The prices paid by the Alabama Power Co. for this amount of power, at 2 mills per kilowatt-hour, was $168,171. If this power had been used at nitrate plant No. 2 in the manufacture of nitrogen, on the basis of the selling price of nitrate by the Cyanamid Co. at Warners, N. J., it would have given the farmers of Mississippi the same nitrate for $1,176,632. The price actually paid by the farmers of Mississippi for nitrate in 1925 was $2,345,523, on the basis of $47 per ton.

I had a telegram to-day which stated that Chile nitrate was selling for $60. The farmers of Mississippi by using this power in the manufacture of fertilizer rather than as power, as Senator NORRIS' bill proposes, in 1925 would have saved $1,168,891. That is the primary reason why we insist that this plant should be used to manufacture fertilizer. That is why we contend that any proposition which turns it over for use as a power plant is not only a diversion of the rights of the people but it robs the farmers of an asset which has been dedicated to their use.

The State of Georgia uses three times as much fertilizer as Mississippi, computing on the same basis of their 1926 production. If the farmers of Georgia could have bought fertilizer at the price required for its manufacture at the cyanamide plant, according to what they are actually doing now, they would have saved $3,554,993.

Fertilizer used in Alabama in 1925, according to Government reports, was 590,515 tons on a 3–8–3 basis, containing 17,715 tons of the pure nitrogen. The excess paid by the farmers of Alabama on the same figures amounted to $2,674,965.

North Carolina, which is one of the largest consumers of fertilizer in the Nation, used 1,217,628 tons of fertilizer in 1925, and if the farmers of this State had bought it at the price quoted by the Cyanamid Co. at Warners, N. J., they would have saved the stupendous sum of $5,515,979 in one year.

What difference, I ask the Senator from North Carolina, does it make to the farmers of North Carolina whether their fertilizer is manufactured by the cyanamide process or the synthetic process? What difference does it make whether it is manufactured by Henry Ford or by the Cyanamid Co. of America? The thing that counts is this: Would the farmers have saved any money? They would have if they had bought it at the Cyanamid Co.'s actual price to-day at Warners, N. J.

Mr. SIMMONS. Mr. President, the Senator has asked me a question, and I will answer it.

Mr. BLACK. I did not intend to get into any discussion.

Mr. SIMMONS. I want to answer the Senator's question.

Mr. BLACK. Very well.

Mr. SIMMONS. It does not make a particle of difference, from the farmers' standpoint, how much cyanamide is made in this country if it can not be reduced to fertilizer and sold for less than the price they pay for the fertilizer bought from Chile.

Mr. BLACK. That is correct.

Mr. SIMMONS. The Senator has not been able to show us that they have ever done that up to this time, and he simply predicts that they will do it in the future. Whether they will or not I do not know, but I have reasons to believe that the synthetic method will supplant the cyanamide method.

If the cyanamide method will furnish the farmers of my State with nitrogen at less than they are paying now for it, I would like to do anything I can to encourage the growth of that industry. But that industry has grown and continued to grow for many, many years, and yet it is furnishing no fertilizer, practically, for the farmer, and the farmer is still compelled to buy from abroad, as he was 25 years ago.

Let me ask the Senator this question, having answered that: Does his bill propose to use all the power at Muscle Shoals for the manufacture of cyanamide?

Mr. BLACK. My bill?

Mr. SIMMONS. The one the Senator is advocating, I mean—the proposition he is advocating.

Mr. BLACK. At present, as I stated a little while ago, I am not going into the merits or demerits of the Madden bill.

Mr. SIMMONS. But the Senator wants Muscle Shoals for some company that is engaged in the manufacture of cyanamide. Otherwise there is no point to his argument with reference to cyanamide and the amount that can be produced, the cost of its production, and its uses. He is in favor of this plant being turned over to some company that will produce cyanamide. Does he propose to use all the great power of Muscle Shoals for the production of cyanamide?

Mr. BLACK. Is that all of the question the Senator wanted to ask?

Mr. SIMMONS. I ask the Senator that, and when he answers that I will ask him another.

Mr. BLACK. The Senator refers to the great power at Muscle Shoals. I shall be glad to show the Senator in a very few moments, if I am allowed to proceed, that all of this great power of which we have heard so much that is going to be distributed to the various States in primary water power, is not sufficient to supply the needs of Memphis, Tenn.

Mr. SIMMONS. I do not know of cyanamide being made anywhere in this country from energy derived from water power except at Niagara Falls. Elsewhere it is being produced by steam plants. It has been said that this great du Pont company in recent years—the last three or four years—has erected three great plants, as I recall it, for the production of cyanamide or synthetic nitrogen, for the purpose of making explosives; but every time, notwithstanding the great water powers all over this country of ours, they have erected steam plants for that purpose. It is being manufactured generally in steam plants. I can not see why the Senator is so much stirred up about the possibilities of the cyanamide process in connection with Muscle Shoals if it is not his desire to have Muscle Shoals turned over to some cyanamide company that is going to use all the power at Muscle Shoals for the manufacture of cyanamide.

Mr. BLACK. Is the Senator through?

Mr. SIMMONS. I am through.

Mr. BLACK. As I stated a while ago, and as I will state again, I am not wedded to either an idea or a process. I am not the special defender of any process or any company. I do not appear as such.

Mr. SIMMONS. Then, if the Senator will pardon me——

Mr. BLACK. If the Senator will permit me to continue, I will be much obliged.

Mr. SIMMONS. I just want to say one word, and then I will stop.

Mr. BLACK. Very well.

Mr. SIMMONS. Then I do not see the reason for the vehemence with which the Senator has been defending cyanamide. I do not see the point, the purpose of the Senator, and I would like to know what his purpose is. I have been anxious to know.

Mr. BLACK. I am defending one of two processes, either of which in my judgment could be used for the manufacture of fertilizer. I believe from my observation and my study that the cyanamide process can be used more cheaply at Muscle Shoals than the synthetic process.

What the farmers were taught to believe they could get, and what they have not received, is nitrogen and fertilizer, and in my judgment there has already been too much time spent in the Senate in discussing the relative merits of the two processes.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER (Mr. HEFLIN in the chair). Does the Senator from Alabama yield to the Senator from Kansas?

Mr. BLACK. I yield.

Mr. CURTIS. I desire to inquire of the Senator from Alabama whether he can conclude his remarks in a few minutes? It is desired that there shall be an executive session, and I would like to have it now.

Mr. BLACK. Assuming that I would be asked a great many more questions, I could not conclude in a few minutes.

Mr. ROBINSON of Arkansas. I understand the Senator from Alabama will require some considerable time to complete his remarks.

Mr. BLACK. That is correct. I could have concluded before this time if no questions had been asked; but I think it is proper that questions should be asked.

Mr. CURTIS. Will the Senator yield for an executive session?

Mr. BLACK. I yield for that purpose.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and the Senate (at 5 o'clock and 5 minutes p. m.) adjourned until to-morrow, Tuesday, March 6, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 5, 1928

COMMISSIONER OF IMMIGRATION

William M. Tuttle, of Louisiana, to be commissioner of immigration at the port of New Orleans, La.

COLLECTORS OF CUSTOMS

Andrew Wiedenmann, of Rochester, N. Y., to be collector of customs for customs collection district No. 8, with headquarters at Rochester, N. Y. (Reappointment.)

Russell H. Dunn, of Port Arthur, Tex., to be collector of customs for customs collection district No. 21, with headquarters at Port Arthur, Tex. (Reappointment.)

ASSAYER IN CHARGE OF MINT

Elbert T. Clyde, of Carson City, Nev., to be assayer in charge of the mint of the United States at Carson City, Nev., in place of Annie H. Martin, deceased.

COAST AND GEODETIC SURVEY

To be aides, with relative rank of ensign in the Navy

Laurence Wilbur Swanson, of Colorado, vice H. K. Hilton, resigned.

Gilbert Rolland Fish, of Nebraska, vice E. B. Latham, jr., promoted.

Franklin Rice Gossett, of Tennessee, vice John Bowie, jr., promoted.

Ernest Bane Lewey, of Virginia, vice G. R. Shelton, promoted.

John Clarence Mathisson, of Alabama, vice I. T. Sanders, promoted.

Rolland Alson Philleo, of California, vice C. R. Bush, jr., promoted.

Harold Joseph Oliver, of Iowa, vice E. R. McCarthy, promoted.

George Anthon Fredrickson, of Massachusetts, vice B. G. Jones, promoted.

George Edward Morris, jr., of Minnesota, vice F. C. Quinn, promoted.

UNITED STATES DISTRICT JUDGE

Bascom S. Deaver, of Georgia, to be United States district judge, middle district of Georgia. (An additional position created by the act approved May 28, 1926.)

POSTMASTERS

ALABAMA

Alvin E. Caudle to be postmaster at Brilliant, Ala. Office became presidential July 1, 1927.

Allie L. Boutwell to be postmaster at Flomaton, Ala., in place of M. C. Clark, resigned.

CALIFORNIA

John W. Calvert, jr., to be postmaster at Azusa, Calif., in place of J. W. Calvert, jr. Incumbent's commission expires March 7, 1928.

Purley O. Van Deren to be postmaster at Broderick, Calif., in place of P. O. Van Deren. Incumbent's commission expires March 7, 1928.

Floyd F. Howard to be postmaster at Courtland, Calif., in place of F. F. Howard. Incumbent's commission expires March 7, 1928.

Anthon G. Heerman to be postmaster at Dinuba, Calif., in place of A. G. Heerman. Incumbent's commission expires March 7, 1928.

Nelson S. Dilworth to be postmaster at Hemet, Calif., in place of N. S. Dilworth. Incumbent's commission expired March 3, 1928.

Frances E. Bennett to be postmaster at Mills College, Calif., in place of F. E. Bennett. Incumbent's commission expires March 7, 1928.

Winfield S. Buchner to be postmaster at Oildale, Calif., in place of W. S. Buchner. Incumbent's commission expires March 7, 1928.

Manuel S. Trigueiro to be postmaster at San Miguel, Calif., in place of M. S. Trigueiro. Incumbent's commission expires March 7, 1928.

M. Elizabeth Woods to be postmaster at Wilmington, Calif., in place of M. E. Woods. Incumbent's commission expires March 7, 1928.

Albert K. Small to be postmaster at Murrieta, Calif., in place of O. W. Miller, deceased.

COLORADO

John Davis to be postmaster at Arriba, Colo., in place of John Davis. Incumbent's commission expires March 5, 1928.

Thomas B. Scott to be postmaster at Meeker, Colo., in place of T. B. Scott. Incumbent's commission expires March 5, 1928.

CONNECTICUT

Clifford E. Chapman to be postmaster at Niantic, Conn., in place of C. E. Chapman. Incumbent's commission expires March 11, 1928.

FLORIDA

Mary Joyner to be postmaster at Bagdad, Fla., in place of Mary Joyner. Incumbent's commission expires March 11, 1928.

IDAHO

Arthur B. Bean to be postmaster at Pocatello, Idaho, in place of A. B. Bean. Incumbent's commission expires March 7, 1928.

ILLINOIS

Georgia W. Cooper to be postmaster at Congress Park, Ill., in place of G. W. Cooper. Incumbent's commission expired January 7, 1928.

INDIANA

Walter C. Belton to be postmaster at Acton, Ind. Office became presidential July 1, 1927.

KENTUCKY

Albert E. Brown to be postmaster at Pembroke, Ky., in place of H. C. Miller, resigned.

MAINE

Carl W. Mitchell to be postmaster at Union, Me., in place of C. W. Mitchell. Incumbent's commission expires March 5, 1928.

MARYLAND

Thomas G. Pearce to be postmaster at Glenarm, Md., in place of E. L. Edwards, removed.

MASSACHUSETTS

Isabelle Crocker to be postmaster at Cotuit, Mass., in place of Isabelle Crocker. Incumbent's commission expires March 7, 1928.

Chestina B. Robbins to be postmaster at East Templeton, Mass., in place of C. B. Robbins. Incumbent's commission expires March 7, 1928.

Harry W. Metcalf to be postmaster at Wrentham, Mass., in place of H. W. Metcalf. Incumbent's commission expired December 18, 1927.

MINNESOTA

Carl H. Schuster to be postmaster at Biwabik, Minn., in place of C. H. Schuster. Incumbent's commission expired March 3, 1928.

Charles A. Morse to be postmaster at Elk River, Minn., in place of C. A. Morse. Incumbent's commission expired December 19, 1927.

NEBRASKA

Edwin P. Clements, jr., to be postmaster at Ord, Nebr., in place of E. P. Clements, jr. Incumbent's commission expires March 11, 1928.

NEW HAMPSHIRE

Alice L. Coughlin to be postmaster at West Ossipee, N. H., in place of A. O. Albrecht. Incumbent's commission expired December 18, 1927.

NEW YORK

Harold L. Payne to be postmaster at Bainbridge, N. Y., in place of H. L. Payne. Incumbent's commission expired February 13, 1928.

Edmund B. Windsor to be postmaster at Castile, N. Y., in place of E. B. Windsor. Incumbent's commission expired January 8, 1928.

Robert L. McBrien to be postmaster at Huntington, N. Y., in place of R. L. McBrien. Incumbent's commission expires March 11, 1928.

Charles Blackburn to be postmaster at Southampton, N. Y., in place of Charles Blackburn. Incumbent's commission expires March 11, 1928.

Harry B. McHugh to be postmaster at Wallkill, N. Y., in place of H. B. McHugh. Incumbent's commission expires March 11, 1928.

NORTH CAROLINA

Richard J. Pace to be postmaster at East Flat Rock, N. C., in place of R. J. Pace. Incumbent's commission expired February 11, 1928.

NORTH DAKOTA

Ole H. Opland to be postmaster at Mott, N. Dak., in place of C. A. Vasey. Incumbent's commission expired February 19, 1927.

OHIO

Howard E. Foster to be postmaster at Chagrin Falls, Ohio, in place of H. E. Foster. Incumbent's commission expires March 5, 1928.

Frank H. Shaw to be postmaster at Germantown, Ohio, in place of F. H. Shaw. Incumbent's commission expires March 5, 1928.

OKLAHOMA

Ada M. Thompson to be postmaster at Mannford, Okla., in place of A. M. Thompson. Incumbent's commission expires March 7, 1928.

OREGON

David S. Young to be postmaster at Dufur, Oreg., in place of D. S. Young. Incumbent's commission expires March 7, 1928.

Don Ellis to be postmaster at Garibaldi, Oreg., in place of Don Ellis. Incumbent's commission expires March 7, 1928.

Fred C. Holznagel to be postmaster at Hillsboro, Oreg., in place of F. C. Holznagel. Incumbent's commission expires March 7, 1928.

Thomas G. Hawley to be postmaster at Multonomah, Oreg., in place of T. G. Hawley. Incumbent's commission expires March 7, 1928.

PENNSYLVANIA

Isaac A. Mattis to be postmaster at Millersburg, Pa., in place of I. A. Mattis. Incumbent's commission expired February 15, 1928.

Nathaniel Shaplin to be postmaster at Windgap, Pa., in place of Nathaniel Shaplin. Incumbent's commission expires March 5, 1928.

John H. Eckert to be postmaster at Gettysburg, Pa., in place of R. C. Miller, resigned.

PORTO RICO

Nicholas O. Lebron to be postmaster at Aibonito, P. R., in place of N. O. Lebron. Incumbent's commission expires March 7, 1928.

Jose E. Guenard to be postmaster at Mayaguez, P. R., in place of J. E. Guenard. Incumbent's commission expires March 7, 1928.

Roque Rodriguez to be postmaster at Ponce, P. R., in place of Roque Rodriguez. Incumbent's commission expires March 7, 1928.

Juan V. Hernandez to be postmaster at San Sebastian, P. R., in place of J. V. Hernandez. Incumbent's commission expires March 7, 1928.

L. Castro Gelpi to be postmaster at Vieques, P. R., in place of L. C. Gelpi. Incumbent's commission expires March 7, 1928.

TEXAS

Louise Sackett to be postmaster at Bullard, Tex., in place of E. A. Kirkpatrick. Incumbent's commission expired December 19, 1927.

Walter E. Hall to be postmaster at Lufkin, Tex., in place of W. L. Evans. Incumbent's commission expired December 19, 1927.

Fannie Dawson to be postmaster at Wilson, Tex., in place of Fannie Dawson. Incumbent's commission expired March 1, 1928.

John T. Hopkins to be postmaster at Longview, Tex., in place of E. H. Angell, resigned.

Willie M. Prouty to be postmaster at Wallis, Tex., in place of J. R. Ratcliff, resigned.

UTAH

Agnes Turnbull to be postmaster at Scofield, Utah, in place of F. C. England, resigned.

WEST VIRGINIA

Nina E. Welch to be postmaster at Camden on Gauley, W. Va., in place of N. E. Welch. Incumbent's commission expired December 18, 1927.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 5, 1928

FOURTH JUDGE, CIRCUIT COURT OF HAWAII

Edward M. Watson to be fourth judge, Circuit Court, First Circuit of Hawaii.

UNITED STATES ATTORNEY

James W. McCarthy to be United States attorney, district of New Jersey.

UNITED STATES MARSHALS

Oscar P. Cox to be United States marshal, district of Hawaii.

Cooper Hudspeth to be United States marshal, western district of Arkansas.

Frederick L. Esola to be United States marshal, northern district of California.

POSTMASTERS

DELAWARE

George W. Mitchell, Ocean View.

KENTUCKY

Mattie R. Tichenor, Centertown.
Harvey H. Pherigo, Clay City.
Egbert E. Jones, Milton.
Charlie H. Throckmorton, Mount Olivet.

MISSISSIPPI

Susette E. McAlpin, Bolton.
Lillie Burns, Brandon.
Homer B. Griffing, Bude.
James T. Skelton, Goodman.
Pink H. Morrison, Heidelberg.
Stella M. Lewis, McLain.
Mattie B. Bounds, Ovett.
Francis C. Hayden, Vaughan.
William J. Stephens, Webb.

NEVADA

Belle Roberson, Beatty.

NEW YORK

Clare L. Masten, Athens.

John H. Quinlan, Pavilion.
Asa C. Rowland, Salamanca.
Conrad Happ, Sparrow Bush.
Walter W. Tilley, Theresa.
William R. Fitch, West Winfield.
James Richtmyer, Windham.

NORTH CAROLINA

Frank L. Smith, Drexel.

OKLAHOMA

Nellie V. Dolen, Okemah.
Charles C. Chapell, Okmulgee.

PENNSYLVANIA

Harvey J. Smoyer, Clairton.
George G. Wallace, Ruffs Dale.
Hugh D. Shallenberger, Vanderbilt.
Edmund W. Tomb, Youngwood.

HOUSE OF REPRESENTATIVES

MONDAY, *March 5, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Heavenly Father, truly it is a noble art to appreciate our blessings and to count them worthily. "The Lord God is a sun and a shield; He will give grace and glory; no good thing will He withhold from them that walk uprightly." Help us to stand on our feet, hold our heads erect, and look life straight in the face. Take from us any ignoble spirit, and at any sacrifice firmly hold us by the golden rule, whose gold is good. Bless all institutions that help and succor man. Come to our country in such a progress that we shall be able to see and understand Thy

guidance. O make Thyself present in all our national affairs, that they shall move forward in a steady stream of splendid Christian development. In the name of Jesus our Savior. Amen.

The Journal of the proceedings of Saturday, March 3, 1928, was read and approved.

PUEBLO LANDS IN THE RIO GRANDE VALLEY, N. MEX.

Mr. MORROW. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate bill 700, with amendments.

The SPEAKER. The gentleman from New Mexico asks unanimous consent to take from the Speaker's table Senate bill 700, which the Clerk will report.

The Clerk read as follows:

A bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes.

The SPEAKER. The Clerk will report the Senate amendments.

The Senate amendments were read.

Mr. MORROW. Now, Mr. Speaker, I move to concur in the Senate amendments and offer a substitute amendment.

The SPEAKER. The gentleman from New Mexico moves to concur in the Senate amendment and offers a substitute, which the Clerk will report.

The Clerk read as follows:

Substitute amendment offered by Mr. MORROW: Page 3, line 18, after the colon, strike out everything down to the colon in line 24, same page, and insert in lieu thereof the following:

Mr. MORROW moves to recede and concur in the amendments of the Senate to the amendment of the House to S. 700 with an amendment in the nature of a substitute for the Senate amendments striking out the following on page 3 of the House bill: "*Provided*, That such reimbursement shall be made only from leases or proceeds from the newly reclaimed Pueblo lands, and there is hereby created against such newly reclaimed lands a first lien, which lien shall not be enforced during the period that the title to such lands remains in the Pueblo or individual Indian ownership," and inserting in lieu thereof the following: "*Provided*, That such reimbursement shall be made only from the proceeds of leases of the newly reclaimed Pueblo lands, whether leased by Indians or others, Indians, however, to be given the preference in the making of such leases, and the proceeds of such leases to be applied, first, to the reimbursement of the cost of the works apportioned to said irrigated area of approximately 8,346 acres: *Provided further*, That as to not to exceed 4,000 acres of such newly reclaimed lands if cultivated by Indians no rentals shall be charged the Indians: *Provided further*, There is hereby created against newly reclaimed lands a first lien for the amount of the cost of the works apportioned to such newly reclaimed lands, which lien shall not be enforced during the period that the title to such lands remains in the Pueblo or individual Indian ownership."

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CHINDBLOM. Mr. Speaker, reserving the right to object, does this come with the action of the committee?

Mr. MORROW. Yes; with the consent of the committee.

Mr. CHINDBLOM. The consent is not what I am asking about. Was this acted upon by the committee?

Mr. MORROW. Not by the committee of the House.

Mr. CHINDBLOM. Mr. Speaker, I withdraw my reservation of an objection.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the substitute amendment.

The substitute amendment was agreed to.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to be allowed to proceed for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

THE MIDDLE RIO GRANDE CONSERVANCY DISTRICT AND THE PUEBLOS

Mr. CRAMTON. With reference to the action just taken, Mr. Speaker, the amendment which the gentleman from New Mexico has offered is quite important and quite helpful to the Senate bill. It makes clear some ambiguities which existed in the bill and in the amendments which were made by the Senate.

It makes clear that the Indians are to have priority in securing leases to these lands. It accepts the provision that the Senate offers, that as to the first 4,000 acres cultivated by the Indians the individual Indians shall not be obliged to pay rental thereon. It makes clear also that such 4,000-acre exemption from rentals does not exempt the 4,000 acres from the lien carried by the bill. It goes further and provides that the 15,000 acres of lands now unimproved shall be subject to the lien only for the cost of improvement of these 15,000 acres.

EFFECT OF THE MORROW AMENDMENT

Heretofore the bill has provided for a lien on the 15,000 acres now unimproved for the full $1,500,000 to be expended on that land and on the 8,346 acres now partially improved. Under the Morrow amendment the 15,000 acres will be subject to a lien of about $1,000,000, covering the expenditure for that 15,000 acres alone. In other words, the Government is to expend $1,500,000 for the benefit of these Pueblo lands. The Senate has yielded to the insistence of the House that the whole amount expended shall eventually be returned to the Treasury. That is only fair, for the House language also requires that none of these lands shall be included in the project except such as the Secretary of the Interior finds are "materially benefited by this work." But no contribution is sought from the Indians, nothing is taken from the greatly increased production from the 8,346 acres, no lien is placed on the 8,346 acres. The whole amount is to be reimbursed from the proceeds of leases of the 15,000 acres which are now unused and unproductive and which will be made usable and productive by the expenditure of Government funds, loaned for a very long period, 30 to 50 years, without interest.

COLLIER CAMPAIGN FAILS

After unusual consideration and discussion the campaign of John Collier to discredit the House action and confuse the issues involved failed, and failed miserably. The Senate accepted the House position as to full reimbursement, on a roll call, by the decisive vote of 59 to 13.

The Senate provided that of the 15,000 acres to be reclaimed individual Indians may use up to 4,000 acres without paying any rental, the lands all being in tribal or pueblo ownership. The House accepts that provision, emphasizing further the generous attitude of the Government in this matter.

The action of the House to-day further assures the Indians of a preferential right to use of the 11,000 acres remaining of the lands to be reclaimed. It further provides that of the debt of $1,500,000, only one million shall be secured by any lien on the Indian lands, a lien which is not to be enforced so long as the lands are in Indian ownership. The balance of $500,000, incurred through improvement of the 8,346 acres, and to which acreage no lien attaches, is an unsecured debt. The whole debt, however, is to be paid from the proceeds of leases of the newly reclaimed lands, and the House amendment just adopted provides that those proceeds of leases shall be first applied to payment of the unsecured debt.

While the House amendment just adopted still maintains the principle of full reimbursement, it makes the bill more favorable to the Indians, is approved by Mr. Meritt, of the Indian Bureau, and it is to be hoped it will be readily accepted by the Senate and that this very important measure will soon become law.

EFFECT OF S. 700 AS AMENDED

In considering the Senate amendment to the House amendment and the general terms of the bill, I asked certain information from the Indian Office and have received the following letter which I think should be placed here as a part of the permanent record in connection with the consideration of this bill in Congress. The letter is as follows:

UNITED STATES DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, March 2, 1928.

MY DEAR MR. CRAMTON: This is in reference to your personal inquiry relative to the interpretation this bureau would place upon the several questions propounded by you dealing with pending legislation affecting the Middle Rio Grande conservancy district and several pueblos in New Mexico.

The ownership of the cultivated area approximating 8,300 acres of pueblo lands is vested in the pueblos as communal property of the members of the respective pueblo.

The ownership of approximately 15,000 acres not now irrigated is likewise vested in the pueblos as communal property of the members of the respective pueblo.

With reference to the provision dealing with reimbursement making such reimbursement only from the proceeds of leases from newly reclaimed pueblo lands except such part thereof as the Indians shall themselves farm not to exceed 4,000 acres, this bureau would interpret this provision as confining the area to be leased at not to exceed 15,000 acres from which reimbursement from the proceeds of such leases would be used to repay the Government. This 15,000 acres would be reduced to 11,000 acres if the Indians themselves farmed the 4,000 acres of the new lands referred to in Senator CURTIS'S amendment. This 4,000 acres,

however, would be subject to the exception of payment of lease rentals only in the event of and to the extent that the area is actually farmed by the Indians.

The rentals to be charged would be governed by economic conditions. At the present time much, if not practicaly all, of this 15,000 acres would require some expenditure after the conservancy works have been completed before the land could actually be farmed so that the per acre cash rentals would not be as great as they would be after the land had once been subdued and placed under cultivation. There would be no question of renting any of the newly reclaimed land to the Indians until after the 4,000 acres above referred to had been placed by the Indians under cultivation. After that has been accomplished, should the Indians desire to rent additional lands to increase further their farming area it would be the policy of this bureau to encourage such Indians and thereby give a preference right to such Indians to lease additional areas, requiring them, however, to pay a fair value for the rental of the area to be farmed by any such Indians. In this respect the per acre rental undoubtedly would be the same from the Indian as from any white lessee.

At the present time the pueblo as a pueblo does not get a rental from the individual Indians assigned tracts of land, as such Indians have an interest in the pueblo. It would, therefore, follow that the Pueblo as a tribe would not derive any direct monetary benefit from lands cultivated by Indians up to the 4,000-acre exception. In excess of this area the benefit to the Pueblo as a tribe would be in the nature of reducing the amount of the indebtedness by reason of payment of the lease rentals which are to be used for that purpose. Ultimately the respective pueblos, after payment of the total indebtedness against them has been effected, will have an area of land to the extent of that reclaimed under the conservancy district of a considerably enhanced value.

Operation and maintenance assessments against the newly reclaimed lands will, with reference to such areas that are under lease, be taken care of by provision in the lease requiring the lessees to pay the annual costs accruing during the period of the lease.

This would apply to both white and Indian on the areas in excess of the 4,000 acres of the newly reclaimed lands after the said 4,000 acres have been placed under cultivation and are being cultivated by the Indians. With reference to the excepted 4,000 acres up to the time that the Indians themselves cultivate the total area any of such area that may be leased to whites would contain the lease provision above referred to. Any part of that excepted area up to and including the 4,000 acres would, it would seem, have to be operated and maintained by the Indians cultivating such area. It would be a manifest injustice to require the pueblo as a pueblo to stand the cost of such operation and maintenance. The Indian cultivating the area would be the one to benefit, and equitably should pay these costs.

It is expected that, after the completion of this project and the lands are once put in cultivation, we will be able to receive a rental of probably $5 per acre; and later, when the land is thoroughly subdued, it will bring an even higher price, probably $6 per acre.

The following tabulation sets out the areas of cultivated lands; also the areas of lands not yet irrigated on the respective pueblos:

Indian lands

Pueblos	Net area under proposed project	Present cultivated		Raw, to be cultivated
		Indians	Whites	
Cochiti	2,026	705	525	796
Santo Domingo	4,909	1,440	224	3,245
San Felipe	4,133	1,111	17	3,005
Santa Ana	1,396	636	28	732
Sandia	4,277	532	325	3,420
Isleta	6,711	2,555	93	4,063
Indian school land	155	155		
	23,607	7,134	1,212	15,261
		1,212		
		8,346		

With reference to the 1,212 acres cultivated by whites within the six pueblos in question, you are advised that this land is temporarily in the possession of certain non-Indians who claim adverse possession. The Pueblo Lands Board will investigate these claims, and it will be determined at a later date as to the ownership of this land. If any of this land is held to be in the ownership of non-Indians, the owners thereof will be required to pay construction costs, operation and maintenance, and all other charges, the same as other white people within the conservancy district.

You will understand that the foregoing represents the views only of the Indian Office and is furnished in response to your personal request.

Cordially yours,

CHAS. H. BURKE, *Commissioner.*

Hon. LOUIS C. CRAMTON,
House of Representatives.

BILL ENDANGERED BY AMERICAN INDIAN DEFENSE ASSOCIATION LOBBYIST

Action on this measure, which means so much to the Indians as well as to the State of New Mexico, has been greatly impeded and its enactment into law greatly imperiled by the misrepresentations and the threats of John Collier, as the Washington lobbyist for the American Indian Defense Association (Inc.), said to include in its membership many persons of high ideals, who no doubt are aware that his aims and methods are obstructive and destructive rather than constructive. I have heretofore discussed him and his methods, as well as his colleague, Grorud, against whom disbarment proceedings are pending in Montana for frauds upon Indian clients. Of Collier, Senator WALSH of Montana said the other day in Senate debate on the Interior Department appropriation bill, "He has not a particle of business sense." And still he presumes to issue orders to Congress on a matter involving expenditure of $1,500,000 and to issue threats that he will secure a veto by the President and, failing that, will tie everything up in the courts.

It is time Congress took note of such lobbyists here and exposed their activities. I think a congressional investigation of such organizations and their funds, how much money they collect from the public, and how they spend it, and, especially, how much of it goes to their officers and lawyers. They are getting to know these folks down in the Southwest. The other day the Albuquerque Journal had this editorial, which is worthy of note:

PROFESSIONAL "UPLIFTERS"

Washington dispatches report growing resentment among Members of both the Senate and House against the activities of an army of white agitators, professional "uplifters," and spokesmen working among the Indians that may lead to an investigation of such men as John Collier, executive secretary of the American Indian Defense Association (Inc.).

Collier has seized upon the Middle Rio Grande conservancy measure, as he has done in every available instance of Indian legislation, to work up sentiment among his following of well-meaning persons who do not fully understand the situation, to the end of securing more members of his incorporated association and larger contributions. This phase of his work ought to be investigated.

Collier has been destructive in his attitude on the conservancy measure as he has in almost every other instance. He peddles misinformation, but he is always against the Government. As when defending Sacco and Vanzetti, as Congressman CRAMTON pointed out, so he is at all times sure his Government is wrong. * * *

Congressman CRAMTON, in his address in the House, fully answered the charge that an agreement with the conservancy district, with the Indian Bureau, or others, had been violated in amending the bill in the House. Mr. CRAMTON said his committee, or Congress, never was party to any agreement that would have adopted the principle of gratuities to the Indians. That principle the Indian Bureau and Congress has opposed for years. Mr. Collier had been working to get gratuities for Indians while Congress and the Indian Bureau has maintained there is no gain for the Indian in teaching him to be a mendicant or to expect gifts from the Government. The Indian Bureau has spent money liberally to educate the Indian, to improve his land, and to help him be self-supporting. The amendments of Mr. CRAMTON were in line with this policy. The Indians' land was not to be taken away; instead it was to be reclaimed. Whereas the six pueblos now have some 8,000 acres of irrigated land, they were to have that improved and 15,000 more acres made available for irrigation. They were to be required to pay back to the Government what it cost for the work, not from their present 8,000 acres, but from the newly reclaimed land, and then only from rentals or leases of the land.

The Indians will benefit more than the white landowners from the conservancy measure as it was passed by both Houses, and as it would have become a law if Mr. Collier had not stirred up the trouble he did.

Professional "uplifters" like Mr. Collier ought to be exposed so that people who are providing them with funds under mistaken conceptions of their activities will come to know the truth. They thrive on being destructive, while the Indian Bureau and Government go along working constructively to help the Indian be something more than a mendicant.

People of the Middle Rio Grande Valley have no quarrel with the Indians and the conservancy measure would now be a law and plans for reclamation well under way, if it had not been for this professional agitator. Instead of the conservancy officials being in Washington working to pass the measure again, they would be in Albuquerque settling upon the final plans for reclamation and making ready to get work started.

But these "uplifters" would rather be against the Government than with it helping to do constructive work. It's their profession, their living; nothing more.

REFRESHING ACTION OF MISSIONARY BOARDS

The principal objective of this "uplifter" is the undermining of public confidence in the governmental administration of Indian affairs. Because he happens to be Commissioner of Indian Affairs, and not because of any lack of zeal, ability, or integrity, he is the mark at whom Collier launches daily attacks the year around.

It is refreshing, therefore, to note the recent action of the Home Missions Council, an interdenominational body of home-mission boards and societies of 28 Protestant denominations, as follows:

National Baptist Convention; Northern Baptist Convention; Christian Church; Church of the Brethren; Congregational; Disciples of Christ; Protestant Episcopal Church; Evangelical Church; Evangelical Synod of North America; Friends; United Lutheran Church; African Methodist Episcopal Church; African Methodist Episcopal Zion Church; Free Methodist Church; Methodist Episcopal Church; Methodist Episcopal Church, South; Methodist Protestant Church; American Moravian Church; Presbyterian Church, United States of America; Presbyterian Church, United States; United Presbyterian Church of North America; Christian Reformed Church; Reformed Church in America; Reformed Church in the United States; United Brethren in Christ; United Church of Canada.

All of these boards and societies have missionaries among the Indians and have a wide and intimate contact with the Government's administration of Indian affairs. No doubt they differ with the Indian Bureau from time to time, no doubt they note mistakes of judgment, no doubt they come in contact with inefficiency in the field—what organization made of humans is without these? But these organizations which stress cooperation, respect their Government and seek to build up rather than belittle and tear down. They can afford to be just. This is the text of a resolution adopted by the joint session of the Home Missions Council and Council of Women for Home Missions at Cleveland January 24, 1928:

Resolution

Voted, That a telegram be forwarded to the Hon. Charles H. Burke, Commissioner of Indian Affairs, Washington, D. C., assuring him of appreciation for his high-minded, Christian attitude toward the work of all boards and societies in Indian fields, and expressing deep confidence in his integrity and that of his associates of the Indian Office; furthermore, that this telegram be recorded in the minutes and be given prominence in the public press.

Mr. MORROW. Mr. Speaker, I ask unanimous consent to address the House for three minutes and explain the measure.

The SPEAKER. The gentleman from New Mexico asks unanimous consent to address the House for three minutes. Is there objection?

There was no objection.

Mr. MORROW. Mr. Speaker and ladies and gentlemen of the House, concerning this measure which passed this House once before by a substitute amendment and was amended again in the Senate, I wish to make my position absolutely clear to the membership of the House, so that the action of the Senate shall be understood. We agreed upon the bill as it passed the Senate, but there was some question as to the language, as to whether or not it exempted 4,000 acres of land belonging to the Indians without a lien.

It was thought best that this substitute amendment be enacted so as to clarify that situation. There were some other matters in the language that were clarified, and this amendment provides that the lands shall be cultivated. There is also this provision; there is a restriction made that the 15,000 acres of Indian lands shall only bear a lien of $67.50 per acre and not the $1,592,000, as it was originally intended, so that the entire amount expended by the Government on the Indian land shall be repaid from the proceeds of leases upon the newly reclaimed 15,000 acres of Indian land. In other words, it is an attempt to meet the situation so that the Indians and those who are in sympathy with the Indians shall be entirely satisfied with the legislation as passed.

PERMISSION TO ADDRESS THE HOUSE

Mr. BRAND of Ohio. Mr. Speaker, I ask unanimous consent to address the House to-morrow for 30 minutes immediately after the reading of the Journal.

The SPEAKER. The gentleman from Ohio asks unanimous consent that to-morrow, after the reading of the Journal and the disposition of business on the Speaker's table, he be permitted to address the House for 30 minutes. Is there objection?

Mr. SNELL. Mr. Speaker, reserving the right to object, by special arrangement it has been agreed that we shall bring up the constitutional amendment to-morrow. The rule provides for five hours of general debate, and I wish the gentleman would ask this permission for some other day when we do not have so much before us as we have for to-morrow.

Mr. BRAND of Ohio. Mr. Speaker, I will modify my request and ask for this time on Wednesday.

Mr. SNELL. We have the White constitutional amendment and the radio bill under special order to come in as quickly as we can get them out of the way.

Mr. BRAND of Ohio. Will the gentleman suggest a time?

Mr. SNELL. I think Saturday would be all right.

Mr. BRAND of Ohio. Mr. Speaker, I will modify my request and make it Saturday.

The SPEAKER. The gentleman from Ohio modifies his request and asks unanimous consent that he may be permitted to address the House for 30 minutes on Saturday next. Is there objection?

Mr. HASTINGS. Mr. Speaker, are we going to be in session on Saturday?

Mr. SNELL. I understand we will be in session on Saturday, because we have plenty of business.

Mr. HASTINGS. I suggest that the gentleman make his request for Friday.

Mr. SNELL. I would not object to the gentleman having the time after the completion of the radio bill on Friday, if we have the time on that day.

Mr. BRAND of Ohio. Will the radio bill be before the House on Friday?

Mr. SNELL. We are going to consider the radio bill. When we finish the constitutional amendment that will be in order. Of course, we can not tell the amount of time that will be consumed on the constitutional amendment.

Mr. BRAND of Ohio. Mr. Speaker, I ask that I be permitted to address the House for 30 minutes on Friday next if there is an opportunity; and if not, then on Saturday.

The SPEAKER. The gentleman from Ohio asks unanimous consent that he may be permitted to address the House for 30 minutes at the conclusion of the consideration of the radio bill on Friday, and in case that bill shall not have been completed on Friday that he may be permitted to address the House on Saturday. Is there objection?

There was no objection.

CONSTITUTIONAL AMENDMENT

Mr. DYER. Will the gentleman from New York permit an inquiry?

Mr. SNELL. I will.

Mr. DYER. I understand the gentleman proposes to bring up the so-called Norris resolution on Friday.

Mr. SNELL. To-morrow.

Mr. DYER. Under a special rule?

Mr. SNELL. Yes.

Mr. DYER. I will state to the gentleman that I intended to raise the question of consideration to that resolution on the ground that it had not been referred to the proper committee, the Committee on the Judiciary, which has jurisdiction over constitutional amendments.

Mr. SNELL. It would be too late.

Mr. DYER. But, under the rules, I doubt the possibility of having such a question sustained by the Chair.

Mr. SNELL. I think it is too late to bring up the question of consideration now.

Mr. DYER. We can raise it prior to its being considered, but if it is brought up under a special rule I doubt whether under the rules we could raise that question.

NAVAL SHIPBUILDING BILL

Mr. McCLINTIC. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the naval bill.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD on the naval bill. Is there objection?

There was no objection.

Mr. McCLINTIC. Mr. Speaker, according to the information given me, over 82 per cent of all of our revenues are now expended in support of our military policies. Making a historical comparison with other nations, when this sum is increased 10 additional per cent, then, unless this Nation becomes engaged in war with some other power, an internal combustion will be inevitable. As long as the United States has sufficient aircraft no one will deny that it will be impossible for any army to land on our shores; therefore, the pacifist at the present time is a less dangerous citizen than the radical militarist.

I regret exceedingly to have a different viewpoint on the subject of national defense from all of the other members of the House Naval Affairs Committee. I see nothing at the present

time that would cause any citizen of the Nation to feel that there are war clouds on the horizon at this time. Therefore, I have endeavored to discover the real reason for the propaganda put in motion, favoring enormous expenditures for certain types of ships, and this report will attempt to prove that the 15 cruisers authorized in this bill are not needed.

The foundation of the proposed naval legislation, calling for 15 cruisers, rests upon the assumption that England has far greater cruiser strength than the United States, when, in truth, according to the figures given me, if a proper allocation is made, the United States has 99,924 more tons of cruiser strength than England. As a corroboration of this fact I specifically refer to Schedule A, which is a fair classification of the various kinds of ships which fall in the cruiser type.

I will offer a motion to substitute 15 submarines of the latest type, constructed in such a manner as to have all of the latest safety devices, these to take the place of the 15 cruisers.

I will offer another motion to authorize the expenditure of $1,000,000 on each of the 18 battleships for the purpose of providing an extra platform, constructed immediately above the turret guns, suitable for aircraft purposes, thereby making each of these ships its own aircraft carrier, having in mind that such an addition would not obstruct the use of the turret guns, and at the same time enable large bombing planes to be utilized in attacking an enemy for a distance of approximately 200 miles away.

I will offer a motion to strike out the authorization for one additional aircraft carrier, costing the sum of $19,000,000, if the above motion is accepted by the House of Representatives.

The members of the Naval Affairs Committee have been told that the five world powers, England, France, Italy, Japan, and the United States, will participate in a disarmament conference during the year of 1931. Therefore, no one can deny that unless ships are laid down of a certain type within the next three years an agreement made at this conference would prevent the expenditure of the $274,000,000 proposed in this bill.

The members of the Naval Affairs Committee have been told by the representatives of shipbuilding corporations who testified before the committee that it will take approximately three years to complete a cruiser. Therefore, if this bill becomes a law in its present form, and the conference in 1931 would agree to a reduction of tonnage of cruisers, then the United States would be in the same ridiculous position it found itself in in 1922 when approximately $300,000,000 were wasted in scrapped new ships.

CRUISER COMPARISON WITH OTHER NATIONS

England is the only nation that is claimed to have a superiority of cruisers over the United States. I make the statement from the figures given me that the cruiser strength of the United States compared with England (using the classification relative to tonnage) is so nearly balanced that it would take a Houdini to decide which country has the advantage. The following tables are submitted in proof of this statement. Cruisers, when correctly classified as to tonnage, will fall into the following schedules:

SCHEDULE A

Types of surface ships (cruisers)

	Tonnage
Destroyers (small cruisers)	1,000 to 5,000
Cruisers (usual size)	5,000 to 15,000
Battle cruisers (large)	15,000 to 25,000
Battleships (extra large)	25,000 to 35,000

UNITED STATES	Tons
282 cruisers (destroyer type), tonnage 1,000 to 5,000	423,000
40 cruisers (new, old, etc.), tonnage 5,000 to 15,000	320,000
Total	743,000

ENGLAND	
208 cruisers (destroyer type), tonnage 1,000 to 5,000	413,710
13 cruisers (new, old), tonnage 5,000 to 15,000	91,066
14 cruisers (authorized), tonnage 5,000 to 15,000	138,300
Total	643,076

The cruiser strength favorable to the United States when old ships are included, which, according to testimony presented before the Naval Affairs Committee, are the best adapted ships we have for river service in China and the Philippines, because some of our cruisers have guns up to 10-inch in size and superior quarters for the officers and men.

	Tons
Total excess favorable to United States	99,924

Thirty-six of the forty-nine so-called cruisers belonging to England have a tonnage of less than 5,000; therefore it can be said that these are large destroyers and can be classified as such; however, our destroyers have an excessive speed over every ship in this schedule.

SUBMARINES

Undersea craft, the only kind that can navigate the ocean alone.

The type of ship that can operate closest to the harbors of the world.

The ships that have proven the greatest menace to commerce.

The type that destroyed in 1917, 5,000,000 tons of allied commerce and struck terror to the hearts of the civilized world.

France has authorized 27 of the newest type and has 20 under way.

Italy has authorized 20 of the newest type and has 12 under way.

Japan has authorized 24 of the newest type and has 14 under way.

England has authorized 24 of the newest type.

United States has 6 of the newest type, with only 3 completed.

Thus, it can be said, if the members of the Naval Affairs Committee are charged with the responsibility of keeping this Nation properly prepared for any kind of an emergency and war should suddenly come upon us, this Nation would not have the proper equipment to prevent our commerce from being paralyzed, and it would be necessary immediately to authorize an emergency submarine building program which could not be completed until frightful damage had been inflicted by the enemy.

AIRCRAFT CARRIERS

Aircraft carriers are an absolute necessity for the successful functioning of any fleet in the future. At the present time no bombing planes are carried on battleships or cruisers for the reason that they are too large to be successfully launched on such ships. Battleships, as I now view them, are suitable only for peace-time purposes; but with the addition of a light upper deck placed above the turrets, it should enable each ship of this type to be its own aircraft carrier, thereby enabling the same to combat an enemy at a distance of 200 miles before the same came within gun range. It is proposed to expend practically $100,000,000 for the elevation of guns and the making of certain other additions on battleships. In my opinion, the expenditure of $18,000,000 would do away with the necessity of this large expenditure and at the same time restore the battleship to its proper place in the estimation of the people as being the most useful type of ship in a fleet.

CONCLUSION

I take the position that as long as everyone admits that our aircraft is sufficient to prevent any hostile forces from invading this country, it is the first duty of our legislative bodies to provide the means necessary to take care of the internal affairs of the Nation. Agriculture is the basic foundation of this country. The failure of the Nation to provide sufficient food will clog every channel of commerce, and bring about a condition that will paralyze the citizenship; therefore, before this country engages upon a military-expansion program, the advisability of which is questioned by a large percentage of our citizens, it seems to me that such subjects as farm relief, flood control, and others that relate to the very bone and sinew of the Nation should receive consideration.

I further say that in making additions to our Navy the Congress should have in mind the building of the kind of ships that will make our Nation sufficiently efficient to take care of any kind of an emergency. That the Navy being the first line of defense should be composed of warships—suitable for war—rather than a lot of ships that can operate only in protected zones in time of war. If we have a lot of obsolete ships, the men and officers should be taken off the same and assigned to the large number of destroyers which are now tied up to the docks at Philadelphia and San Diego, thereby building up an arm of defense that was found to be the most valuable during the World War. I am in favor of voting every dollar that this Nation needs to provide adequate defense. However, I am not willing to expend $274,000,000 to stem a depression in the shipbuilding industry and to provide additions to the Navy in the way of personnel and luxurious quarters on a type of ship that can not be used in time of war without the aid of submarines and aircraft.

CONSENT CALENDAR

The SPEAKER. The Clerk will call the Consent Calendar.

ADDITIONAL JUDGES FOR THE SOUTHERN DISTRICT OF NEW YORK

The first business on the Consent Calendar was the bill (H. R. 9200) to provide for the employment of three additional judges of the District Court of the United States for the Southern District of New York.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I ask that this bill and the one following it may be passed over without prejudice.

The SPEAKER. The gentleman from New York asks unanimous consent that this bill and the following bill may be passed over without prejudice. Is there objection?

There was no objection.

BRIDGE AND ROAD ON THE HOOPA VALLEY RESERVATION, CALIF.

The next business on the Consent Calendar was the bill (H. R. 441) to authorize an appropriation to pay half the cost of a bridge and road on the Hoopa Valley Reservation, Calif.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LEA. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. The gentleman from California asks unanimous consent that this bill may be passed over without prejudice. Is there objection?

There was no objection.

WORLD WAR MEMORIAL

The next business on the Consent Calendar was Senate joint resolution (S. J. Res. 66) authorizing an additional appropriation to be used for the memorial building provided for by a joint resolution entitled "Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War," approved June 7, 1924.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, this additional appropriation is made necessary by reason of a certain kind of stone that was used. I would like to ask the introducer of the bill or the gentleman who reported it what stone was used in this particular building?

Mr. LUCE. I am not sure whether it is the marble from Vermont or North Carolina.

Mr. LAGUARDIA. Could the gentleman obtain that information during the course of the day?

Mr. LUCE. I certainly could; but may I ask the gentleman if he deems it of importance?

Mr. LAGUARDIA. Of great importance, because we have had a condition in this country where, due to the issuance of a most outrageous injunction, several thousand men have been compelled to work under involuntary servitude, and I do not believe a memorial of this kind should be marred by having been constructed under such conditions. I shall reserve my right to object until that point is clarified to remove any stain upon this memorial.

Mr. LUCE. Mr. Speaker, I ask unanimous consent that the bill may retain its place on the calendar without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

OIL AND GAS PROSPECTING PERMITS AND LEASES

The next business on the Consent Calendar was the bill (H. R. 479) to authorize the Secretary of the Interior to grant certain oil and gas prospecting permits and leases.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WINTER. Mr. Speaker, I ask unanimous consent that this bill may go over without prejudice.

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I want to ask the gentleman if this is not a private bill and should not this bill be considered on the Private Calendar?

Mr. WINTER. The Public Lands Committee was of the opinion that it should go on the Consent Calendar.

Mr. LAGUARDIA. It is only for the benefit of the Oregon Basin Oil & Gas Co. It seems to me the bill is entirely a private bill. We have gentlemen who take an active interest in that calendar and I would like to have it transferred to the Private Calendar.

Mr. WINTER. The terms of the bill are general and mention no company as being the beneficiary of the bill.

Mr. LAGUARDIA. Both the report and the decision of the court is so clear that it is for the benefit of the particular company I have mentioned, the Oregon Basin Oil & Gas Co., I do not believe the gentleman will contend that it has any other purpose except to grant relief to that particular company. This being so, I wish the gentleman would remove it to the Private Calendar, where Members who are specialists in that kind of legislation can give it their attention.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. I object.

HOSPITAL AT FORT BIDWELL INDIAN SCHOOL, CALIFORNIA

The next business on the Consent Calendar was the bill (H. R. 8542) to provide for the construction of a hospital at the Fort Bidwell Indian School, California.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this bill is an illustration of a class of bills that are an unnecessary burden, in my judgment, upon the Consent Calendar.

This bill very possibly, and the next bill following it certainly, propose to authorize an appropriation where, in my judgment, there is now authority for the appropriation. This bill comes here recommended by the Indian Bureau and by the Budget, whereas if the Indian Bureau would recommend the appropriation and the Budget would recommend the appropriation, and it came up in the deficiency appropriation bill next May, it could be taken care of without the passage of this legislation.

Mr. O'CONNELL. Will the gentleman yield?

Mr. CRAMTON. Yes; I yield to the gentleman.

Mr. O'CONNELL. May I ask the gentleman if he knows, approximately, what this hospital is going to cost?

Mr. CRAMTON. My impression is the bill fixes the limit of cost.

Mr. O'CONNELL. The gentleman from Montana can probably enlighten us.

Mr. CRAMTON. But that, of course, is a little apart from what I am suggesting now. Thirty thousand dollars is the limit of cost.

It is my impression, Mr. Speaker, that the Budget Office, when a bill goes to the Budget, proposing new legislation to authorize an appropriation, they would protect the calendars of the House and would protect the purposes of the Budget system if they would state that the item is already authorized by law and that, if presented to them in the regular way in connection with an appropriation bill, it would have their consideration. The difficulty is when it goes in the way this bill does, the only question considered by the legislative committee is whether the expenditure is a desirable one. When it goes in the appropriation bill there is to be considered not only whether it is a desirable appropriation, but whether it is more urgent than other desirable items of a similar character, because we are not able in one year to take care of all the desirable needs.

In this particular case, Mr. Speaker, I am not going to object. It has been reported from the legislative committee, it is for a desirable purpose, and I am not going to object; but I believe this ought not to stand as a precedent, and a somewhat different policy on the part of the Budget ought to obtain.

I withdraw the objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to cause to be erected a building upon Government property at Fort Bidwell, Calif., to be used for a hospital for the Indians.

SEC. 2. For the purpose of erecting such building there is authorized to be appropriated the sum of $30,000 or so much thereof as may be necessary to carry out the provisions of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

SCHOOL BUILDING AT FORT BIDWELL INDIAN SCHOOL, CALIFORNIA

The next business on the Consent Calendar was the bill (H. R. 8543) to provide for the construction of a school building at the Fort Bidwell Indian School, California.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to cause to be erected a school building upon Government property, Fort Bidwell, Calif., to be used for the education of Indian children.

SEC. 2. For the purpose of erecting such building there is authorized to be appropriated the sum of $30,000 to carry out the provisions of this act.

Mr. LEAVITT. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Line 8, after the word "of," insert the words "not more than."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

GRANTING PENSIONS TO UNITED STATES DEPUTY MARSHALS OF THE DISTRICT COURT FOR WESTERN DISTRICT OF ARKANSAS

The next business on the Consent Calendar was the bill (H. R. 5709) granting a pension to the regularly commissioned United States deputy marshals of the United States District Court for the Western District of Arkansas, including the Indian Territory, now the State of Oklahoma, and to their widows and dependent children.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. HOOPER. Mr. Speaker, reserving the right to object, I had occasion to object to this bill a month ago. I considered it very carefully during the time intervening. I do not like the thought of doing an injustice to men who no doubt performed very dangerous service at a perilous time, but it seems to me that it would be unwise to adopt this legislation. It will create a precedent that is going to be dangerous. We are going to establish a precedent by which other marshals and other officials will come in in the future and point to this as a reason why we should vary from the customary program and grant special pensions under special circumstances.

Mr. DYER. Mr. Speaker, I do not agree that this would establish a precedent because there never has been and never will be such a case brought to the attention of Congress again, where men rendered the services that these men rendered, which were not only dangerous but involved the loss of many lives. There is no other way that the Government can testify to their great service. I think we should not object to their having this small consideration. There are only a few of them. It would not in my judgment or the judgment of the committee that reported the bill be a precedent.

Mr. McKEOWN. Will the gentleman yield? I want to say that a peculiar situation was found in the Indian Territory. The Indians were moved out, and it immediately became the refuge for many criminals in the United States. They went into that country, lived out there in the Indian country, and the United States went to work, sent its marshals in there and there never was a more perilous work done by men than there was at that time. The civilization and law that came out of that Territory, which makes it one of the great Commonwealths of the Nation, is due to the fact that these rugged, uneducated, brave, and fearless men carrying their lives in their hand went out on the frontier and brought these criminals to justice. They were hauled hundreds of miles to Fort Smith and Paris, Tex. I want to say that these men gave their lives in defense of civilization, in defense of the lives and property of the citizens of that Territory, and in defense of those who traveled over the only two railroads that traversed that country.

I want to say another thing. The men who have carved law and order out of that country did that service at a pitifully low stipend.

Mr. HOOPER. Mr. Speaker, I realize that much of what the gentleman from Oklahoma has said is true; but the simple fact remains that every United States marshal, whether in the Indian country or Michigan or Oklahoma or anywhere else, takes his life in his hands when he is sworn in. I am constrained, Mr. Speaker, to object.

The SPEAKER. It takes three objections.

Mr. BEGG. I object.

Mr. MAPES. I object.

Mr. HASTINGS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HASTINGS. This bill requires three objections. I do not believe that any one Member can reserve the right to object for the purpose of making a speech. The rule requires three objections, and I do not think any one Member can reserve an objection and make a speech. Where the bill has been restored to the calendar for the second time can one Member reserve the right to object and then make a speech? That is my parliamentary inquiry.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. HASTINGS. Yes.

Mr. CHINDBLOM. Does the gentleman think that the change of the rule requiring three objections on consent days changes all the other rules of the House as to the privilege of the floor?

Mr. HASTINGS. I am clear in my own mind that no one Member can reserve the right to object and use it for the purpose of inviting other gentlemen to object.

Mr. HOOPER. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. I suggest that the remedy for that is to demand the regular order.

Mr. HASTINGS. That is just what I am trying to do now. I am demanding the regular order now.

Mr. CHINDBLOM. Mr. Speaker, I demand the regular order.

Mr. HASTINGS. Mr. Speaker, I do not believe that any Member has the right to reserve the right to object when he has only the right to one-third of an objection.

The SPEAKER. Does the gentleman desire an answer to his parliamentary inquiry?

Mr. HASTINGS. That is a parliamentary inquiry.

The SPEAKER. The Chair thinks that the gentleman's contention, carried to its logical conclusion, would mean that the three objectors would all have to speak at once.

Mr. HASTINGS. I think that all three should rise up and object.

The SPEAKER. The Chair is clearly of opinion that no change in the general rules of the House follows this change in respect to three objections. The Chair thinks that any Member has the right to reserve the right to object.

Mr. HASTINGS. Under that ruling one man can reserve the right to object, and then a second man can reserve the right to object and make a speech in order to induce some other Member to join him in the objection.

Mr. CHINDBLOM. The gentleman can stop it at any time by demanding the regular order.

Mr. HASTINGS. That is what I will do in the future.

PAYMENT FOR ADDITIONAL DUTIES OF TERRITORIAL OFFICERS

The next business on the Consent Calendar was the bill (H. R. 8284) to authorize the payment of amounts appropriated by the Legislature of Alaska on account of additional duties imposed upon the Territorial officers.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. LaGUARDIA. Mr. Speaker, I object.

Mr. LLACK of New York. Mr. Speaker, I object.

Mr. PEAVEY. Mr. Speaker, I object.

CITY OF MENDON, UTAH

The next business on the Consent Calendar was the bill (H. R. 8724) granting certain lands to the city of Mendon, Utah, to protect the watershed of the water-supply system of said city.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That, upon payment of $1.25 per acre, there is hereby granted to the city of Mendon, Utah, and the Secretary of the Interior is hereby authorized and directed to issue patent to the city of Mendon, Utah, for certain public lands for the protection of the watershed furnishing the water for said city, the lands being described as follows: The west half of section 12, township 11 north, range 2 west, Salt Lake meridian, and containing approximately 320 acres, more or less.

SEC. 2. The conveyance hereby authorized shall not include any lands which at the date of the issuance of patent shall be covered by a valid existing bona fide right or claim initiated under the laws of the United States: *Provided*, That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found on the lands so granted and the right to prospect for, mine, and remove the same: *Provided further*, That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and if the said land shall not be used for such municipal purpose the same, or such parts thereof not so used, shall revert to the United States. The conditions and reservations herein provided for shall be expressed in the patent.

With the following committee amendment:

Page 2, line 8, strike out the word "on" and insert the word "in," and on line 15, page 2, after the word "States," insert "and the Secretary of the Interior is hereby authorized and empowered to declare a forfeiture of this grant and to cancel the patent issued hereunder after such proceedings as he may prescribe upon a finding by him that the land has not been used for the purpose for which it was granted."

The committee amendments were agreed to; and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill and joint resolution of the following titles:

H. R. 11197. An act to authorize the Secretary of War to grant rights of way to the Vicksburg Bridge & Terminal Co. upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss.; and

H. J. Res. 176. Joint resolution granting consent of Congress to an agreement or compact entered into between the State of Wisconsin and the State of Michigan for the construction, maintenance, and operation of a highway bridge across the Menominee River.

THE CONSENT CALENDAR

BOUNTIFUL, UTAH

The next business on the Consent Calendar was the bill (H. R. 8733) granting certain lands to the city of Bountiful, Utah, to protect the watershed of the water-supply system of said city.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That upon payment of $1.25 per acre, there is hereby granted to the city of Bountiful, Utah, and the Secretary of the Interior is hereby authorized and directed to issue patent to the city of Bountiful, Utah, for certain public lands for the protection of the watershed furnishing the water for said city, the lands being described as follows: The north half, and the south half of the southeast quarter, of section 14; the north half of section 22; and the south half, and the south half of the north half, of section 26; all in township 2 north, of range 1 east, Salt Lake meridian, United States survey, and containing approximately 1,200 acres more or less.

SEC. 2. The conveyance hereby authorized shall not include any lands which at the date of the issuance of patent shall be covered by a valid existing bona fide right or claim initiated under the laws of the United States: *Provided,* That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found on the lands so granted and the right to prospect for, mine, and remove the same: *Provided further,* That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and if the said land shall not be used for such municipal purpose the same, or such parts thereof not so used, shall revert to the United States. The conditions and reservations herein provided for shall be expressed in the patent.

With the following committee amendments:

Page 2, line 10, strike out the word "on" and insert the word "in," and in line 17, after the word "States," insert "and the Secretary of the Interior is hereby authorized and empowered to declare a forfeiture of this grant and to cancel the patent issued hereunder after such proceedings as he may prescribe upon a finding by him that the land has not been used for the purpose for which it was granted."

The committee amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CENTERVILLE, UTAH

The next business on the Consent Calendar was the bill (H. R. 8734) granting certain lands to the city of Centerville, Utah, to protect the watershed of the water-supply system of said city.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That upon payment of $1.25 per acre there is hereby granted to the city of Centerville, Utah, and the Secretary of the Interior is hereby authorized and directed to issue patent to the city of Centerville, Utah, for certain public lands for the protection of the watershed furnishing the water for said city, the lands being described as follows: All of section 12, township 2 north, range 1 east, Salt Lake meridian, United States survey, and also the west half of the west half, the northeast quarter of the northwest quarter, the north half of the northeast quarter, and the southeast quarter of the southeast quarter of section 10, township 2 north, range 1 east, Salt Lake meridian, United States survey, and containing approximately 960 acres, more or less.

SEC. 2. The conveyance hereby authorized shall not include any lands which at the date of the issuance of patent shall be covered by a valid existing bona fide right or claim initiated under the laws of the United States: *Provided,* That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found on the lands so granted and the right to prospect for, mine, and remove the same: *Provided further,* That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and if the said land shall not be used for such municipal purpose the same, or such parts thereof not so used, shall revert to the United States. The conditions and reservations herein provided for shall be expressed in the patent.

With the following committee amendments:

Page 2, line 11, strike out the word "on" and insert the word "in," and in line 18, after the word "States," insert "and the Secretary of the Interior is hereby authorized and empowered to declare a forfeiture of this grant and to cancel the patent issued hereunder after such proceedings as he may prescribe upon a finding by him that the land has not been used for the purpose for which it was granted."

The committee amendments were agreed to; and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

AMENDING AIR MAIL ACT

The next business on the Consent Calendar was the bill (H. R. 8337) to amend the air mail act of February 2, 1925, as amended by the act of June 3, 1926.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, does the gentleman from Pennsylvania [Mr. KELLY] really believe that under the guise of reducing the rates on air mail we should go as far as this bill really goes, to give a present contractor a certificate for 10 years that he has an established right on that route unless removed previously by the Postmaster General? Can the gentleman suggest any instance in the early days of railroading where any such contract was made?

Mr. MADDEN. We can suggest instances every day now.

Mr. KELLY. Mr. Speaker, the gentleman asks a question that I will be very glad to answer, and I think I can show him that in this measure we are not doing anything unprecedented or extra liberal. At the present time the railroads have a perpetual contract, or an indefinite contract, with the Post Office Department, and there is no 10-year limitation. There is no 10-year limitation on mail messengers or on steamship contracts that the Post Office Department now has. This measure will give additional protection to the Post Office Department. We have two different provisions here which dovetail together and make one in fact: First, we give the power to the Postmaster General to reduce the rates. We only give him authority. We do not compel him to change the rate, but we do give him authority to make a rate in the future of 5 cents an ounce. The present rate is 10 cents per half ounce. The main difficulty with our air mail service is the volume of air mail. The volume has not come up to capacity of the planes. Instead of carrying a thousand pounds these planes are carrying 200 and 300 pounds and 400 pounds. We propose to lessen the rate in the discretion of the Postmaster General and bring the mail up to the full volume that can be carried and thus decrease the unit cost.

Then in the second provision of the bill we propose to give the Postmaster General power to go to the contractor and readjust the payment now made under the four-year contract and give him the right to negotiate in the future and bring this rate down as conditions warrant. The contractor can make more money at one-half the rate now received if the volume is three or four times the present volume.

Mr. LAGUARDIA. The gentleman is speaking of that part of the bill to which I am not opposed.

Mr. KELLY. I am showing the gentleman that there is nothing new or unprecedented about this. We deal in the same way with the railroads, and we have always done so. Now, with the air mail contractors we have a four-year contract, as the gentleman knows. Some of these companies are compelled to invest millions of dollars in equipment, in advance work, in organization, and establishing their hangars, and so forth. We propose to give them a chance to show to the Postmaster General that they should have an extension of the contract and not lose their investment at the end of a short period. At the same time we protect the Government by giving the right of

cancellation when there is any failure to comply with regulations.

Mr. O'CONNELL. Mr. Speaker, will the gentleman yield?

Mr. KELLY. Yes.

Mr. O'CONNELL. This bill has not only the approval but also the enthusiastic support of the Post Office Department?

Mr. KELLY. Yes. I was also informed to-day that Colonel Lindbergh, the lad who was a faithful pilot in this contract mail service dealt with in this bill, has said that the passage of this measure will do much for the commercial aviation in which he is so intensely interested. He pointed out that it will increase the volume of air mail 200 per cent in a short period.

Mr. O'CONNELL. If we reduce the rate, would it not double the business?

Mr. KELLY. Yes. It will do more than double the business. It will triple the business.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield?

Mr. KELLY. Yes.

Mr. CHINDBLOM. I find that the bill provides for financial investigation of the transportation of mail by airplanes, and it provides that the department shall not put into force other regulations than those in the contract.

Mr. KELLY. Yes; it gives full protection to the public interest and these pioneer air companies as well.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. KELLY. Yes.

Mr. SCHAFER. Can the gentleman assure us that this bill is not in conflict with the President's financial policy?

Mr. KELLY. I can assure the gentleman that the Postmaster General in the President's Cabinet is enthusiastically for it.

Mr. SCHAFER. How about the Budget Bureau?

Mr. KELLY. I am not able to speak for the Budget Bureau, but you may be assured of its acquiescence.

Mr. LAGUARDIA. The reduction of the rate is one thing, and establishing a vested right to a route by means of a new method on a certain species of transportation that is something absolutely in its infancy is another thing; and we made such a mess of the regulation of railroads in the past that it is going to take a century to get out of it. I say this: That if the gentleman wants to reduce the rates, it is the easiest thing in the world to do so in a separate bill. And the bringing of Colonel Lindbergh into the proceedings should not sweep anybody off his feet, because I doubt if the colonel has examined all the details of this bill.

Mr. KELLY. I will say to the gentleman that he has.

Mr. LAGUARDIA. He has not taken into consideration the fact that this contract takes into account a specific name.

Mr. COCHRAN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. COCHRAN of Missouri. I have received inquiries from Harold M. Bixby, president of the St. Louis Chamber of Commerce, who was with the colonel, and advised him yesterday in reference to this bill and the foreign air mail bill. I advised him of the status of the bills and sent copies of the bill when it was introduced and also when reported. I informed them that one bill would probably go to the President to-day and the other would be taken up on this calendar.

Mr. KELLY. The gentleman from New York and I served together on the Post Office Committee and dealt with the original air mail legislation. I hope the gentleman will not object to this bill, which aims to improve the air mail service.

Mr. MADDEN. Mr. Speaker, I notice that the gentleman from New York [Mr. LAGUARDIA] rather doubts the propriety of doing what is proposed in the bill, and yet that is exactly what we do on every railroad in the country. We do not advertise for contracts for carrying the mail by railroad. The Government negotiates the contracts and transfers the business from one railroad to another, and yet the railroad business is so comprehensive that the mail carried is a very small percentage of their total business, whereas in the air mail transportation the men who invest their money have no other business, but they are required to invest very large sums of money, and their contract at present is only for a four-year period.

Now, if by any chance somebody comes along and takes that contract away, which is possible, all the money invested in the enterprise is lost. There is no other place in the world where their equipment can be used.

Mr. LAGUARDIA. Why not?

Mr. MADDEN. Because they have not anything to use it on.

Mr. LAGUARDIA. There is no fixed rails or road bed.

Mr. MADDEN. Yes; but they would have nothing to carry. They are not going to run airplanes just for fun.

Now, I do not know of a proposal submitted to the House that is as fair as this. In the first place, they have a contract for four years at a very low rate, a rate below cost. Yet they propose to submit to a reduction in the rate they are already receiving under the contract if the volume is sufficient to justify it. But what does the gentleman propose if he objects? He proposes to object to a continuation of a service that is essential to the country, that is being established at a great sacrifice of money and genius, and just as we get it established we put sprags in the wheels, which would prevent the utilization of the instrumentalities for the transportation of the mails by air. For what? Not because the thing that is proposed is not just, not because it is not right, not because it is not fair, not because the people who are behind the movement in investing their money are not experienced, not because they are not patriotic, not because they are not willing to cooperate with the Government in the development of the service, but, on the contrary, because, forsooth, there may be a chance to destroy every dollar of investment that may have been made by all of these men who have made a great personal early sacrifice. Is it fair? I do not think it is, and I hope the gentleman will not object.

Mr. LAGUARDIA. On the other hand, I do not think it is fair, in anything that is still in its infancy, to preclude all others.

Mr. MADDEN. We do not preclude all others.

Mr. LAGUARDIA. By giving a 10-year certificate to any one company.

Mr. MADDEN. Let me ask the gentleman this question, and I am sure he will be fair about it: Suppose they have invested in the air mail activity let us say $2,000,000, $3,000,000, or $5,000,000, or whatever it may have been, and let us suppose further that during all of the four-year period they have lost every dollar they put in and that there is no chance in the world to continue the proposition into which they have put their money and their experience and on which they have made a loss, in a further effort to recoup the loss without any cost to the Government of the United States, with advance knowledge that the end would come in two years more. How much does the gentleman think they would continue to invest in new equipment pending the expiration of the four-year period?

Mr. LAGUARDIA. Under those circumstances I think they would get a renewal of their contract without any trouble.

Mr. KELLY. That is a matter of bidding.

Mr. LAGUARDIA. Under the law, not only is the price given consideration but the ability to render the service.

Mr. MADDEN. I hope the gentleman will not object.

Mr. LAGUARDIA. I will permit it to be passed over without prejudice, but otherwise I will be constrained to object.

Mr. KELLY. I do not know whether the gentleman realizes that the Post Office Department would hesitate to put a parallel line on where mail is being carried under a four-year contract. Under this bill the Post Office Department can put a parallel route on wherever it may be justified. They can distribute the mail among two or three companies. This bill will increase, not lessen, competition.

Mr. LAGUARDIA. The gentleman is speaking about the good features of his bill.

Mr. KELLY. I am showing the protection which is provided for the the public and the department.

Mr. LAGUARDIA. If the gentleman wants to pass this over without prejudice for two weeks longer, I shall be glad to permit him to do that; otherwise I shall be constrained to object.

Mr. BEGG. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BEGG. Does the gentleman take into consideration this angle: Air transportation, as the gentleman says, is in its infancy and requires a whole lot of experimentation. Every nation in the world encourages private enterprise to perform these experiments by a direct subsidy. However, this can not be interpreted in any way as a direct subsidy, but only a preferment for a period of years, so that they will be certain they will have a definite income. In this way contributions to the development of the industry might be very cheaply purchased. If it were true that we were giving them absolute control over a specific route for a definite number of years, that would be a different proposition.

Mr. O'CONNELL. Mr. Speaker, I would suggest that the gentleman let the rest of the Members in on this conversation. We can not hear him.

Mr. BEGG. I doubt whether it would be possible to make yourself heard above the noise in the House. I was simply trying to call the attention of the gentleman from New York to the fact that, this being an experimental method of transportation, in any other nation of the world it would undoubtedly receive a direct subsidy. However, this is in no

sense a subsidy. Let us grant it will be a preferment as to a particular route for 10 years. Even with that condition existing, the development of transportation through the air might be very cheaply purchased. It does not cost the Government a nickel and it may lessen the transportation cost of the mails.

Mr. LAGUARDIA. I will concede it will.

Mr. BEGG. All right. I would not hesitate, so far as my own vote goes, for one second in giving some particular company a 10-year monopoly to carry the mails, because, as I say, of the results that will come from the development of this service.

Mr. LAGUARDIA. There is no reason for it. We had an instance where the Postmaster General properly disregarded the lowest bidder and gave the contract to a bidder who was better qualified, better equipped, and experienced to transport the mail through the air. There was no question about that; his judgment was not questioned at all and it was sound. Therefore all the conditions and all the illustrations that have been cited to-day would indicate that at the expiration of a four-year period a company under those circumstances would get a contract for another four-year period.

Mr. BEGG. Will the gentleman yield?

Mr. LAGUARDIA. I yield to the gentleman.

Mr. BEGG. Let us bring this right down to the practical side of it. Suppose the gentleman had some money to invest; would the gentleman rather invest that money in a company that had a contract with two or three years to run or with a company that had a contract with 10 years to run?

Mr. LAGUARDIA. That is one side of it.

Mr. BEGG. That is the practical side. You must get money for any experimental work.

Mr. LAGUARDIA. As against that, there is the possible development of new equipment, of new means of transportation, and would the gentleman keep that work back while one company is in control for 10 years and not give an outsider any chance at all?

Mr. KELLY. The bill provides for that contingency.

Mr. BEGG. There is no danger of running into that situation. The Government is amply protected in that respect by the bill itself.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that the bill be passed without prejudice; otherwise I shall be constrained to object.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

UNPRODUCTIVE PUBLIC LANDS ON IRRIGATION PROJECTS

The next business on the Consent Calendar was the bill (H. R. 9958) to authorize the disposal of public land classified as temporarily or permanently unproductive on Federal irrigation projects.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I would like to ask about the reference here. I find there is insufficient reference. The reference is to the act of May 25, 1926; does the gentleman think that is sufficient?

Mr. LEAVITT. I think so; yes.

Mr. LAGUARDIA. I looked into it yesterday and could not possibly trace it; but if the gentleman believes this is sufficient reference, that satisfies me.

Mr. LEAVITT. I presented the situation to the department and asked them to prepare a bill to meet it. The bill was prepared by the attorneys of the Interior Department as being sufficient.

Mr. LAGUARDIA. It is not codified. I could not find it anywhere. I have no objection.

Mr. ARENTZ. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. ARENTZ. Is it the gentleman's opinion that this land that is unproductive that lies next to an irrigation project but does contain possibly grass, although the land is not fit for cultivation, could be taken up by irrigation settlers who have a limited amount of land under a Government project and use this land for pasturage?

Mr. LEAVITT. Yes.

Mr. ARENTZ. But at no time in the future will the land be put within a district and water put upon it.

Mr. LEAVITT. I am very sure that situation is very fully protected in the bill; in fact, there is a provision in the bill that might be taken to practically answer the question, in that lands that are classified as permanently unproductive, or class 6 land, can not be made the subject of exchange for productive, irrigated land, which in itself means that they can never be brought in to take the place of other lands.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior, hereinafter styled the Secretary, is authorized in connection with Federal irrigation projects to dispose of vacant public lands designated under the act of May 25, 1926, as temporarily unproductive or permanently unproductive to resident farm owners and resident entrymen on Federal irrigation projects, in accordance with the provisions of this act.

SEC. 2. That the Secretary is authorized to sell such lands to resident farm owners or resident entrymen, on the project upon which such land is located, at prices not less than that fixed by independent appraisal approved by the Secretary, and upon such terms and at private sale or at public auction as he may prescribe: *Provided*, That no such resident farm owner or resident entryman shall be permitted to purchase under this act more than 160 acres of such land, or an area which, together with land already owned on such Federal irrigation project, shall exceed 320 acres.

SEC. 3. All "permanently unproductive" and "temporarily unproductive" land now or hereafter designated under the act of May 25, 1926, shall, when sold, remain subject to sections 41 and 43 of the said act. The exchange provisions of section 44 of said act of May 25, 1926, shall not be applicable to the land purchased under this act.

SEC. 4. After the purchaser has paid to the United States all amounts due on the purchase price of said land, a patent shall issue which shall recite that the lands so patented have been classified as temporarily or permanently unproductive, as the case may be, under the adjustment act of May 25, 1926. Such patents shall also contain a reservation of a lien for water charges when deemed appropriate by the Secretary and reservations of coal or other mineral rights to the same extent as patents issued under the homestead laws.

SEC. 5. In the absence of a contrary requirement in the contracts between the United States and the water users' organization or district assuming liability for the payment of project construction charges, all sums collected hereunder from the sale of lands, from the payment of project construction charges on "temporarily unproductive" or "permanently unproductive" lands so sold, and (except as stated in this section) from water rentals, shall inure to the reclamation fund as a credit to the sums heretofore written off in accordance with said act of May 25, 1926. Where water rental collections hereunder are in excess of the current operation and maintenance charges, the excess as determined by the Secretary shall, in the absence of such contrary contract provision, inure to the reclamation fund as above provided, but in all other cases the water rentals collected under this act shall be turned over to or retained by the operating district or association, where the project or part of the project from which the water rentals were collected is being operated and maintained by an irrigation district or water users' association under contract with the United States.

SEC. 6. The Secretary of the Interior is authorized to perform any and all acts and to make all rules and regulations necessary and proper for carrying out the purposes of this act.

Mr. LEAVITT. Mr. Speaker, this is a very important bill to the settlers on the project, and I ask unanimous consent to extend my remarks at this point in the RECORD upon it.

The SPEAKER. Is there objection?

There was no objection.

Mr. LEAVITT. Mr. Speaker, this bill (H. R. 9958) to authorize the disposal of public land classified as temporarily or permanently unproductive on the Federal irrigation projects was introduced by me on the 24th of January last. On the 8th of February it was favorably acted on by the Committee on Irrigation, and I reported it to this House.

To-day it has been reached on the calendar for passage, and it is a matter of much gratification to hundreds of resident farm owners and entrymen on the reclamation projects that it has your approval.

You will recall that on the 25th of May, 1926, the act to adjust water-right charges and to grant certain other relief on the Federal irrigation projects became law. It extended a large measure of relief to 19 projects in the West, of which 4 are in the district I have the privilege of representing. Among other things it authorized the classifying of 207,342 acres of lands as being temporarily unproductive and suspended $12,593,329 charged against them; and it also set aside 174,448 acres as being permanently unproductive and removed them from the projects, thus charging off $9,343,038 theretofore standing as a debt against the settlers on the 19 projects.

The bill I have introduced and which has just been read by the Clerk has to do with the present disposition of these unproductive lands. They are in the main rough or of such soil

as to be unfit for irrigation, but they have value as grazing units and otherwise if used in connection with the irrigated lands. The gist of the measure is that the Secretary of the Interior is authorized to dispose of such vacant public lands in these areas to resident farm owners and resident entrymen on the projects within which the lands are located. They are to sell at prices fixed by appraisal, not more than 160 acres to anyone, nor giving any one individual a total of more than 320 acres, including other land already owned on the project.

The conditions and reservations of sale are proposed in the bill as matters of sound public policy. Section 3 says:

All "permanently unproductive" and "temporarily unproductive" land now or hereafter designated under the act of May 25, 1926, shall when sold, remain subject to sections 41 and 43 of the said act. The exchange provisions of section 44 of said act of May 25, 1926, shall not be applicable to the land purchased under this act.

That the sections 41, 43, and 44 of the act of May 25, 1926, may be ready for reference I give them here as follows:

SEC. 41. All lands found by the classification to be permanently unproductive shall be excluded from the project and no water shall be delivered to them after the date of such exclusion unless and until they are restored to the project. Except as herein otherwise provided, the water right formerly appurtenant to such permanently unproductive lands shall be disposed of by the United States under the reclamation law: *Provided*, That the water users on the projects shall have a preference right to the use of the water: *And provided further*, That any surplus water temporarily available may be furnished upon a rental basis for use on lands excluded from the project under this section on terms and conditions to be approved by the Secretary of the Interior.

SEC. 43. The payment of all construction charges against said areas temporarily unproductive shall remain suspended until the Secretary of the Interior shall declare them to be possessed of sufficient productive power properly to be placed in a paying class, whereupon payment of construction charges against such areas shall be resumed or shall begin as the case may be. While said lands are so classified as temporarily unproductive and the construction charges against them are suspended, water for irrigation purposes may be furnished upon payment of the usual operation and maintenance charges, or such other charges as may be fixed by the Secretary of the Interior the advance payment of which may be required, in the discretion of the said Secretary. Should said lands temporarily classed as unproductive, or any of them, in the future be found by the Secretary of the Interior to be permanently unproductive, the charges against them shall be charged off as a permanent loss to the reclamation fund and they shall thereupon be treated in the same manner as other permanently unproductive lands as provided in this act.

SEC. 44. Settlers who have unpatented entries under any of the public land laws embracing lands which have been eliminated from the project, or whose entries under water rights have been so reduced that the remaining area is insufficient to support a family, shall be entitled to exchange their entries for other public lands within the same project or any other existing Federal reclamation project.

And so forth. With further provisions and amplification. Of course, it would not be fair to allow the later exchange of these cheaply acquired lands for valuable irrigable lands under the provisions of section 44.

Finally the reasons for the enactment of this legislation are quite fully set forth in the letter of the Secretary of the Interior to the chairman of the Committee on Irrigation and Reclamation under date of February 2. The letter is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, February 2, 1928.

Hon. ADDISON T. SMITH,
Chairman Committee on Irrigation and Reclamation,
House of Representatives.

MY DEAR MR. SMITH: I have your request of January 26 for report on (H. R. 9958) a bill to authorize the disposal of public land classified as temporarily or permanently unproductive on Federal irrigation projects.

The bill authorizes the Secretary of the Interior to sell unproductive lands on Federal irrigation projects to resident owners and entrymen under terms and conditions to be fixed by him. Under the bill no landowner would be permitted to purchase more than 160 acres of such land, or an area which, with land already owned on any one project, would exceed 320 acres. The lands are to be appraised by an independent board of appraisers.

The lands, the sale of which is contemplated under the bill, are not suitable for entry under the homestead and reclamation laws.

Under the present law, private landowners and entrymen could secure the use of these lands only by temporary lease. This method is objectionable because the Government has turned over or will turn over the projects to water users for their own management, and the United States will thereafter have no representatives on the projects to make the necessary leases and administer them.

I believe it preferable that these lands be disposed of in the manner contemplated, and recommend favorable consideration of the bill.

Very truly yours,

HUBERT WORK.

I am sure that the enactment of this measure will be a further forward step toward the final success of the irrigation projects. The sale of these lands will add to the home units of actual settlers in a way to round out their holdings, and it will also place back into the reclamation fund in the Federal Treasury very considerable sums of money now frozen in these unproductive lands and make them available for further constructive use.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

PROHIBITION ENFORCEMENT IN THE DISTRICT OF COLUMBIA

Mr. BLANTON. Mr. Speaker, I have an important matter I want to present to the House, but I do not want to delay the Consent Calendar. I therefore ask unanimous consent that at 3 o'clock to-day I may be permitted to proceed for 10 minutes.

Mr. SCHAFER. Mr. Speaker, reserving the right to object, on what subject?

Mr. BLANTON. It is on the investigation we have been making.

Mr. SCHAFER. Will the gentleman present some concrete evidence to the House?

Mr. BLANTON. Yes.

Mr. SCHAFER. I notice the gentleman's prior speeches seem to infer that certain high officials of the Washington police department have been giving protection to bootleggers while they did not give any evidence which would substantiate that inference.

Mr. BLANTON. If the gentleman will come to my office I will give him all the evidence he wants.

Mr. LaGUARDIA. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. LaGUARDIA. I understand we are going to have some suspensions later in the afternoon.

Mr. BLANTON. Yes; I have spoken to the Speaker about it.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CHINDBLOM. Does the gentleman propose to discuss, as he did last Saturday, testimony brought before a subcommittee against men holding official positions who have had no opportunity to confront witnesses, no opportunity to present evidence on their own behalf, and who themselves have not had an opportunity to testify?

Mr. BLANTON. The ones I am going to discuss have had plenty of opportunity. I shall discuss no others.

Mr. SCHAFER. Further reserving the right to object, I believe if the gentleman has evidence showing protection to bootleggers given by officers or members of the Metropolitan police force, the proper procedure is to file such evidence with the Commissioners of the District of Columbia, so that these men may have an opportunity to be heard, and I therefore object.

Mr. BLANTON. Mr. Speaker, I hope my friend will not object to my having this 10 minutes. I do not take the time of the House unless it is necessary, and this is an important matter. What better proof does the gentleman want than this specially built truck that is right over here at the House Office Building now, with a secret compartment in it to carry liquor, the owner of which says he had it built to carry liquor in and has used it for six months to transport liquor here in violation of the law?

Mr. SCHAFER. The gentleman from Wisconsin will state that any police officer, no matter what position he holds in the police department, who has been taking graft or giving protection to bootleggers, should be put in Leavenworth penitentiary with the bootleggers, just as the gentleman from Texas would desire.

Mr. BLANTON. That is what I want done with them.

Mr. SCHAFER. But the gentleman's prior speeches about the matter do not contain material facts sufficient to substantiate an indictment on the floor of the House of any officer in the police department. Particularly they do not substantiate the inference directed against the chief of police.

Mr. BLANTON. If the gentleman from Wisconsin is going to block proceedings, I do not now want to take up any more time of the House.

Mr. SCHAFER. If the gentleman will assure me that he will present concrete evidence, I will withdraw my objection.

Mr. BLANTON. I expect to give enough of concrete facts to satisfy the gentleman.

Mr. SCHAFER. Mr. Speaker, I withdraw my objection.

Under permission granted me by unanimous consent of the House, I incorporate the statement recently made by Maj. Edwin B. Hesse, superintendent of the Metropolitan police force of the District of Columbia, which is as follows:

If Representative BLANTON has any evidence against me, it is his duty to present it to the Commissioners of the District. It is my right to have an opportunity to cross-examine his witnesses and introduce testimony in my behalf. I stand ready to face any investigation of my acts or utterances by the commissioners to whom I am responsible for my official position.

I hereby obligate myself to submit to the trial board without further investigation and without change of any language any charges Representative BLANTON may care to make against any of my subordinates, who will thereupon have opportunity for defense and decision by an impartial tribunal without possibility of intervention by Representative BLANTON or myself.

I invite an investigation by any unbiased body of men of my record and that of the police department under my administration to ascertain whether that record will not disclose the fact that I have energetically and honestly striven to secure the enforcement of all laws.

Mr. TREADWAY. Reserving the right to object, I would like to ask the gentleman from Texas what benefit he expects to be derived by publicity of what he has already exploited on the floor? If it is a criminal matter, it should be placed in the hands of the criminal prosecutor.

Mr. BLANTON. I will say to the gentleman that I could demand an hour under a question of personal privilege. There was more than a column printed in the Herald this morning of a pretended interview and not one word was authorized. There was no such interview.

Mr. TREADWAY. If it is a question of personal privilege, the gentleman should exercise his rights rather than to ask for 10 minutes this afternoon.

Mr. BLANTON. I want to give the concrete facts as to the law being violated.

Mr. TREADWAY. If that is so, why does not the gentleman give the facts to the district attorney?

Mr. BLANTON. They have been given to the district attorney.

Mr. TREADWAY. If the gentleman desires to exercise the privileges of the House, he can do so without asking for 10 minutes.

Mr. BLANTON. Mr. Speaker, I withdraw my request. If the gentleman from Massachusetts wants to keep the country from knowing the facts, he can do so.

Mr. TREADWAY. Mr. Speaker, I want to see orderly procedure maintained, and object to 10 minutes of publicity for no good purpose.

Mr. BLANTON. Mr. Speaker, I ask for a quorum.

The SPEAKER. The gentleman from Texas makes the point of no quorum. The Chair will count. [After counting.] One hundred and ninety Members present, not a quorum.

Mr. TILSON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. The doors will be closed, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 41]

Aldrich	Dickstein	Johnson, S. Dak.	Sears, Fla.
Allen	Doutrich	Kindred	Seger
Anthony	Drewry	Kunz	Sirovich
Beck, Wis.	Edwards	Larsen	Somers, N. Y.
Berger	England	McFadden	Stedman
Boies	Estep	McSwain	Strong, Pa.
Britten	Fish	Manlove	Strother
Bushong	Fitzgerald, W. T.	Moore, N. J.	Sullivan
Carley	Free	Moore, Ohio	Wainwright
Cartwright	Fulbright	Nelson, Me.	Watson
Chase	Gifford	Norton, N. J.	Weller
Christopherson	Golder	Oliver, Ala.	White, Colo.
Cole, Iowa	Goldsborough	Oliver, N. Y.	Whitehead
Collins	Goodwin	Palmer	Williams, Tex.
Combs	Graham	Peery	Williamson
Connally, Tex.	Green, Iowa	Perkins	Wilson, Miss.
Connolly, Pa.	Griffin	Pou	Wingo
Crosser	Hall, Ill.	Prall	Wolverton
Cullen	Harrison	Quayle	Wood
Davey	Igoe	Rathbone	Yates
De Rouen	Irwin	Reed, N. Y.	
Dickinson, Mo.	Jacobstein	Sabath	

The SPEAKER. Three hundred and forty-two Members are present, a quorum.

Mr. TILSON. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

SALE OF CERTAIN LANDS NEAR GARDEN CITY, KANS.

The next business on the Consent Calendar was the bill (H. R. 8286) to authorize the sale of certain lands near Garden City, Kans.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOPE. Mr. Speaker, Senate bill 2545, on the Speaker's desk, is identical with this bill. I ask unanimous consent to substitute the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the State of Kansas be, and it is hereby, authorized to sell all or any part of the following-described land granted to said State under the provisions of the act of Congress approved June 22, 1916, to wit: Sections 25, 26, and 35 in township 24 south, and sections 1 and 2 in township 25 south, all in range 33 west of the sixth principal meridian, notwithstanding the restrictions contained in said act: *Provided,* That the proceeds of said sale shall be used to purchase land in sections 23 and 24 in township 24, range 33, and in sections 19 and 30 in township 24, range 32, all in Finney County, Kans., to be used as a State game preserve.

The bill was ordered to be read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The House bill was laid on the table.

WORLD WAR MEMORIAL

Mr. LUCE. Mr. Speaker, I ask unanimous consent to return to Calendar No. 257, Senate Joint Resolution 66.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to return to Calendar No. 257. Is there objection.

Mr. LAGUARDIA. Reserving the right to object, can the gentleman now state the source from which the stone comes?

Mr. LUCE. From the Vermont Marble Co.

Mr. LAGUARDIA. And it is not embraced in the matter I referred to?

Mr. LUCE. No; I think not.

The Clerk read the bill, as follows:

Joint resolution (S. J. Res. 66) authorizing an additional appropriation to be used for the memorial building provided for by a joint resolution entitled "Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War," approved June 7, 1924.

Resolved, etc., That there is authorized to be appropriated, in addition to the sum authorized to be appropriated by a joint resolution entitled "Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War," approved June 7, 1924, the sum of $50,000 to be used for the erection and equipment of the memorial building provided for by such joint resolution. Such sum shall be expended under the direction of the commission, consisting of the chairman of the Senate Committee on the Library and the chairman of the House Committee on the Library, created by such joint resolution, and its disbursement shall not be contingent upon any private subscription.

Mr. LUCE. Mr. Speaker, I move to strike out the last word.

The SPEAKER. The gentleman from Massachusetts moves to strike out the last word.

Mr. LUCE. Mr. Speaker, this resolution will, I am sure, receive no objection from any Member of the House. But I crave the indulgence of the House while in connection with it I address myself to a matter that has seemed to me to be of grave importance to every committee and every Member.

Two weeks ago when this resolution appeared upon the calendar objection to its consideration was made by the gentleman from Michigan [Mr. CRAMTON] on the ground that the report contained no statement to the effect that the matter has been laid before the Director of the Budget. At that time I told him that it was my recollection that the director had been consulted. This, upon further inquiry, I have found to be the fact. He had been consulted by the secretary of the association, who saw fit to discuss with him the proposal. No formal approval, however, had been asked or received by the committee. In my anxiety not to see the matter blocked, I have secured and have before me here a letter from the Director of the Budget saying that the proposal is not inconsistent with the President's program.

Since then I have been much disturbed by reflecting upon the situation brought up by the gentleman from Michigan. For the

first time, so far as I know, in the seven years since the Budget law has been in effect, objection has been raised to the consideration of a matter by unanimous consent because there accompanied the report no statement that the Director of the Budget had been consulted. It was my province to take some small part in the debate upon the adoption of the Budget.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Certainly.

Mr. CRAMTON. Let me understand the gentleman's statement. Is it the gentleman's impression that a report from his committee had never been objected to on the ground that there was no report from the Budget, or was it from any committee?

Mr. LUCE. My statement was intended to be that when I have been on the floor of the House no measure has been objected to by reason of the failure of the report to contain anything about the Director of the Budget.

Mr. CRAMTON. If the gentleman included all committees, he is in error in that statement.

Mr. LUCE. Whether in error or not, the important consideration is still to be brought to the attention of the House.

I have taken the pains to run through the debates when the Budget was adopted, and my eye has caught there nothing indicating that it was the intention of the Congress that any of its lawmaking committees should be required to consult the Director of the Budget when considering legislation. But this is what has happened: The President, by an Executive order, seems to have directed that when departments are consulted by committees of this House the departments shall include in their reply a statement showing that the Director of the Budget has been consulted. This, it will be seen, puts the lawmaking body of the land under the control of the Director of the Budget, who, of course, has not the time or opportunity to consider these proposals as our committees consider them.

Mr. O'CONNELL. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Yes.

Mr. O'CONNELL. As a matter of fact, are we not now following that very policy under which it seems we can not get anything done in the House without consulting the Budget Bureau?

Mr. LUCE. It was to bring that to the attention of the House that my remarks are made.

Mr. JOHNSON of Washington. Mr. Speaker, will the gentleman yield?

Mr. LUCE. Certainly.

Mr. JOHNSON of Washington. I have undertaken to show you from time to time that by the process we are using now we are making the Director of the Budget the dictator of the proceedings of the House of Representatives.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. LUCE. Mr. Speaker, may I have five minutes more?

Mr. MADDEN. I do not see why the gentleman should take up the time in discussing an academic question.

Mr. LUCE. It is not an academic question.

Mr. MADDEN. The gentleman is not discussing the resolution.

The SPEAKER pro tempore. Is there objection?

Mr. MADDEN. I object.

The SPEAKER pro tempore. Objection is heard. The question is on the engrossment and third reading of the resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the Senate joint resolution was passed was ordered to be laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

PROOF OF ENTRIES WITHIN RECLAMATION PROJECTS

The next business on the Consent Calendar was the bill (H. R. 475) to amend certain laws relating to the submission of proof on entries within reclamation projects.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker, this is a bill that provides for paying taxes on irrigated lands?

Mr. WINTER. Yes.

Mr. LAGUARDIA. Who informs the State that the matter has arrived at such stage where the land may be taxed under this bill?

Mr. WINTER. The State authorities will find that of record in the Land Office, where the register issues a final certificate.

Mr. LAGUARDIA. This is to reach settlers who avoid taking out the final certificate in order to avoid paying local taxes?

Mr. WINTER. Yes.

Mr. LAGUARDIA. How is that accomplished?

Mr. COLTON. It is the custom to obtain that from the register of the Land Office. Each year the Land Office issues a copy of the final certificate issued in the preceding year.

Mr. LAGUARDIA. The final certificate?

Mr. COLTON. Yes; issued by the register.

Mr. WINTER. That they have complied with the requirements of the homestead law.

Mr. LAGUARDIA. After they get this certificate, what is done?

Mr. WINTER. They go on with the period of the payment for construction of the reclamation project.

Mr. LAGUARDIA. After the payment is made they purposely refrain from applying for a patent in order to avoid taxation?

Mr. WINTER. That is correct.

Mr. LAGUARDIA. Is the settler protected in not paying taxes before the local authorities have a right to tax him?

Mr. WINTER. Yes; certainly.

Mr. CRAMTON. A letter from the Secretary says that under existing law the entryman may delay for the entire period, which may extend over a period of 40 years.

He might have said that on some of the projects under the 5 per cent plan it would be 75 or 100 years. Just why should he have that privilege of delaying the issuance of a patent until he has made his payments for the reclamation charges?

Mr. WINTER. I do not think the privilege ought to be extended.

Mr. CRAMTON. Why should not the gentleman's bill be a bill that would require them to complete their proof and make their lands taxable instead of leaving it in this inchoate state for 40, 50, or 100 years?

Mr. WINTER. My form of the bill has been amended and the form of the bill as it is now before the House is the form submitted by the department itself.

Mr. CRAMTON. Under the form submitted by the department what becomes of the priority of lien of the Government for its construction charges on the reclamation project? By Federal authority in this bill the land is made subject to taxation and under State laws naturally those taxes stand as a lien. The land is liable to be sold for taxes and then what has become of the Federal Government's lien for reclamation charges?

Mr. WINTER. I do not think that can be disturbed; I think the Government's lien stands right where it is.

Mr. CRAMTON. There is nothing in this bill to preserve that lien, and it is the holder of that lien who is so graciously making these lands subject to State taxation, although the title has not left the Federal Government. I am not out of sympathy with what the gentleman is trying to do, but I do believe it is of enough importance to have a little more attention than has yet been given it. I shall be obliged to object to it.

The SPEAKER pro tempore. Objection is heard.

PERMISSION TO ADDRESS THE HOUSE

Mr. MADDEN. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Illinois rise?

Mr. MADDEN. Mr. Speaker, I rise to ask unanimous consent that on the first occasion after the reading of the Journal and when it will not interrupt any other business that 40 minutes be accorded to the gentleman from Massachusetts and myself to discuss the question against which I objected a few moments ago.

The SPEAKER pro tempore. I think the gentleman had better put that request a little more definitely.

Mr. MADDEN. Well, that 20 minutes be accorded to the gentleman from Massachusetts and 20 minutes to myself.

The SPEAKER pro tempore. The Chair meant as to the day.

Mr. MADDEN. On Thursday morning, after the reading of the Journal.

Mr. LAGUARDIA. Mr. Speaker, on that day we have the radio bill and the constitutional amendment, perhaps.

Mr. MADDEN. Well, the first day after the reading of the Journal and when other business will not be interfered with. I ask for it on Saturday.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that on Saturday next, after the special orders and disposition of other business on the Speaker's table, the gentleman from Massachusetts [Mr. LUCE] may be allowed to speak for 20 minutes out of order, and that the gentleman from Illinois may be permitted to speak for 20 minutes out of order. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that following the addresses made under the special agreement just entered into I may have 20 minutes.

The SPEAKER pro tempore. The gentleman from Washington asks unanimous consent that following the addresses of the two gentlemen just mentioned he be permitted to proceed for 20 minutes. Is there objection?

Mr. O'CONNELL. Mr. Speaker, reserving the right to object, on what subject?

Mr. JOHNSON of Washington. On the same subject, the matter of the right of committees of the House of Representatives to enact authorizations for appropriations and progressive legislation of various kinds.

The SPEAKER pro tempore. Is there objection?

There was no objection.

LUMMI INDIAN RESERVATION, WASH.

The next business on the Consent Calendar was the bill (H. R. 8731) to authorize an appropriation for the construction of a road on the Lummi Indian Reservation, Wash.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HADLEY. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice and retain its place on the calendar.

The SPEAKER pro tempore. The gentleman from Washington asks unanimous consent that this bill may be passed over without prejudice and retain its place on the calendar. Is there objection?

There was no objection.

HAWAII NATIONAL PARK

Mr. HOUSTON of Hawaii. Mr. Speaker, I ask unanimous consent that the next bill on the calendar, H. R. 10483, be passed over without prejudice and retain its place on the calendar.

The SPEAKER pro tempore. The gentleman from Hawaii asks unanimous consent that the next bill on the calendar, H. R. 10483, be passed over without prejudice and retain its place on the calendar. Is there objection?

There was no objection.

OFFICERS OF THE UNITED STATES NAVY

The next business on the Consent Calendar was the bill (H. R. 5531) to amend the provision contained in the act approved August 29, 1916, relating to the assignment to duty of certain officers of the United States Navy as fleet and squadron engineers.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, this bill is improperly drawn. It is drawn in the form that an amendment could be offered on the floor of the House when the bill is properly corrected and completed. The text of the bill is there, but as this bill is drawn it strikes out certain words of the law and inserts other words. It is only going to add confusion, and such a bill should not be permitted to pass. I do not know who is responsible for the bill.

Mr. DREWRY. What is the gentleman's statement?

Mr. LAGUARDIA. The bill is in improper form.

Mr. VINSON of Georgia. Will the gentleman enlighten the House as to what form it should be in?

Mr. LAGUARDIA. It should provide that "section so-and-so should be amended to read as follows"; but, as I just stated, this bill is drawn in the form of an amendment offered on the floor, where the text may be corrected.

Mr. VINSON of Georgia. Mr. Speaker, I ask unanimous consent that this bill may be passed over for the time being without prejudice.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

U. S. S. "DISPATCH"

The next business on the Consent Calendar was the bill (H. R. 771) providing for the loan of the U. S. S. *Dispatch* to the State of Florida.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, there is no objection on the part of the department to giving this ship, which apparently is of no use to the Government, to the State of Florida. Why does not the State just take the gift of the ship rather than its loan so there will be no question of any futher liability on the part of the Government?

Mr. DRANE. The State of Florida would not go so far as to ask for a gift, but it does ask that this ship, which has long been out of commission, may be loaned to the State during the pleasure of the Government. The State of Florida meanwhile will rehabilitate the ship and put it in commission for State purposes.

Mr. LAGUARDIA. The department further states that the ship is of no use to the Navy at this time and they will be glad to give it to the State. I do not see why the State does not take the ship.

Mr. DRANE. We would not like to go that far, unless agreeable to the department.

Mr. LAGUARDIA. It would relieve the Government of any possible liability on account of the ship.

Mr. DRANE. I understand that, but the committee did not discuss it from that angle and I would not feel at liberty to do that, for the present.

Mr. LAGUARDIA. I do not think we ought to take the ship and lend it, even with the safeguards put in this bill. We do not want the ship and you want the ship, so there is no reason why you should not have it.

Mr. DRANE. I would be glad to accept an amendment if the gentleman desires to offer an amendment to that effect.

Mr. LAGUARDIA. I can not prepare it offhand, and therefore I ask that the bill may be passed without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

CONSTRUCTION AT MILITARY POSTS

The next business on the Consent Calendar was the bill (H. R. 7944) to authorize appropriations for construction at military posts, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I want to call the attention of the gentleman from Massachusetts, a member of the Committee on Military Affairs, to the wording of the bill wherein there is authorized appropriations. You then provide for utilities and appurtenances thereto, "as in the judgment of the Secretary of War may be necessary." Would the gentleman accept an amendment in all of these bills, inserting after the word "thereto" the words "within the amount herein authorized to be appropriated"?

Mr. FROTHINGHAM. That is what is intended.

Mr. LAGUARDIA. That would make the language clear, and with that understanding I shall not object.

Mr. FROTHINGHAM. If the gentleman from Virginia does not object——

Mr. MOORE of Virginia. That is all right.

Mr. BLACK of Texas. Mr. Speaker, I would like to make an inquiry about this project. I find in the Sixty-ninth Congress we appropriated $500,000 for this purpose, and in the Army appropriation act of February 10 of this year we appropriated $160,000 more. I would like to inquire what is the present need of this authorization when the Army appropriation bill carries $160,000 for this project.

Mr. JAMES. The $666,000 will take care of the building itself, but there is $80,000 needed for sewer and water pipe to complete the building; otherwise, we will have a building completed, but with no water pipes or sewer pipes in connection with the building.

Mr. BLACK of Texas. Let me ask the gentleman this further question: Is it necessary to have this particular appropriation at the present time?

Mr. JAMES. Yes; otherwise, we would have a building and would be unable to connect it with sewer and water pipes and would not be able to use it for a year.

Mr. BLACK of Texas. Did the original authorization just authorize $660,000 for this project?

Mr. JAMES. For the building itself, and they forgot to estimate for the sewer and water pipes.

Mr. BLACK of Texas. And that is the reason for this particular bill?

Mr. JAMES. Yes.

Mr. BLACK of Texas. Mr. Speaker, I withdraw my objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, not to exceed $80,000, to be expended for the construction and installation, at Fort Humphreys, Va., of barracks and such utilities and appurtenances thereto as in the judgment of the Secretary of War may be necessary.

With the following committee amendment:

In line 4, after the word "construction," strike out the word "and," and in line 5 insert the words "and completion" after the word "installation."

The committee amendment was agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment striking out, on page 1, line 6, the word "such," and the word "as," at the end of the line, and all of line 7, so that it will read, "Barracks and utilities and appurtenances thereto."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

RIVERSIDE INDIAN SCHOOL, ANADARKO, OKLA.

The next business on the Consent Calendar was the bill (H. R. 8326) to authorize the construction of a dormitory at Riverside Indian School at Anadarko, Okla.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this is another of the class of bills I referred to earlier in the afternoon, where I do not believe legislation is necessary.

I am satisfied if the Budget approves this as strongly as they seem to, there is nothing to prevent the submission of an estimate. It happens I have visited this school, and while the dormitory is desirable I am satisfied there are other schools where we need new buildings worse than we do here.

If this bill be passed it is considered by some a command for the Appropriations Committee to approve of this appropriation, and it stands in the way of some other appropriation that is more urgently needed than this. It prevents the balancing of respective needs that should obtain in making up the Budget.

Mr. O'CONNELL. Does the member of the Cabinet pass on these matters, and has not this matter been submitted to the Secretary of the Interior and received his approval? The report indicates that it is an emergency.

Mr. CRAMTON. It is not an emergency, I will say on my own personal knowledge, but it is desirable.

I want to make this other objection. This particular need is under a large lump-sum item in the Interior bill—two or three million dollars, I think—I am not sure, so that if at any time the department feels that this item is so much more urgent than others they can take it out of that fund. But for the reason, as I said this afternoon, I recognized the fact that this has been to the legislative committee and that committee has approved of it and I am willing to assume that it is a desirable expenditure, and therefore I am not going to object to the bill. But I want it to be understood that we are not creating a precedent here that is going to foreclose the right of objecting to similar expenditures all over the country. There is one other difficulty about that. This is encouraging the heads of Indian schools and other activities just as the military bills are encouraging Army officers to violate the Budget law by going to their Congressmen and asking to have bills introduced, instead of letting the things take the natural course through the department.

Mr. JOHNSON of Oklahoma. Mr. Chairman, as the gentleman from Michigan [Mr. CRAMTON] has been kind enough to state that he will not object to this measure, although he does not feel that it is an emergency, I shall have little to say at this time. It is action we desire with reference to the pending measure making an authorization of $40,000 for a boys' dormitory at the Riverside Indian School, and not extended speeches.

Permit me to add in this connection, however, that the Riverside School is located near my home city of Anadarko, Okla., and therefore I feel that I am possibly more familiar with the situation and the needs of this splendid institution than my good friend from Michigan could possibly be. This bill proposes to replace an old dilapidated dormitory built more than 40 years ago and which is really in a dangerous condition. The measure had the enthusiastic approval of the Interior Department, and was reported out unanimously by the committee. A representative of the Interior Department was present when I presented the matter in detail to the committee, and I think I can safely say that both the committee and the department feel that an emergency does exist. Before introducing this bill I went over and inspected this institution very carefully with Hon. J. A. Buntin, superintendent of the Kiowa Indian Agency, who also feels that this is an emergency, and has recommended this authorization as being urgently needed.

May I be permitted to add, Mr. Chairman, that this school is situated in the midst of a large Indian population? I think there are possibly a dozen tribes represented at this school, and the Indians of this particularly part of the country are increasing quite rapidly instead of decreasing, as is the case with many other tribes of Indians. The Caddos, Kiowas, Comanches, and Apaches, and several other tribes, whose children attend the Riverside Indian School, have made a marked and phenomenal progress within the past decade. They are building good homes as fast as their finances will permit, are learning trades, and are anxious to educate their children. Surely we will not withhold from them the opportunity of sending their children to this institution merely because we have seen fit to bring this in as a special bill and did not choose to wait in the hopes of getting it included in the Budget. I hope that none of my colleagues will object to the passage of this important measure that means so much to the Indians of my community.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

APPRAISAL OF CERTAIN GOVERNMENT PROPERTY

The next business on the Consent Calendar was the bill (H. R. 5746) to authorize the appraisal of certain Government property, and for other purposes.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

UTILIZATION OF RESOURCES AND INDUSTRIES OF THE UNITED STATES

The next business on the Consent Calendar was the joint resolution (H. J. Res. 36) to amend section 3 of the joint resolution entitled "Joint resolution for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, etc.," approved February 8, 1918.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, this bill has been up ever since I have been in Congress, and it seems to me that some time something ought to be done to it. I remember during the first session in Congress that it was first up, and Mr. Mann, of Illinois, said, on July 31, 1917:

Mr. Speaker, I have spent 20 years in the House and have seen a great many bad bills, but I measure my words when I say this is the worst and most vicious proposition I have heard in the House of Representatives.

[Laughter.]

Following Mr. Mann, I object.

PRECEDENCE OF CERTAIN OFFICERS OF THE STAFF CORPS OF THE NAVY

The next business on the Consent Calendar was the bill (H. R. 21) to provide for date of precedence of certain officers of the staff corps of the Navy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That any officer of the line of the Navy who, since July 1, 1923, has been transferred to, and commissioned in, a staff corps of the Navy in the same rank as formerly held by him in the line, shall take precedence with, but next after, that officer of the line immediately above him in the Navy at the time of such transfer, which officer shall be assigned as his running mate for promotion purposes: *Provided*, That no back pay or allowances shall accrue to any officer by reason of the passage of this act.

The bill was ordered to be read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LOAN OF THE U. S. S. "DISPATCH" TO THE STATE OF FLORIDA

Mr. DRANE. Mr. Speaker, I ask unanimous consent to return to Calendar No. 298—S. 771—providing for the loan of the U. S. S. *Dispatch* to the State of Florida.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Navy is authorized and directed to loan to the State of Florida, for such time and upon such conditions as he deems advisable, for the use of the fisheries department of such State the U. S. S. *Dispatch*, together with all her apparel, charts, books, and instruments of navigation; but no expense shall be caused the United States by the delivery or the return of such vessel, and the State of Florida shall assume responsibility for all expenses for repair and upkeep of the vessel and for any damage which may be caused to the vessel while loaned to such State.

Mr. DRANE. Mr. Speaker, I offer the following amendment.
The Clerk read as follows:

Beginning on line 4, page 1, strike out the words "to loan" and insert the words "to convey by gift." Line 9, strike out the words "or the return," and after the word "vessel" insert the period in line 9 and strike out the balance of the bill.

The amendments were agreed to.
The title was amended.
The bill as amended was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider was laid on the table.

PAY OF RETIRED WARRANT OFFICERS AND ENLISTED MEN, ETC., OF THE PANAMA CANAL

The next business on the Consent Calendar was the bill S. 1946, a bill relative to the pay of certain retired warrant officers and enlisted men and warrant officers and enlisted men of the reserve forces of the Army, Navy, Marine Corps, and the Coast Guard, fixed under the terms of the Panama Canal act, as amended.
The Clerk read the title of the bill.
The SPEAKER pro tempore. Is there objection?
Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, the gentleman from Illinois and I have had this out before.
Mr. DENISON. We have; but I thought the gentleman from New York was satisfied about the matter. It applies to only a few men employed on the Panama Canal Zone, and we have removed the disability from every other class of employees.
Mr. LAGUARDIA. That strengthens the gentleman's argument in putting through a bad policy.
Mr. DENISON. I did not initiate the policy.
Mr. LAGUARDIA. This applies only to a small number, and I shall not object to this; but I shall object all I can to prevent retired soldiers or officers from retiring and competing with men in the civil service.
The Clerk read the bill, as follows:

Be it enacted, etc., That section 4 of the Panama Canal act, as amended, shall not be construed as requiring the deduction of the retired pay or allowances of any retired warrant officer or enlisted man of the Army, Navy, Marine Corps, or Coast Guard, or the training pay, retainer pay, or allowances of any warrant officer or enlisted man of the reserve forces of the Army, Navy, Marine Corps, or Coast Guard, from the amount of the salary or compensation provided by or fixed under the terms of the Panama Canal act, as amended.

The bill was ordered to be read a third time, was read the third time, and passed.
A motion to reconsider was laid on the table.

CONSTRUCTION AT MILITARY POSTS

The next business on the Consent Calendar was the bill (H. R. 6480) to authorize appropriations for construction at military posts, and for other purposes.
The title of the bill was read.
The SPEAKER pro tempore. Is there objection?
Mr. CRAMTON. The Secretary of War says they have full authority now under the law to construct this building. It is deemed desirable to enact this bill only in order to make it easier to procure appropriations for this project. I shall be obliged to object to this as unnecessary.
The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.
The next business on the Consent Calendar was the bill (H. R. 7932) to authorize appropriations for construction at military posts, and for other purposes.
The title of the bill was read.
The SPEAKER pro tempore. Is there objection to the present consideration of the bill?
Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker, this bill is subject to the same objection as the previous bill. I shall be glad to withdraw my objection if you will strike out the language as to the judgment of the Secretary of War.
Mr. JAMES. Mr. Speaker, we had the matter up with the Secretary of War, and I suggested to him that we would leave off that language on future bills that may be prepared.
Mr. LAGUARDIA. On that statement I will withdraw my objection.
The SPEAKER pro tempore. The Clerk will report the bill.
The Clerk read as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated not to exceed $65,000, to be expended for the construction and installation at Schofield Barracks, Hawaii, of nurses' quarters and such utilities and appurtenances thereto as in the judgment of the Secretary of War may be necessary.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment. On page 1, line 6, strike out the word "such" and after the word "thereto" insert a period and strike out the balance of the bill.
The SPEAKER pro tempore. The Clerk will report the amendment.
The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: In line 6, strike out the word "such," and after the word "thereto" insert a period and strike out the remainder of the bill.

The SPEAKER pro tempore. The question is on agreeing to the amendment.
The amendment was agreed to.
The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.
The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote whereby the bill was passed was laid on the table.
The SPEAKER pro tempore. The Clerk will report the next bill.

PURCHASE OF REAL ESTATE BY THE WAR DEPARTMENT

The next business on the Consent Calendar was the bill (H. R. 5806) to authorize the purchase of real estate by the War Department.
The title of the bill was read.
The SPEAKER pro tempore. Is there objection to the present consideration of the bill?
Mr. LAGUARDIA. Reserving the right to object, does not the gentleman from Michigan [Mr. JAMES] believe that we ought to insert after the word "sum" the words "not exceeding"? With that reservation I shall have no objection.
Mr. CRAMTON. Reserving the right to object, Mr. Speaker, and I shall not object to any of these bills to-day, but I will state that I am going to object hereafter to bills of this kind. As to this bill, the Secretary of War says the only purpose is to "make easier the getting of an appropriation." There is now authority of law. What my colleague is proposing is very desirable, and I shall not object now, but an expression of that kind from Cabinet officers will hereafter condemn a bill so far as my objection goes.
The SPEAKER pro tempore. The Clerk will report the bill.
The Clerk read as follows:

Be it enacted, etc., That the Secretary of War, under such conditions as he shall determine, is authorized to procure real estate at Opaeula Gulch and Gilbert, Hawaii, for the purpose of providing four sites for firing installations for heavy artillery, and there is hereby authorized to be appropriated for this purpose the sum of $10,125.

With a committee amendment, as follows:

In line 4, strike out the word "procure" and insert in lieu thereof "acquire by purchase or condemnation."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.
The committee amendment was agreed to.
Mr. LAGUARDIA. Mr. Speaker, I offer an amendment.
The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from New York.
The Clerk read as follows:

Page 1, line 8, strike out the word "sum" and insert in lieu thereof the words "a sum not exceeding."

The SPEAKER pro tempore. The question is on agreeing to the amendment.
The amendment was agreed to.
The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.
The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.
A motion to reconsider the vote whereby the bill was passed was laid on the table.
The SPEAKER pro tempore. The Clerk will report the next bill.

PAVING GOVERNMENT ROAD FROM ST. ELMO, TENN., TO ROSSVILLE, GA.

The next business on the Consent Calendar was the bill (H. R. 5817) to provide for the paving of the Government road extending from St. Elmo, Tenn., to Rossville, Ga.
The title of the bill was read.
The SPEAKER pro tempore. Is there objection to the present consideration of the bill?
Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker, I understand this road was offered to the State of Tennessee under the law some time ago, and the State of Tennessee has not even replied to the offer. What assurance do we have now that if we spend this money the State of Tennessee will finally take over the road?

Mr. McREYNOLDS. It is all in the hands of the Secretary of War.

Mr. LAGUARDIA. The gentleman would not assure us that the State would take it off our hands before we expended the $20,000?

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the sum of $116,000, or so much of said sum as may be necessary, is appropriated, out of the Treasury of the United States, to be expended under the direction of the Secretary of War, in paving the Government road commencing at the pike at the foot of Lookout Mountain at St. Elmo, Tenn., and extending to the Rossville Boulevard, at Rossville, Ga., in the length of $3\frac{7}{10}$ miles, known as the Hooker Road.

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Strike out all after the enacting clause and insert:

"That the sum of $75,000, or so much of said sum as may be necessary, is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Secretary of War, in paving the Government road commencing at the pike at the foot of Lookout Mountain at St. Elmo, Tenn., and extending to the Rossville Boulevard, at Rossville, Ga., in the length of $3\frac{7}{10}$ miles, known as the Hooker Road: *Provided*, That no part of this appropriation shall be expended until the States of Georgia and Tennessee, or the counties or municipalities thereof concerned, have obligated themselves in writing to the satisfaction of the Secretary of War that they will accept title to and maintain said road under the provisions of the act approved March 3, 1925, immediately upon the completion of such improvements as may be made under this appropriation."

Mr. McREYNOLDS. I offer the amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. McREYNOLDS: Strike out the figures "$75,000" and insert in lieu thereof the figures "$116,000."

Mr. McREYNOLDS. Mr. Speaker and gentlemen of the House, this is merely an authorization for $116,000. The amendment as offered by the committee makes the bill read just as drawn by the War Department.

Mr. CRAMTON. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. CRAMTON. My attention was diverted. Do I understand that the gentleman now offers an amendment to increase the amount above the amount carried in the bill?

Mr. McREYNOLDS. That is what I have offered.

Mr. CRAMTON. Was any notice given to the House of the gentleman's purpose?

Mr. McREYNOLDS. I never gave any notice, but I gave the committee notice. If the gentleman thinks that I am unfair about this I certainly will not insist on it.

Mr. CRAMTON. I know the gentleman would not intend to be unfair; but we looked at the bill and report.

Mr. McREYNOLDS. I think the gentleman will even support my amendment if he hears my statement.

Mr. CRAMTON. I do not want to disappoint the gentleman, but I think he is indulging in a vain hope.

Mr. McREYNOLDS. I have often misjudged the gentleman.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. LAGUARDIA. I want to say in all frankness that the gentleman takes me by surprise, and it seems to me that the situation on this Consent Calendar is just a little different.

Mr. McREYNOLDS. If you gentlemen feel I am taking any undue advantage I certainly will not insist on my amendment. I merely want to make a statement, and if my statement is not convincing I will withdraw the amendment.

Mr. JAMES. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. JAMES. I hope the gentleman will withdraw his amendment. We have other bills before our committee. If the committee finds that after it has obliged a man by reporting out a bill for him that then the amount may be increased on the floor the committee will have to play safe. I may say to the gentleman that I had to do a good deal of work to get a favorable report on the bill in its present shape, and I certainly hope the gentleman will withdraw his amendment.

Mr. McREYNOLDS. I will say to the House that on the committees I am serving with I thought we reported bills out as a matter of right. However, if the gentleman feels I am taking any undue advantage, I certainly will withdraw my amendment. If you will permit me to make a statement, I will withdraw it at the proper time. The idea of this amendment was this: The only proof we have in this record is that it will require $116,000 to build a permanent highway from these two points. I have the greatest admiration and confidence in the ability of the Director General, and he thought $75,000 was sufficient. However, I feel that the amount of $75,000 is too small, but if I am wrong and the $116,000 is not necessary, it will not have to be used. If the War Department builds the road for a less amount, then it will not be used. It is not my purpose to take advantage of anyone and I would have notified the gentleman, but I had notified the chairman of that subcommittee.

I want to say that this is not merely a road that connects the Missionary Ridge, Chickamauga Park, and Lookout Mountain battle fields, but it is a historic road over which General Hooker led his Union Army in his attack upon Missionary Ridge, after the great battle had been fought in Chickamauga, Ga., by the Union forces and the Confederate forces.

It is the place where the North and the South met in the bloodiest battle of this country. It has been set aside as a park by the Government. Also, 102 acres on Lookout Mountain, and this road is the connecting road between the two. I see gentlemen in this audience who have seen the monuments erected on the site of Lookout Mountain; the Iowa monument and the New York monument are two of the great monuments that occupy this historical site. We have from Hamilton County built concrete roads up this mountain. We built them into the city of Chattanooga from this road. There is a highway from Rossville to Chickamauga Park that is concrete, also from Rossville into the city, and all I was asking was a sufficient amount to build a proper road of this connecting link.

The SPEAKER pro tempore. The time of the gentleman from Tennessee has expired.

Mr. McREYNOLDS. Mr. Speaker, I ask unanimous consent to proceed for one additional minute.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent to proceed for one additional minute. Is there objection?

There was no objection.

Mr. McREYNOLDS. Since gentlemen have made this statement, and if you feel that way about it, it is not my purpose to undertake to take advantage of you or any of you at any time. I notified your chairman that it was my purpose to make a motion on the floor of the House to raise this sum; but if he feels I am taking undue advantage, I will be glad to withdraw my amendment. [Applause.]

The SPEAKER pro tempore. Without objection, the amendment offered by the gentleman from Tennessee will be withdrawn.

There was no objection.

The committee amendment was agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment. On page 2, line 14, after the figures "1925," insert "section 418, title 18, United States Code."

The SPEAKER pro tempore. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 2, in line 14, after the figures "1925," insert "section 418, title 18, United States Code."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

EXTENSIONS OF TIME UNDER COAL PERMITS

The next business on the Consent Calendar was the bill (S. 1455) to grant extensions of time under coal permits.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I want to ask the gentleman from New Mexico [Mr. MORROW] why this is necessary at this time?

Mr. MORROW. The reason it is necessary is that in all these matters of coal, oil, and gas upon the public domain at times the permittee having the right to prospect fails to secure what he is seeking and asks an extension of time. The Government loses nothing. It simply leaves the matter open for further investigation and the Government gets the benefit when the discoverer finds what he has been seeking. Such extensions were granted by this House, I think, on the last consent

day with respect to oil and gas, extending the time two years. This is with respect to coal, and there is no doubt but that the department wants this legislation, and it is really a beneficial measure.

Mr. LAGUARDIA. Is this universal, or does it affect just one or two individuals?

Mr. MORROW. As I understand, it is universal as to all parties who may need such extensions. They have to make application to the department, and the department decides whether they are entitled to the extension or not.

Mr. HASTINGS. Does this apply only to public lands? It does not apply to Indian lands?

Mr. MORROW. No; it applies only to public lands.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That any coal-prospecting permit issued under the act entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, as amended, may be extended by the Secretary of the Interior for a period of two years, if he shall find that the permittee has been unable, with the exercise of reasonable diligence, to determine the existence of workability of coal deposits in the area covered by the permit and desires to prosecute further prospecting or exploration, or for other reasons in the opinion of the Secretary warranting such extension.

SEC. 2. Upon application to the Secretary of the Interior, and subject to valid intervening rights and to the provisions of section 1 of this act, any coal permit that has already expired because of lack of authority under existing law to make extensions may, in the discretion of the Secretary, be extended for a period of two years from the date of the passage of this act.

Mr. LAGUARDIA. Mr. Speaker, I move to strike out the last word for the purpose of calling the attention of the gentleman from New Mexico to the fact that the act of February 25, 1920, is section 201 of title 30 of the United States Code. If we amend the bill now, it will have to go back to the Senate, so I think it is best to leave the bill as it is. Does the gentleman agree with that?

Mr. MORROW. Being a Senate bill, I would prefer that the bill be left as it is.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

TO SELL CERTAIN PUBLIC SQUARES IN OKLAHOMA CITY, OKLA.

The next business on the Consent Calendar was the bill (H. R. 465) to authorize the city of Oklahoma City, Okla., to sell certain public squares situated therein.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, I want to obtain a little information. We pass legislation from day to day, granting to municipal governments Federal lands with a proviso that it will be retained for public purposes by the municipality. I find that this bill will authorize the municipality to sell public land which was obtained from the Federal Government with such a reservation.

Mr. SWANK. I will say to the gentleman from Wisconsin that when these town sites in Oklahoma Territory were surveyed there were certain blocks or tracts reserved for public parks, schools, and other public purposes, and on the 10th day of January, 1919, the Department of the Interior issued patents to Oklahoma City for these little tracts. They have only two left, and one is 42 by 155 feet and the other is 82 feet square. One of them, block 23, is where the city jail and city hall are located, and block 62 they want to exchange with the Oklahoma City Railway Co., so they can open Walker Street. They have an agreement to this effect if they can get this legislation. The city has grown where these blocks are located, and they are now surrounded by buildings from 2 to 12 stories in height. The lots can not be used by the city for public purposes, and there is an amendment on the bill that this fund shall be used to buy other lands in the city for public purposes.

I will say further that last fall Oklahoma City voted a bond issue of $4,000,000 to buy 22 acres of land in Oklahoma City for park purposes.

Mr. SCHAFER. The gentleman is absolutely certain that the city government will receive full value for this land?

Mr. SWANK. I have no doubt about it whatever.

Mr. SCHAFER. I withdraw my objection, Mr. Speaker.

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, does this tie in at all with the State capitol grounds?

Mr. SWANK. No; it has nothing to do with that.

Mr. CRAMTON. It is not proposed to move the capitol into town?

Mr. SWANK. No; it has nothing to do with that.

Mr. LAGUARDIA. Reserving the right to object, I want to say I spent a lot of time in checking up this reference, and I am not sure that your reference to Twenty-sixth Statutes at Large, page 81, is correct. I find in the code that sections 1091 to 1097 of title 30 contain the act of May 2, 1890, while sections 1111 to 1119 refer to town sites, but that is the act of May 14, 1890.

Mr. SWANK. The section referred to is the act of May 2, 1890.

Mr. LAGUARDIA. I did check up on that reference, so I will only suggest to the gentleman to make sure that his reference is correct.

Mr. SWANK. I am sure it is correct.

Mr. LAGUARDIA. You can not locate it by cross reference.

Mr. SWANK. I will say that the Interior Department drafted the bill.

Mr. LAGUARDIA. I noticed that; and I spent a good deal of time yesterday trying to locate the reference.

Mr. SWANK. I will say to the gentleman that I have no doubt that the reference is correct.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the city of Oklahoma City, Okla., be, and it is hereby, authorized, whenever in its judgment the best interests of said city require such action, to sell the five tracts of land designated as public squares, or any portion thereof, patented to said city on January 10, 1919, for public purposes in accordance with the provisions of section 22 of the act of May 2, 1890 (26 Stat. L. 81), notwithstanding the restrictions contained in said act.

With the following committee amendments:

Line 5, strike out the word "five" and insert the word "two."

Line 6, after the word "squares," insert "in block 23 and block 62, Oklahoma City, Okla."

In line 11, strike out the period after the word "act," insert a colon, and add the following: "*Provided*, That the proceeds from the sale of said tracts shall be devoted by said city to the public purpose referred to in said section 22 of the said act of May 2, 1890."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

RELIEF OF CERTAIN PORTO RICAN TAXPAYERS

The next business on the Consent Calendar was the bill (S. 754) for the relief of certain Porto Rican taxpayers.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. SCHAFER. I object.

CHANGING NAME OF ANCON HOSPITAL, PANAMA CANAL ZONE, TO GENERAL GORGAS HOSPITAL

The next business on the Consent Calendar was the joint resolution (H. J. Res. 175) to change the name of the Ancon Hospital in the Panama Canal Zone to the Gorgas Hospital.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved, etc., That in recognition of his distinguished services to humanity and as a fitting perpetuation of the name and memory of Maj. Gen. William Crawford Gorgas, from and after the passage of this act the Government hospital within the Canal Zone, near the city of Panama, heretofore known as the Ancon Hospital, shall hereafter be known and designated on the public records as the General Gorgas Hospital.

SEC. 2. That the change in the name of the said hospital shall in no wise affect the rights of the Federal Government, or any municipality, corporation, association, or person; and all records, maps, and public documents of the United States in which said hospital is mentioned or referred to under the name of the Ancon Hospital or otherwise shall be held to refer to the said hospital under and by the name of the General Gorgas Hospital.

With the following committee amendments:

Page 1, line 9, strike out the word "General."

Page 2, line 4, strike out the word "General."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

Amend the title so as to read: "A joint resolution to change the name of the Ancon Hospital in the Panama Canal Zone to the Gorgas Hospital."

A motion to reconsider was laid on the table.

AMENDING THE ACT FOR CONSOLIDATED NATIONAL-FOREST LANDS

The next business on the Consent Calendar was the bill (H. R. 9829) to extend the provisions of the act of Congress approved March 20, 1922, entitled "An act to consolidate national-forest lands."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the provisions of the act of Congress approved March 20, 1922 (42 Stat., 465), section 485, chapter 2, title 16, Code of Laws of the United States, an act entitled "An act to consolidate national forest lands," be, and the same are hereby, extended and made applicable to any lands within former Spanish or Mexican land grants which lie partly within or contiguous to the boundaries of the Carson, Manzano, or Santa Fe National Forests in the State of New Mexico.

With the following committee amendment:

Page 1, line 4, before the word "and," insert "section 485, chapter 2, title 16, Code of Laws of the United States."

Mr. LAGUARDIA. Mr. Speaker, I move to amend the committee amendment by striking out the words "chapter 2."

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, bills of the following titles:

H. R. 84. An act to approve Act 25 of the Sessions Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the District of Waimea, on the island and in the county of Kauai, Territory of Hawaii";

H. R. 204. An act to authorize an additional appropriation for Fort McHenry, Md.;

H. R. 230. An act to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees;

H. R. 233. An act to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J.;

H. R. 234. An act to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1 cent a mile for subsistence of candidates in going to and returning from camp;

H. R. 235. An act to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields.

H. R. 238. An act to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army;

H. R. 449. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a toll bridge across the Atchafalaya River at or near Morgan City, La.;

H. R. 519. An act for the relief of Joseph F. Ritcherdson;

H. R. 2524. An act for the relief of Mary M. Jones;

H. R. 4536. An act for the relief of Fred R. Nugent;

H. R. 5635. An act to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation;

H. R. 5686. An act granting a right of way to the county of Imperial, State of California, over certain public lands for highway purposes;

H. R. 5727. An act to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, La.;

H. R. 5783. An act to grant extensions of time of oil and gas permits;

H. R. 5803. An act authorizing the Interstate Bridge Co., of Lansing, Iowa, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Lansing, Iowa.;

H. R. 6194. An act for the relief of Frank Stinchcomb;

H. R. 6476. An act authorizing the Wabasha Bridge Committee, Wabasha, Minn., to construct, maintain, and operate a bridge across the Mississippi River at or near Wabasha, Minn.;

H. R. 6973. An act authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill.;

H. R. 6989. An act to amend the Hawaiian Homes Commission Act, 1920, approved July 9, 1921, as amended by act of February 3, 1923;

H. R. 7030. An act to amend section 5 of the act of March 2, 1895;

H. R. 7195. An act to provide for the purchase of horses and mules for the Military Establishment;

H. R. 7199. An act granting the consent of Congress to the Oregon-Washington Bridge Co. to maintain a bridge already constructed across the Columbia River near the city of Hood River, Oreg.;

H. R. 7213. An act to grant authority to the Postmaster General to enter into contracts for the transportation of mails by air to foreign countries and insular possessions of the United States for periods of not more than 10 years, and to pay for such service at fixed rates per pound or per mile, and for other purposes;

H. R. 7371. An act to legalize a bridge across the Snake River near Heyburn, Idaho;

H. R. 7375. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Guntersville on the Guntersville-Huntsville road in Marshall County, Ala.;

H. R. 7909. An act to authorize the maintenance and renewal of a timber-frame trestle in place of a fixed span at the Wisconsin end of the steel bridge of the Duluth & Superior Bridge Co. over the St. Louis River between the States of Wisconsin and Minnesota;

H. R. 7914. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Whitesburg Ferry, on the Huntsville-Laceys Spring road between Madison and Morgan Counties, Ala.;

H. R. 7915. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tennessee River at or near Scottsboro, on the Scottsboro-Fort Payne road in Jackson County, Ala.;

H. R. 7925. An act granting the consent of Congress for the maintenance and operation of a bridge across the Monongahela River between the borough of Glassport and the city of Clairton, in the Commonwealth of Pennsylvania;

H. R. 8530. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River near Cedar Bluff in Cherokee County, Ala.;

H. R. 8531. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road between Talladega and Shelby Counties, Ala.;

H. R. 8726. An act authorizing Oscar Baertch, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis.;

H. R. 8740. An act granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 8743. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis;

H. R. 8818. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La.;

H. R. 8837. An act authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Cassville, Wis.;

H. R. 8896. An act granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia road in Escambia County, Ala.;

H. R. 9036. An act to increase the salary of the Librarian of Congress;

H. R. 9064. An act granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River at or near Pell City on the Pell City-Anniston road between Calhoun and St. Clair Counties, Ala.;

H. R. 9139. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Cumberland River on the Lafayette-Celina road in Clay County, Tenn.;

H. R. 9196. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Tennessee River on the Decatur-Kingston road in Roane County, Tenn.;

H. R. 9842. An act to provide for the survey, appraisal, and sale of the undisposed lots in the town site of St. Marks, Fla.;

H. R. 9849. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Quincy, Ill.; and

H. R. 10715. An act to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments.

SENATE BILLS REFERRED

Bills of the following title were taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. 2449. An act to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana; to the Committee on Interstate and Foreign Commerce.

S. 3097. An act for the relief of the State of North Carolina; to the Committee on the Judiciary.

THE CONSENT CALENDAR

BRIDGE BILLS

Mr. DENISON. Mr. Speaker, following are a number of bridge bills. I ask unanimous consent that the Clerk may read the bills by title, the committee amendments be agreed to, and the bills as amended pass.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that the bridge bills may be considered without reading, amendments agreed to, and the bills read a third time and passed, and a motion to reconsider to lay on the table. Is there objection?

Mr. DYER. Mr. Speaker, reserving the right to object, are there any bridge bills among these on which tolls are to be charged?

Mr. DENISON. Yes. There are several. I have excluded from this list certain bridges to which I understood there will be some objection, and I will call them up separately.

Mr. DYER. I seriously object to any bill being agreed to that permits tolls to be charged. We have an intolerable situation in my city where exorbitant tolls are being collected. I will not object to any bridge that has nothing to do with tolls.

BRIDGE ACROSS THE MISSISSIPPI RIVER

The next business on the Consent Calendar was the bill (H. R. 7198) granting the consent of Congress to Henry Thane, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, has this man Henry Thane, his heirs, and legal representatives ever had permission to construct another bridge?

Mr. DENISON. I can not answer the gentleman.

Mr. REED of Arkansas. I can tell the gentleman they have not.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote was laid on the table.

BRIDGE ACROSS THE OCMULGEE RIVER, FITZGERALD, GA.

The next business on the Consent Calendar was the bill (H. R. 9831) authorizing J. E. Turner, his heirs, legal representatives, or assigns, to construct, maintain, and operate a bridge across the Ocmulgee River at or near Fitzgerald, Ga.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, I would like to inquire if J. E. Turner, his heirs and legal representatives or assigns, has been given permission to construct any other bridge; and if so, did he construct it or sell the right?

Mr. DENISON. The gentleman from Alabama is not present, but he asked me to look after it. I can tell the gentleman this man has never appeared before Congress before. I think this is his first appearance.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE OHIO RIVER AT NEW MARTINSVILLE, W. VA.

The next business on the Consent Calendar was the bill (H. R. 10070) authorizing the New Martinsville & Ohio River Bridge Co. (Inc.) to construct, maintain, and operate a bridge across the Ohio River at or near New Martinsville, W. Va.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. DENISON. There is a similar Senate bill. It is Senate bill 2801. I ask that it be substituted and considered instead of the House bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the Senate bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Ohio River at a point suitable to the interests of navigation at or near New Martinsville, Wetzel County, W. Va., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes, in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of West Virginia, the State of Ohio, any political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or political subdivisions thereof as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and

its approaches, the expenditures for operating, repairing, and maintaining the same, and the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. The said New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same, and for such purpose the said New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the New Martinsville & Ohio River Bridge Co. (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

Amend the title so as to read: "A bill granting the consent of Congress to the New Martinsville & Ohio River Bridge Co. (Inc.), to construct, maintain, and operate a bridge across the Ohio River, at or near New Martinsville, W. Va."

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the Senate bill was passed was laid on the table.

Mr. DENISON. I move, Mr. Speaker, that the similar House bill be laid on the table.

The SPEAKER pro tempore. The gentleman from Illinois moves that the House bill be laid on the table. The question is on agreeing to that motion.

The motion was agreed to.

Mr. DENISON. The gentleman from Missouri has told us that he did not propose now to object to my request.

Mr. DYER. The gentleman advises me that these bills are of such a nature that I do not desire to object to them.

The SPEAKER pro tempore. The Clerk will report the next bill.

Mr. LAGUARDIA. Mr. Speaker, I was under the impression, just as the Speaker was, that the gentleman from Missouri [Mr. DYER] was going to object; but if he does not object I reserve the right to object, because I believe that certain corporations or individuals that are given the right to construct bridges to-day have been given the right to construct some bridges previously. Can the gentleman from Illinois give me any assurance as to that?

Mr. DENISON. Mr. Speaker, I never make a statement on the floor of the House unless I know absolutely that I am right. I do not think there are any of that kind here, but I would not like to say so positively.

Mr. LAGUARDIA. The gentleman will recall that the attention of the House was called to the fact by the gentleman from Missouri [Mr. COCHRAN] that one or two individuals or corporations have obtained several permits to build bridges, and were in the business of obtaining permits from Congress and then assigning them. I do not want to do that.

Mr. DENISON. I have taken out two of that kind from the list.

Mr. GARNER of Texas. The company that is getting a permit here, I understand, has built two bridges, one in Texas and one in Alabama.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois, that certain bridge bills may be considered as engrossed and read a third time and passed?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, does the request include Calendar No. 381, the bill (H. R. 9830) granting permission to build a bridge across the Potomac River to the Great Falls Bridge Co.? If it does, I will ask the gentleman to omit that one.

Mr. DENISON. It does.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE RIO GRANDE AT ZAPATA, TEX.

The next business on the Consent Calendar was the bill (H. R. 10144) authorizing the B & P Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande River at or near Zapata, Tex.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in order to facilitate international commerce, improve the postal service, and provide for military and other purposes, the B & P Bridge Co., its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Rio Grande River, so far as the United States has jurisdiction over the waters of such river, at a point suitable to the interests of navigation, at or near Zapata, Tex., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, subject to the conditions and limitations contained in this act, and subject to the approval of the proper authorities in Mexico.

SEC. 2. There is hereby conferred upon the B & P Bridge Co., its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property in the State of Texas needed for the location, construction, operation, and maintenance of such bridge and its approaches, as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State of Texas, upon making just compensation therefor to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said B & P Bridge Co., its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge in accordance with any laws of Texas applicable thereto, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred in this act is hereby granted to the B & P Bridge Co., its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 5. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS MISSOURI RIVER AT PLATTSMOUTH, NEBR.

The next business on the Consent Calendar was the bill (H. R. 10373) authorizing the Plattsmouth Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Plattsmouth, Nebr.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, the Plattsmouth Bridge Co., its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Missouri River, at a point suitable to the interests of navigation, at or near Plattsmouth, Nebr., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the Plattsmouth Bridge Co., its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for

bridge purposes in the State in which such real estate or other propety is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said Plattsmouth Bridge Co., its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Nebraska, the State of Iowa, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues, or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property; and (3) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. The Plattsmouth Bridge Co., its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the highway departments of the States of Nebraska and Iowa a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States, shall at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Plattsmouth Bridge Co., its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the Plattsmouth Bridge Co., its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

With a committee amendment, as follows:

Page 3, line 17, after the word "actual," insert the words "cost of acquiring such interests in real property; (3) actual financing and promotion costs."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE MISSOURI RIVER AT RULO, NEBR.

The next business on the Consent Calendar was the bill (H. R. 10424) authorizing John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, all of Falls City, Nebr., their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Rulo, Nebr.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. DYER. Mr. Speaker, I would like to ask the gentleman a question. Is there any limitation on the amount they can charge and as to the period of time?

Mr. DENISON. This bill is in the form that has been approved by the two committees. The regulation of tolls is under the supervision of the Federal Government. If the company building this bridge charges tolls that are unfair, anyone can make complaint, and the Secretary of War and the Chief of Engineers can take action. The bridges are all to be regulated by the Federal Government.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, his or their heirs, legal representatives, and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Missouri River, at a point suitable to the interests of navigation, at or near Rulo, Nebr., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. That there is hereby conferred upon John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, his or their heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. That the said John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, their heirs, legal representatives, and assigns, are hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. That after the completion of such bridge, as determined by the Secretary of War, either the State of Nebraska, the State of Missouri, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. That if such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining and operating the same and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. That the said John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, their heirs, legal representatives, and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the highway departments of the States of Nebraska and Missouri a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs as filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, their heirs, legal representatives, and assigns, shall make available all of the records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to John C. Mullen, T. L. Davies, John F. Hutchings, and Virgil Falloon, their heirs, legal representatives, and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Amend the title so as to read: "A bill authorizing John C. Mullen, T. L. Davies, John H. Hutchings, and Virgil Falloon, all of Falls City, Nebr., their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Rulo, Nebr."

A motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE MENOMINEE RIVER AT MARINETTE, WIS.

The next business on the Consent Calendar was the bill (S. 2902) granting the consent of Congress to the States of Wisconsin and Michigan to construct, maintain, and operate a free highway bridge across the Menominee River at Marinette, Wis.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the State of Wisconsin and the State of Michigan to construct, maintain, and operate a free highway bridge and approaches thereto across the Menominee River, at a point suitable to the interests of navigation at or near Marinette, Wis., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. There is hereby conferred upon the State of Wisconsin and the State of Michigan all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendment, as follows:

After the word "That" on line 3, strike out "the consent of Congress is hereby granted to" and insert "in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes"; and on line 6, after the word "Michigan," insert "be, and are hereby, authorized"; and on line 9, after the word "River" insert "at a point suitable to the interests of navigation."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the third reading of the bill.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE ATCHAFALAYA RIVER

The next business on the Consent Calendar was the bill (H. R. 7927) granting the consent of Congress to the Louisiana Highway Commission of the State of Louisiana to construct, maintain, and operate a bridge across the Atchafalaya River at Melville, La.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE CALUMET RIVER

The next business on the Consent Calendar was the bill (H. R. 8897) granting the consent of Congress to the city of Chicago to construct a bridge across the Calumet River at or near One hundred and thirtieth Street in the city of Chicago, County of Cook, State of Illinois.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

FOOTBRIDGE ACROSS THE FOX RIVER

The next business on the Consent Calendar was the bill (H. R. 9350) granting the consent of Congress to Frank E. Merrill, carrying on business under the name and style of Frank E. Merrill & Co.'s Algonquin Shores Realty Trust, to construct, maintain, and operate a footbridge across the Fox River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE FOX RIVER

The next business on the Consent Calendar was the bill (H. R. 9361) granting the consent of Congress to the city of St. Charles, State of Illinois, to widen a bridge across the Fox River within the city of St. Charles, State of Illinois.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE ST. FRANCIS RIVER

The next business on the Consent Calendar was the bill (H. R. 9365) granting the consent of Congress to the Arkansas Highway Commission to construct, maintain, and operate a free highway bridge across the St. Francis River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE MONONGAHELA RIVER

The next business on the Consent Calendar was the bill (H. R. 9761) to extend the time for completing the construction of a bridge across the Monongahela River at or near Pittsburgh.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE MISSOURI RIVER

The next business on the Consent Calendar was the bill (H. R. 9773) authorizing the Manufacturers' Electric Terminal Railway, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River, at or near the mouth of the Big Blue River, in Jackson County, Mo., where the same empties into the Missouri River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE WABASH RIVER

The next business on the Consent Calendar was the bill (H. R. 9946) to extend the times for commencing and completing the construction of a bridge across the Wabash River at Mount Carmel, Ill.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, was the original grant given to the same parties who are now getting the extension?

Mr. DENISON. Yes; the State highway department.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE MONONGAHELA RIVER

The next business on the Consent Calendar was the bill (H. R. 10025) to extend the time for completing the construction of a bridge across the Monongahela River at or near McKeesport, Pa.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

BRIDGE ACROSS THE MISSISSIPPI RIVER

The next business on the Consent Calendar was the bill (H. R. 10026) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Savanna, Ill.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. DENISON. Mr. Speaker, I move to substitute the Senate bill.

The SPEAKER pro tempore. Without objection, the Senate bill will be substituted.

There was no objection.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE SABINE RIVER

The next business on the Consent Calendar was the bill (H. R. 10143) authorizing the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Merryville, La., on the Merryville-Newton highway.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

Mr. DENISON. Mr. Speaker, I ask that the other bridge bills be called in connection with these bills and disposed of now.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

BRIDGE ACROSS THE OHIO RIVER

The next business on the Consent Calendar was the bill (H. R. 472) granting the consent of Congress to Dwight P. Robinson & Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE OHIO RIVER

The next business on the Consent Calendar was the bill (H. R. 437) granting the consent of Congress to the Maysville Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. DENISON. Mr. Speaker, there was an objection to this bill on last consent day, but that objection has been removed. I wish to offer a substitute for the committee amendment in order to make the bill conform to the forms that have been adopted. I have sent the amendment to the Clerk's desk.

The SPEAKER pro tempore. Without objection, the substitute amendment for the committee amendment will be agreed to.

There was no objection.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGES ACROSS THE OHIO RIVER

Mr. VINSON of Kentucky. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on H. R. 472 and H. R. 437, including in the remarks excerpts from agreements entered into between certain parties.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. VINSON of Kentucky. Mr. Speaker, H. R. 472 is a bill introduced by myself, and H. R. 437, immediately following it on the calendar, is a bill introduced by the gentleman from Ohio [Mr. KEARNS]. As introduced, it sought to secure permit for the construction of a bridge across the Ohio River between Maysville, Ky., and Aberdeen, Ohio.

To-day the gentleman from Illinois [Mr. DENISON] offered a complete substitute for H. R. 437, which authorized the construction of a combination railroad and vehicular bridge (an "and/or" bill), together with a recapture clause in the event it should be desired to secure for the benefit of the public the right to use the vehicular portion, should a combination bridge or only a vehicular bridge be constructed. This substitute provides that a railroad bridge may be constructed, or a vehicular bridge may be constructed, or that both might be so constructed; and, as I stated, it carries the right in the public to secure by condemnation the vehicular bridge, or the portion of the combined bridge, as the case might be, that may be constructed.

I make this statement because of the fact that on February 6 I called attention to the nature of the bill H. R. 437, originally introduced and as reported from the committee, both in respect of the combination features and the recapture clause. After the debate upon the bills at that time, upon my suggestion, negotiations were entered into between the gentlemen sponsoring the two bills looking toward an adjustment of the matter, to the end that the people would see a bridge constructed, which all admitted would be of wondrous benefit to that entire section. The written contract, executed by all involved, was signed February 28, 1928, under which agreement the opposition to the passage of both bills has disappeared and to-day we find Mr. WILSON, one of the sponsors of the Maysville Bridge Co. bill (H. R. 437), for the first time agreeing that the two bills should pass. This has always been the attitude of those sponsoring H. R. 472. I felt that it would be well to preserve and keep clear the record relative to this legislation, and so I insert herewith certain paragraphs of the contract above referred to, which show succinctly the program agreed upon:

Witnesseth: That—

Whereas there is now pending in Congress a bill authorizing party of the first part to construct a bridge over the Ohio River from Maysville, Ky., to Aberdeen, Ohio, and also a bill authorizing party of the second part to construct a bridge over the Ohio River between the same points; and

Whereas the said parties of the third part are interested with the party of the second part in its proposed construction of said bridge; and

Whereas all parties hereto feel that it is of the highest importance to this community that facilities for interstate commerce be provided between the above points, without unnecessary delay and that such consummation may be endangered by the continuation of their independent efforts, as neither bill can pass without the passage of the other:

Now, therefore, it is hereby agreed between all parties hereto as follows:

"First. That all parties hereto will use their best efforts to secure the prompt enactment into law of both bills now pending. Promptly upon the approval of either or both of said bills by the President of the United States, the parties in whose favor such legislation may be drawn hereby agree to immediately assign such permits in blank and to deliver same to the Central Trust Co. of Cincinnati, Ohio, in escrow, accompanied with verified copies of this agreement to be held by said depositary for delivery to the party of the first part or to the parties of the second and third part, jointly, according to the terms of this contract and upon compliance with the conditions thereof, and such depositary is hereby authorized to insert the name of the purchaser or purchasers in any blank in the assignment, where necessary or proper.

"The party of the first part agrees that within six months after the passage of the bill by Congress and the approval of the plans by the Secretary of War which approval shall be promptly obtained authorizing it to construct said bridge, it will make all necessary financial arrangements insuring the construction of said combination bridge, approaches and viaduct in accordance with plans prepared for it by James A. Stewart Co., copies of which are herewith furnished to parties of second and third part, and which plans are made a part hereof as though incorporated herein, or attached hereto, or in conformity with plans of other reputable engineer, which plans shall provide for the construction of substantially the same proportion of the completed combined bridge, the completed approaches, and the completed viaduct, and further will begin the actual construction of said bridge within said period of six months.

"It is expressly agreed that the first party will construct as a part of such plan the vehicular viaduct between Bridge Street and Forest Avenue, Maysville, Ky., as provided in such plans. The connection between Forest Avenue and Bridge Street is to be provided and continued without cost to the city of Maysville and subject to travel free of toll.

"The ability of said first party to construct is to be evidenced within the above time by a contract with financially responsible parties for the financing thereof, which contract shall contain a clause that the parties signatory thereto guarantee to W. W. Ball, jr., and his associates that said contract will be fully performed within three years of the date thereof, subject to delays arising from acts of God, strikes, or the public enemy, or in default thereof the two bridge permits will be assigned, unused and unimpaired, to said second and third parties. As a guarantee for the faithful performance of such clause the undersigned stockholders of the Maysville Bridge Co. sign their names hereto as guarantors. A signed duplicate of said contract is to be delivered to said W. W. Ball, jr.

"On performance of these conditions precedent, the depositary of the escrow is to deliver to first party such bridge permits as are deposited with it."

From this it can be seen the Maysville Bridge Co. will have the first six-months period after the passage of the bill by Congress and the approval of the plans by the Secretary of War to make the necessary financial arrangements to insure the construction of the combination bridge, approaches, and viaduct referred to in the contract and are to begin the actual construction of said bridge within the six months' period aforesaid. In the event that the combination bridge is financed, the construction thereof is further guaranteed by the agreement to construct it within three years. The stockholders of the Maysville Bridge Co. sign their names as guarantors of this provision.

The vehicular viaduct between Bridge Street and Forest Avenue, Maysville, Ky., provided in the plans of this company, is really a portion of the approaches of the bridge under this plan, but it is agreed that this viaduct may be used as a street connection without cost to the city of Maysville and subject to such public use free of toll. This is a very valuable right which will come to the citizens of this locality if this plan is put through to consummation.

I quote further from the contract:

In the event that party of the first part is unable to comply with the conditions precedent, above stated, to secure the delivery of the escrow, the depositary is to deliver the permit or permits deposited with it, to said second and third parties, jointly, for their sole ownership and use in the construction of a bridge, as by the permits authorized.

The contract is executed in triplicate. The Maysville Bridge Co. signed it through Horace J. Cochran, president, and O. W. Bennett, secretary. The stockholders of the Maysville Bridge Co. signed it in the persons of Horace J. Cochran, A. J. Cochran, O. W. Bennett, J. M. Wilson, T. A. Duke, W. B. Campbell. The Dwight P. Robinson & Co. (Inc.), executed it through J. K. Ostrander; and W. W. Ball, jr., signed in his own proper person.

So, if the Maysville Bridge Co. fail to construct the bridge, approaches, and viaduct described in the contract aforesaid within six months, then the Dwight P. Robinson Co. and W. W. Ball, jr., are to become the sole owners of the permits. Thus, it appears to us that it is a happy solution to the problem. The policy of Congress in respect of bridge permits will have been followed; the full and free opportunity to construct a combination bridge is afforded; and failing to see its realization, the vehicular proposal will have its opportunity. All in all, every opportunity is offered for the construction of a bridge which will serve a large section of Kentucky and Ohio.

BRIDGE ACROSS CHESAPEAKE BAY

The next business on the Consent Calendar was the bill (S. 1498) to extend the time for the construction of a bridge across the Chesapeake Bay, and to fix the location of said bridge.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE ILLINOIS RIVER NEAR PEORIA, ILL.

The next business on the Consent Calendar was the bill (H. R. 10566) granting the consent of Congress to the city of Peoria, Peoria County, Ill., to construct, maintain, and operate a free highway bridge across the Illinois River at or near Peoria, Ill.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE MISSOURI RIVER NEAR DECATUR, NEBR.

The next business on the Consent Calendar was the bill (H. R. 10658) authorizing the Interstate Bridge Co., its successors and assigns (or his or their heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across the Missouri River at or near Decatur, Nebr.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE MONONGAHELA RIVER NEAR POINT MARION, PA.

The next business on the Consent Calendar was the bill (H. R. 10707) authorizing the Point Marion Community Club, of Point Marion, Pa., its successors and assigns, to construct, maintain, and operate a bridge across the Monongahela River at or near Point Marion, Pa.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE MIAMI RIVER

The next business on the Consent Calendar was the bill (H. R. 10756) authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Miami River, between Lawrenceburg, Dearborn County, Ind., and a point in Hamilton County, Ohio, near Columbia Park, Hamilton County, Ohio.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE MISSOURI RIVER NEAR ATCHISON, KANS.

The next business on the Consent Calendar was the bill (H. R. 10806) authorizing the city of Atchison, Kans., and the county of Buchanan, Mo., or either of them, to construct, maintain, and operate a toll bridge across the Missouri River at or near Atchison, Kans.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE OHIO RIVER NEAR WELLSBURG, W. VA.

Mr. DENISON. Mr. Speaker, Calendar No. 361, bill S. 797, was passed over because I knew there would be objection. I would like for the bill to be called up and for the RECORD to show that there is objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the title of the bill (S. 797), as follows:

An act granting the consent of Congress to the J. K. Mahone Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River, at or near Wellsburg, W. Va.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MURPHY. Mr. Speaker, I object.

BRIDGE ACROSS THE WABASH RIVER NEAR VINCENNES, IND.

The next business on the Consent Calendar was the bill (H. R. 9953) authorizing the State of Indiana, acting by and through the State highway commission to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. SCHAFER. Mr. Speaker, I reserve the right to object.

Mr. LUCE. Mr. Speaker, there is before the Committee on the Library a proposal for a large appropriation to aid in a memorial of George Rogers Clark at Vincennes, Ind. A similar bill has passed the Senate and has come to the House.

This bill contemplated that a bridge at Vincennes should be ornamented, made monumental in its nature, as part of the celebration. This is the first intimation that has come to me that there is any proposal to have a toll bridge there. I suspect that the Committee on the Library would hardly be inclined to look with favor upon a Government appropriation to commemorate George Rogers Clark which would adorn and decorate at public expense a toll bridge. Can the gentleman explain?

Mr. DENISON. Mr. Speaker, I had not heard there was any such proposal. Of course, the fact that there was such a bill in the Senate had not been called to our attention. This bill came to our committee and we had to act upon it. No objection was presented. If the facts are as stated by the chairman of the Committee on the Library, I suggest the gentleman object to this bill, so that it will be passed temporarily until we can know whether the House is going to consider the other bill or not.

Mr. LUCE. Perhaps the gentleman at your left will explain.

Mr. GREENWOOD. The bill to build the bridge that the gentleman calls attention to is the subject of negotiations and cooperation between the Highway Commission of Illinois and that of Indiana, and so far the State of Illinois has seen fit not to join the State of Indiana. This will permit the highway commission to build the bridge and reimburse itself so far as one-half is concerned in case Illinois does not join with Indiana.

Mr. LUCE. I trust I have served some useful purpose by calling attention to the remarkable suggestion, unprecedented as far as I know, that the appropriation by the Federal Government should be used to adorn and beautify with sculpture and fine stone work a bridge upon which toll is to be charged.

Mr. GREENWOOD. Let me explain, there is no such provision in the bill. The gentleman will notice that the money was to be raised by popular subscription on behalf of the people of the community and nothing asked from the Federal Government to adorn the bridge.

Mr. LUCE. It is a part of the project of commemoration, and I think I was justified in bringing out the fact that subscription is to be asked from the public for adorning a toll bridge.

Mr. HUDSON. Mr. Speaker, I object.

BRIDGE ACROSS TAMPA BAY, FLA.

The next business on the Consent Calendar was the bill (H. R. 9663) authorizing Herman Simmonds, jr., his successors and assigns (or his or their heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across Tampa Bay from Pinellas Point, Pinellas County, to Piney Point, Manatee County, Fla.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE MISSISSIPPI RIVER AT ST. LOUIS COUNTY, MO.

The next business on the Consent Calendar was the bill (H. R. 10145) authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Carondelet, St. Louis County, Mo.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. DENISON. Mr. Speaker, I desire to state in relation to this bill, and also Calendar No. 376, that the gentleman from Missouri [Mr. COCHRAN] wants some time to make some inves-

tigation, and at his suggestion I will ask unanimous consent that these two bills be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

BRIDGE ACROSS THE POTOMAC RIVER AT GREAT FALLS

The next business on the Consent Calendar was the bill (H. R. 9830) authorizing the Great Falls Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Potomac River at or near Great Falls.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. SCHAFER. Reserving the right to object, is this going to be a toll bridge like the toll road we have going to Great Falls where you pay 25 cents to go over it and $5 to $10 to be pulled out?

Mr. MOORE of Virginia. When this bridge is built there will be a hard road from the bridge to the main highway, and it is expected the highway commission will take care of the latter.

Mr. BLANTON. Will the gentleman yield?

Mr. MOORE of Virginia. I yield.

Mr. BLANTON. Is it not a fact that we have not yet determined what is going to be done with Great Falls, or whether the Government will take it over, and under the circumstances I do not think the gentleman ought to press his bill.

Mr. MOORE of Virginia. It has been in a state of indetermination for more than half a century. Let me make this point. There is an amendment offered by the committee declaring that the bridge, if constructed, shall not interfere with any water-power plan.

Mr. BLANTON. There are a half dozen propositions before us, or have been before the District Committee, and it is in an inchoate state now as to what is to be done with Great Falls. We ought not to have a bridge built there until the Government decides what it is going to do.

Mr. MOORE of Virginia. It will perhaps be a hundred years before there is any development at Great Falls, if ever.

Mr. BLANTON. I hope something proper soon will be done, not to build a $75,000,000 power plant for the Power Trust, but to preserve Great Falls for the Government and the people. I object for the present.

BRIDGE ACROSS AN ARM OF LAKE MEMPHREMAGOG

The next business on the Consent Calendar was the bill (S. 2698) granting the consent of Congress to the State of Vermont to construct, maintain, and operate a free highway bridge across an arm of Lake Memphremagog at or near Newport, Vt.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CONSTRUCTION AT MILITARY POSTS, AND FOR OTHER PURPOSES

Mr. JAMES. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 11134.

Mr. QUIN. Mr. Speaker, will the gentleman withhold his motion for a moment?

Mr. JAMES. Yes; I will withhold it.

CERTAIN LANDS IN LOUISIANA AND MISSISSIPPI

Mr. QUIN. Mr. Speaker, I ask unanimous consent to take up House bill 6993.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to take up No. 336 on the calendar, H. R. 6993. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 6993) authorizing the Secretary of the Interior to sell and patent certain lands in Louisiana and Mississippi.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I wish to ask the gentleman from Mississippi what is the hurry in selling this land? Will the gentleman tell us?

Mr. QUIN. There is no hurry about it at all. The only thing about it is that we can not get a title without this legislation.

Mr. LAGUARDIA. Is this land that they own?

Mr. QUIN. Yes.

Mr. LAGUARDIA. Is the right to be given to the owners of the upland or adjoining land?

Mr. QUIN. Anybody can buy it. This is the Interior Department's bill. They amended my bill and put in it a regular rule.

Mr. SCHAFER. Reserving the right to object, Mr. Speaker, is the purchaser already known who is going to buy this land?

Mr. QUIN. He has the first right to buy the land.

Mr. SCHAFER. It is a good bill, is it?

Mr. QUIN. Oh, yes.

The SPEAKER. Is there objection to the consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That upon payment to the United States of $1.25 per acre, the Secretary of the Interior be, and is hereby, authorized to issue patents to the owners in good faith of sections 6, 13, 14, 15, and 16 of township 5 north, range 4 west, and sections 4 and 5 of township 4 north, range 4 west, Washington meridian, in the State of Mississippi, and sections 11, 12, 19, to 37, both inclusive, and sections 65, 66, 67, and 68 of township 5 north, range 9 east, and sections 1, 2, 3, 4, 37, and 45, of township 4 north, range 9 east, Louisiana meridian in the State of Louisiana for those lands which he has found or shall hereafter find are public lands of the United States that have accreted thereto: *Provided*, That the Secretary of the Interior be, and is hereby, authorized to cause such accreted area to be divided into such tracts as constitute an equitable division of such accretions among the owners of the lands described herein: *And provided further*, That payment be made and application filed hereunder in the district land office within six months after the final division of the accreted area as provided for herein.

With the following committee amendment:

Strike out all after the enacting clause and insert the following:

"That the Secretary of the Interior, in his judgment and discretion, is hereby authorized to sell, in the manner hereinafter provided, any of those lands which he has found or shall hereafter find are public lands of the United States that have accreted to section 14 of township 5 north, range 4 west, Washington meridian, in the State of Mississippi, and to sections 65, 66, 67, and 68, of township 5 north, range 9 east, Louisiana meridian, in the State of Louisiana, and which are not lawfully appropriated by a qualified settler or entryman or other adverse claimant claiming under the public land laws.

"SEC. 2. That the owners of said above-described lots or sections shall have a preferred right to file in the office of the register of the United States land office of the district in which the lands are situated an application to purchase the public lands thus formed by accretion at any time within 90 days from the filing of plats of such accreted area in the United States land office. Every such application must be accompanied with satisfactory proof that the applicant is entitled to such preference right by virtue of the ownership of said above-described lots or sections and that the lands which he applies to purchase are not in the legal possession of any adverse claimant.

"SEC. 3. That upon the filing of any application to purchase any lands subject to the operation of this act, together with the required proof, the Secretary of the Interior shall cause the lands described in said application to be appraised, including the timber thereon, and the stumpage value of any timber cut or removed by the applicant or his predecessors in interest. Such appraisement shall be exclusive of any increased value resulting from the development or improvement of the land for agricultural purposes by the applicant or his predecessors in interest.

"SEC. 4. That an applicant who applies to purchase land under the provisions of this act, in order to be entitled to receive a patent must, within 30 days from receipt of notice of appraisal by the Secretary of the Interior, pay to the register of the United States land office of the district in which the lands are situated the appraisal value of the lands, and thereupon patent shall issue to said applicant for such lands as the Secretary of the Interior shall determine that such applicant is entitled to purchase under this act. The proceeds derived by the Government from the sale of lands hereunder shall be covered into the United States Treasury and applied as provided by law for the disposal of the proceeds from the sale of public lands.

"SEC. 5. If, at the date of the approval of this act, any of the lots or sections or parts of lots or sections above described are covered by a pending entry on which satisfactory final proof in support thereof has not been submitted, patent based on any application to purchase land subject to the provisions of this act shall be withheld to await the completion of the pending entry. If, upon completion of the pending entry it shall then be found that applicant has shown due compliance with the law under the said pending unperfected entry and his application to purchase is otherwise satisfactory patent on said application to purchase shall then be issued.

"SEC. 6. That the Secretary of the Interior is hereby authorized to prescribe all necessary rules and regulations for administering the provisions of this act and determining conflicting claims arising hereunder."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

AMENDMENT TO THE CONSTITUTION

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BANKHEAD. Gentlemen of the House, to-morrow, under the arrangement already made, we will begin the consideration of the Norris-White amendment to the Constitution. When the matter is reached in Committee of the Whole I propose to offer an amendment to the pending resolution making the tenure of the Members of the House four years instead of two years, as at the present time, and for the information of the Members of the House, and in order that it may go into the RECORD, I ask that the Clerk read the text of the proposed resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

SEC. 2. The House of Representatives shall be composed of Members chosen by the people of the several States for four years. Immediately after they shall be assembled in consequence of the first election after the ratification of this article, they shall be divided as equally as may be into two classes. The seats of the Members of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year.

CONSTRUCTION AT MILITARY POSTS, AND FOR OTHER PURPOSES

Mr. JAMES. Mr. Speaker, I now move to suspend the rules and pass the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass the bill H. R. 11134.

The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated not to exceed $12,964,950, to be expended for the construction and installation at military posts of such buildings and utilities and appurtenances thereto as may be necessary, as follows: Albrook Field, Panama, noncommissioned officers' quarters, $413,000, officers' quarters, $378,000; Fort Kamehameha, Hawaii, barracks, $35,000; San Juan, P. R., barracks, $10,000, officers' quarters, $140,000; Schofield Barracks, Hawaii, barracks, $830,000; Wheeler Field, Hawaii, barracks, $504,000, noncommissioned officers' quarters, $300,000, officers' quarters, $666,000. Alcatraz Island, Calif., addition to utilities building, $15,000; Fort Benning, Ga., noncommissioned officers' quarters, $130,000, officers' quarters, $370,000; Fort Bliss, Tex., noncommissioned officers' quarters, $150,000; Fort Bragg, N. C., barracks, $186,000, noncommissioned officers' quarters, $102,000, officers' quarters, $212,000; Chanute Field, Ill., barracks, $150,000, officers' quarters, $70,000; Camp Devens, Mass., noncommissioned officers' quarters, $100,000, officers' quarters, $150,000; Fort Humphreys, Va., noncommissioned officers' quarters, $180,000; Fort Jay, N. Y., barracks, $300,000; Langley Field, Va., noncommissioned officers' quarters, $300,000; Letterman General Hospital, California, nurses' quarters, $70,000, hospital, $50,000; Fort Lewis, Wash., barracks, $350,000, noncommissioned officers' quarters, $68,000, officers' quarters, $50,000, nurses' quarters, $32,000; March Field, Calif., noncommissioned officers' quarters, $150,000; Camp McClellan, Ala., officers' quarters, $225,000; Fort McPherson, Ga., hospital, $150,000; Camp Meade, Md., noncommissioned officers' quarters, $150,000, officers' quarters, $250,000, hospital, $150,000; Mitchel Field, N. Y., barracks, $280,000, noncommissioned officers' quarters, $120,000; Fort Monmouth, N. J., officers' quarters, $350,000; Fort Monroe, Va., officers' quarters, $268,000; Fort Riley, Kans., noncommissioned officers' quarters, $125,000, officers' quarters, $125,000; Fort Sam Houston, Tex., barracks, $870,000, post signal communication center building, $30,000; New Primary Flying School, San Antonio, Tex., barracks, $180,950, noncommissioned officers' quarters, $540,000, officers' quarters, $1,250,000; Presidio of San Francisco, Calif., chapel, $40,000; Scott Field, Ill., noncommissioned officers' quarters, $150,000; Selfridge Field, Mich., noncommissioned officers' quarters, $100,000, officers' quarters, $300,000; Fort Slocum, N. Y., barracks, $246,000, noncommissioned officers' quarters, $54,000; Fort Wadsworth, N. Y., barracks, $250,000; Walter Reed General Hospital, Washington, D. C., nurses' quarters, $300,000: *Provided,* That the north center of the building shall be approximately 600 feet east of the north and south line which forms the western boundary of the reservation and approximately 260 feet north of the line which forms the south boundary of the reservation.

The SPEAKER. Is a second demanded?

Mr. GARRETT of Tennessee. Mr. Speaker, I demand a second.

Mr. BLANTON. Is the gentleman from Tennessee in favor of the bill?

Mr. GARRETT of Tennessee. Yes.

Mr. BLANTON. I am against the bill.

Mr. GARRETT of Tennessee. I yield to the gentleman.

Mr. BLANTON. Mr. Speaker, I demand a second.

Mr. JAMES. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The gentleman from Michigan is recognized for 20 minutes and the gentleman from Texas is recognized for 20 minutes.

Mr. JAMES. Mr. Speaker, I yield five minutes to the gentleman from South Carolina [Mr. MCSWAIN].

Mr. MCSWAIN. Mr. Speaker and gentlemen of the House, there has been for several years a very pronounced agitation in favor of procuring better housing accommodations for the Army. Several of the magazines of the country have carried articles describing the conditions that exist. I have not agreed entirely with the adjectives that many of these magazines employed. It was quite common to use the adjective "disgraceful." I do not agree with the use of such harsh language, because as a general proposition nothing can be disgraceful when an individual or a nation is doing the best it can.

Mr. O'CONNELL. Will the gentleman yield?

Mr. MCSWAIN. Yes.

Mr. O'CONNELL. The gentleman does not take everything a magazine says to be true?

Mr. MCSWAIN. That is the reason I did not agree with them. But, as a matter of fact, due to the somewhat considerable expansion of the Army after the reorganization of 1920, it has been housed not in permanent barracks and not in permanent quarters, but in the temporary structures of war-time construction. These, of course, have begun to decay. In many cases they are, as a matter of fact, very, very uncomfortable; and it is only a matter of time before they would become absolutely uninhabitable. However, in passing, I wish to commend the spirit that has prevailed among the personnel of the Army in many of the posts where these temporary structures were their enforced habitations. I visited Fort Bragg, N. C., and I found they used exclusively the temporary war-time structures for the housing of the men and of the officers.

Mr. ABERNETHY. Will the gentleman yield?

Mr. MCSWAIN. Certainly.

Mr. ABERNETHY. Is Fort Bragg taken care of in this bill?

Mr. MCSWAIN. It has already been partially taken care of. There is a provision here for additional barracks at Fort Bragg. But, of course, that will furnish only partial relief. I am going to explain that. This is but a beginning, a necessary beginning, and in my humble judgment the minimum of a beginning for the final housing program of the Army.

Mr. ABERNETHY. I understand it is the present temper and idea of the Military Affairs Committee, under the leadership of Mr. JAMES, to be in favor of proper accommodations for these posts?

Mr. MCSWAIN. Most assuredly. I was going to mention the fine spirit I found prevailing at Fort Bragg, due, I think, to the fine example set by its commanding officer, Brigadier General Bowley, inspiring those under his immediate command and prevailing down through the rank and file of the entire organizations there stationed to put up with and to make the very best of the conditions that were inevitable. But those structures and the structures throughout the country will in a very short time become uninhabitable.

Mr. O'CONNOR of New York. Will the gentleman yield?

Mr. MCSWAIN. Yes.

Mr. O'CONNOR of New York. With reference to Fort Bragg, I had an opportunity to see it in November. It was almost impossible to conceive of human beings living in such quarters.

Mr. MCSWAIN. Well, I have seen hundreds and thousands of human beings live and work every day in the year under conditions not very much worse, if any worse, than these. So I say personally I do not agree with the proposition that it is disgraceful, because we have done the best we could. But we have now come to the time when we can do better and if, having come to the time when we can do better, we do not do it, then I say it will become "disgraceful." So this represents, Mr. Speaker, ladies, and gentlemen of the House, what is properly

and wisely described as the minimum of the housing program for the Army of the country. It is a minimum of a minimum, in my humble judgment, and from the statements I have already made it must appear that I am in no way a rabid or extreme person in matters of this kind. [Applause.]

The SPEAKER. The time of the gentleman from South Carolina has expired.

Mr. BLANTON. Mr. Speaker, I am just as good a friend of the Army as any man in this House. I have just as many strong, personal friends in the Army as any other man in this House. Many of them are my personal friends, for whom I have the highest regard, and with whom I have the closest personal contact. I want to do everything for them that should be done, but the trouble of it is that we can not depend altogether on our Committee on Military Affairs on bills that the Army brings to them, and we can not depend altogether on our Committee on Naval Affairs concerning naval propositions that the naval administration wants put into law.

Mr. O'CONNELL. Will the gentleman yield?

Mr. BLANTON. I yield to my friend.

Mr. O'CONNELL. Where, then, can we get the real information?

Mr. BLANTON. Well, we are just simply up against it, if some of the balance of the Members do not look into these bills. You can have a Member who is not for a big Navy; you can take one who is for the smallest Navy and put him on the Naval Affairs Committee and surround him with that naval influence and let him take a few trips on battleships and let him travel around the world with naval officers, and the first thing you know he is for as big a Navy as FRED BRITTEN. That is the way it is with every man we create as Secretary of the Navy and every man whom we create as Secretary of War. He mighty soon is surcharged with that Army atmosphere and with the naval atmosphere until he thinks as they think, and he is willing to act as they want him to act.

Mr. McSWAIN. Will the gentleman yield?

Mr. BLANTON. I am not casting any reflection on my distinguished friend, but he will admit that he had a bill in here that he reported, with two section in it, and when I called his attention to the bad effects of the first section he said, "My goodness, I did not know that was in there." He helped us to kill it, but he had reported it for the Army officers.

Mr. McSWAIN. Will the gentleman yield?

Mr. BLANTON. Certainly.

Mr. McSWAIN. The gentleman has excoriated the Naval Affairs Committee. I have nothing to do with that, but I wonder if the gentleman would not say that the Military Affairs Committee, at least with regard to the War Department, is a little less guilty?

Mr. BLANTON. Well, considering all the bills I have closely inspected which they have reported, I am afraid I can not do it. [Laughter.]

Mr. McSWAIN. If you knew us as we know ourselves, you would certainly excuse us. [Laughter.]

Mr. BLANTON. When I first came here our distinguished friend from Georgia, Mr. CARL VINSON, had very conservative ideas about the Navy. He has been so long upon the Naval Affairs Committee until I can not follow him on Navy matters in the House, as I did formerly.

Mr. O'CONNELL. He saw the light.

Mr. BLANTON. It has not been long since the War Department came in here with its special bill and wanted us to give them permission to sell all of the surplus war property and to put the money into a revolving fund—to take it away from the control of Congress and give it to the Army and let the Army spend the $20,000,000 for buildings and construction. We did this. I fought that bill and it was passed over my protest. I did everything I could to kill it, and I called attention then to the fact that they would sell the property and would take the money and would spend it, and I also called attention to the fact it would not be two years before they would be back here for more money from the Congress and for more money than they would have had if we had not given them the proceeds from the sale of this property.

But you passed the bill, and they sold the property; and do you know how much that property involved? Twenty million dollars, they said at the time, and they have spent $21,000,000 up to this time, good hard-earned dollars of the people that came out of their pockets as tax money during the war. The property was sold in some instances for one-tenth of what it cost the people, and that $20,000,000 is gone.

Mr. WRIGHT. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. WRIGHT. The gentleman is about the most industrious Member of the House that I know.

Mr. BLANTON. I doubt that it pays to be industrious.

Mr. WRIGHT. Will the gentleman point out any item in this bill that is not meritorious?

Mr. BLANTON. I am coming to that now.

Mr. WRIGHT. And in calling attention to the item I want to know if the gentleman from Texas has any objection to the $3,000,000 approximately that his State of Texas gets under this bill?

Mr. BLANTON. That is exactly what I was coming to—the sop that is in this bill. I am as loyal a Texan as ever came from that State. I love my State. I will do anything in the world that is honorable for it. I am for its best interests, and so is my friend EUGENE BLACK.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. BLANTON. In just a moment. Yet I saw EUGENE BLACK vote against an appropriation for navigating Red River or some other stream in his section because he knew that that stream was not navigable and he knew that it would be money wasted. Now this money that they have in this bill may be needed down at Fort Sam Houston. They have in this bill $870,000 for barracks at Fort Sam Houston, and $30,000 for a post signal communication center building, and they have $180,950 for the primary flying school there, and $540,000 for officers' quarters. They have $1,250,000 in this bill for our State. Therefore, forsooth, every man from Texas ought to vote for it, is their idea.

Now, after we gave them this $20,000,000 that they ought to have spent for proper quarters and for the various things that are in this bill, they came in here not long ago with an authorization for $2,100,000 to be spent at Sawtelle, Calif., when they ought to have built that out of the $20,000,000 and saved us the necessity of making that new appropriation.

Mr. JAMES. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. JAMES. The money to be used at Sawtelle is for the soldiers' home and has nothing to do with the Army.

Mr. BLANTON. The soldiers' homes ought to have had part of the money from the sale of surplus war properties.

Mr. JAMES. The soldiers' homes have never been a part of the Army.

Mr. BLANTON. You can not disconnect the soldiers' homes from the Army or from surplus war property. They are intimately connected, and the other day we passed another bill authorizing an appropriation of $1,500,000 for a soldiers' hospital at Dayton, Ohio, that ought to have come out of the $20,000,000 sale of surplus property left over from the war.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. SCHAFER. The gentleman is not willing to have these old, disabled soldiers housed in firetraps, is he?

Mr. BLANTON. Oh, no. I am just as much in favor of protecting them as the gentleman is. These buildings have not burned yet. They have been at Dayton, Ohio, for some time and I have been through there in my car and I have seen that plant there. I have been going back and forth through there for 11 years, and they have never had an accident or a catastrophe. I want to see them have what they need, but I wanted the Army to take that $20,000,000 worth of the people's property and spend the proceeds therefrom where it ought to be spent and not fritter it away.

Mr. ARENTZ. Will the gentleman yield?

Mr. BLANTON. In just a minute, I will. After giving them the $20,000,000, and the $2,100,000 in California and the $1,500,000 at Dayton, Ohio, this bill authorizes another appropriation of $12,964,950.

Mr. LAGUARDIA. Will the gentleman yield there?

Mr. BLANTON. I promised first to yield to our friend the gentleman from Nevada, but since he does not desire it, I yield to the gentleman from New York.

Mr. LAGUARDIA. Has the gentleman been able to ascertain how much of the surplus property has actually been sold and how much they have realized from it?

Mr. BLANTON. I understood they had sold about $20,000,000 worth.

Mr. LAGUARDIA. Did they get the money for it?

Mr. BLANTON. I do not know. If they did not, it was their own fault.

Mr. LAGUARDIA. Well, they ought not to have gone into that business. They should have turned the property over to the Treasury Department, and let people who know about real estate conduct the sale of that property.

Mr. BLANTON. That is exactly the position that the gentleman from New York took, and the position that the gentleman from Texas took, and when they sold that property the proceeds ought to have been covered into the General Treasury, and

when they wanted money they should have come to Congress. Then we would know exactly what they had done with the money of the people which came from the sale of this surplus property.

Mr. McSWAIN. Let me say to the gentleman that the Committee on Military Affairs was so jealous of its authority that it insisted on the money being turned into the general fund, and this appropriation being specially authorized from time to time.

Mr. BLANTON. That is the trouble with the gentleman's committee; that is, all it did was to insist. The Army compelled them to give it to them. It has been made a special fund.

Mr. McSWAIN. It is earmarked in the book, and we have to direct how it shall be spent.

Mr. BLANTON. In my time, will the gentleman tell how much they have sold?

Mr. McSWAIN. About $9,000,000 worth.

Mr. BLANTON. Is that all?

Mr. McSWAIN. That is all that they have got the money for.

Mr. BLANTON. Have they not sold $20,000,000 worth?

Mr. McSWAIN. No. The bill gave the States and the counties and municipalities the first call on property near them for public-park purposes. Much of the appropriation was stricken out of the bill, like Fort Washington and Fort Howard, so there has been turned into the Treasury about $9,000,000 worth, and this Congress is appropriating and has appropriated $9,000,000. It has not turned it over to them to be spent, we have been too careful for that.

Mr. BLANTON. I doubt that. [Laughter.] Can the gentleman tell me what they have done with the $9,000,000?

Mr. McSWAIN. The Treasury of the United States got it.

Mr. BLANTON. But they have spent it.

Mr. McSWAIN. We have spent it; we spent some in Texas.

Mr. BLANTON. I want to ask my friend, the gentleman from Michigan, is it not a fact that since we passed that bill the Army has spent $20,000,000?

Mr. JAMES. Exactly $21,000,000.

Mr. BLANTON. Now I am getting the facts. Twenty-one million dollars for building construction?

Mr. JAMES. The act of Congress authorized the appropriation of $21,000,000 at Sam Houston and other places.

Mr. BLANTON. Oh, they always bring in Sam Houston, probably because they think it will get 18 Texas votes.

Mr. JAMES. If the gentleman will look, he will see that the first $3,000,000 went where there are no votes—to Porto Rico and the Panama Canal. We are trying to house the soldiers and protect them.

Mr. BLANTON. I am for taking care of the Army and building proper barracks and giving them proper quarters.

I am reminded that my wife was visiting the wife of a general, and the wife of the general said, "I want to show you what the Government furnishes us, and how hard-hearted your husband has been toward us." She took her into this great big house where she said she had only one servant, and said she had to take care of this house and 10 bathrooms, and the Government only furnished them one servant. My wife said, "Well, you are better off than I am. I am the wife of a Congressman and the Government does not furnish me with any bathrooms nor a house servant. We have had to pay $150 per month for a house and we have only one servant and have to pay for that." That is what is the matter with the Army officers; they are asking too much. This general's wife had 10 bathrooms when she ought not to have but 2. They do not properly spend the money, and that is one reason why I took the floor to protest against this bill. We ought to stop the departments from preparing special bills and sending them to the committees and have them introduced as department bills.

I got after my distinguished friend the other day, the chairman of the Committee on Indian Affairs. I was astonished when I found the Indian Bureau had sent a big batch of bills to him to be introduced as department measures. They had been passed around among the Members, and some of them introduced by him by request. That was proper, and I commended him for it. And others were introduced as Members' bills. Departments ought to be stopped from sending specially prepared bills to committees to be parceled out in that way.

Mr. LEAVITT. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. LEAVITT. The Department of the Interior sent the bills down in connection with its duty in caring for the welfare of the Indians. If it did not do so, it would not be doing its duty.

Mr. BLANTON. Well, they ought to be introduced as departmental measures. They ought not to be brought in as Members' bills under Members' names. The chairman ought to introduce them. If the Immigration Department sends a bill to the committee of which our friend from Washington is chairman, I guarantee that when he puts it in the basket he indicates that it is a department bill, and not anybody else's bill.

Mr. JOHNSON of Washington. All these departments have a way of recommending legislation in their reports. The gentleman can write a bill and submit it.

Mr. BLANTON. I am talking about bills written by the departments, every word of them, and sent to the committees with the request that they be passed.

Mr. JOHNSON of Washington. I want to get back to this matter concerning the quarters of the Army. I am in favor of letting a sergeant have facilities for raising a family.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield there?

Mr. BLANTON. Yes.

Mr. SCHAFER. Will the gentleman support this bill if we incorporate in it an amendment providing that none of the buildings constructed under its provisions shall provide for any more than two baths for a general? [Laughter.]

Mr. BLANTON. I will support it if you pass an amendment that not a dollar shall be expended for officers' quarters until every noncommissioned officer and every private shall be furnished with proper quarters. I want them provided for first. [Applause.]

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. FURLOW. Mr. Speaker, this Army housing bill has given rise to a very interesting discussion; but I want to say at the outset that this is not a department bill. It did not come from the department, but came from a man who is a Member of this Congress and who made a journey of 25,000 miles in order to get the material upon which to base this bill. I have reference to the gentleman from Michigan [Mr. JAMES], and to him, I know, this House desires to pay a deserved tribute. [Applause.]

The problem of providing necessary housing for the reorganized Regular Army was brought to the attention of the Committee on Military Affairs immediately after the World War. In fact, the study of this problem began while the national defense act of 1920 was being written by the Military Committee.

It was at once recognized that this housing question was closely related to the disposition of surplus War Department real estate, and the two problems have been studied together continuously since the war.

The permanent housing program for the Regular Army could not be definitely settled until a final decision had been reached as to the peace-time stations of the organizations of the Regular Army. The national defense act of 1920 imposed a mission upon the Regular Army which made the final decision in this matter of permanent stations difficult to reach. In addition to the mission of providing garrisons for our overseas possessions and a military force in the United States organized, trained, equipped, and located so that it is readily available for immediate service in case of a national emergency, the national defense act imposed upon the Regular Army the duty of training the citizen components of the Army of the United States, which, by the national defence act of 1920, were put on a very much higher plane than they had ever occupied before in the history of our country in time of peace. So far as permanent peace-time stations are concerned, the requirements of training the citizen army are in many instances in conflict with the requirements of an immediate mobilization of the Regular Army itself. It required much thought, study, and, to a certain extent, actual trial in the location of organizations to reach a decision which would be satisfactory from both points of view and at the same time would be consistent with the economical administration of the Army.

By January of 1926 these various studies were sufficiently advanced and final decisions had, in a sufficient number of cases, been reached to justify Congress in making a start with the permanent construction for the Army. In March, 1926, the initial act of Congress in this matter was passed. This provided for the sale of military reservations no longer needed, and authorized the proceeds from such sales to be deposited in the Treasury to the credit of the military post construction fund, and the means was thus provided for a start to be made on the present Army housing program.

In May of that same year, 1926, the first authorization bill for permanent construction under the present Army housing program was passed by Congress. This first bill carried a total of nearly $6,000,000. Since that time about $20,000,000 more has been authorized by Congress to carry forward this program.

On July 2, 1926, the President approved the bill authorizing the development of the Army Air Corps under the five-year

program. This five-year program modified somewhat and enlarged materially the housing requirements for the Army. Fortunately, it was passed at a time which made it possible to fit the requirements of the five-year Air Corps program into the general housing program for the Army.

The bill under consideration carries a total of approximately $13,000,000 and is intended to become available for use during the fiscal year 1930.

The preliminary study of this subject by the Military Affairs Committee, the initial acts of Congress on this subject, and the carrying forward of the program since the initial authorizations were made, have been due primarily to the interest, industry, and untiring energy of our esteemed colleague from Michigan, Hon. FRANK JAMES.

Immediately after the adjournment of Congress, last March, Mr. JAMES began preparations for an extensive investigation of housing conditions in the Army by means of a personal inspection. He indicated to the Secretary of War and to the Chief of Staff the purpose of his visit, the places he desired to visit, and the nature of the inspection which he desired to make. Instructions were sent from the War Department to the responsible commanding officers concerned, and they were directed to furnish Mr. JAMES the information which he would call for and to render him every possible assistance in his investigations and inspections.

It is a fact that he got up out of a sick bed on the last day of June to start on this tour of inspection. His travels took him to Army stations near New York City, to the Panama Canal Zone, to Hawaii, to the Army posts and stations along the Pacific coast from northern Washington to southern California, and along the Mexican border, through the Southern States and to a number of stations in the Middle West. He traveled more than 25,000 miles. More than 7,500 miles of this travel was by airplane. His trip by air began at San Francisco. He went to Takoma and Spokane, Wash., and from Spokane back to San Francisco, and thence to Los Angeles and San Diego. From San Diego he went to El Paso, to Fort Clark, and to San Antonio, Tex. From San Antonio he went to Fort Sill, Okla., and back to Houston and Galveston. From Galveston he flew about 100 miles over the Gulf. Leaving New Orleans he went to Montgomery, Ala., Columbus, Ga., Anniston, Ala., Atlanta, Ga., Spartanburg, S. C., Fort Bragg, N. C., and thence to Langley Field, and finally to Bolling Field here in Washington. Later, he flew to Wright Field at Dayton, Ohio, and to Fort Benjamin Harrison, Ind. It is a trip by air of which any man may well be proud.

In calling the attention of the House in this brief manner to what has been, and is being done in the development of the Army housing program, I not only desire to pay a richly deserved tribute to the gentleman from Michigan [Mr. JAMES], but I also wish to emphasize the confidence which the members of the Military Affairs Committee have in his thoroughness, his great knowledge of the military service and his judgment of what the requirements of national defense are. I am sure he equally has the confidence of the House and I am sure he has also the confidence of the Army. [Applause.]

I yield to the gentleman from New York [Mr. BOYLAN].

The SPEAKER. The gentleman from New York is recognized.

Mr. BOYLAN. Mr. Chairman and gentlemen of the House, the remarks of my friend from Texas [Mr. BLANTON] remind me of the story told of a man in a small town in Texas who had his feet on the brass rail and who wound up after he was knocked down by saying he had covered too much territory. The gentleman from Texas took the War Department and the Interior Department and the Navy Department to task, and the Committee on the District of Columbia, and I do not know what else.

Now, I had the good fortune to be designated by the chairman of the housing committee, Mr. JAMES, of Michigan, to visit some of the forts around New York, and in doing so I found living conditions that were really disgraceful to our Government, conditions that were almost unbelievable unless actually witnessed. If the gentleman from Texas, whom I respect and admire, was down on his ranch, where he has some good livestock, he would want adequate protection for them against the elements, so why not provide decent livable quarters for our soldiers. At Fort Jay I found, right on the threshold of the richest city in the United States, at the very doorstep of New York City, enlisted men living in quarters that were temporarily erected during the war, made of corrugated iron, where they had two or three of those large coal stoves going, and at the same time had to have four or five blankets wrapped around them at night in order to keep warm. The walls of these quarters were so flimsy that you could push your cane or your umbrella through them. These quarters, I understand, are typical of other quarters at Army posts throughout the United States.

The gentleman cites the case of an officer's family in Washington having a house with 10 baths. Down at Fort Jay we found instances where there was barely one bath in an officer's quarters. But these splendid gentlewomen, wives of the officers, uttered no complaint. They had the true Army spirit. They tried to make the best of it. But I tell you, gentlemen, it is a disgrace to the United States to have our men, both commissioned and noncommissioned, housed in these miserable hovels. I do not see how you can get a man to join the Army. I do not see how you can get men who are willing to take the course at West Point and then come out and live under the hardships such as these men have to live in. It would be better to abolish the Army, and it would be better to abolish every post in the United States rather than to have these men live in the wretched and miserable quarters they now inhabit.

Mr. O'CONNELL. Will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. O'CONNELL. They do not know what kind of quarters they are to get until they get out and go into their quarters. That is the trouble.

Mr. BOYLAN. The gentleman from New York is correct. Really, I think enlistments should be suspended as an act of humanity until decent and proper quarters are provided.

While I speak from personal observation, I did not proceed to these forts by a military automobile. I proceeded under my own power, and I found for myself the conditions that actually existed.

Knowing the gentleman from Texas [Mr. BLANTON] as I do, and knowing the wonderful streak of humanity that is in him, I know that if he took the time, if he could spare it, and visited these places, as the members of the Military Affairs Committee have done, that he would not say one word against the expenditure of this money, because these soldiers and these officers are our brethren; they are a part and parcel of the citizenship of this country, just as we are, and irrespective of divisions by States or other geographical distinctions we owe to them the duty of at least providing for them with decency, providing them with quarters that will be at least sufficient to maintain their health and, gentlemen, if we do not give the ordinary creature comforts of life to our soldiers, how can we expect anything of them in the hour of stress or necessity? [Applause.]

Last October, at the request of Mr. William Randolph Hearst, a committee was formed in New York to inspect housing conditions at the various Army posts around New York.

This committee consisted of the gentleman from New York [Mr. BLACK]; Mr. Bonham, president of the New York Board of Trade and Transportation; Mr. William Siegrist; Col. John R. Slattery, Engineer Corps, United States Army, retired; Mr. Sundby-Hansen; and myself.

We made a careful investigation of all the posts, and the following is a summary of the facts found by us:

With a few notable exceptions, many officers and enlisted men are forced to live in flimsy, war-time-constructed fire traps, dangerous to health, demoralizing to discipline, and a constant menace to life. These structures were built in a war-time emergency, hastily constructed with little regard to safety or health. They were built for the "duration of the war," which was calculated to be five years. They are now 10 years old, and in various stages of rapid decay, depending on their location and local weather conditions.

Due to insufficient funds for upkeep, these structures are fast going to ruin. This applies with equal force to buildings of a more permanent character. There are leaky roofs, drafty windows, broken doors and stairways, worn-out floors, sagging porches, and sinking foundations that cause great cracks in walls and ceilings, and an utter lack of proper painting.

With adequate funds for repairs and continuous upkeep the more permanent buildings can be saved if promptly attended to. Otherwise they might as well be torn down, because ultimately the repairs, if deterioration is permitted to continue at the present rate, will cost more than the buildings are worth.

The committee regards the war-time barracks buildings as disgraceful to the Army and the Nation. They are unfit for human habitation and should be promptly removed. Their plumbing, sanitary, and heating equipment is broken, rusty, and a menace to health and life. The heating by antiquated sheet-iron stoves is inadequate and wasteful. In these gloomy, outworn, unsightly hovels the men are unable to keep dry in rainy weather or warm during the cold of winter.

Owing to the flimsy construction of the war-time shacks, built of light-weight pine lumber, lined with beaver board or burlap, many not even that, and heated with sheet-iron stoves that are often broken and for that reason alone dangerous,

there is constant fire menace at most of these Army posts. Millions of dollars worth of Government property, expensive military supplies of every description, is stored in tumble-down shacks and fire traps of this character.

In this connection we desire to draw attention to the speech made last summer by Maj. Gen. Charles P. Summerall, Chief of Staff, in which he deplored the present housing conditions in the Army and urged that some prompt remedial action be taken. He was promptly recalled to Washington for an interview with the President.

This committee respectfully calls attention to the fact that the United States Army is the army of the people of this country. If we are to have an Army its officers and men should be cared for properly in the matter of housing and reasonably comfortable living conditions.

Housing shortage was found to be acute at virtually all the posts. War-time constructed shacks, warehouses, and other buildings, which originally were never intended for human occupancy, were found converted into living quarters for officers, noncommissioned officers entitled to separate quarters, and enlisted men.

The serious shortage of proper living quarters we found to be due to the steady concentration since the war of large numbers of soldiers at fewer Army posts. This intolerable condition should be remedied at once by the construction of modern, permanent buildings at all posts where a permanent concentration of troops is taking place.

The richest Nation in the world, in honor to itself and in duty to its military defenders, should not, can not permit the present disgraceful housing conditions in the Army longer to continue. They are demoralizing to discipline, weakening to morals, both among officers and enlisted men, they impair enlistments and virtually terminate reenlistments, and are discreditable to the United States.

We were amazed at the fine spirit shown by officers and their wives and enlisted men living under the most adverse conditions. These conditions were appreciated by all, but in every case their attitude was to make the best of the situation. This is the true Army spirit.

In conclusion, I ask the Members of the House to stand behind the Military Affairs Committee in their effort to provide decent and livable quarters for the splendid officers and men who labor so hard to maintain the high standard of our Military Establishment. [Applause.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. JAMES. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. BLACK].

Mr. BLACK of New York. Mr. Speaker and gentlemen of the House, I do not think there is any man in the House who is a greater friend of the underprivileged than the gentleman from Texas. I am sure that if he had seen the conditions around the Army posts in New York, as the previous speaker [Mr. BOYLAN] and myself have, that he would be heart and soul for this proposition.

Mr. William Randolph Hearst, through one of his editors, asked me a short time ago to form a committee to visit the Army posts for the purpose of inspecting Army housing conditions. On that committee was the gentleman from New York [Mr. BOYLAN], Mr. Bonham, president of the New York Board of Trade and Transportation; Mr. William Siegrist, a social welfare worker in New York; Colonel Slattery; Mr. Sundby-Hansen; and myself. My son also accompanied us. We visited all the posts around New York. We found that the men had been sadly neglected.

The Military Affairs Committee, through Congress, has taken care of the rations of the men in a very fine way, and this bill completes their work in the case of honesty on the part of the Government and humanity.

A man goes into the Army from civil life from a decent job at high wages and decent hours. When he gets into the Army he receives the Army pay and under bad hours he does just the same things he did in civil life. That is because the posts have not been kept up. Men have been compelled to do carpenter work and plumbing work. The men have had so much work to do that the Army is not able to give them proper military training, because so much time had to be taken from drills. At one of the Army posts they had very few formations in the course of the year. They could not get an outfit that could take a machine gun apart. They could take care of the buildings, do the carpentering work, and the plumbing work, but they could not do the military work. That was due to the fact that these things had been neglected by the Government.

This Congress can do no better service to the country than to pass this bill. [Applause.]

Mr. JAMES. Mr. Speaker, I yield myself two minutes and ask unanimous consent to revise and extend my remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. JAMES. Mr. Speaker and gentlemen, it is true that we are spending $900,000 in this bill for Fort Sam Houston. The reason for that is because conditions were so deplorable at Fort Sam Houston that General Summerall had to issue orders to move 2,693 enlisted men to other places where the housing conditions were better.

There is not any politics in this bill or any pork in this bill. The first $3,000,000 in the bill—as a matter of fact, over $3,000,000—will go to places where they have no vote. About $6,000,000 in this bill is to carry out the five-year aircraft Army program, for which we all voted.

The War Department had nothing at all to do with the drafting of this bill. I spent about three months visiting Army posts. When I was in the Army I never rose above a "private in the rear rank," and my sympathies have always been for the private soldier. At every place we visited I paid particular attention to how he lived, how he was housed, and how he was fed.

At Governors Island it will cost about $2,000,000 to house every enlisted man. There is $1,686,000 authorized, including the $300,000 in this bill; $314,000 will complete the housing of the privates. Not a cent for officers' quarters has been authorized up there. In this bill there is also $350,000 which will house every enlisted man at Camp Lewis not already provided for.

Mr. BLANTON. Will the gentleman yield?

Mr. JAMES. Yes.

Mr. BLANTON. The gentleman knows I am one of those who appreciate the splendid, unselfish, and sacrificial work he has done. He knows that because I have talked with him. Now, I want to ask him this: If there should be a consolidation of our War Department and Navy Department into one department of national defense, with an Army Corps, a Naval Corps, an Air Corps, and a Marine Corps, as is contemplated by some of the best thought in this Nation, are we not spending too much on a separate Army Air Corps in this country?

Mr. JAMES. No. We must use every cent provided in this bill if we are to have an Army Air Corps. We can save on future appropriations, but not in this bill.

Mr. BLANTON. But there are duplications.

Mr. JAMES. I agree with the gentleman from Texas on that. With a consolidated national defense we can save millions of dollars, but there is not a single cent in this bill that you can strike out without hurting officers and enlisted men.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. JAMES. Mr. Speaker, I yield myself two additional minutes. The gentleman has called attention to the fact that at this new primary flying field we are spending a good deal of money for housing and officers' quarters. That is true, because when you come to the five-year program most of the money is for flyers, commissioned officers; but at every other place——

Mr. BLACK of Texas. Will the gentleman yield for an observation?

Mr. JAMES. Yes.

Mr. BLACK of Texas. I notice in the item we had to-day for Fort Humphreys, Va., Congress has authorized $660,000, and I dare say it contemplated that that should include the plumbing and the pipes necessary.

Mr. JAMES. No, sir.

Mr. BLACK of Texas. I suppose these authorizations include the plumbing, do they not?

Mr. JAMES. That is true, and I would like to tell the gentleman about that.

Mr. BLACK of Texas. In other words, what I want to stress is that the Army ought to stay within the limits of the authorizations and not come here at future times and ask us to give a further extension of the amount authorized.

Mr. JAMES. Up to a year ago, when the language of the bill was changed at the suggestion of the Director of the Budget himself, the question was whether or not when you say barracks it would include water pipes and sewers, except from the building down to the main sewer or main water pipe. Since that time the Comptroller General has made a ruling to the effect that where there is no sewer or no water pipes the language which we now use in the bill, and which was used for the first time a year ago, would include the main sewers or the main water pipes.

Mr. BLACK of Texas. Then we are to understand that these authorizations we are about to make in this bill cover the total

cost of construction and they will not come back here for additional money.

Mr. JAMES. I never expect to see another one come back here except the one we had here to-day from Camp Humphreys.

Mr. McKEOWN. Will the gentleman yield?

Mr. JAMES. Yes.

Mr. McKEOWN. Does this bill contemplate new barracks in Hawaii at Schofield Barracks?

Mr. JAMES. There is an authorization of $900,000 to take care of the regiment at Schofield Barracks, which is so badly needed.

Mr. McSWAIN. Will the gentleman yield?

Mr. JAMES. Yes.

Mr. McSWAIN. Will the gentleman explain to the House that the committee, with greater definiteness and more jealousy than any Member of the House has manifested here, critically examined the Quartermaster General and his aides that the plans of the architects and the construction of the buildings should insure that this money would be wisely spent?

Mr. JAMES. Yes. I wish the gentlemen of the House would read the hearings and see how closely the Quartermaster General was examined.

I know the gentleman from Texas [Mr. BLANTON], as well as being one of the hardest and most conscientious workers in this House, is also a good friend of the enlisted man on the floor. The gentleman always has been, and I want to say to the gentleman that if he has any idea that this was a departmental bill sent up for the House Military Affairs Committee to vote up or down, he is absolutely wrong. I spent three months and about $1,500 or $2,000 of my own money going around and seeing the conditions. The War Department was not consulted and had nothing to do with the drafting of the bill. It was done by our committee.

Mr. McMILLAN. Will the gentleman yield?

Mr. JAMES. Yes.

Mr. McMILLAN. This bill, as I understand, covers only a partial list of the fortifications and posts over the country.

Mr. JAMES. Yes.

Mr. McMILLAN. Is it the attitude of the gentleman and of the committee that next year these other places that are not now provided for will be taken care of?

Mr. JAMES. It is the policy of the President, the policy of the Director of the Budget, and the policy of our committee, as well as of the Congress, that every enlisted man who is now housed in a deplorable way shall be properly housed.

Mr. McMILLAN. I want to say for the gentleman's benefit that there are other posts having just such experiences and needing the same improvements.

Mr. JAMES. The authorizations carried in this bill will provide additional housing for the following:

Officers	470
Noncommissioned officers	604
Enlisted men	5,855
Patients in hospitals	138

Since the adjournment of the last Congress I have visited Army posts and stations in Panama, Hawaii, on the Pacific coast, along the Mexican border, and through the Southern and Middle Western States. I have personally inspected the conditions at practically every station for which construction is provided in this bill.

Other members of the Military Affairs Committee have also visited many of the Army posts and stations included in this bill. The bill under consideration was prepared by the committee as a result of the information gathered on these visits of personal inspection and observation.

Construction under the present Army housing program began with the passage of the act of March 12, 1926.

During the last Congress there was authorized for Army housing $20,297,000. Of this amount, $13,308,000 has been appropriated, and the remaining $6,989,000 is carried in the War Department appropriation bill, which is now in conference. This $20,297,000 will provide housing for the Army, as follows:

Officers	251
Noncommissioned officers	184
Enlisted men	18,021
Patients in hospitals	804

For the information of the Members of the House I am going to take up in detail each project included in the bill and show not only the amounts authorized for each station and just what construction these amounts will provide, but I am also going to give a brief account of what has already been done at each of these stations since the inauguration of the present Army housing program.

1. ALBROOK FIELD, PANAMA

The $791,000 carried in the bill for this flying field will provide quarters for 106 noncommissioned officers and 54 officers. The last Congress authorized $1,086,000 for this station, which provides quarters for 650 enlisted men, 21 noncommissioned officers, and 40 officers. This is a new flying field which is being built as a part of the five-year Air Corps program. When all of the construction heretofore and herein authorized has been completed, the housing requirements for officers, warrant officers, noncommissioned officers, and enlisted men will have been completely met.

2. FORT KAMEHAMEHA, HAWAIIAN DEPARTMENT

The $35,000 carried in the bill for this station will provide quarters for 65 enlisted men. This station now has permanent quarters for the accommodation of 1,061 enlisted men, 29 noncommissioned officers, and 40 officers. The permanent construction for this station will be completed with another authorization of $196,900 for barracks, 1 set of officers' quarters, and 25 sets of noncommissioned officers' quarters.

3. SAN JUAN, P. R.

The $150,000 carried in the bill for this station will provide quarters for 135 enlisted men and 16 officers. These amounts will complete the barrack requirements for enlisted men at this station, but there will still be needed more money to provide permanent quarters for all the noncommissioned officers and officers on duty there. The permanent quarters now at this station accommodate 1,006 enlisted men, 4 noncommissioned officers, and 6 officers.

4. SCHOFIELD BARRACKS, HAWAII

The $830,000 carried in the bill for this station will provide quarters for 1,150 enlisted men. The last Congress authorized $972,000, which provides quarters for 28 noncommissioned officers and builds a hospital for 400 patients. H. R. 7932, which passed the House a few minutes ago, carried $65,000 for quarters for nurses. This is the largest station in Hawaii and the permanent construction there prior to the inauguration of the present Army housing program accommodated 7,000 enlisted men, 38 noncommissioned officers and 275 officers.

5. WHEELER FIELD, HAWAII

The $1,470,000 carried in the bill for this station will provide quarters for 1,000 enlisted men, 96 noncommissioned officers, and 110 officers. This is the first authorization for this flying field under the present Army housing program and it will complete the permanent barracks requirements at this station. This is a new flying field just being developed under the five-year Air Corps program. It was here Maitland and Hegenberger and the Doyle flyers landed after their flights across the Pacific last summer.

6. ALCATRAZ ISLAND, CALIF.

The $15,000 carried in this bill for this station is to complete the utility building at this post. This station is a branch of the disciplinary barracks and the permanent quarters now there accommodate 350 enlisted men, 11 noncommissioned officers, and 6 officers.

7. FORT BENNING, GA.

The $500,000 carried in the bill for this station will provide quarters for 22 noncommissioned officers and 30 officers. This is the home of the Infantry School, and has been completely developed as a permanent station since the World War. The last Congress authorized $1,870,000 for this station, which provides quarters for 2,485 enlisted men and 24 nurses and a hospital for 132 patients. These amounts complete the hospital and nurses' quarters requirements at this station. Prior to the inauguration of the present Army housing program a small amount of permanent construction had been completed at this station, providing quarters for 10 noncommissioned officers, 71 officers, and the first part of the hospital.

8. FORT BLISS, TEX.

The $150,000 carried in the bill for this station will provide quarters for 25 noncommissioned officers. The last Congress authorized $300,000 for quarters for 50 noncommissioned officers. There was at Fort Bliss prior to the inauguration of the present Army housing program permanent quarters for 1,132 enlisted men, 8 noncommissioned officers, and 110 officers.

9. FORT BRAGG, N. C.

The $500,000 carried in the bill for this station will provide quarters for 232 enlisted men, 17 noncommissioned officers, and 17 officers. This is a Field Artillery training center, which has been developed as a permanent station since the World War. Since the inauguration of the present Army housing program $1,049,000 has been authorized for this station, providing quarters for 1,208 enlisted men, 9 noncommissioned officers, and 6 officers.

10. CHANUTE FIELD, ILLINOIS

The $220,000 carried in the bill for this station will provide quarters for 187 enlisted men and for 6 officers. This is also

one of the new flying fields and the permanent construction authorized in this bill constitutes the first permanent construction for this station.

11. CAMP DEVENS, MASS.

The $250,000 carried in the bill for this station will provide quarters for 16 noncommissioned officers and 12 officers. This is also a new station which has been developed since the World War. The last Congress authorized $1,200,000, which provides quarters for 970 enlisted men and a hospital for 105 patients. The hospital and barrack requirements for this station are now complete. An authorization for $211,000 will complete the requirements at this station for officers' and noncommissioned officers' quarters.

12. FORT HUMPHREYS, VA.

The $180,000 carried in the bill for this station will provide quarters for 30 noncommissioned officers. This is the home of the Engineer School. It is a new station and has been developed since the World War. The last Congress authorized $660,000, which provides quarters for 835 enlisted men. House bill 7944, which passed the House a few minutes ago, authorizes $80,000 additional for the completion of these barracks. Prior to the inauguration of the present Army housing program no permanent quarters existed at this station. There are, however, semipermanent quarters at this station for 67 officers. An authorization for $140,000 will complete the hospital requirements for this station.

13. FORT JAY, N. Y.

The $300,000 carried in the bill for this station will provide quarters for 375 enlisted men. The housing program for barracks for enlisted men at this station contemplates a total of $2,000,000, of which $1,386,000 was authorized by the last Congress. The permanent quarters at this station prior to the inauguration of the present Army housing program provided quarters for 355 enlisted men, 55 noncommissioned officers, and 100 officers. This station is on Governors Island and, in addition to the Infantry garrison, includes also the eastern branch of the disciplinary barracks and the headquarters of the Second Corps Area. An authorization for $175,000 will complete the requirements for officers' quarters for this station.

14. LANGLEY FIELD, VIRGINIA

The $300,000 carried in the bill for this station will provide quarters for 50 noncommissioned officers. This station is the home of the Air Corps Tactical School. This bill provides the first authorization for this station under the present Army housing program. The permanent quarters now at this station accommodate 132 enlisted men, 5 noncommissioned officers, and 87 officers. An authorization for $150,000 will complete the hospital requirements at this station.

15. LETTERMAN GENERAL HOSPITAL

The $120,000 carried in the bill for this station will provide quarters for 18 nurses and a hospital ward for 24 patients. This is the first authorization for this station under the present Army housing program. The permanent quarters now at this station accommodate 6 noncommissioned officers, 9 officers, and 750 patients.

16. FORT LEWIS, WASH.

The $500,000 carried in the bill for this station will provide quarters for 437 enlisted men, 11 noncommissioned officers, 4 officers, and 9 nurses. This is also a new station which has been developed since the World War. The last Congress authorized $1,752,000 for this station, providing quarters for 1,646 enlisted men, 5 noncommissioned officers, 6 officers, and a hospital for 87 patients. This bill will complete the barrack requirements for Fort Lewis, and also the hospital and nurses' requirements for this station. No permanent quarters existed at this station prior to the inauguration of the present Army housing program.

17. MARCH FIELD, CALIFORNIA

The $150,000 carried in the bill for this station will provide quarters for 25 noncommissioned officers. This is also a new flying field which is being developed under the five-year Air Corps program. It is at present the temporary station of one branch of the Primary Flying School. This branch of the Primary Flying School will be transferred to the new field at San Antonio, Tex., when the construction authorized for that field by the act approved February 18, 1928, has been completed. March Field will then become one of the permanent garrisons for a tactical organization of the Air Corps. The last Congress authorized $1,300,000 for March Field, which provides quarters for 688 enlisted men and 75 officers.

18. CAMP M'CLELLAN, ALA.

The $225,000 carried in the bill for this station will provide quarters for 18 officers. This is another station which has been developed since the World War and at which there was no permanent quarters prior to the authorization by the last Congress of $300,000 for quarters for 349 enlisted men.

This completes the requirements for officers' quarters at this station. An authorization for $216,000 will complete the requirements for barracks, noncommissioned officers' quarters, and hospital at this station.

19. FORT M'PHERSON, GA.

The $150,000 carried in the bill for this station will complete the hospital at this station. This is one of the old Army posts, which now includes not only the Infantry garrison but also the headquarters of the Fourth Corps Area. The permanent construction now at this post provides quarters for 714 enlisted men, 8 noncommissioned officers, and 64 officers. An authorization of $120,000 will complete the requirements for noncommissioned officers' quarters at this station.

20. CAMP MEADE, MD.

The name of this station has recently been changed to Fort Leonard Wood in honor of that distinguished officer. The $550,000 carried in the bill will provide quarters for 25 noncommissioned officers, 20 officers, and a hospital ward for 38 patients. The last Congress authorized $1,160,000, which provides quarters for 1,242 enlisted men and started the construction of the hospital.

21. MITCHEL FIELD, NEW YORK

The $400,000 carried in the bill for this station will provide quarters for 350 enlisted men and 20 noncommissioned officers. Since the inauguration of the present Army housing program there has been authorized $287,000, which provides quarters for 355 enlisted men. This amount will complete the barracks requirements for this station. This is also a new flying field and no permanent construction existed there prior to the inauguration of the present Army housing program.

22. FORT MONMOUTH, N. J.

The $350,000 carried in the bill for this station will provide quarters for 28 officers. This station is the home of the Signal School. Since the inauguration of the present Army housing program $742,000 has been authorized for this station, providing quarters for 860 enlisted men, 3 noncommissioned officers, 6 officers, and a hospital for 27 patients. These amounts will complete the barrack and hospital requirements at this station. This is a new station and no permanent construction existed there prior to the inauguration of the present Army housing program.

23. FORT MONROE, VA.

The $268,000 carried in the bill for this station provides for 21 officers' quarters. This station is the home of the Coast Artillery School. The officers' quarters requirements at this station will be completed with an additional authorization of $292,000. This is the first construction authorized for this station under the present Army housing program. Permanent quarters existed at this station prior to the inauguration of the present Army housing program to accommodate 1,234 enlisted men, 81 noncommissioned officers, and 119 officers.

24. FORT RILEY, KANS.

The $250,000 carried in the bill for this station will provide quarters for 21 noncommissioned officers and 10 officers. This station is the home of the Cavalry School. This will complete the noncommissioned officers' quarters requirements at this station. The last Congress authorized $198,000 for quarters to accommodate 16 officers. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated 2,319 enlisted men, 54 noncommissioned officers, and 132 officers.

25. FORT SAM HOUSTON, TEX.

The $900,000 carried in the bill for this station will provide quarters for 1,087 enlisted men and for a post signal communications center building. The last Congress authorized $1,300,000 for this station, providing quarters for 1,591 enlisted men. Permanent quarters, which existed at this station prior to the inauguration of the present Army housing program, accommodate 2,732 enlisted men, 22 noncommissioned officers, and 94 officers. The amendment authorizing the construction of the post signal communications center building has been adopted for the purpose of permitting the telephone, telegraph, and radio service at this large post to keep abreast of the building program which is going on there.

26. NEW PRIMARY FLYING SCHOOL AT SAN ANTONIO, TEX.

The $1,970,950 carried in the bill for this station provides quarters for 225 enlisted men, 90 noncommissioned officers, and 100 officers. The act approved February 18, 1928, by transfer of funds authorized for construction at Brooks and Kelly Fields by the last Congress, and by further authorizations contained in the act of February 18 carries a total authorization for this new primary flying school of $4,849,075, which will provide

quarters for 2,738 enlisted men, 90 noncommissioned officers, 106 officers, a hospital for 76 patients, a magazine—explosive—quartermaster warehouse, garage for Government transportation, quartermaster maintenance building, a fire house, a guardhouse, a post exchange, a theater and gymnasium, an incinerator, railroad spur and tracks, telegraph and telephone lines in conduit, a bakery, a chapel and school, an enlisted men's club, and an officers' mess. This is a new flying field and no permanent or temporary construction existed at this station prior to the inauguration of the present Army housing program.

27. PRESIDIO OF SAN FRANCISCO, CALIF.

The $40,000 carried in the bill for this station provides for the building of a chapel. This is the first authorization for this station under the present Army housing program. The permanent quarters at this station prior to the inauguration of the present Army housing program accommodated 3,030 enlisted men, 137 noncommissioned officers, and 120 officers. Besides the troops garrisoned at the Presidio, the headquarters of the Ninth Corps Area is located there.

28. SCOTT FIELD, ILLINOIS

The $150,000 carried in the bill for this station provides for quarters for 25 officers. The last Congress authorized $100,000 for this station, which provides quarters for 125 enlisted men. H. R. 10146, which passed the House February 20, carries $32,000 additional and completes the barrack requirements at this station. This is a new flying field, and no permanent construction existed there prior to the inauguration of the present Army housing program.

29. SELFRIDGE FIELD, MICHIGAN

The $400,000 carried in the bill for this station provides quarters for 16 noncommissioned officers and 24 officers. The last Congress authorized $872,000 to provide quarters for 725 enlisted men, 30 noncommissioned officers, 6 officers, and a hospital for 15 patients. These amounts will complete the barracks and hospital requirements at this station. This is a new flying field and no permanent construction existed there prior to the inauguration of the present Army housing program.

30. FORT SLOCUM, N. Y.

The $300,000 carried in the bill for this station provides quarters for 9 noncommissioned officers and 300 enlisted men. This is the first authorization for this station under the present Army housing program. The permanent quarters at this station prior to the inauguration of the present Army housing program accommodated 1,389 enlisted men, 9 noncommissioned officers, and 31 officers.

31. FORT WADSWORTH, N. Y.

The $250,000 in the bill for this station provides quarters for 312 enlisted men. The last Congress authorized $285,000 for this station providing barracks for 349 enlisted men. H. R. 11762 provides an additional $40,000 to complete these barracks. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated 400 enlisted men, 18 noncommissioned officers, and 14 officers. An authorization for $142,500 will complete the requirements at this station for officers' and noncommissioned officers' quarters.

32. WALTER REED GENERAL HOSPITAL, WASHINGTON, D. C.

The $300,000 carried in the bill for this station provides quarters for 95 nurses. The act approved February 18, 1928, authorized $310,000 for this station which provides for continuing the work on the new hospital. The new hospital to which this $310,000 is to be applied is now being constructed out of a $2,000,000 authorization made by Congress prior to the inauguration of the present Army housing program. The permanent quarters which existed at this station prior to the inauguration of the present Army housing program accommodated 225 enlisted men, 2 noncommissioned officers, and 17 officers.

In order to provide better quarters for the officers and noncommissioned officers in the Army troops have been moved temporarily within the last 18 months to stations having permanent barracks and quarters, pending the completion of the War Department housing program, as follows: From Fort Sam Houston, Tex., to Fort D. A. Russell, Wyo., and to Fort Logan, Colo., 112 officers, 94 noncommissioned officers, and 2,693 enlisted men; from Fort Lewis, Wash., to Fort Lawton, Wash., 12 officers, 30 noncommissioned officers, and 373 enlisted men; from Fort Lawton, Wash., to Fort Lincoln, N. Dak., 10 officers, 20 noncommissioned officers, and 300 enlisted men; from Boston, Mass., to Fort Rodman, Mass., 1 officer, 1 noncommissioned officer, and 30 enlisted men; from Boston Harbor to Fort Adams, R. I., 10 officers, 4 noncommissioned officers, and 287 enlisted men; from Fort McPherson, Ga., to Fort Oglethorpe, Ga., 8 officers, 3 noncommissioned officers, and 214 enlisted men; from Fort Douglas, Utah, to Fort Rosecrans, Calif., 5 officers, 1 noncommissioned officer, 34 enlisted men; making a total of 158 officers, 153 noncommissioned officers, and 3,931 enlisted men.

In conclusion, I can assure the Members of the House that in working out the needs of the Army in this vitally important matter of housing there has been and is a very splendid spirit of cooperation on the part of the Bureau of the Budget and of the President.

This program will continue over a period of years. There is much work yet to be done. Many more inspections must be made. The problem is one requiring a continuing study.

The committee propose to stay on the job until it is completed, and I am sure I am only giving voice to the feelings of every member of the committee when I say that the attitude of the House in its action on the housing bills we have already brought before you inspires us with a confidence to carry on this work thoroughly, fully, and completely.

The SPEAKER. The time of the gentleman from Michigan has expired; all time has expired.

The question is on the motion of the gentleman from Michigan to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

PAYMENT OF AMOUNTS APPROPRIATED BY LEGISLATURE OF ALASKA FOR ADDITIONAL DUTIES OF TERRITORIAL OFFICERS

Mr. CURRY. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 8284) to authorize the payment of amounts appropriated by the Legislature of Alaska on account of additional duties imposed upon Territorial officers.

The SPEAKER. The gentleman from California moves to suspend the rules and pass the bill H. R. 8284, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That neither section 1855 of the Revised Statutes (U. S. Code 1645, par. 1457) nor any other act of Congress shall be construed to prevent payments for clerk hire, office rent, and other expenses of executive offices of the Territory of Alaska, including additional compensation, not to exceed $2,000 per annum, to the secretary of the Territory, under appropriations heretofore or hereafter made by the Legislature of Alaska for said purposes.

The SPEAKER. Is a second demanded?

Mr. LAGUARDIA. Mr. Speaker, I demand a second.

Mr. CURRY. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. CURRY. Mr. Speaker, from the time of the organization of Alaska as a Territory the Legislature of Alaska has passed acts imposing certain duties on the governor and on the secretary that may be in conflict with section 1855 of the Revised Statutes.

Congress did not impose this system on Alaska. The Territory of Alaska itself, as a matter of economy and efficiency in government, in my opinion in the face of adverse law, did enact legislation that placed these duties on these executive officers, and every two years the legislature has appropriated certain moneys to pay for the performance of these duties, and has also appropriated $2,000 as an addition to the salary of the secretary of the Territory. The Federal Government pays him $3,600 a year and the Territory of Alaska has added $2,000, making $5,600 a year.

In my report to the Congress I have included every item of appropriation for the governor's office and for the treasurer's office by Congress and by the legislature from the first meeting of the legislature in 1913 to date. It must be borne in mind that the legislature at any time it sees fit may stop this cooperation.

For several past legislatures bills have been introduced to create Territorial offices with these duties. They have uniformly been defeated by the legislature as a matter of economy in the conduct of the governmental business of Alaska.

The Territorial legislature will not meet for one year. If this bill is not enacted into law it will probably tie up, to a certain extent, the government of that Territory.

This bill does not fix the law for cooperation, but simply legalizes the acts of the Territory pending a change in the system of government by the legislature. I have every confidence in the Legislature of Alaska.

Of course, it is a large Territory—one-fifth the size of the United States, and at the present time has about twenty to twenty-five thousand inhabitants other than Indians and Eskimos. At the present time about one in five are employed by the Federal Government, the Territorial government, the district government, or municipal government. It is rather expensive to the Federal Government, and the Federal Government

has been willing in the past to cooperate with the Territory in permitting the governor and secretary to perform extra duties at a very minimum cost.

There is some opposition from Alaska, particularly an organization of Indians and half-breeds organized by politicians, and some opposition by job seekers who want places. Nearly every chamber of commerce has approved the bill; the governor has approved of it and asked me to get it passed, if possible. Nearly every city government in Alaska has approved it, and some have opposed it.

Personally I am not interested. It is a matter of efficiency and economy, and a matter of not tying up the government of that Territory until the legislature can meet, and if it so desires to enact other legislation.

Mr. NEWTON. Will the gentleman yield?

Mr. CURRY. I will.

Mr. NEWTON. I received a letter from the attorney general of the Territory some years ago—I do not remember much about the letter, because I just glanced over it and did not know the bill was coming up to-day. The first information was in brief that it would not be wise to pass the measure. I do not recall what the specific objections were but I have sent for the letter.

Mr. CURRY. The attorney general is a fine man. I know him. He is interested with certain politicians in Alaska trying to force Congress and the legislature to enact different legislation than they want. The Territorial treasurer had a temporary injunction by the court issued against him to prevent his paying the money out pending the trial and decision of the court. In my judgment, the court can do nothing but hold that the legislature has exceeded its authority under the Federal statute. We had the same proposition up in Hawaii, but there was no objection on the part of Hawaii, and that has been rectified.

Of course, Hawaii is in a different situation. There are three or four hundred thousand people there. It is one of the wealthiest parts of the United States and pays more income tax than any one of twenty States in the Union. Alaska has been in hard straits recently. Of course, the business of Alaska is mining and fishing and railroading, and in the near future we will have some paper mills up there that may help.

There are only three big mines in Alaska at present paying any dividends. Two of them are dredging mines. Two are owned by British capital. The State of California furnishes more gold than Alaska. Colorado produces more gold than Alaska. The great industry in Alaska is fishing, and yet there is a greater amount of fish taken off the banks of Newfoundland than in Alaska. There is a greater amount of fish taken from Japan than in Alaska, and a greater amount of fish taken around the British Isles and the Mediterranean than in Alaska.

Fur is another industry up there, and not so very much either on account of the legislation. In Louisiana last year there was more value of furs produced than in the Territory of Alaska. We want to develop Alaska if we can. I would like to see certain changes in the law. I would like to see Alaska developed, but I do not want the Government tied up for two years in a matter of local politics by men looking for jobs.

Mr. MORTON D. HULL. I notice on page 2 of the report there is a quotation from an act of Congress authorizing the Legislature of Alaska to pay the expenses involved in necessary additions to duties of officers.

Mr. CURRY. That is the governor—partial duties.

Mr. MORTON D. HULL. All you are adding is the right to pay larger salaries to the secretary of state?

Mr. CURRY. Oh, no; the officers up there have these extra duties to perform. The additional duties placed on the Federal officials relates to banks, issuing of licenses to corporations, vital statistics, fox and reindeer statistics, leasing school lands, and a number of other duties.

Mr. MORTON D. HULL. The act that I called attention to refers to the governor.

Mr. NEWTON. Will the gentleman yield?

Mr. CURRY. I will.

Mr. NEWTON. I have the letter from the attorney general. He seems to be of the opinion that this is setting aside a precedent that has been in effect for many years, not only in Alaska but other Territories, and thinks it very unwise to place Territorial officers under the Federal Government or Federal influence, and that that would be the effect of legislation of this character.

Now, I am expressing the fears and apprehensions as they have been expressed to me.

Mr. CURRY. I agree with the Attorney General within limitations. Alaska is not financially in shape to do what she ought to do, so far as the creation of Territorial officers is concerned. When the Territory of Alaska shall create these officers—and I think that ought to be done—they will pay them and stop the cooperation between the Federal Government and the Territorial government. But the Territorial legislature has refused to do it. It did so at the last session and the one before it. There will not be another session of the legislature until next year. I hope at that time they will change this system. But in the meantime if the courts should hold that the Territory of Alaska exceeded its authority in enacting these laws, it would tie up the Government of Alaska for two years, and I do not think that is what Congress wants to do. When the time comes I think the change should be made.

Mr. COOPER of Wisconsin. Mr. Speaker, will the gentleman permit an interruption?

Mr. CURRY. Yes.

Mr. COOPER of Wisconsin. Is there anything to prevent Congress at this session from passing additional compensation to the secretary up there?

Mr. CURRY. Congress can not pass a law imposing Territorial duties. The duties imposed upon these executive officers are Territorial and not Federal. Congress can not rectify that situation.

Mr. COOPER of Wisconsin. As I understand it, the secretary is a Federal officer?

Mr. CURRY. Yes.

Mr. COOPER of Wisconsin. Can not the Congress of the United States fix an adequate salary for an officer?

Mr. CURRY. They can fix the salary, but his extra salary is on account of his extra duties, imposed by the legislature, and Congress can not enact legislation placing these duties on the secretary, in my judgment.

Mr. COOPER of Wisconsin. That does not meet the point raised by the Acting Secretary, Mr. Finney, of the Interior Department. He says the suit was based upon the ground that the Territorial appropriations were void. The court sustained this contention as to certain items, including the one for additional compensation to the secretary of the Territory.

Mr. CURRY. Yes; and the suit was dismissed pendente lite at the request of the one who brought the suit. Another suit has been brought. The court, in my opinion, can not do anything but decide that the legislature has exceeded its authority, and that the money can not be paid and the Federal executive officers perform these Territorial duties unless this bill is passed.

Mr. COOPER of Wisconsin. Does the gentleman think it would be establishing a good precedent for Congress to enact a law which would permit an act that was void in the law when originally done to continue in the future?

Mr. CURRY. It would not continue in the future. It is simply a controversion of section 1855 of the Federal statutes. I do not think that statute should be repealed, but I think this local situation should be met for the next two years.

Mr. CRAMTON. I understand the decision of the court was that the expenditure authorized by the Legislature of Alaska could not be made because it was withheld by a provision of the Federal statute.

Mr. CURRY. Yes; under section 1855 of the Revised Statutes and the organic act.

Mr. CRAMTON. And because that expenditure, controlled by the Legislature of Alaska, is forbidden by Federal statute, this bill proposes to repeal that provision, so far as these particular expenditures go. In other words, the Federal Government would get out of the way of the Legislature of Alaska in doing what they want to do.

Mr. CURRY. I think that is wrong.

Mr. HOCH. Mr. Speaker, will the gentleman yield?

Mr. CURRY. Yes.

Mr. HOCH. If the effect of it is to repeal this Federal statute, why not repeal it directly instead of saying it shall not be construed so-and-so?

Mr. CURRY. That is not the effect of it.

Mr. HOCH. What will be the effect?

Mr. CURRY. The effect of it will only be until the legislature changes its law.

Mr. HOCH. Instead of repealing the statute you provide that a court shall not construe what the law says.

Mr. CURRY. I do not think the legislature of an organized Territory should assume any more legislative authority than is warranted by the organic act. To repeal that statute would permit the Federal Government to go in there just as if it was not an organized Territory.

Mr. HOCH. If this repeals it to that extent, then that is what it would be doing.

Mr. CURRY. No. It is only to meet this situation.

Mr. HOCH. We should change the language and provide the exception in the law, instead of simply saying that the statute

shall not be construed so-and-so. We should provide that the statute should read so-and-so.

Mr. NEWTON. I understand that section 1855 applies to all Territories. The exception is the Territory of Alaska.

Mr. LAGUARDIA. I want to call the attention of the House to this bill, and just ask your attention long enough to listen to the one man who knows the conditions, and that is the Delegate from Alaska. I think you will give him an attentive hearing. He knows what he is talking about. Just imagine a bill introduced into Congress by some one outside of your State to require your State to pay additional salary to a collector of customs or a postmaster.

Thus far the gentleman from Alaska has not had an opportunity to fight this measure. Not a single resident of Alaska has appeared before the committee. This is a bureau bill. The gentleman from California has indicated to you that the politicians of Alaska are opposed to this bill. That is not so. Both the Republican and Democratic parties in their platforms have inserted a plank demanding a complete separation of the Territorial government from the Federal Government. The people of Alaska must be protected by this Congress by reason of the fact that the Territory has a Representative in this House who has a voice, but not a vote. It was for that reason, Mr. Speaker, that I demanded a second, and I now yield 15 minutes to the gentleman from Alaska [Mr. SUTHERLAND.

Mr. SUTHERLAND. Mr. Speaker and gentlemen of the House, I had hoped that this bill might have been considered on Calendar Wednesday, on Territories day, when opportunity would have been afforded for amendment. The suspension rule precludes any motion for amendment being offered. Therefore, I must appeal to you to defeat this measure.

In 1913, when the Territory was first organized, they imposed certain duties on the Federal officials and compensated them with certain salaries for performing those duties. They knew it was illegal under the organic act, but they knew that at the next session of the legislature that could be corrected. At the second session the attorney general of the Territory ruled that the payment of salaries of Federal officials from the revenues of the Territory was illegal.

Again in 1917 and again in 1919 they were advised to the same effect. In 1921 the Solicitor for the Department of the Interior gave an opinion to the governor of the Territory that that whole procedure was illegal and they were advised by the governor of the Territory at that time, a Democratic governor just retiring, that that system should cease, that it was impractical and not in harmony with the theory of good government.

The first appropriation for one office in 1913 was $6,575. It continued increasing until 1927, when the appropriation was $21,700, with no great corresponding increase in the amount of business transacted by the office. They were simply increasing the amount annually to be paid to clerks and to the secretary of the Territory. Then citizens of Alaska came into court and asked the court to enjoin the Territorial treasurer from the payment of these salaries. The court held that the payment of the salary to the secretary of the Territory was illegal under the organic act and under statutory provisions. The suit was withdrawn without prejudice after the opinion of the judge of the Federal court was rendered, but the Secretary of the Treasury, knowing that it was illegal and construed to be illegal by the court, has withheld that salary and has not paid it, as well as certain other salaries.

This bill could have been amended to pay the salaries. No one in Alaska or anywhere else objects to the payment of this money that has been authorized by the legislature, but they do object to the repeal of portions of our organic act.

The bill provides that section 1855 shall not apply, which is a virtual repeal. I am not going to attempt to argue these technical terms, but it is considered by lawyers in Alaska as a repeal of our organic act. The portion that it repeals is section 1855 of the Revised Statutes, which reads:

> No law of any Territorial legislature shall be made or enforced by which the governor or secretary of the Territory, or the members or officers of any Territorial legislature, are paid any compensation other than that provided by the laws of the United States.

That was written into the statutes in 1873 by James A. Garfield, a Member of Congress from Ohio, and it has stood to govern this matter in the Territories ever since that time. But the repeal goes further than that and repeals another act, and the other act is section 11 of the organic act of the Territory, wherein it is provided that:

> No person holding a commission or appointment under the United States shall be a member of the legislature, or shall hold any office under the government of said Territory.

That is the section it repeals, section 11 of our organic act, and that section was written into the organic act of the Territory of Wisconsin in 1843. So it has stood for almost a century and, in fact, has been embodied in the constitutions of many of the States of the Union. The latest, and presumably the most approved, constitution to-day is that of the State of New York, and the separation of State and Federal offices and municipal officers is made clear and explicit in the constitution of the State of New York.

The attorney general of the Territory, who has been quoted here, has expressed himself in this matter, and I want you to let me read briefly what he says on the subject:

> As early as 1873 Congress, thinking that these unlawful expenditures—

Of which we are speaking now—

> might stop if an act was passed which in express and unequivocal terms denounced this perversion, a law was passed which reads as follows:

That is the Garfield Act and that law is still in force.

> Is there any doubt as to what this means? Certainly not. Yet our legislature has insisted upon disregarding every provision of it. Why? Simply because so many of them are ready and willing to disregard any law and to throw their honor and self-respect to the winds in order to gain, as they hope, the smiles of the Federal and social set at Juneau.
>
> Even as early as 1843 Congress enacted a statute which reads as follows:
>
> "No legislative assembly of a Territory shall in any instance or under any pretext exceed the amount appropriated by Congress for its annual expenses."

That is in another statute that will be repealed by this act.

> The language employed shows that Congress was irritated at the sycophancy of Territorial legislators. And in those older days the Federal officials in the Territories were not nearly as important or as numerous as in Alaska, where about one-third of the population live off the Federal pay roll.
>
> It was out of an abundance of historic experience, guided by common sense, that Congress wrote into the organic act of Alaska what is known as section 11.

Which I have quoted to you.

> These provisions should be enforced not only in letter but in spirit. The purposes of section 11 are perfectly plain. The main object was to keep the Federal and Territorial functions separate and apart and to have them discharged by separate and distinct officers. The last clause provides that no one "holding a commission or appointment under the United States shall be a member of the legislature or hold any office under the government of said Territory." This is neither more nor less than an order upon the Territory to organize its own government and provide its own officers to execute its laws, and it is a denunciation of the present system of bestowing Territorial functions upon the Federal officials.

Now, gentlemen of the House, in closing I want to say that this organic act is our constitution in Alaska. It bears the same relation to the Territorial Legislature of Alaska that the Constitution of the United States bears to Congress, and an even better analogy is that of the State constitutions, which are held to be stable instruments. They are not to be amended or changed or altered at the whim or caprice of any individual or any minority organizations, for this request comes from very inconsequential bureaucrats in Alaska and from no other source. Both parties in the coming campaign have declared in unmistakable terms against this practice in violation of our organic act. So I am appealing to you to recognize our constitution as being just as sacred as the constitution of any of your States and to refuse this repeal. To repeal this provision is simply the entering wedge on the part of bureaucracy in Alaska, where to-day it virtually dominates the Territory—this is an entering wedge to the destruction of local self-government and the establishment of a superbureaucracy in that Territory. [Applause.]

Mr. NEWTON. Will the gentleman yield?

Mr. SUTHERLAND. Yes.

Mr. NEWTON. I want to inquire as to the gentleman's idea of what would be the effect upon the Territory if the legislature did not act for two years.

Mr. SUTHERLAND. But the legislature meets in a year. Nobody is suffering for this money.

Mr. NEWTON. I understood the gentleman from California to say two years.

Mr. SUTHERLAND. No; the legislature will be in session a year from to-day. There is nobody suffering for this money. It will be paid in good time.

Mr. ENGLEBRIGHT. Will the gentleman yield?

Mr. SUTHERLAND. Yes.

Mr. ENGLEBRIGHT. Why has not the Legislature of Alaska taken this matter under consideration before?

Mr. SUTHERLAND. It has taken it under consideration; but the gentleman from California explained that they took no action, and it was for the reason that the bureaus there wanted to hold and administer the Territorial government.

Mr. ENGLEBRIGHT. Does the gentleman mean to infer that the Federal Government is reflecting itself into the Legislature of Alaska?

Mr. SUTHERLAND. The Federal Government, through its bureaus, is administering the Territorial affairs of Alaska to-day.

Mr. ENGLEBRIGHT. Through the legislature?

Mr. SUTHERLAND. The legislature has given consent.

Mr. ENGLEBRIGHT. Then does the gentleman infer that he can not depend upon his legislature in Alaska?

Mr. SUTHERLAND. I think we can depend on them to alter it now, because the issue has become so strong that they are going to change it.

Mr. COOPER of Wisconsin. Will the gentleman yield for a question?

Mr. SUTHERLAND. Yes.

Mr. COOPER of Wisconsin. Does the gentleman think that a bill of this importance should be brought up in this way on unanimous-consent day, when the offering of amendments is prevented?

Mr. SUTHERLAND. I knew nothing about this suspension until we were almost up to the bill under unanimous consent and then a Member informed me the bill was under consideration by suspension of the rules. I wanted this bill to come up on the Committee on the Territories day when I would have an opportunity to amend it, and I can offer an amendment that will pay this money authorized by the legislature and still not repeal our organic law. That is all I am asking for.

Mr. CURRY. Will the gentleman yield?

Mr. SUTHERLAND. Yes.

Mr. CURRY. I will answer the gentleman from Wisconsin. The Committee on the Territories will not be called during this session of Congress. The Committee on the Territories was not called during the last Congress, during either one of its sessions. It is impossible to have this bill come up on the call of committees because the committee will not be reached. That is the only reason I put it on the Consent Calendar and is the only reason I asked for a suspension of the rules. It is the only way to meet this situation. The fiscal year in Alaska starts on the 1st of April, and if this bill is not enacted by the 1st of April it will tie up the government, and the gentleman from Alaska knows it.

Mr. SUTHERLAND. I simply want to say in closing——

Mr. SINNOTT. Will the gentleman yield?

Mr. SUTHERLAND. Yes.

Mr. SINNOTT. I want to know whether the gentleman objects to the appropriations heretofore made that this bill will approve or ratify.

Mr. SUTHERLAND. Oh, no. There is no objection to the appropriations at all. The whole objection is to the system they are setting up.

Mr. LAGUARDIA. But the gentleman is opposed to that in principle?

Mr. SUTHERLAND. Yes; in principle, but I do not want to deprive those men of the money that has been authorized, and Congress could authorize that without this repeal of the organic act.

Mr. CURRY. Will the gentleman yield?

Mr. SUTHERLAND. I yield; yes.

Mr. CURRY. The gentleman knows that the suit in Alaska was to prevent the Treasury from paying this money.

Mr. SUTHERLAND. Yes.

Mr. CURRY. How does the gentleman square his two statements?

Mr. SUTHERLAND. You can authorize the payment of the money without repealing the act. You can write a simple bill to authorize the payment of the money, but there is no occasion for repealing acts that have stood for almost a century.

Mr. JOHNSON of Washington. If it is wrong from a local self-government standpoint to do that, why should we authorize it?

Mr. SUTHERLAND. That is true; and that is the position that the gentleman from New York [Mr. LAGUARDIA] has taken; but I realize my position here. I have to compromise when I ought not to compromise. I have to make compromises when a voting Member here does not have to make a compromise, and I have to beg the chairmen of committees, such as the chairman of the Committee on the Territories, for some little favor, and so I am not in a position to ask for what I think ought to be put in.

Mr. CURRY. The gentleman knows that so far as the Committee on the Territories is concerned he has never had to do that in his life. That is an absolute untruth.

Mr. SUTHERLAND. Mr. Speaker, I will not reply to that. I will just let it stand. The House may judge.

Mr. STEVENSON. Will the gentleman yield?

Mr. SUTHERLAND. Yes.

Mr. STEVENSON. As I understand the gentleman, he is perfectly willing to pay these officers for the services rendered although the service has been rendered in violation of the organic act.

Mr. SUTHERLAND. Yes; in violation of the law.

Mr. STEVENSON. But he does not want to make it possible for that system to continue.

Mr. SUTHERLAND. And this bill authorizes a continuation of it.

Mr. STEVENSON. When the legislature meets, however, it will have to separate this business. If it goes ahead and authorizes it again, we will be in the same fix. The gentleman's proposition is to take this business away from the Federal officers and create proper officers to conduct it.

Mr. SUTHERLAND. Yes; as Congress intended they should.

Mr. LAGUARDIA. Mr. Speaker, I will take no further time, because I do not want to disturb the splendid argument made by the Delegate from Alaska. I do ask the Members to stand back of him and give him the protection he has begged for. [Applause.] I ask for a vote.

The SPEAKER. The question is on the motion of the gentleman from California [Mr. CURRY] to suspend the rules and pass the bill.

The question was taken; and on a division (demanded by Mr. CURRY) there were—ayes 12, noes 130.

So the motion to suspend the rules and pass the bill was rejected.

AIR MAIL

Mr. KELLY. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 8337) to amend the air mail act of February 2, 1925, as amended by the act of June 3, 1926, with amendments.

The SPEAKER. The gentleman from Pennsylvania moves to suspend the rules and pass the bill H. R. 8337, as amended, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 3 of the air mail act of February 2, 1925 (U. S. Code, title 39, sec. 463), as amended by the act of June 3, 1926, is hereby amended to read as follows:

"SEC. 3. That the rates of postage on air mail shall not be less than 5 cents for each ounce or fraction thereof."

SEC. 2. That after section 5 of said act (U. S. Code, title 39, sec. 465) a new section shall be added as follows:

"SEC. 6. That the Postmaster General may by negotiation with an air-mail contractor who has satisfactorily operated under the authority of this act for a period of two years or more, arrange, with the consent of the surety for the contractor and the continuation of the obligation of the surety during the existence or life of the certificate provided for hereinafter, for the surrender of the contract and the substitution therefor of an air-mail-route certificate, which shall be issued by the Postmaster General in the name of such air-mail contractor, and which shall provide that the holder shall have the right of carriage of air mail over the route set out in the certificate so long as he complies with such rules, regulations, and orders as shall from time to time be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting air-mail operation to the advances in the art of flying: *Provided,* That such certificate shall be for a period not exceeding 10 years from the beginning of carrying mail under the contract. Said certificate may be canceled at any time for willful neglect on the part of the holder to carry out such rules, regulations, or orders; notice of such intended cancellation to be given in writing by the Postmaster general and 60 days provided to the holder in which to answer such written notice of the Postmaster General. The rate of compensation to the holder of such an air-mail-route certificate shall be determined by periodical negotiation between the certificate holder and the Postmaster General, but shall never exceed the rate of compensation provided for in the original contract of the air-mail-route certificate holder."

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

FEDERAL RADIO COMMISSION

Mr. SNELL. Mr. Speaker, I present a privileged report from the Committee on Rules.

The Clerk read as follows:

Resolution 132

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 2317, continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed three hours, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall arise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

AMENDMENT TO THE CONSTITUTION

Mr. SNELL. Mr. Speaker, I present another report from the Committee on Rules.

The Clerk read as follows:

Resolution 133

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. J. Res. 47, proposing certain amendments to the Constitution. That after general debate, which shall be confined to the Senate joint resolution and shall continue not to exceed five hours, to be equally divided and controlled by those favoring and opposing the Senate joint resolution, the Senate joint resolution shall be read for amendment under the five-minute rule. For the purpose of amendment the House committee substitute shall be considered as an original bill. At the conclusion of the reading of the Senate joint resolution for amendment the committee shall rise and report the Senate joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the Senate joint resolution and the amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. SNELL. Mr. Speaker, I desire to make a short statement in regard to this last resolution just presented. The Senate passed Senate Joint Resolution 47, providing for an amendment to the Constitution. It came over here, and our Committee on Election of President and Vice President struck out all after the enacting clause and inserted a committee amendment and reported it to the House. Later our Committee on Election of President and Vice President reported a House concurrent resolution which embodied the same matter that was in their amendment to the original Senate joint resolution. They asked us for a rule on Concurrent Resolution 18. That was granted by the Committee on Rules. Later on, after investigation, we found that all constitutional amendments were passed by means of a House or Senate joint resolution.

Referring to the Manual, section 223, it provides as follows:

Amendments to the Constitution are proposed in the form of joint resolutions which have their several readings and are enrolled and signed by the presiding officers of the two Houses, but are not presented to the President for his approval.

Also in sections 389 and 390 in regard to concurrent resolutions it specially excepts constitutional amendments and says that they are always passed by House and Senate joint resolutions. That is the reason for presenting the resolution to-day to take up the Senate Joint Resolution 47 instead of House Concurrent Resolution 18. It is expected that this rule just presented will be called up to-morrow immediately after the disposition of matters on the Speaker's table.

Mr. GARRETT of Tennessee. I presume at some time the gentleman will have the other resolution laid on the table?

Mr. SNELL. Yes. I was going to do that to-morrow, but I think it just as well to do it now. I ask unanimous consent that House Concurrent Resolution 112 lie on the table.

The SPEAKER. The gentleman asks unanimous consent that House Concurrent Resolution 112 be laid on the table. Is there objection?

There was no objection.

ORDER OF BUSINESS

Mr. DENISON. Mr. Speaker, we have not concluded the Consent Calendar. I ask unanimous consent that on Wednesday, if the committee that has the call concludes its business early in the day, that the bills on the Consent Calendar may be called.

Mr. SNELL. I think the gentleman's own committee, the Committee on Interstate and Foreign Commerce, has the call.

Mr. DENISON. Yes; but if the committee does not have business enough to take the entire day, I think there will be time to complete the Consent Calendar.

Mr. HASTINGS. Commencing where we left off to-day?
